Strikers cite job concerns

by Thomas J. Sheeran

Railroad workers across the state stepped onto picket lines Wednesday, demanding pay raises and a chance to live their lives without constant pressure

ives without constant pressure from the job.
"I don't know of any craft where there are more divorces than on the railroad," said Bob Damsel, a Conrail rail employee walking a picket line outside the Collinwood Yard on Cleveland's east side. He was with 20 picketers all members of the Broth. eters, all members of the Broth-erhood of Locomotive Engineer,

The railroad destroys your life. It destroys your body. It destroys everything about you. It's a killer "

Workers at major freight car-riers went on strike as morning broke across the country Wednesday. Passenger service in many areas was also disrupted. Unions and management have

wrangled over a contract for three years. Union members said Wednesday they'd had enough.

"What it is, in my opinion, is we're going backward," said Bob Nadel, 55, of Cleveland, a Conrail engineer. "The times are going ahead, but we're going back-

"Inflation has already wiped us out," added Nadel, a 39-year railroad veteran.

Panel describes party problems

by Robert Davidson

Students, residents and police all have responsibilities to control Bowling Green's traditional spring parties, panelists said Wednesday

Bowling Green's traditional spring parties, panelists said wednesday night.

Bowling Green Police Chief Galen Ash, Bowling Green Municipal Court Judge James Bachman, University Director of Public Safety Roger Dennerll and University President Paul Olscamp offered their views during WBGU-TV's production, "The Responsible Party."

With Olscamp serving as moderator, Ash opened by stressing city police avoid giving students a hassle from the outset of any party.

He said officers generally respond to complaints from paidbless of

He said officers generally respond to complaints from neighbors of noise and vandalism associated with parties. If they find people are too drunk to reason, they are forced to break up the party.

Bachman added however, police also have a responsibility not to use excessive force. He believes the city police have acted appro-

priately in the past — with a few exceptions.

"When police respond to a 2,500 person party, they have to use more reasonable force," he said. "Last fall there were only two cases where officers overstepped the bounds of the Constitution."

As panel discussion turned to student responsibilities and tips for partying, Bachman stressed students must be considerate to their

He said when people are cited for noise violations, they often come to his court and ask, "Why didn't the neighbor come over and ask me to turn it down before calling the police?"

However, it is not the responsibility of the neighbor to tell the student to lower the volume, but the responsibility of the student to follow

the law, he said.

Earth's woes continue

Deforestation, population threaten environment

by Greg Watson

Earth Day has passed, but the planet is still here and problems caused by humanity should not be forgotten.

Two serious problems facing the planet are mass deforestation and problems caused by population growth and movement

One major problem with de-forestation, said Berry Cobb, University environmental pro-grams director, is "by destroying the trees, we are also destroying the oxygen they produce."

Burning large amounts of trees can act as a "double-edged sword" because burning sends more carbon dioxide into the air and the fewer the trees, the less vehicles there are to photosynthesize, said Rex Lowe, biological sciences professor.
Third World countries — espe

cially those containing rain forests — are responsible for the most deforestation in order to produce more agriculture, said

has and want to catch up to make more money," he added. Jerry Wicks, sociology profes-sor, said the easiest way for the countries to grow economically is to cut down the rain forests for agriculture and timber.

"It would be nice to [stop de-forestation] in the Amazon Basin, See RESPONSIBILITY, page 4. Those countries are more but if any of us were responsible aware of what [the United States] for economic growth, we would

be more than likely to do it," Wicks added.

Lowe said many Third World countries are unhappy with the United States because the U.S. is telling weaker countries — some which almost need to cut down forests to produce agriculture to stop deforestation.

Because of large cities and

Because of large cities and other areas without people, the Brazilian government is persuading people to turn forest areas into farmland, Cobb said.

People cut down trees to clear land for farmland, but because the soil is weak, the farm land is usually good for only two years, Cobb added.

Another problem with defores-

Another problem with deforestation is the loss of forest species diversity, Cobb said.

Cobb said the area with the largest amount of deforestation is aligest amount of deforestation is also the area with the largest species diversity — thousands of different species and thousands yet to be discovered.

"In my view, the largest prob-lem with destroying forests is the loss of biological diversity," added Lowe.

Faculty Senate's labor often mute

by Jeremy Stone Weber staff writer

Imagine spending a great deal of time and effort on a homework assignment or research project, giving it your best effort, and then having it not graded or looked at.

Faculty Senate faces this same problem with its adopted resolutions once they leave the senate floor, and it is a major source of frustration in the sen-

Part III of "Faculty Frustra-tions" looks at this issue. Faculty Senate puts a lot of effort into developing its resolu-

Resolutions begin and are crafted in a committee, go through the Senate Executive Committee and must be approved by the senate as a whole. Many resolutions are worked upon for months, even years, before the senate approves them.

That's when the real difficulty begins.

Many resolutions — perhaps as many as 50 percent — never turn into University policy for one reason or another. Many are never voted on by the Board of Trustees. Senate members

Faculty Senate's Actions

are divided on where to lay the blame. Senator Elliot Blinn has re-peatedly pushed for the Univer-sity Board of Trustees to vote on every senate resolution, but he says the real fault lies with

the senate itself.
"All I'm doing with the

trustees is to try and get the senate to take itself seriously," he said. "The senate can be extremely influential and make itself go if it wants to."

The senate passed a resolu-tion last year requiring the Board of Trustees to vote on all senate resolutions sent to them, but the trustees dismissed it

without a vote.
In September, the senate passed a compromise resolu-tion merely spelling out the current means for transmitting resolutions to the trustees.

Blinn aid the senate must try harder to get the trustees to vote on senate resolutions.

"If [the senate] doesn't care what happens, why take them seriously?" he said. "It's hard to blame the trustees because the senate doesn't take them-selves seriously and doesn't care what happens to them.

"I don't think the senate has any bitch at all because I think

it needs to throw its ideas into the ring and fight for them."

☐ See SENATE, page 6.

Faculty Senator Tom Anderson listens to debate on a resolution

during Tuesday's senate meeting.

Oil dependence threatens planet

nce again, our society's dependence on fossil fuels has caused a potential catastrophe.

Off the coast of Italy last week, an oil-carrying supertanker spilled several thousand barrels of oil into the Mediterranean Sea. Everyone breathed a sigh of relief as the tanker sank intact, rather than spilling the remainder of its cargo. However, as everyone congratulated themselves on their quick actions and the relatively small amount of damage, the heart of the catastrophe went ignored.

Our nation has an addiction to oil. Our reliance on oil has caused our nation to act like the helpless addict

who will do anything for our fix.

