## HIGHLIGHTS

- ◆ *From 1988 to 1998, the number of burglary arrests declined 27.1 percent from 76,270 in 1988 to 55,595 in 1998. (Table 1 and 8)*
  
  - ◆ *The burglary arrest rate per 100,000 total population declined 34 percent from 271.8 in 1988 to 166.0 in 1998. (Tables 1,3,5 & 7)*
  
  - ◆ *From 1997 to 1998, burglary arrests declined 6.0 percent, from 59,148 to 55,595. (Table 1)*
  
  - ◆ *From 1988 to 1998, the number of males arrested for burglary declined from 65,266 in 1988 to 44,039 in 1998. In contrast, the number of females arrested increased from 11,004 in 1988 to 11,556 in 1998. (Table 2)*
-

- ◆ *More men were arrested than women for burglary each year (79.2 percent of the total in 1998); however, the percentage of women arrested increased from 14.4 percent of the total in 1988 to 20.8 percent of the total in 1998. (Table 2)*
  
  - ◆ *From 1988 to 1998, the burglary arrest rate declined for all four race/ethnic groups: White, Hispanic, Black and Other. Blacks declined the most (42.7%), from 872.2 arrests per 100,000 in 1988 to 499.4 arrests per 100,000 in 1998. (Table 5)*
  
  - ◆ *When age groups were combined, the data show that the percentage of 18-39 year olds arrested for burglary decreased from 65.3 percent of the total in 1988 to 54.6 in 1998, while the percentage of juveniles plus individuals over 40 arrested for burglary increased from 34.6 percent of the total in 1988 to 45.4 in 1998. (Table 7 and Figure 4)*

## Report on Arrests for Burglary in California, 1998

### Introduction

This report contains information about persons arrested for the crime of burglary. The purpose of this report is to provide policy makers and the public with accurate and complete criminal statistical information by organizing and displaying 1998 arrest data and multi-year arrest data for burglary. Statewide totals of burglary arrests are displayed by gender, race, and age. Data by county and by cities with population over 100,000 are also available in the Appendices.

The number of reported burglary crimes declined 34 percent from 407,555 in 1988 to 268,847 in 1998.<sup>1</sup> The number of burglary arrests and the rate per 100,000 also declined steadily over the last 10 years (see Table 1). The reasons for the decline are not readily known and this report does not speculate on the causal factors that may be responsible because there is no way to definitively measure the impact of those factors. However, it is suspected that the underlying factors include, but are not limited to demographics, increased law enforcement personnel, crime prevention techniques such as neighborhood watch programs and burglar alarm systems, community oriented policing and stricter penalties such as the "three-strikes" law.

Data concerning the number and nature of burglary arrests in the state of California are collected through the Uniform Crime Reporting (UCR) Program. Local city police departments, county sheriff offices, the California Highway Patrol, and other law enforcement agencies report on a monthly basis.

---

### ARRESTS FOR BURGLARY

Arrests for violations of the following California Penal Code Sections are the basis for this report:

- Burglary - § 459, 460, and 461  
*Burglary is defined as the unlawful entry of a structure to commit a felony or a theft.*
- Looting during emergency - § 463 (a)
- Burglary with acetylene torch, etc., or explosives - § 464
- Attempted burglary - § 664/459, and 664/460

---

The arrest totals shown should not be interpreted as the actual number of individuals arrested for burglary offenses because it is possible that some individuals may have been arrested for burglary on more than one occasion.

<sup>1</sup> Crime data are available from the Department of Justice, Criminal Justice Statistics Center.

There were 76,270 burglary arrests in 1988. With the exception of 1989 and 1992, years in which burglary arrests peaked, arrests declined to 55,595 in 1998. The rate of arrests decreased from 271.8 per 100,000 total population in 1988 to 166.0 per 100,000 total population in 1998. (Table 1 & Figure 1)

**TABLE 1**

 Number of Arrests by Year

## Burglary Arrests by Gender

Approximately 83 percent of the burglary arrests during the 10-year period of 1988-1998 were arrests of males. However, in the 10-year period, arrests of males for burglary, as a percent of the total, declined, while arrests of females for burglary, as a percent of the total, increased. In 1988 women accounted for 14.4 percent of the arrests, which increased to 20.8 percent in 1998. (Table 2)

The male arrest rate declined 43.1 percent from 460.5 per 100,000 in 1988 to 262.0 per 100,000 in 1998. However, the female arrest rate declined only 10.6 percent from 77.4 per 100,000 in 1988 to 69.2 per 100,000 in 1998. (Table 3 & Figure 2)

TABLE 2

<sup>a</sup> 1989 and 1991 data do not include arrests for San Bernardino PD.

