INTRODUCTION

Providing information, maps, funding and technical assistance to local governments, consultants, Resource Conservation Districts and non-profit organizations statewide with the goal of conserving the state's agricultural and natural resources.

--Division of Land Resource Protection's Mission Statement

The California Land Conservation (Williamson) Act

The California Land Conservation Act, better known as the Williamson Act, has been the state's premier agricultural land protection program since its enactment in 1965. The Williamson Act preserves agricultural and open space lands through property tax incentives and voluntary restrictive use contracts. Private landowners voluntarily restrict their land to agricultural and compatible open-space uses under minimum 10-year rolling term contracts with local governments. In return, restricted parcels are assessed for property tax purposes at a rate consistent with their actual use, rather than potential market value. In August of 1998, the Legislature enhanced the Williamson Act with the Farmland Security Zone (FSZ) provisions. The FSZ provisions offer landowners greater property tax reduction in return for a minimum rolling contract term of 20 years. For more information about the Williamson Act please refer to Appendix B.

About This Report

This biennial report is a compilation of statewide enrollment data for the Williamson Act. The focus of this report is Williamson Act enrollment as of January 1, 2008 and January 1, 2009. However, enrollment data from prior years are included to provide context in certain discussions. Nearly all of the enrollment data were gathered from applications for payment under the Open Space Subvention Act. The applications are submitted annually to the Department of Conservation (Department) by participating counties and cities. Several cities that administer Williamson Act contracts do not submit applications. As such, the total amount of contracted land may be negligibly understated in this report. Appendix C contains the data tables used to generate the charts and graphics featured in this report.

A small amount of non-Williamson Act, enforceably restricted land is included in this report. Except for Appendix C, this "Other Enforceable Restriction" is mingled with the Williamson Act totals and accounts for less than one percent of the total reported acreage.

This report is mandated by State law and is primarily a report to the Legislature. However, this report is also made available to other audiences, including local governments, researchers, and interested statewide organizations. All audiences may find this report useful as a tool for educational purposes, for anticipating farmland conversion trends, for tracking land use trends, for facilitating program comparisons among participating local governments, and for demonstrating the Williamson Act's relative effectiveness.

I. ENROLLMENT SNAPSHOT: JANUARY 1, 2009

As of January 1, 2009, approximately 15 million reported acres were enrolled under the Williamson Act statewide. This represents approximately half of California's farmland total of about 30 million acres, and nearly one-third of the State's privately owned land.

Of California's 58 counties, 53 have adopted the Williamson Act program (Alpine County has adopted the program, but has yet to execute a contract). Del Norte, San Francisco, Inyo, and Yuba have not adopted the Williamson Act program as of the snapshot dates.

The Farmland Security Zone (FSZ) program has been adopted by 25 counties, although not all of the counties have executed contracts. Twenty-one counties reported a total of 863,530 acres of land under FSZ contract, which constituted approximately 6 percent of the statewide Williamson Act enrollment.

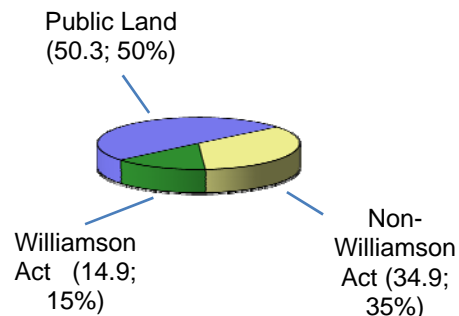

On January 1, 2009, there were 457,734 acres of contracted land at some stage of the nonrenewal process. The cumulative nonrenewal acreage constituted 3.2 percent of Statewide Williamson Act enrollment.

As of January 1, 2009, participating local governments claimed a total of \$35,107,597 in Open Space Subvention Act payments for the partial replacement of property tax revenue losses associated with contract enrollment. However, pursuant to AB X4 1(Chapter 1, Statutes of 2009), the actual entitlement amount to be paid to participating local governments has been limited to a total of \$1,000.

The recent severe economic downturn has had disastrous consequences to State and local budgets. As a result, subvention payments have been greatly reduced and many of the local governments that participate in the Williamson Act have had to greatly reduce their planning staff (which traditionally has administered the Act). Because of these recent events, the following regions had counties (in parentheses) that did not report enrollment figures for fiscal year 2009-10: North Coast & Mountain (Mendocino, Modoc, and Trinity); South Coast & Desert (Riverside and San Diego); Bay & Central Coast (San Mateo and Santa Cruz); San Joaquin Valley (Stanislaus); and Foothill & Sierra (Tuolumne).

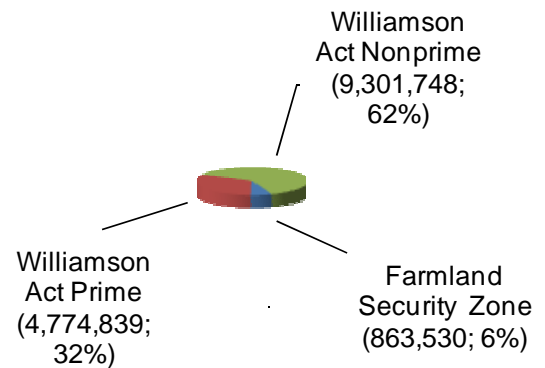

The above counties that did not report enrollment figures for fiscal year 2009-10, reported the following total reported enrollment acreages in fiscal year 2008-09 (in parentheses): Mendocino (498,495), Modoc (127,170), Trinity (22,035), Riverside (59,307), San Diego (61,873), San Mateo (n/a), Santa Cruz (17,071), Stanislaus (690,067), and Tuolumne (120,197). Please see Appendix C: "Total Reported Enrollment (2008)" for more details.