President George Bush and congressional leaders have voiced support for opening up the 1.5 million acre Arctic National Wildlife Refuge in northern Alaska to oil-drilling interests. A war was recently fought for the reason, admitted by Bush, that the world-wide flow of oil was jeopardized, and thus our national security was threatened.

Like any addict that hopes to survive, we have to wean ourselves from the dependence on fossil fuels. Our present course of dependence on oil while the total supply shrinks only can lead to eventual demise for our industry. And the best methadone clinic for America's addiction can be summed up in one word - conservaConservation allowed the American economy to grow 35 percent between 1973 and 1986 without any extra energy use. Without conservation, we'd be burning the equivalent of an extra 14 million barrels daily.

Just a 1 percent gain in automobile fuel efficency for new cars each year during the next 25 years would save 4 billion barrels of oil.

People hear these words and feel a momentary pang of anger and guilt. Then they climb into their cars, crank on the air-conditioning and leave their lights burning back home.

Deeds, not words, caused the environmental damage. And only deeds will reverse the tide of degrada-

Earth warming melts Cold War

hey won't be making any predicitions about the demise of the reign of Mikhail Gorbachev, but they will be doing their best to provide their expertise

on another topic of importance — global warming.

The culmination of a semester-long honors class entitled "Global Warming" will be this weekend, when the much-touted global teleconference with the Soviet Union takes place. About 40 Soviet students will interact with about 40 University students during the conference, confronting one another about varying aspects of global warming, ranging from the political to the social implications of the problem.

Bowling Green is one of the first universities to take part in a global exchange, which will be viewed by close to 1 million Soviet citizens. The teleconference will be directed and produced by WBGU-TV.

The class has been extremely unique. It was conducted by about 10 professors, all who lectured on one aspect of global warming during each class period, in-cluding scientific, climatological, social and philosophical effects of the environmental problem.

The great interactive opportunities the class has provided have been excellent. Several students from the Soviet section of the class visited the University at the beginning of the semester to meet their counterparts. During Spring Break, several students from the University visited the U.S.S.R. In addition, environmental studies student Michael Rolfes was offered a scholarship from Mendeleev Institute, the exchange

When a University takes on a project of such an important magnitude, all of those involved should be commended. The idea was the brainchild of history professor Lawrence Friedman and the University should be lauded for being quick to give whole-hearted

support to the idea.

Hopefully, this Saturday will be an exciting climax for the class, who not only will question Soviet students, but also have a chance to speak with Gorbachev's top science adviser, Evgenii P. Velikhov, and the Soviet Minister of Education, Gennadii Yagodin. Panelists for the University include Jerry Mahlman, a climatologist who works with NOAH, and Rosina Bierbaum, who works with the Office of Technical Assessment in Washington, D.C.

SURE BAKER BY KANDIUNG SANCTION! AND DECLARING WAR ON IRAQ WE KILLED OVER 100,000 PEOPLE... DESTROYED THE INFRASTRUCTURE OF TWO COUNTRIES... LETTERS

Condoms, info should be made more accessible

Editor The News: I would like to take this opportunity to thank the likes of Dr. Jo-shua Kaplan and Susan Perkins, as well as all of the staff of the Student Health Center and the local Planned Parenthood, for representing so well the concerns of students here at BG. Their collective stance on the responsible use of contraception, as well as their provision of information on

their provision of information on STDs, has been outstanding. I believe that in this respect, the University stands apart from other schools with these services available to all students, at little or vietuelly no cost.

virtually no cost.

I agree with those that take the stance that Marc Harris (April 16 The News) has taken, i.e. the only truly safe form of "safer sex" is with a lifelong and monogamous sexual partner, preferably by marriage. During a semester I volunteered with Planned Parenthood, the entire staff fait Parenthood, the entire staff felt that lifelong monogamy with a partner not previously exposed to STDs was the only safe sex. This view also has not been disputed by any information made availa-ble by the organizations I have

What I do dispute is the use of the term "immaturity" with those that do not feel as we do, as well as the belief (not addressed in Mr. Harris' letter) that con-doms should not be made availa-ble on campus. One might con-sider our views Victorian and de-cidedly immature and judgmencidedly immature and judgmen-tal in nature, Marc. Condoms do not provide 100

percent protection against anything, as anyone that reads the box that they are packaged in can tell. They do offer limited protection against VD and pregnancy when used responsibly. Since not all people want to behave in the idealistic sexual manner described in Mr. Harris' letter. scribed in Mr. Harris' letter, shouldn't condoms be made readily available to ensure that a person can have a loving, lifemonogamous relationship when they choose to do so without undue fear of exposing their sig-nificant other to a STD? To this end, condoms and information on sex and its consequences should be made more accessible.

I encourage sexually-active students to consider the potential consequences of casual sex. To those that choose to engage in such relationships, please use the services that are here for you. The future STD patient you save won't just be you, but your future partners as well.

Dean Sabetta International Studies

Monogomy views draw harassment

Editor The News:
After my Letter to the Editor
was printed (April 16 The News)
regarding the dangers of casual
sex, I received a note taped to my
door that said: "Dear dickface, door that said: "Dear dickface, you can't get an STD if you wear a rubber! Lighten up shithead! If I told my roommate what you said, he'd kick your ass."

This person then provided me with the number to the VD hotline, just in case I'd need it for comething. I mass

something, I guess.

First, this is a perfect example of the ignorance I had written

Spring Break reveals male culture, fears

By making genders into opposites, individuals become sexual stereotypes

as mine was, our mothers would come to us with their own pain, verbal or otherwise, and we 10-year-old little men were elected to shoulder it. This gives us a lifetime habit of carrying women's pain. If a man picks up women's pain, he's going to drop his own, because you can't carry both at the same time. These sensitive men are wonderfully supporting of women in their grief and oppression, but about their own pain they know nothing at all...in later life he can often only love a woman with the lower half of his body, his sexual part, or he can love a woman with his spirit-ual part, but not both at the same time." The root Bobert Bly

time." the poet Robert Bly.
The roar of the surf at Daytona
Beach pounded in my ears. After swimming in the salty broth of the sea and feeling a sense of communal participation with Great Mother Earth, I padded up the beach toward the Spring Break throng.

Upon the pavilion of the tower-ing hotel behind the beach, an an-nual ritual of Spring Break was

about to begin.

A tide of college kids, mostly male, were streaming up the stairs into the pavilion. And like the ancient rituals of old, an altar had been erected in front of the HoJo swimming pool. The college kids filled the pavilion, beers in hand. The setting sun cast a shadow behind the hotel tower and a late-afternoon inebriation

filled the air like a carnival. Suddenly the air was filled with a tremendous cry, like that of a thousand rutting elks.

