

# House of Stone

case study  
By Cameron McRae

Location: Milan, Italy

**Architect:** John Pawson

**Owner:** Interni Think Tank

**Year of completion:** 2010

**Climate:** Mediterranean

**Material of interest:** Recycled Granite Chips  
(Lithoverde)

**Application:** Exterior, Structure

**Properties of material:** The material is composed of 99% recycled granite and 1% natural soy resin. This material reuses a material (granite) that is otherwise difficult to dispose of properly. It has a beautiful aesthetic and creates a sense of strength and serenity.