I. WILLIAMSON ACT REGIONS

II. ENROLLMENT CHANGE SUMMARIES AND TRENDS

Net Acreage Increases and Decreases

Net Enrollment Increase

Sonoma and Lassen had the largest enrollment increases in 2008 and 2009, respectively. These two counties were not ranked in the Top 10 the previous year.

Net Enrollment Decrease

Lassen and Stanislaus had the largest enrollment decreases in 2008 and 2009, respectively. Statewide, the amount of land enrolled in the Williamson Act program has been declining since 2001. Between 2001 and 2009, new enrollment acres have averaged a yearly increase of 146,568 acres per year.

Please note that the following regions had counties (in parentheses) that did not report enrollment figures for fiscal year 2009-10: North Coast & Mountain (Mendocino and Modoc); South Coast & Desert (Riverside and San Diego); Bay & Central Coast (San Mateo and Santa Cruz); San Joaquin Valley (Stanislaus); and Foothill & Sierra (Tuolumne).

New Enrollments

A new enrollment is the execution of a contract, resulting in an increase in the amount of restricted acreage.

New enrollments are filed with the anticipation of maintaining the contracted land in agriculture for at least ten years. As such, new enrollments may be seen as an indicator of agricultural stability in a particular location.

From 2007 to 2008, new enrollment acres decreased by approximately 27 percent from 68,698 to 49,859 acres. From 2008 to 2009, the amount of new enrollments decreased to 38,711 acres – well below the annual average of 144,222 acres for the current decade (2000-2009).

Since 1991, the greatest amount of new enrollment acreage occurred in 2001 (497,503 acres) and the least amount in 2009 (38,711 acres).

Cross-Reference: Appendix C (p. 30, 31)

Farmland Security Zone Transfers

A Farmland Security Zone (FSZ) transfer is the rescission of an existing Williamson Act contract with the concurrent creation of a FSZ contract on the same land. FSZ transfers do not result in a net change to the amount of contracted acreage within a county.

FSZ transfers signify a long-term, 20-year, agricultural commitment. This commitment is made possible only upon a deliberate action by the county in adopting the FSZ program and, subsequently, by the landowner in petitioning for such a transfer.

From 2008 to 2009 the amount of FSZ transfers further decreased to 6,093 acres – well below the annual average of 55,233 acres for the current decade (2000-2009).

In 2009, the Bay & Central Coast and Foothill & Sierra regions accounted for nearly all of the acres transferred. Four regions did not report any transfers. Over 50 percent of the transfers consisted of prime agricultural land.

Since 1991, the greatest number of FSZ acres transferred occurred in 1999 (209,480), and the least in 2006 (1,008).

Cross-Reference: Appendix C (p. 25, 26)

†The following counties did not report enrollment figures for fiscal year 2009-10: Mendocino, Modoc, Riverside, San Diego, San Mateo, Santa Cruz, Stanislaus, Trinity, and Tuolumne.

Nonrenewal Initiations

The initiation of nonrenewal on a contract by either the landowner or the local government.

Nonrenewals are often filed with the anticipation of converting farmland to other uses. As such, nonrenewal trends may be seen as a likely indicator of farmland conversion in particular locations.

From 2007 to 2008, the annual amount of acreage entering nonrenewal decreased sharply from 157,805 acres to 52,711 acres. The San Joaquin Valley region led in the amount of nonrenewal initiation acres in both years.

From 2008 to 2009, Statewide nonrenewal initiations decreased by approximately 58 percent to 22,323 acres – well below the annual average of 61,317 acres for the current decade (2000-2009). This decrease was led by the Sacramento Valley and Bay & Central Coast regions. In 2007 and 2008, Kern had the most acres entering nonrenewal compared to all participating counties. However, Kern was replaced by San Luis Obispo in 2009.

Statewide, annual nonrenewal initiation acreage increased each year from 2001 (16,148 acres) to 2007 (157,805 acres). Since then, however, nonrenewal acreages have fallen sharply to pre-2002 levels.

Nonrenewal Expirations

A nonrenewal expiration is the termination of a contract as a result of completing the nonrenewal process.

Most Williamson Act contracts are terminated through nonrenewal expiration. Upon the expiration of a contract, the restrictions are removed and the property tax assessment (which gradually increases over the nonrenewal period) returns to its full market value.

From 2007 to 2008, the annual amount of contracted land terminated through nonrenewal expirations increased from 16,931 to 24,124 acres, respectively.

From 2008 to 2009, nonrenewal expirations increased by approximately 13 percent to 27,193 acres – below the annual average of 33,691 acres for the current decade (2000-2009).