<sup>b</sup> 1995 data does not include arrests for Oakland PD or March-December arrests for Bakersfield PD.

Burglary Arrests by Gender (continued)

TABLE 3  
**BURGLARY ARRESTS, 1988 & 1998**  
*Number of Arrests and Rate per 100,000 Population by Gender*

Gender	1988				1998				Percent change in rate 1988-1998
	Percent of population	Number of arrests	Percent of total arrests	Rate	Percent of population	Number of arrests	Percent of total arrests	Rate	
Total	100.0	76,270	100.0	271.8	100.0	55,595	100.0	166.0	-38.9
Male	49.9	65,266	85.6	460.5	50.2	44,039	79.2	262.0	-43.1
Female	50.1	11,004	14.4	77.4	49.8	11,556	20.8	69.2	-10.6

Notes: Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance. Rates were calculated by dividing the number of arrests by the respective population, then multiplied by 100,000. Percentages may not add to 100.0 due to independent rounding.

FIGURE 2  
**BURGLARY ARRESTS, 1988 & 1998**  
 Rate per 100,000 Population by Gender

## Burglary Arrests by Race

From 1988 to 1998 the rate of arrest per 100,000 total population declined for all four of the race/ethnic groups: White, Hispanic, Black and Other. However, while the number of arrests declined for Whites, Blacks and Hispanics, the number of arrests of Others increased from 3,758 in 1988 to 4,243 in 1998. (Tables 4 & 5)

As a percentage of the total arrests, the race/ethnic groups of White and Black decreased while the race/ethnic groups of Hispanic and Other increased. These changes are similar to the shifts in population among the race/ethnic groups. (Table 5 & Figure 3)

**TABLE 4**  
**BURGLARY ARRESTS, 1988-1998**  
*Number and Percent of Arrests by Race/Ethnic Group*

Year	White		Hispanic		Black		Other		Total

Other	9.4	3,758	4.9	140.3	11.7	4,243	7.6	108.3	-22.8

Notes: Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance. Rates were calculated by dividing the number of arrests by the respective population, then multiplied by 100,000. Percentages may not add to 100.0 due to independent rounding.

**FIGURE 3**  
**BURGLARY ARRESTS, 1988 & 1998**  
 Percent of Total Arrests by Race/Ethnic Group

Burglary Arrests by Age

From 1988 to 1998 the total number of burglary arrests for adults and juveniles declined. (Table 6)

Adults made up 64.2 percent of the burglary arrests in 1998, a decline from 70.9 percent of the total in 1988. Juveniles, defined as those persons under the age of 18, made up 35.8 percent of the total number of arrests in 1998, an increase from 29.1 percent in 1988.

From 1988 to 1998 the numbers of arrests and rates per 100,000 population decreased for juveniles and 18-39 year olds. The rates of arrests per 100,000 total population decreased for those 40 years and older, however, the total number of arrests increased from 1988 to 1998. (Table 7)

As a percentage of the total, arrests of juveniles and individuals 40 and over increased, which is a reflection of the increase in the percentage of the population of those age groups.

TABLE 6

Notes: Rates are based on annual population estimates provided by the Demographic Research Unit, California Department of Finance. Rates were calculated by dividing the number of arrests by the respective population, then multiplied by 100,000. Percentages may not add to 100.0 due to independent rounding.

FIGURE 4  
**BURGLARY ARRESTS, 1988 & 1998**  
 Percent of Total Arrests by Age Group

**Burglary Arrests by Age** (continued)

Over the 10-year period (1988-1998) arrests for burglary declined in 16 of 22 age groups shown in Table 8 (Juvenile-39 year olds). There was a 10.4 percent decrease in the number of juveniles arrested for burglary and a 34.0 percent decrease in the number of adults arrested, however, the number of arrests increased for all age groups above 40.