On the altar, a parade of scanti- warped and twisted by the rely-clad women appeared.

The wet T-shirt contest was

about to begin.

The women parading in front of the throng of males represented the archetypical "cheese-cake" woman. And because of our culture and its emphasis on superfi-ciality, the wet T-shirt contest symbolizes an example that points to a source of much suffer-

Word Up

Chuck Travis

columnist #

And a lot of unresolved desper-

ation for men. What followed was a rodeo of the most American kind. Ice water was poured down the front of the women. And they were allowed to individually prance in front of the throng of males who in kind, responded with the roar of a herd of bulls put out to stud.

What was occurring was a warped and superficial expression of deep, primal human

Sexual drives which, genetically implanted from birth, become

pressive forces of church, school and media. The primal call of the crowd

was a natural enough response, but it was focused in a way that could only be expressed like Pav-

lov's dog.
In other words, it was conditioned by culture. A culture which has lost touch with itself.

Standing among the throng, beer in hand, I happened to notice some girls who were standing next to me watching the ritual.

They looked at me and laughed.

I asked them,"What do you think about all of this?"

think about all of this?"
They giggled and said, "Those girls must have no hang-ups about their bodies."
I responded, "Come on, every-body has at least one hang-up about their body."
"Oh yeah," they said, "what's yours?"
Caught off guard, I decided to try another tactic. Which was to change the course of the conversation.

"Nice weather we've been having," I said.

They weren't so easily dis-suaded.

"Come on, you know that if they had a contest that judged men the same way these contests judge women, there wouldn't be a reason for many men to come to Spring Break," they chorused. "Like what?" I said. "A phallus contest," they said. Now I thought about this.

There were hot-bod contests for men, but mostly the men that entered those contests lived in weight rooms and consumed a diet of steroids. I shared that thought with

They said there wasn't a contest where a man had to be

judged by natural endowment.
"See, if men had to get up there wearing only a sock, things would be much different," they ex-

plained. With that they laughed and wandered off.

I sat there with a beer in my

hand thinking about things.
It seemed to me that both men and women have tried to define their genders by looking at the opposite sex.

What does a woman want in a

man? What does a man want in a woman? The tattoo of opposites echoes in our heads.

And in trying to define masculinity and femininity in such a manner, the true essence of both is missed. Which results in females as cheese-cake figures in a wet T-shirt contest and males as herd of bulls intent on fufilling

heir need to stud.

As the throng dispersed, I walked back to the beach and looked at the sea. The roar of the surf sounded to me like the great belly chuckle of a power greater

than ourselves.

A power which looked down upon us, bemused by the fact that human beings stand very close to the veils covering the truths behind the illusions that they

Chuck Travis is Editorial Coordinator and a Columnist for The

about before. Wearing a rubber DOES NOT guarantee protection from an STD. Perhaps if this person called the VD hotline and success-the students. Students (if they so desire) are going to drink beer. The plain simple fact is that when you're 18,

son called the VD hotline and asked, they would know this also.

Secondly, it is a display of the kind of emotional immaturity that causes people to willfully ignore the truth, just because they don't like it. Posting an unsigned, harassing note to my door is an act of a very immature person An immature person isn't re-sponsible in relationships, and the solution to irresponsibility

isn't a condom.

Students' rights outweigh politics

Editor The News: I am a Republican. Alex Teodosio is a Democrat. But both of us are students at BGSU. Whatever went on at Teodosio's residence Saturday night (I don't know all the details, but I know the stu-dents caused no trouble), I sup-port him, John Kohlstrand and

anyone else who was arrested. As our rights get stripped away one by one by groups with more power, students must stand firm against the residents and police of Bowling Green who violated our rights. Not only are we being taken for granted, but leaders of this town seem to forget who provides the town with its wealth and going to drink beer. The plain simple fact is that when you're 18, you are an adult. East Merry will not be squashed, but instead will probably result in a clash be-tween students and police. The town has been playing hardball with the students and has refused to compromise (as Ohio University and others did), but the stu-dents are not flinching. A grand traditon, our civil rights and a good time are on the line.

Take a bite out of crime

New hotline put into use by University security

by Lori Miller

According to International Crimestoppers Association, one murder occurs every 27 minutes, one violent crime occurs every 30

seconds and one property crime every three seconds.

Although these crimes usually do not happen at the University, other crimes

do. Thousands of Waddell Thousands or dollars are spent on repairing vandalism in residence halls, academic buildings and parking lots at the University, according to the University Police Department. ment.

However, a recently-implemented program will at-tempt to decrease these occurrences, or at least solve the question of who is committing the

Crime Connection, a hotline used to help solve campus crimes, is open 24 hours a day, said Barb Waddell, public infor-mation officer and coordinator of

Students, University faculty, staff or city residents are now able to call 372-6000 to give information pertaining to crimes on campus, Waddell said.

campus, Waddell said.

The phone line is open 24 hours a day with an answering machine to answer calls after normal business hours. If the call is an emergency, the caller is told to contact 911 or the department's dispatcher she said. ispatcher, she said.

When the department receives a call, the informant is given a three-digit indentification number to maintain anonymity.

After the information is taken, the call is screened to see if the information is valid, and then gives it to the proper in-

vestigative unit.

If the information leads to an arrest, referral to Standards and Procedures or a decision on restitution, the informant is given a reward, Waddell said.

However, the amount of monetary rewards vary from case to case, she said.

There is no standard amount of a reward given because the im-plications of the information received can be very different, she said.

For example, one informant may need to testify if they are willing, while another another informant may not have to testify, Waddell said

University police started the process of implementing the program after Cathy Akens, unit director in Kohl Hall at the time, suggested the hotline.

Sandy LaGro, manager of Risk Management, will donate money each year to maintain a \$500 bal-ance in the reward fund, Waddell

Mary Edmonds, vice president of Student Affairs, purchased the answering machine and Crime Prevention paid for the telephone installation charge and miscel-laneous articles.

The hotline's monthly line charge is being funded by University Communications.

Minority alumni share job experience, advice

by Marvin C. Brown

African-American alumni returned to the University Wednesday night to share their ex-periences in the work field with undergradu-

During the Alumni Sharing African-American Paths program, sponsored by the Office of Alumni Affairs and the Counseling and Career Development Center, six panelists offered a va-riety of opinions on the key to their post-college

Journalism graduate Jared O. Wadley, now a business writer for the *Flint Journal* in Michigan, credited the University with offering contacts — students, counselors, professors — that led to opportunities.