From 2007 to 2009, the San Joaquin Valley region continued to experience the largest amount of nonrenewal expirations. However, in 2009, the Bay & Central Coast region replaced the San Joaquin Valley region in terms of nonrenewal expirations.

Since 1991, the greatest amount of nonrenewal expirations occurred in 1999 (118,391 acres), and the least in 2006 (11,934 acres).

Cancellations

A cancellation is the immediate termination of a contract by a landowner, which requires payment of a cancellation fee and board/council approval based on rigorous findings.

State law limits the use of cancellation to narrow conditions. Due to the specific findings required for a board or council to approve a contract cancellation, only a small fraction of yearly contract terminations occur as a result of cancellation.

From 2007 to 2008, the amount of contracted land terminated through cancellation decreased by approximately 79 percent to 373 acres.

From 2008 to 2009, cancellations decreased sharply by approximately 98 percent to seven acres – well below the annual average of 868 acres for the current decade (2000-2009). The San Joaquin Valley region continued to complete the highest number of cancellations from 2007 to 2009.

Since 1991, the greatest amount of cancellations occurred in 1995 (5,694 acres) and the least in 2009 (seven acres).

Public Acquisitions

A public acquisition typically leads to the immediate termination of an enforceable restriction through acquisition by a public agency via eminent domain, or in lieu of eminent domain. The public agency may need to make specific findings and notify the Director of the Department of Conservation.

Public agencies may acquire Williamson Act contracted land for a wide range of public improvements. Common reasons for publicly acquiring contracted land include: wildlife habitat, water resource management, public open space, and schools. Before acquiring contracted lands, a public agency must make findings that there is no other non-contracted land reasonably feasible for the purpose, and that the lower cost of contracted land is not a primary factor in its decision.

From 2007 to 2008, public acquisitions decreased by approximately 36 percent from 14,901 to 9,482 acres. In 2008, Santa Clara replaced Fresno as the leader in the amount of publicly acquired acreage. All of the publicly acquired land in Santa Clara was non-prime agricultural land and was completed by the City of San Jose and the Midpeninsula Regional Open Space District.

In 2009, the number of publicly acquired acres continued to decrease by approximately 46 percent to 5,156 acres – well below the annual average of 31,398 acres for the current decade (2000-2009). Fresno (and the San Joaquin Valley region) reclaimed the top spot in terms of the amount of publically acquired acreage completed in the county. A majority of the publicly acquired acreage in Fresno was prime farmland.

Since 1991, the greatest amount of publicly acquired acres occurred in 2005 (70,334) and the least in 2009 (5,156).

City Annexations

A city annexation is the succession or immediate termination of a contract upon the annexation of contracted land by a city. A valid city protest of the original Williamson Act contract is required to terminate a contract, as determined by the local agency formation commission.

Certain contracts executed prior to 1991 may be terminated through city annexation only if the city filed a valid protest upon county notification at the time of contract formation. At present, the total amount of contracted acreage covered by protested contracts statewide is unknown.

From 2007 to 2008, the amount of contracted land annexed by cities increased by approximately 224 percent from 481 to 1,076 acres.

In 2009, the amount of contracted land annexed by cities decreased by approximately 50 percent to 539 acres – well below the average of 2,458 acres for the current decade (2000-2009). The largest annexation was completed by the City of Santa Maria, which annexed 241 acres in Santa Barbara county.

Since 1991, the greatest amount of annexed acreage occurred in 2000 (9,961 acres) and the least in 2007 (481 acres).

Net Adjustments

Adjustments are the reconciliation of errors in records or previous reports, re-mappings or re-surveys, lot line adjustments, or parcel divisions.

Local governments have the difficult task of monitoring all of the changes that affect the approximately 15 million reported acres contracted under the Williamson Act. The net adjustments category is partly a result of the elimination of errors that occur in local government enrollment data and of the imperfect forms that local governments must use to report enrollment data.

From 2007 to 2008, the amount of net adjustments made by the counties increased by 621 percent from a net loss of 441 acres to a net gain of 2,742 acres. From 2008 to 2009, the amount of net adjustments increased by over 455 percent to a net gain of 12,487 acres. This figure also represents approximately 28 percent of the total contract terminations statewide.

In 2008, Calaveras gained 6,234 acres of non-prime farmland as a result of a Department of Conservation audit. Kings gained 2,614 acres of FSZ-contracted prime agricultural land as a result of a transfer of contracted parcels from tax exempt entities to private ownership. In 2009, Shasta gained 10,072 acres due in large part to corrections on figures from the preceding year.

Since 1994, the largest net adjustment occurred in 2005 (32,205 lost acres) and the smallest in 2007 (441 lost acres).

Contract Termination Trends

Statutorily, there are five ways to terminate a Williamson Act contract: nonrenewal, cancellation, public acquisition, city annexation, and easement exchange. For reporting purposes, acres may also be removed on paper via "Net Adjustments."

Nonrenewal: The nonrenewal process is the most common (and recommended) mechanism for the termination of Williamson Act contracted land. Since 1998, more contracted acreage has been terminated through nonrenewal expiration than all of the other methods of termination combined. From 1998 to 2009, nonrenewal expirations have averaged 43,417 acres per year statewide.

