PREFACE

In 1918 a semi-centennial book containing the history of the school during its first fifty years as a State Normal School, 1867-1917, inclusive, was published. This book did not contain a locality list of graduates. In 1923 a supplement to the semi-centennial book was published. In the semi-centennial was a list of the graduates of the State Normal School up to and including the class of 1917. The supplement gave the list of the graduates for the next five years, 1918-1922, inclusive. This supplement also included a locality index of all graduates from 1867 to 1922, inclusive. The second supplement includes a list of the classes of 1923-1927, inclusive, and an alphabetical index and a locality index of these classes.

Including the class of 1927, there have been graduated from the normal department since 1867, 2622; from the old academic department 228, and from the high school department since 1905, 472.

The three-year course of study beyond high school graduation, which became effective September, 1921, is in full operation and the next step will be the lengthening of the normal course to four years with the granting of a degree for its completion.

Constant changes and improvements are being made in the plant. Normal Hall now has sixteen art glass windows, gifts of the graduating classes from 1911 to 1926, inclusive, which fill the window spaces. The normal school class of 1927 gave a sun dial and the high school class of 1927 gave a beautiful picture, one of the series of the Knights of the Round Table. The school has also received many other gifts.

The outlook for the normal school is very bright. The applications of new entrants for September, 1928, give assurance that it will be the largest entering class in the history of the school. It has been definitely settled that after a year or two the high school department in the normal school will be discontinued. A kindergarten department will be added in September, 1928, and three new members will be added to the normal faculty at the same time.

The addresses of graduates and the names of young women, owing to marriage, are changing constantly. The school is making every effort possible to keep the lists correct. Any information or help to that end will be most welcome.

PREFACE

In 1918 a semi-centennial book containing the history of the school during its first fifty years as a State Normal School, 1867-1917, inclusive, was published. This book did not contain a locality list of graduates. In 1923 a supplement to the semi-centennial book was published. In the semi-centennial was a list of the graduates of the State Normal School up to and including the class of 1917. The supplement gave the list of the graduates for the next five years, 1918-1922, inclusive. This supplement also included a locality index of all graduates from 1867 to 1922, inclusive. The second supplement included a list of the classes of 1923-1927, inclusive, and an alphabetical index and a locality index of these classes. The third supplement includes a list of the classes of 1928-1932, inclusive, and an alphabetical index and a locality index of these classes.

Including the class of 1932, there have been graduated from the normal department since 1867, the year the school was taken over by the State, 3103; from the old academic department, 228; and from the high school department since 1905, 492.

The High School Department was discontinued July 1, 1928, and was taken over at that time by the Brockport Central School District. The high school is still housed in the normal school building but plans are being made by the Brockport Central School District to build a high school. When the high school moves out the much needed space for the development of the Normal School will be released.

The class of 1924 was the last to graduate from the old two-year course. The class of 1925 graduated from a three-year course which was adopted in 1921. Again, a new three-year course became effective in September, 1929, and is the one now in use. In this course differentiation begins with the second year. The differentiation provides for three courses covering the kindergarten-primary work, the work of the fourth, fifth, and sixth grades, and for the seventh, eighth and ninth.

At the present time a four year course leading to a degree is being developed. It is hoped that in the near future financial appropriations will be sufficient to secure the additional faculty members and equipment needed to make a start on this course.

The school continues to receive many gifts. Graduating classes have consistently given the school valuable gifts. Also, school societies and other organizations have presented beautiful art glass windows for the alcove in the main corridor. All of the eight window spaces there are now filled.

Our normal school enrollment constantly increases, and we believe the results accomplished from year to year are better. Selective admissions and the requiring of higher standards of attainment have been important factors in improving the quality of our output.

Every effort possible is made to keep the office record of names and addresses correct. So many changes, due to marriage and other causes, make the task very difficult. The school will be most grateful for any information or help to this end.