"When I got to college, I asked myself how could I prepare myself, after graduation, to meet my goals," he said. "The biggest thing I learned here at the University is how to market myself and find mentors that helped me reach goals," he said.

Clarence Smith, graduate of the College of Musical Arts, emphasized versatility as a key to surviving in the job market.

Smith said he started as a vocal musician, with a background in piano.
"I began having trouble with my voice, but luckily my background in piano was there to fall back on," he said.

back on," he said.

Smith, who also earned a degree in education, said college students should be willing to do things not directly related to their goals.

"First things first," he said, "don't let your major cause you to neglect your other courses—it's all important in your overall education."

Ken Chambers a business graduate, now an account executive for the Kraft Co., offered insights into the business world.

Among his suggestions: limit credit pur-

chases, participate in the company's stock op-tions, find a mentor and exercise regularly to reduce stress

"People don't usally come to discover this kind of knowledge until they are 30 or 40," he said. "That's why I'm telling you now."

Business graduate Scott Johnston, a sales representative for IBM, noted the importance of

enjoying work.
"You should enjoy what you do, look for advancement opportunities within your company and, in the end, the salary will be there," he said.

Yuri N. Maltsev, who defected from the Soviet Union in 1989. spoke about the Soviet economy in his speech "Perestroika or Reaction: The Prospects for Freedom in the Soviet Union" in the Joe E. Brown theater Wednesday night. Maltsev said, "the Soviet Union is a unique country with no economy at all because there is no other economy in the world than a market economy." He went on to suggest the Soviet government should declare the Soviet blackmarket a whitemarket because the blackmarket is the Soviet economy

RESPONSIBILITY

Continued from page 1.

One resident videotaped in a survey of resident and student concerns said the resident does have an obligation — an obligation to work with students to minimize conflicts.

work with students to minimize conflicts.

Ash recommended students always consider noise levels, and keep close track of party guests to avoid losing control.

He said unexpected guests coming from other cities and states cause the most trouble at the Merry/Frazee parties.

Addressing the issue of enforcement versus containment at Merry/Frazee parties, Ash said city police have been enforcing laws within the party area rather than working around the perimeter to keep the festivities contained.

He said the change stemmed from the Merry party leading to vandalism and violence last spring as students became "too drunk to reason with."

reason with.

Bachman cautioned students who believe they have been wrongly confronted by police to file a complaint with the court and not "hold court in the street," which could lead to additional charges of persistence or resisting arrest.

Vegetarian populace growing

Food Operations reacting to demand for non-meat dishes

by Lucinda Robbins

The vegetarian lifestyle is experiencing a growth in popularity, and Food Operations is trying to help provide meals for people who choose this eating option.

Studies indicate vegetarians tend to be closer to their desirable weights and have level their desirable weights are the corrections.

lower blood cholesterol than meat-eaters.

Jane Schimpf, director of Food Operations, said Food Operations has seen the

need for more vegetarian dishes and that providing for vegetarians is a priority. Food Operations is gathering vegetarian recipes, and the National Association of Col-

recipes, and the National Association of College and University Food Services will release a vegetarian cookbook soon.

"We will be trying to develop recipes in our test kitchen this summer to respond to the vegetarian need," Schimpf said.

Schimpf also said Food Operations will be trying to move away from using cheese in all of the vegetarian dishes, since some vegetarians do not consume dairy products. She added Food Operations needs to work more with legumes and the newer grains like couscous and barley. She also would like to

couscous and barley. She also would like to try working with tofu.

Students for Ethical Treatment of Animals is trying to get a vegetarian line instituted in the dining halls, but past experiences have not been economical according ences have not been economical, according to Schimpf. She does plan, though, to include more vegetarian dishes in the menu

Ed Wells, SETA adviser, emphasized vegetarians eat more than salad and tofu. SETA has tried to arrange vegetarian pot-luck dinners and has taken trips to restau-

rants that serve vegetarian dishes.

He hopes next year, SETA will be able to provide an alternative to the meat-eating lifestyle. Although many members of SETA are vegetarian, one does not have to be a

vegetarian to join the group.

In addition to better weight maintenance and lower blood cholesterol, the vegetarian gains other health benefits, while helping the environment.

According to John Robbins, author of "Diet for a New America," risk of death from heart attack for vegetarian males is 35 percent less than that of meat-eating males. Eating vegetarian can also have a positive effect on the environment.

Robbins reports an individual who swit-ches to a vegetarian diet spares one acre of

Rainforests are being clear cut to provide ranging ground for beef. The United States imports 300 million pounds of beef each year from Central and South America.

Many vegetarians are offended by the use of farming techniques which use an assem-

bly-line approach to produce meat.

"Eating meat is not intrinsically wrong—the way we raise animals is wrong," Wells, a vegetarian for two-and-one-half years, said. Recent publicity of the veal industry's treatment of veal calfs—including chaining them in crates which are only 22 inches wide, denying them solid food and making them anemic — has increased awarness of factory farming techniques.

Poultry farming also employs many of the same techiques.

According to Robbins, 98 percent of the chickens produced for human consumption are factory farmed. Male chicks are thrown away upon birth. The chickens live in cages that are 12 inches by 12 inches with four to five hens in each cage.

Their beaks are cut off so they do not peck each other. The average life expectancy for these chickens is two months due to their severe living conditions.

"It's not a question of whether animals should die or if we should eat them — it's a question of whether or not we should mistreat them before we kill them," Curtis McCrary, sophomore RTVF major, who re-cently became a vegetarian, said.

scott Williams, sophomore who became a vegetarian for ethical reasons said most people do not think about what they are eating.

"People let someone else raise the meat, kill it, cook it. The package doesn't look like the animal the meat came from," Williams said. "People remove themselves so far from what they're really eating that they see it as just a piece of food. It's not like they're eating an animal."

'fight' date rape Greek women

by Jennifer Taday staff writer

At the Panhellenic Council meeting Tuesday night, some greek women learned selfgreek women learned self-defense techniques which could save their lives and even possibly

kill a potential attacker. Karen Scott and Brian Wa-goner, members of United Karate System, conducted a self-defense presentation and set up scenarios where the techniques taught could be used.

Scott said rape, particularly date rape, is increasing, and these tips could help an individual if placed in a confrontational sit-

"One out of three women who go to college are raped during

Science

Biologists get closer look at science

photo/Biology Departmen

The University's electron microscope reveals the "unknown" — the infrastructure of a fuzzy leaf. The fuzzy leaf is magnified 100,000 times, but the electron microscope can magnify up to 200,000 times

PROBLEMS

□ Continued from page 1.