Public Acquisition: Public acquisitions have been the second leading source of contract termination acreage over the current decade. However, Williamson Act contracts underlying publicly acquired lands are not always terminated. Acquired acreage has trended upward since 1998, but, over the past four years, has dropped dramatically to its lowest level in 2009. From 1998 to 2009, public acquisitions have averaged 28,163 acres per year statewide.

Net Adjustments: A "Net Adjustment" is not a true method of contract termination. However, from 1998 to 2009, net adjustments have resulted in the removal of an average of 5,482 acres per year statewide.

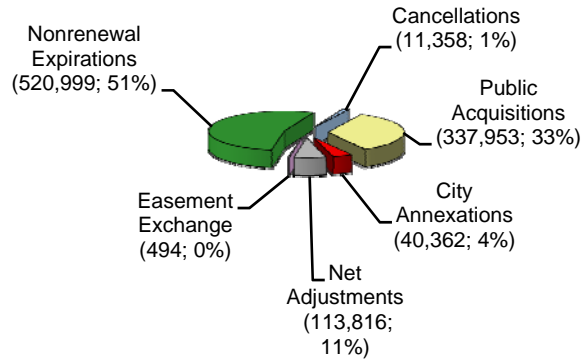

City Annexation: The actual amount of contracted land terminated through annexation is overstated since this analysis assumes that affected contracts are terminated, not succeeded to, upon annexation. Annexation acreage has fluctuated over the current decade. From 1998 to 2009, city annexations have averaged 3,364 acres per year statewide.

Easement Exchange: This method of contract termination became available in 1998. As of 2009, three Williamson Act easement exchanges have taken place. In those three exchanges, Williamson Act contracts were rescinded on 494 acres in exchange for the placement of agricultural conservation easements on 579 acres.

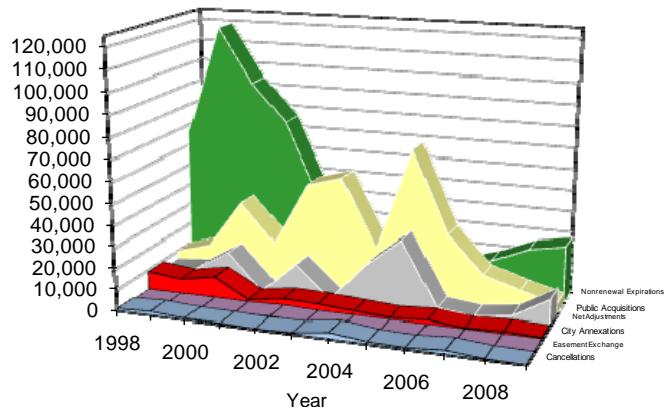

Cancellation: Statewide, cancellation acreage had been decreasing since 1999 to its low point of 161 acres in 2002, but has fluctuated over the past decade. From 1998 to 2009, the average amount of cancelled acreage each year has been 947 acres.

Please note that the following regions had counties (in parentheses) that did not report enrollment figures for fiscal year 2009-10: North Coast & Mountain (Mendocino, Modoc, and Trinity); South Coast & Desert (Riverside and San Diego); Bay & Central Coast (San Mateo and Santa Cruz); San Joaquin Valley (Stanislaus); and Foothill & Sierra (Tuolumne).

Cumulative Acres Terminated By Category: 1998-2009 (Acres; Percentage)

