

# New Milan Trade Fair

case study  
By Jina Kim

Location: Milan, Italy

**Architect:** Studio Fuksas

**Owner:** Fiera Milano Foundation

**Year of completion:** 2005

**Climate:** Marine West Coast Climate

**Material of interest:** Glass

**Application:** Canopy

**Properties of material:** Free standing fluid like glass canopy runs entire site. It dramatically flows down to the ground level in a parabolic vortex fashion. Rhomboidal glazing panes were utilized on the flat portions and triangular panes were used to make the curves