While Third World countries are using deforestation to ad-vance now, the United States did the same during the turn of the century.

Forests were cut down with a

"Paul Bunyan rape-of-the-forest" attitude, Lowe said.

When people realized how much damage they were causing to the forests, Lowe said they re-

planted the trees.

"[In the United States], there are more forests now than there were at the turn of the century," Lowe added

While many U.S. forests are second-growth forests, Lowe said some species, such as the spotted owl, require old-growth forest.

The growth of humanity also poses some problems for the environment

Rapid population growth

causes food shortages and pollution because industry has to pro-duce more energy for more people. However, moving popula-tions can also propose a problem

to the environment.

Population movement stresses the new area's water supply and also introduces pollutants into a mostly untouched environment,

Some fast growing cities in Florida and California are having problems with their water sup-plies because more people are

"The people there] have been sucking up the water sources and tapping into rivers [to get more water]," Wicks said.

water], wicks said.
American Rivers, a Washington, D.C.-based conservation group, recently released a list of U.S. rivers endangered because

of pollution and damming for water sources and electricity, Wicks said.

The list includes the Colorado, the upper Mississippi, the Columbia and Snake rivers. "Rivers like the Colorado are

being dammed because people need sources of water and elec-

need sources of water and elec-tricity in Los Angeles and Phoenix — areas which are grow-ing like crazy,'' Wicks said. Other places facing problems because of population growth and movement include Africa, India and South America, Wicks said.

We could point to any point on the map and make a small book on ways the population affects [the environment]," Wicks said. "Everybody has different views of what we can do to solve these problems. There is no one ap-proach to solving these prob-

New electron microscope to aid BG researchers

by Amy Zitzelberger

Getting a close look at science has taken on new meaning in the University's Electron Microsco-py Facility. The new \$165,000 e-lectron microscope can magnify

up to 200,000 times. "It's so much fun. You can look at anything — human hair, paint flakes, beetles, flower petals, even bricks," said Carol Heck-man, director of the Electron

Microscopy Facility. Also, among the microscope's many applications is the study of cell psychology.

"Before cells divide, they seem to collect a lot of information on their surroundings. They scoot around and see how close the other cells are," Heckman said. If the cell can scoot around for awhile without bumping into an-other cell, the cell assumes there is room to divide.

However, cancer cells seem to have lost the ability to tell that other cells are nearby, she said. Heckman and Katherine Oravecz, biology graduate assistant, are trying to figure out how the cancer cells can make this mistake.

The microscope also is providing insight into the effects acid rain has on plants. Biology graduate assistant Chun Wang ger-minates seeds in soil of varying acidity and by using the electron microscope can determine what damage is done to the cells covering the roots.

In another project, the microscope is helping scientists understand how a single molecule of DNA, which can be more than a centimeter long, fits in the nucleus of a cell. If 100,000 nuclei were lined up next to each other, they would be about a centimeter long.

Very little is known about how ***************

the strand of DNA manages to ravel into such a small area, Heckman said. James Olesen, a doctoral student in biology, is us-ing the images created by the electron miscroscope to investigate this problem as part of his dissertation

Although telephone poles and electron microscopes seem to have little to offer each other, James Dyer, undergraduate biology major, has found a growing connection. The polls are treated with a preservative that should request living things feemed. prevent living things from de-veloping on them. However, a yellowish fungus has taken up residence on some poles. Worse, the fungus also continues to flourish on the hands of workers who climb the poles.

With the electron microscope we should be able to find a way to identify the fungus so that doctors can diagnose it in their patients,"

Heckman said.

Another researcher working on the electron microscope, Robert Graves, is looking for clues about the activity of rocks as they move within a geological fault. Graves, a geology master's student, has been looking at the tiny fracture lines in rocks from faults to see

how they responded to stress.
The University has two types of electron microscopes. The new

addition is a scanning electron microscope. This machine uses e-lectricity, which is made up of electrons, to take a picture in the same way a camera uses light. The electrons that are reflected back from the sample are used to make the image.

The second type takes an image from the electrons that pass through the sample. The magnification can be up to 1,000,000 times using this method, but the sample must be one-millionth of a centimeter thick to allow an adequate number of electrons to pass through.

be taken in a vacuum because if air were present, it would inter-rupt the flow of electricity. Also, water in the samples can cause problems.

In both cases the images must

"We like to look at things that are dead and dried," Heckman explained.

To use the electron miscroscope, students need to take Biology 446, scanning electron micros-copy — a course open to undergraduates

"People get trained by taking a course," Heckman said. "Then, we issue them a key and they get to work.

will be taking place and registration fees. One of the biggest purposes of

the recruitment party, according to Easy Street owner Vic Pirooz, is to pump people up to get involved in Bike to the Bay.

The marathon, which is a 75-mile ride starting at the Uni-

versity of Toledo and ending at Port Clinton High School, will raise money to benefit research and development for multiple sclerosis.

On Saturday afternoon June 29, halfway through the tour, riders will have time to visit Put-In-Bay or stay in Port Clinton and enjoy the beach. Then on Sunday June

30, the trip back to Toledo begins. In order to participate in the event, each rider must collect at least \$150 in pledges, of which 60 percent will benefit area research and facilities and the remaining 40 percent will be alo-cated to a national research fund.

In addition to the recruitment Bike to the Bay can be obtained by calling the MS 150 Hotline at (419) 531-1671.

Several senators said Olscamp has isolated the trustees from the faculty, and this has resulted in a rift between the

to remain anonymous, agreed.
"The problem is the Faculty doesn't take strong stances. We are wimpy," the senator said. "I think it's easy for the administration and trustees to ignore our resolu-tions when the Faculty Senate won't do anything if they do ig-

Another senator, who wished

nore them."
Undergraduate Student Government President Kevin Coughlin is also of this view, saying USG does a better job than the senate of pursuing its resolutions.

"When we make a statement, we stick by it and we are suc-cessful in bringing the issue to the appropriate people and get-ting something done," he said. "Faculty Senate will pass a re-solution and then whine and cry about nothing getting done. They have to roll up their sleeves and fight." Senator Ronald Stoner said

strained relations between the senate and administration result in the senate being less effective.

"There have been several changes along the way, but I think [the senate]is less effective because there's not a lot of rapport between the senate and the Board of Trustees.

Some senators agree with Stoner, but blame University President Paul Olscamp for the problems with the trustees.

is not always an option.
"They should [speak up], but
no administrators are involved
in the formation of senate legislation. The legislation comes to the administration at a very late period," he said. "With complicated issues, it's difficult enough to assert a position on what's there and impossible to work out alternatives and convey them to senators on the floor."