Termination Trend Comparison (Acres): 1998-2009

Cumulative Nonrenewal Trends

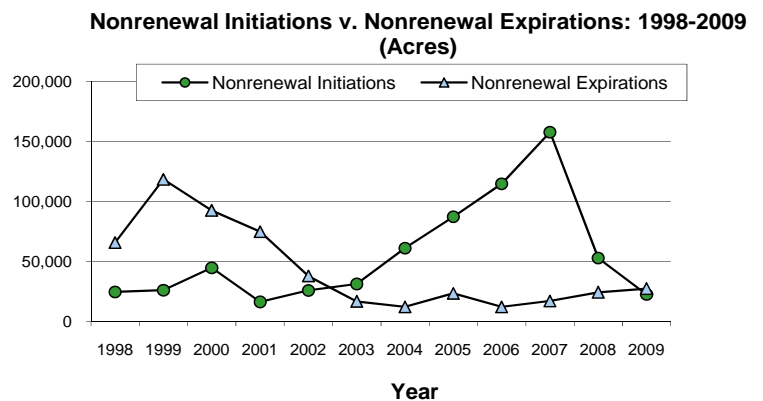

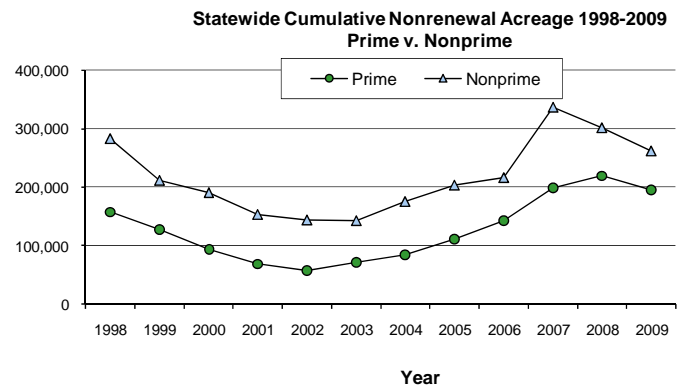

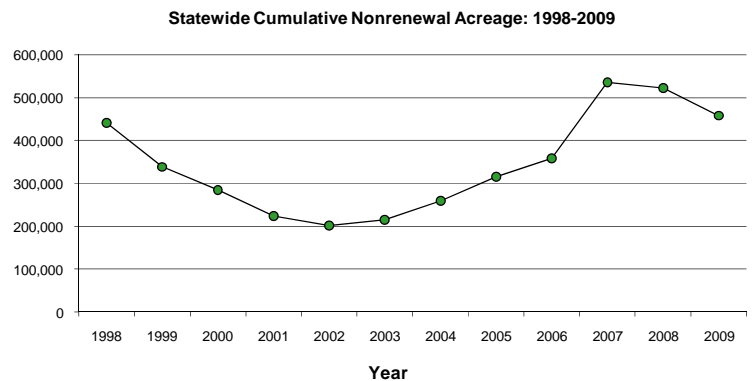

Cumulative nonrenewal acreage refers to the total amount of acreage undergoing the nine to ten-year phase-out of contract status at any one time.

Statewide cumulative nonrenewal acreage peaked at nearly 700,000 acres (record high) in 1993. The top graphic shows a steady decline in cumulative nonrenewals from 1998 to 2002, an increase from 2002 to 2007, and finally a decline until the present year. In 1991, statewide cumulative nonrenewal acreage made up 4.1 percent of the total statewide enrollment; in 2009 it was 3.1 percent.

The middle graphic shows the prime/non-prime agricultural land composition of the statewide cumulative nonrenewal acreage. Notably, the amounts of cumulative nonrenewal acreage in both the prime and non-prime categories were declining until 2003 and 2002, respectively. From 2002 to 2008, prime cumulative nonrenewals increased an average of 126,552 acres per year. From 2008 to 2009, the number of prime cumulative nonrenewals decreased approximately 11 percent to 195,361 acres.

The bottom graphic shows the statewide cumulative nonrenewal acreage from a different perspective. In 2003, nonrenewal initiations exceeded expirations for the first time since 1993 and continued to rise until 2007. Subsequently, nonrenewal initiations declined dramatically and dropped below expirations for the first time since 2002.

Please note that the following regions had counties (in parentheses) that did not report enrollment figures for fiscal year 2009-10: North Coast & Mountain (Mendocino, Modoc, and Trinity); South Coast & Desert (Riverside and San Diego); Bay & Central Coast (San Mateo and Santa Cruz); San Joaquin Valley (Stanislaus); and Foothill & Sierra (Tuolumne).

Cumulative Nonrenewal Trends

From 2001 to 2009, Orange easily maintained its top ranking statewide in the percentage of its enrollment that is under the nonrenewal process. In 2009, Orange had only 692 acres remaining under continuing contract. In the same year, Orange led all counties with a nonrenewal expiration of 7,479 acres. Its Williamson Act program peaked in popularity in the early 1970s when it had over 77,000 acres under contract.

Between 2005 and 2008, Placer remained in the second position behind Orange, initiating nonrenewal on 522 acres in 2006, 2,411 acres in 2007, and 56 acres in 2008. However, in 2009, San Bernardino overtook Placer’s position, even though it did not initiate any nonrenewals.

From 2002 to 2009, the South Coast & Desert and Foothill & Sierra regions remained in the top two positions in terms of how many acres were in nonrenewal.

Farmland Security Zones

In August 1998, the Farmland Security Zone (FSZ) provisions were enacted with the passage of Senate Bill 1182 (Chapter 353, Statutes of 1998). The FSZ provisions offer landowners greater property tax reductions in return for a contractual commitment of at least 20 years.

As enacted in August of 1998, the FSZ provisions allowed for the creation of a FSZ contract only through the rescission of an existing Williamson Act contract. That requirement was changed on January 1, 2000, thus allowing non-contracted land to go straight into an FSZ contract.

As of January 1, 2009, 21 counties had some percentage of their Williamson Act land under FSZ contract. This percentage ranged from 42 percent (Kings County) to 0.02 percent (Santa Barbara County), with an average of 8.27 percent. Regionally, only the Sacramento Valley and San Joaquin Valley have greater than two percent of their total amount of contracted land under FSZ contract (six percent and 9.4 percent, respectively).

On average, the FSZ program has continued to grow over the past five years. The program has increased in size by 44,180 acres in 2004, 11,222 acres in 2005, 1,651 acres in 2006, and 22,237 acres in 2007. In 2008, the program decreased in size by 4,823 acres. However, in 2009 the program rebounded and increased in size by 26,266 acres.

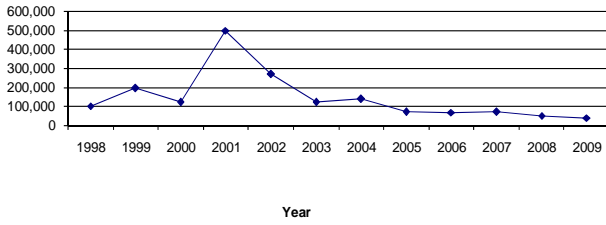

Since 1999, the FSZ program added the most acreage in 2000 (229,378 acres) and the least in 2006 (1,651 acres).