Senate leadership — the offi-cers and the Senate Executive Committee — are charged with following resolutions once they leave the senate. Some people —even administrators — think they are responsible when resolutions are not adopted.

"I think it would make a big difference in the effectiveness of the senate if the management of all formal action issues was done more rigorously and care-

thilly," said an administrator who requested anonymity.

Senate Chairperson Harold Lunde said it's part of democracy to have resolutions turned down though

racy to have resolutions turned down, though.
"I get frustrated, but what we need is patience," he said. "I may craft a resolution which I think is brilliant and it doesn't pass. I have to put away my own ego for the greater good of the faculty and University."

Friday's "Faculty Frustrations" will explore the scars left from the no-confidence propos-

from the no-confidence proposal, senate officer resignations and presidential evaluation during the past 15 months.

the disruptive effect on the econ-

omy.
Oliver Foreman, 56, of Cleve-land, a yard conductor with 36 years with Conrail, said he was

upset with frequent mandatory overtime requirements that leave him working 12 hours a day on a regular basis.

"I want to work eight hours and go home. I want to have a family life," he said.

About a dozen striking workers from three unions gathered near

the northern gate of Conrail's Buckeye Yards near the Colum-bus suburb of Hilliard. Trucks passing the entrance waved or honked their support. "It's unbelievable how many

drove by and waved at us or gave

us a thumbs-up. They drive by and honk at us. It makes us feel good," said Jack Haines, 39, of Amlin, a rural Franklin County

community near Columbus.
"We've been working without a

contract now for three years and we were at an impasse," said

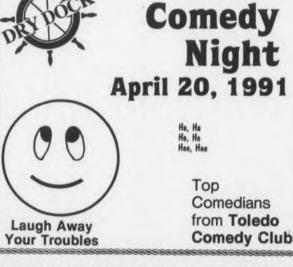

Rusty Dillinger, 42, of Galloway.

Smoking ban has

opposers fuming

WADSWORTH, O. (AP) — A city councilperson said Wednesday she is surprised there is strong opposition to her proposal to ban smoking in large retail stores and create non-smoking areas in large restaurants.

"People have simply misunderstood the proposal because they think it applies to everything and that I'm out to get smok-ers," said Joetta McQueen. She said some opponents have taken dramatic steps to make

A newspaper article about the proposed ban was burned at an area restaurant.

"And they drew beards and mustaches on my picture at a bowling alley," said McQueen, laughing.

Bud Williams, manager of Great Oaks Lanes, said that hadn't happened at his establishment.

But he said he had distributed a survey to find out how many

But he said he had distributed a survey to find out how many customers would oppose such a ban.

"It [smoking ban] would dramatically affect our business," said Williams. "Also, if business suffers, then it would go on down the line and affect the number of workers they employ and ultimately reduce the taxes paid to the city."

About 350 people signed the survey indicating they would oppose a smoking ban, Williams said.

However, McQueen said the survey was signed by people who

oppose a smoking ban at the bowling alley.

She said they don't understand the ban "doesn't apply to bowl-

ing alleys, small retail shops, churches, schools, public buildings, manufacturing places, or bars.

"In other words, it doesn't apply to anything in the whole world except retail establishments that are big enough to hold 200 people or to restaurants that are large enough they could have a non-smoking section," she said.

McQueen said once people understand the proposal, they seem

"I've had about seven calls today from people who like the idea and no negative calls," she said.

The proposal is scheduled to come before a city council committee May 2.

Elsewhere

U.S. presence in Kuwait wanes

by David Crary

SAFWAN, Iraq — The U.S. military presence in southern Iraq shrank to a narrow buffer zone along the Kuwait border Wednes-

day.

For the first time, meanwhile, For the first time, meanwhile, U.S. soldiers entered northern Iraq to look for sites that will serve as camps for Kurdish refugees. The Pentagon said U.S., French and British troops would build tent cities and provide food and medical care for the Kurds.

At the southern buffer zone, the

At the southern buffer zone, the field commander in charge of the 18,000 soldiers of the 3rd Armored
Division said they would feed and
protect refugees in the area until
relief agencies can take over the

"We're not going to pull the plug until people can take care of themselves or until there's somebody else here to take care of them," said Lt. Col. John Kalb, who runs a sector of the Kuwait border zone that includes the U.S. Army-run refugee camp in Saf-

An estimated 40,000 Iraqis are in the zone, seeking refuge from civil unrest in southern Iraq, where Shiite Muslims rebelled against Saddam Hussein. About a fourth of them are fed and treated for medical problems at the Safwan camp.

The zone, which was created

Iraqi and Kuwaiti military units are barred from the zone, but the Iraqi part of the zone is to return to the civil control of Saddam's government once U.N.
peacekeeping troops are deployed. Many refugees who deserted from the Iraqi army or supported anti-government upris-ings fear that changeover will give free reign to Iraqi police to exact revenge.

Kalb said the refugees would be safe as long as U.S. troops were around. "If an Iraqi policeman shows up with a gun, I'm taking the gun," he said.

He said no regular Iraqi police had returned to Safwan, but that several secret police agents had been arrested by the Americans. They were seeking information

on the U.S. military and the names of Iraqis working with the

Americans, he said. Kalb said American soldiers might stay on to run humani-tarian programs even after the 1,440-member United Nations peacekeeping force begins pa-trolling the buffer zone. No de-ployment timetable has been set, and relief agencies have not announced plans to take over the Army's humanitarian work.

Kalb's staff said the other major U.S. contingent in Iraq, the 1st Infantry Division, finished moving out early Wednesday, leaving only the 3rd Armored from the 200,000 American sol-diers who occupied the year after diers who occupied the area after the allied victory in late Febru-

demanded Gorbachev's resig-nation, saying he has not acted firmly enough to end ethnic and labor strife.

Next week, the party Central Committee is scheduled to meet in Moscow to review the work of

authority as party chief and government president. The miners started the strike on March 1 demanding pay raises,

but Gorbachev's resignation has become their main goal.

Miners at the Raspadskaya

mine in western Siberia returned to work Wednesday after the re-public of Russia agreed to take control of the operation from the national government, said mine

officials and strikers.
"The country's largest coal
mine is now flying the [Russian]
flag instead of the Soviet one," said the independent Postfactum news agency. The mine formerly was run by the national Coal Ministry, meaning all decisions about production and sales were made in the Kremlin.
Tass quoted the Raspadskaya

mine director, Alexander Yevtu-shenko, as saying coal shipments from the mine would resume today. It said the mine is capable of producing 20,000 tons a coal a

day. No figures were immediately available on how many miners work there or how they arrived at the decision to return to work

"On one hand, it's wonderful that they have resumed work," said Vyacheslav Sharipov of Siberia's Kuznetsk coal basin strike committee. "On the other hand, it's damaging to the workers' movement.
"At the very start, we agreed

that the decision to end the strike should be reached together," he

OXFORD, O. (AP) — Miami University students rallied on campus Wednesday in support of a proposal to sell condoms through dispensing machines in the residence halls.