Farmland Security Zone Acreage and Percentage of Total Enrollment By County*

Cancellations (Acres): 1998-2009

Open Space Subvention Act Payments (Millions): 1998-2009

III. OPEN SPACE SUBVENTION ACT PAYMENT CLAIMS

Open Space Subvention Act

The Open Space Subvention Act provides for the partial replacement of local property tax revenues foregone as a result of participation in the Williamson Act and other enforceable restriction programs.

Since the first Open Space Subvention payments made in fiscal year 1972-1973, the State has distributed over \$876 million to counties and cities in support of the Williamson Act program. In 2008 15,596,209 acres were reported as eligible, while \$37,745,477 was claimed in subventions. The eligible acreage figure and subvention claim in 2008 were more than their respective figures in 2007. In 2009, 14,111,330 acres were reported as eligible, while \$35,107,579 was claimed in subventions. Actual subvention payments, which had been increasing since 1996, declined each year from 2004 to 2009.

Top 10 Counties with the Largest Subvention Entitlement

2008				2009			
Ranking		County	Dollars	Ranking		County	Dollars
2007	2008			2008	2009		
1	1	Fresno	\$5,282,752	1	1	Fresno	\$5,281,956
2	2	Kern	\$4,673,567	2	2	Kern	\$4,677,077
3	3	Tulare	\$3,440,425	3	3	Tulare	\$3,442,967
4	4	Kings	\$2,532,142	4	4	Kings	\$2,639,646
5	5	San Joaquin	\$1,870,983	5	5	San Joaquin	\$1,872,435
6	6	Stanislaus	\$1,480,351	7	6	Merced	\$1,463,192
7	7	Merced	\$1,438,964	8	7	Madera	\$1,324,488
9	8	Madera	\$1,344,846	9	8	Yolo	\$1,309,555
8	9	Yolo	\$1,288,063	10	9	San Luis Obispo	\$1,086,347
10	10	San Luis Obispo	\$1,088,988	11	10	Glenn	\$1,059,677

While prime agricultural land constitutes about one-third of the Statewide enrollment, it accounted for roughly 74 percent of total subvention claims in 2009. Other enforceably restricted lands, including Open Space Easement lands that qualify for subvention payments, accounted for 0.1 percent of total subvention claims in 2009.

Not all Williamson Act contracted lands are eligible for subvention payments. For example, local governments generally cannot claim subventions on contracted land that is under nonrenewal or valued for property tax purposes at Proposition 13 levels. In 2008 to 2009, approximately three percent of the Statewide enrollment was not eligible for subvention payments.

The top ten counties have remained fairly stable over the years in terms of subvention claims. The eight San Joaquin Valley counties ranked in the top eight positions in 2008. However, in 2009, Stanislaus was not in the top ten, as it did not report its enrollment figures. The San Joaquin Valley contains approximately 43 percent of the total Statewide Williamson Act enrollment and accounts for 59 percent of total subventions.

Please note that the following regions had counties (in parentheses) that did not report enrollment figures for fiscal year 2009-10: North Coast & Mountain (Mendocino, Modoc, and Trinity); South Coast & Desert (Riverside and San Diego); Bay & Central Coast (San Mateo and Santa Cruz); San Joaquin Valley (Stanislaus); and Foothill & Sierra (Tuolumne).

*Year 2009. Entitlement Amounts and the above OSSA payment claims will differ significantly due to Chapter 1 Statutes of 2009 AB X-4 (Chartered on 07/28/09), which limits total fiscal year 2009-10 Entitlement Amounts to \$1,000.

IV. COMPLIANCE AUDITS

In 1988, Williamson Act and Open Space Subvention Act program audits were initiated for participating Williamson Act counties and cities. At that time, the Department of Conservation (Department) contracted with the Department of General Services (DGS) to conduct audits of several counties. As a result of those initial audits, approximately \$550,000 in subventions was recaptured by DGS for payments made on land not eligible for subventions and for cancellation fees paid to counties but not forwarded to the State. In fiscal year 1996-1997, the Department began an annual Williamson Act/Open Space Subvention Act compliance audit program through contracts with the Department of Finance. This program has resulted in a return to the General Fund of more than \$2.1 million from the recapture of subvention overpayments and unpaid contract cancellation fees.

Paying subvention claims on land not eligible for payment is the most frequent cause of subvention overpayments. This includes land starting through the contract nonrenewal process, and land valued lower under Proposition 13 valuation for regular Williamson Act contracts. Another problem area is where cancellation fees are collected by local governments and not transmitted within the statutorily required timeframe to the State Controller's Office.

Another major benefit of the audit process is the correction of procedures for cities and counties that may not have followed the Williamson Act requirements and restrictions. The audit findings provide reassurance to both local governments and the State that the law has been followed. Since 1972, over \$876 million in State subventions have been certified to local governments to provide replacement revenues for the loss in tax revenue and administrative costs resulting from participation in the Williamson Act program. The audit program provides a valuable check to ensure that the program is administered according to statute at the local level, and to carry out the State's fiduciary responsibility for a major investment by the taxpayers of California.