Campus police estimated the crowd at about 100 students, including some who oppose dormitory sales of condoms. The rally went without incident. incident.

Myrtis Powell, the university's vice president for student affairs, addressed the students to reiterate her opposition to selling condoms in the dormitories. Powell said the university should promote educathe dormitories. Power said the university should promote education and sexual responsibility.

The University Senate, composed of faculty, administration and student representatives, voted Monday to recommend that university president Paul Pearson permit the installation of condom dispensing machines in the dormitories. It also unanimously passed a resolution

Miami rallies for,

against dormitory

condom dispensers

The proposal cannot be implemented without Pearson's approval.

He was in Columbus on Wednesday to discuss budget matters. University spokesperson Richard Little said he does not know when Pearson will decide the condoms issue.

Supporters of the condom sales urged Wednesday that Pearson announce his decision before the end of the school year, which concludes

with graduation exercises May 12.

Miami already makes condoms available at the bookstore and Student Health Center, so it is just a matter of making them more accessible, said Deepak Pateriya, a student who serves as a co-chairperson for the Condoms and Education Coalition. Condoms can also be bought in the business district of Oxford, which borders the campus.

Japanese skeptical of Soviet stability

by Michael Hirsh

TOKYO — Japan's elite toasted and cheered Mikhail Gorbachev on Wednesday, but turned a cold shoulder to the Soviet leader's frank plea for aid and in-

Gorbachev, in a speech to par-liament, urged Japan to join the "new spirit in Soviet-U.S. re-lations" that began with the end of the Cold War and promised that the Soviet Union would never

He also claimed broad Soviet military reductions in Asia and said he did not intend to interfere with Japan's most important relationship, its security treaty with America.

Yet midway through Gorbachev's historic four-day visit, deep-seated Japanese doubts about their giant Soviet neighbor and its economic stability were proving more difficult to overcome than Cold War hostility.

Accompanied by his wife, Raisa, the 60-year-old Soviet president entered the wood-paneled main chamber of the Diet, or parliament, to a standing ovation. He received another when he finished speaking 45 minutes later.

In his most plain-spoken

In his most plain-spoken

request to date for foreign aid, Gorbachev warned that "the de-velopment of a new peaceful world order will largely depend on the outcome of peres-troika...We are counting on sup-port for our efforts, particularly now as we go through this critical stage."

stage."
"If we let the new social processes get out of hand, the country may really be thrown into the chaos that gives birth to dictator-ship," he said in a speech interrupted seven times by applause.

At a luncheon meeting earlier, Gorbachev was blunter about asking for aid. He threw out most of a prepared text in trying to persuade 600 business leaders he was serious about reforming the crumbling Soviet economy.
"Our Far East and Siberia

infrastructure to develop them, Gorbachev said, adding the Soviet Union has much to learn from Japan's experience of converting military industries to commercial use.

Gorbachev stressed he was aware of the need for the Soviet Union to deal with its outstanding debts.

"This year has been especially difficult because our oil exports have declined due to the Gulf War," he said.

Bailey overcomes setbacks

BG second baseman could enter Falcon record books

by Brian Dugger

Some people let life's obstacles ruin their lives, others relish the

challenge of overcoming them.

Becky Bailey, BG softball's senior second baseman, just accepts her personal roadblocks.

Her first hinderence was a reconstructive operation on her left knee in high school. Her second obstruction as a freshman at BG she had her right knee operated on after hurting it playing bas-

Last summer her left knee gave out once again during a softball game and she had her third knee

"I don't think about it too much [the operations]." Bailey said. "Sometimes I feel I got cheated because I used to be real fast. Now I just have to hit the ball far-ther so I don't have to run as fast."

So far this season, Bailey hasn't been hitting the ball very far (0 home runs), but she's been get-

After Tuesday's doubleheader against Kent State, Bailey leads the team with an average of .333. Her 39 hits are also tops for the Falcons.

The average and hits are career highs for the Houston, Texas native. Before this season, Bailey's highest average was her

.215 mark last year.
According to Bailey, the main reason for this year's success is her increased focus on the game.

"Now that I'm a senior, I'm realizing there's nothing left after this, so I better go out with a

BG head coach Jacquie Joseph said many seniors have the same

"Seniors have an invested in-terest. They see the end ap-proaching and want to do well."

The end is approaching on a softball career filled with success for Bailey.

A Westerville South High School graduate, Bailey earned all-state honors as her team ap-peared in the 1986 and 1987 state tournaments.

The success continued in her first year at BG. Bailey played in 60 games during her freshman season as the Falcons won their first Mid-American Conference

She came to BG as a second baseman/shortstop, but in her freshman season, she was 4-0 with a 1.02 ERA on the mound. In her sophomore season, she led the team with a 1.82 ERA.

Last year, she pitched two in-nings against national powerhouse Cal State-Fullerton and she said that's all it took to end her

pitching career.

The Titans roughed her up for

However, according to Joseph, Bailey has no equal as a defen-sive second baseman.

"She's the best defensive sec-ond baseman in the conference,"

Joseph said. "She's so quick and she has such a quick release."

"She's improved a little each year," junior Kim Snyder said.
"She really covers a lot of ground

Bailey is finishing up her athletic career this spring, but more importantly, she will be earning her degree in social work next

"I started out with an English major, but I thought I would really like to do something with peopele," Bailey said. "I feel I have a lot to give because I was brought up in a good family and I'm strong enough inside to handle social work."

The inner strength has enabled her to overcome three knee surgeries and, by the end of the season, could put her in the Falcon record books.

If she can get 15 more hits in BG's remaining 22 games, she will the second highest hit total for one season in Falcon softball history. However, she doesn't want to be known for records at

"I want to be remembered as someone who gave it her all, no matter what the obstacle.

BG senior Becky Bailey collects a hit to maintain her .333 batting average

419-255-9406

game on AstroTurf, wasn't it?" said former coach Buddy Hankins, when asked simply about a game played 25 years ago. "It was against the Dodgers."

The artificial turf had been tested in 1964 in an indeer field.

tested in 1964 in an indoor field-house at the Moses Brown School in Providence, R.I., but it was not considered for professional sports.