- **Fiscal year 1998-1999** audits of San Luis Obispo, Riverside, Monterey and Tehama resulted in the recapture of \$958,497 in subvention overpayments. Of this amount, \$911,298 was for cancellation fees collected by Riverside but not forwarded to the State Controller's Office.
- **Fiscal year 1999-2000** audits of Colusa, San Diego and Yolo resulted in the recapture of \$150,406 in subvention overpayments.
- **Fiscal year 2000-2001** audits of Contra Costa, Glenn, San Benito, Santa Barbara and Tuolumne resulted in the recapture of \$5,000 in overpaid subventions.
- **Fiscal year 2001-2002** audits of Marin, Mendocino, Placer, San Bernardino and Santa Clara resulted in the recapture of \$57,980 in subvention overpayments. The audits also generated a subsequent review that resulted in the recapture of \$407,885 in subvention overpayments beginning in fiscal year 2004-05.
- **Fiscal year 2002-2003** audits of Sacramento, Ventura, Solano, Kern, Mariposa, and Siskiyou resulted in the recapture of \$11,125 in subvention overpayments.
- **Fiscal year 2004-2005** audits of Butte, Humboldt, and Sonoma resulted in the recapture of \$289,773 in subvention overpayments.
- **Fiscal year 2005-2006** audit of Sonoma resulted in the recapture of \$29,457 in subvention overpayments.
- **Fiscal year 2006-2007** audit of Alameda resulted in the recapture of \$94,395 in subvention overpayments.
- **Fiscal year 2007-2008** audit of Calaveras resulted in the recapture of \$135,689 in subvention overpayments.

APPENDIX A. SIGNIFICANT LEGISLATION

Summary of Significant Legislation Effective January 1, 2009

Assembly Bill 2921 (Laird, Chapter 503, Statutes of 2008)

- AB 2921 authorized the Department of Conservation to discharge certain actions if the finding of no material breach by a city or county was not supported by the evidence; revised the conditions under which a landowner may cancel a Williamson Act contract to place other land under an agricultural conservation preserve; and required the city or county to determine the amount of the cancellation fee required of the landowner and to report that amount to the county auditor before tentatively approving the cancellation petition.
- The Williamson Act, until January 1, 2009, authorized parties to a contract subject to the act's provisions to rescind the contract and simultaneously enter into a new contract in order to facilitate a lot line adjustment, if certain findings were made by the governing body of the city or county where the land is located. AB 2921 extended the above authorization until January 1, 2010.

Assembly Bill 1389 (Assembly Budget Committee, Chapter 751, Statutes of 2008)

- AB 1389 provided the necessary statutory changes to enact the 2008 Budget Act, which reduced the fiscal year 2008-09 Open Space Subvention Act Entitlement Amounts by ten percent.

Summary of Significant Legislation Effective January 1, 2010

Assembly Bill X-4 (Chapter 1, Statutes of 2009)

- Total fiscal year 2009-10 Open Space Subvention Act Entitlement Amounts were limited to a combined total of \$1,000 for all participating counties.

Senate Bill 671 (Runner, Chapter 358, Statutes of 2009)

- Existing law required the county assessor to assess current fair market valuations to determine the cancellation fee for removing land from a Williamson Act contract. Existing law permitted the Department of Conservation or the landowner, if either believed that the current fair market valuations were inaccurate, to request formal review from the county assessor in the county considering the cancellation petition, and authorized the assessor to recover his or her reasonable costs of the formal review from the party requesting the review, as specified.
- This bill authorized the assessor to require a deposit from the landowner to cover the contingency that payment of a cancellation fee would not necessarily result from the completion of a formal review, as specified.

Assembly Bill 1441 (Committee on Agriculture, Chapter 148, Statutes of 2009)

- Existing law authorized a city or county and a landowner to agree to rescind a contract or contracts and simultaneously enter into a new contract or contracts to facilitate lot line adjustments. This bill extended this authorization to January 1, 2011.

APPENDIX B. ABOUT THE WILLIAMSON ACT

The California Land Conservation Act, better known as the Williamson Act, has been the State's premier agricultural land protection program since its enactment in 1965. Over 16 million of the State's 30 million acres of farm and ranch land are currently protected under the Williamson Act. The Williamson Act statute is located in the California Government Code beginning with Section 51200.

Following World War II, California experienced tremendous population and economic growth. This growth, in tandem with the State's property tax system, led to increased pressures to convert agricultural land to urban use. Rapidly escalating property taxes often presented a prohibitive burden for farmers who wanted to maintain their agricultural operations. In response, the California Legislature passed the Williamson Act in 1965 to preserve agricultural and open space lands by discouraging premature and unnecessary conversion to urban uses. The Williamson Act was then, and remains today, a highly innovative policy that protects agricultural land through an interrelated set of property tax, land use, and conservation measures.

The Williamson Act is a State policy administered by local governments. Local governments are not mandated to administer the Act, but those that do have some latitude to tailor the program to suit local goals and objectives. The State's support of the program is strong and enduring – expressed in the language of the Act, in the authority granted to local governments, in the State subventions, and in the recent enhancements to the Act that further promote farmland and open space protection.

A three-way relationship between private landowners, local governments, and the State is central to the Williamson Act. Local governments and landowners voluntarily enter into a contract in which each accepts certain costs in return for other benefits. The landowner foregoes the possibility of development, or converting his or her property into nonagricultural or non-open space use during the term of the contract, in return for lower property taxes. The local government foregoes a portion of its property taxes in return for the planning advantages and values implicit in retaining land in agriculture or open space. The State is also a key player in the program. The State supports local governments and landowners in the form of technical and implementation assistance, interpretation of the Act, subventions to local governments, research of issues and policies, contract enforcement, and preparation of the Williamson Act Status Report.

Williamson Act contracts have an initial term of ten years, with renewal occurring automatically each year (local governments can establish initial contract terms for longer periods of time). The contracts run with the land and are binding on all successors in interest of the landowner. Only land located within an agricultural preserve is eligible for a Williamson Act contract. An agricultural preserve defines the boundary of an area within which a city or county will enter into contracts with landowners. The boundary is designated by resolution of the board of supervisors (board) or city council (council) having jurisdiction. Preserves are regulated by rules and restrictions designated in the resolution to ensure that the land within the preserve is maintained for agricultural or open space use. The rules of each agricultural preserve specify the uses allowed. Generally, any commercial agricultural use will be permitted within any agricultural preserve. In addition, local governments may identify compatible uses permitted with a use permit. Landowners interested in enrolling land in a contract should contact their local planning department for application forms and instructions.

In August of 1998, Senate Bill 1182 (Chapter 353, Statutes of 1998) established the Farmland Security Zone (FSZ) provisions of the Williamson Act. An FSZ is an area created within an agricultural preserve by a board upon request by a landowner or group of landowners. FSZ contracts offer landowners greater property tax reduction in return for an initial contract term of 20 years, with renewal occurring automatically each year. Land restricted by an FSZ contract is valued for property assessment purposes at 65 percent of its Williamson Act valuation, or 65 percent of its Proposition 13 valuation, whichever is lower. New special taxes for urban-related services must be levied at an unspecified reduced rate unless the tax directly benefits the land or living improvements. Cities and special districts that provide non-agricultural services are generally prohibited from annexing land enrolled under an FSZ contract. Similarly, school districts are prohibited from taking FSZ lands for school facilities. The FSZ provisions of the Williamson Act begin at Section 51296 of the California Government Code.

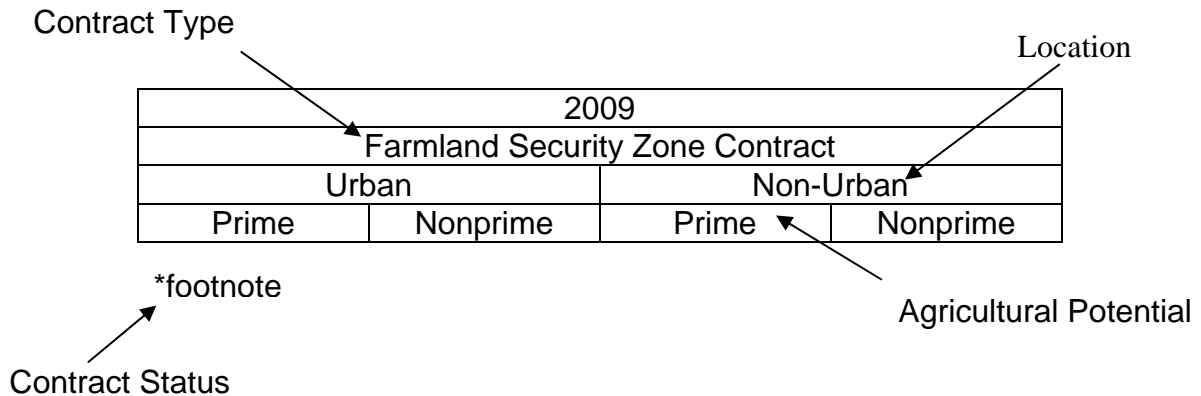

APPENDIX C. DATA TABLES

Data Notes

The following charts were omitted since no acreage was reported: Nonrenewals Withdrawn (FSZ, 2008 and 2009) and Williamson Act Easement Exchange (2008/2009).

Explanation of Enrollment Categories

The Status Report shows changes to nineteen categories of enrollment. These enrollment categories may be described by a combination of four factors: contract type, contract status, location, and agricultural potential.

Contract Type

Contract type refers to the nature of the restriction covering the land. The contract types are:

- Land Conservation Act Contract
- Farmland Security Zone Contract
- Agricultural Conservation Easement
- Other Enforceable Restriction

Contract Status

Contract status indicates whether the contract is under nonrenewal. If so, then its contract status will be “Nonrenewal”; otherwise, its status will be “Continuing.”

- Nonrenewal
- Continuing

Location

This factor is only relevant to FSZ enrollment for subvention payment purposes. FSZ contracted land that is within a city’s sphere of influence, or within three miles of the exterior boundaries of a city’s sphere of influence, is “Urban.” All other FSZ contracted land is “Non-Urban.”

- Urban
- Non-Urban

Agricultural Potential

Agricultural potential refers to the actual or potential agricultural productivity of the land being restricted. Contracted land that meets the Williamson Act definition of prime agricultural land is “Prime.” All other land is “Nonprime.”

- Prime
- Nonprime