But then Houston built the As-

trodome in 1965 with a lucite roof that didn't allow real grass to

"They had to paint the lucite because you couldn't see to catch a fly," said former pitcher and

current Astros announcer Larry Dierker, in an interview from At-

Dierker, in an interview from Atlanta where the Astros played the Braves on Wednesday.

Dierker said the team was playing on a special strain of grass developed at Texas A&M. But without direct sunlight, the roots failed to take hold and "it would fly up in hig clumps when would fly up in big clumps when you ran across it. It became more and more clear it wasn't going to

Based on its success in Providence, AstroTurf was installed in the infield of the Astrodome in time for an April 18, 1966 game against the Los Angeles Dodgers.

"Let's see, it was Dodgers 6, Astros 3 — I must not have been pitching," Dierker said.

But who won and who pitched is not what the players re-membered, he said. Reporters named the synthetic

grass for the Astros, who seem to have namesakes all around them: they play on AstroTurf at the Astrodome, next to the Astrohall, across the freeway from As-troworld in the city of the astro-

"Everybody was curious and fascinated, but there was the tra-ditional purist feel that it was a travesty to play on anything but grass," Dierker.

Aesthetics aside, the new sub-stance — which replaced the out-field grass in time for a July 19 game against the Philadelphia Phillies — allowed the baseball to "bounce truer," and allowed players to run faster, changing the skills necessary to succeed in the game, Dierker said.

"Speed was going to be a greater asset than the traditional asset of soft hands," said Dier-ker. "The ball would bounce truer, get to the infield faster and you could play deeper and cut across faster. 'Course, you had to have a good arm, too.''

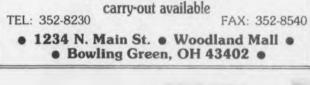

AstroTurf Industries, Inc., of Dalton, Ga., said half the 28 NFL teams and 10 of 26 major league baseball teams have AstroTurf home fields. The company said, however, the prime users of synthetic turf fields are colleges, high schools and communities for recreational programs.

Cuyler runs past Jays, Bronx Bombers hand Chisox first defeat

DETROIT (AP) — Milt Cuyler's speed and mistakes by Toronto catcher Pat Borders accounted for the winning run in the 10th inning as the Detroit Tigers getting a game-tying pinch homer from Lou Whitaker — beat the Blue Jays 5-4 Wednesday.

With two outs, Pete Incaviglia

reached on an infield single and Cuyler ran for him. With a 2-0 count on Dave Bergman, Cuyler stole second and took third when Borders' throw went into center field for an error. Bergman was then intentionally walked and re-liever Duane Ward's first pitch to Travis Fryman got by Borders for a passed ball, allowing Cuyler

Ward (0-1) gave up four runs on five hits, including Whitaker's three-run homer with two out in the ninth. Ward struck out five in the 2 2-3 innings in relief of rookie Denis Boucher, who pitched the first seven innings for the Blue

Mike Henneman (1-0) pitched one inning to pick up the victory for Detroit.

Ward struck out the first two batters to start the ninth before Mickey Tettleton hit a pinch single to right and John Shelby reached on an infield single that second baseman Roberto Alomar had trouble handling. Whitaker, pinch hitting for Tony Phillips, hit the first pitch into the upper deck

in right field to tie the game. Henneman started the 10th for the Tigers. He relieved Dan Petry who went 6 1-3 innings, the longest Tiger relief stint since

Boucher allowed four hits in seven innings and Kelly Gruber hit his third homer and had two

RBIs for Toronto.

The Blue Jays broke a 1-1 tie with three runs off Steve Searcy

Glenallen Hill and Mookie Wilson singled before Alomar walked to load the bases with none out. Gruber's flyball scored Hill, Joe Carter's single drove in Wilson and Mark Whiten's flyball got Alomar across for a 4-1 lead. Searcy, making his first start

ever against Toronto, gave up five hits and two walks in 2 2-3 in-

Gruber homered in the first, extending his hitting streak to five games. The Tigers tied it 1-1 in the bottom of the inning when Alan Trammell doubled and scored on Rob Deer's single.

 NEW YORK — Chicago lost its first game this season as Chuck Cary made the New York Yankees' six-run second stand up with eight strong innings to beat the White Sox 10-1 Wednesday.

The White Sox (6-1) return home Thursday to open the new Comiskey Park with an afternoon game against the Detroit Tigers. Jack McDowell, who won Chica-go's last game at old Comiskey, is scheduled to start for the White Sox. Cary (1-1) gave up three hits, struck out five and walked two. In his first start, last Friday at Kansas City, Cary gave up eight earned runs in 3 1-3 innings. Eric Plunk pitched the ninth.

• CHICAGO - George Bell homered and drove in two runs Wednesday as the Chicago Cubs won their fifth straight game and completed a three-game sweep of the Philadelphia Phillies, 4-1. Shawn Boskie (1-1) went 6 1-3

innings, allowing one run and four hits. He walked four and struck out three before leaving

with a two-strike count on Len Dykstra and a runner on first base. Paul Assenmacher got Dykstra on a fly ball to right and struck out pinch-hitter Ricky Jordan. Dave Smith, the third Chicago pitcher, got the last three outs for his fourth save.

Pat Combs (1-1) allowed three runs on six hits in 51-3 innings.

 BOSTON — Jack Clark, benched for a game after going 0-for-9 with eight strikeouts, celebrated his return with a two-run homer and a double Wednesday as the Boston Red Sox defeated the Kansas City Royals 6-2.

Tom Bolton, making his first start of the season, pitched seven innings, threw two wild pitches, leading to the Royals second run, scattered six hits, walked one and had one strikeout as the Red Sox beat the Royals for the second game in a row after losing five of

Clark, who ended his drought with a second-inning double, broke a 2-2 tie with his second homer, a drive into the screen in left in the fourth off Storm Davis,

Mike Greenwell hit his first homer in the eighth and Tom Brunansky, who had a sacrifice fly earlier, added an insurance run with an RBI single.

Moore supervises Foreman's quest

by Ed Schuyler Jr. AP boxing writer

ATLANTIC CITY, N.J. — George Foreman would be the oldest man to win a championship in any weight class, but he'll still be second best in one category to Archie Moore, his 77-year-

Moore will remain the oldest challenger in any weight class. When he was knocked out in the ninth round of a heavyweight title bid in 1955, he was 42 years, 11 months old — eight months older than Foreman is now.

Foreman will challenge 28-year-old Evander Holyfield for the heavyweight championship in a scheduled 12-round bout at the Convention Center.

Convention Center.

Foreman not only is a golden oldie, he's a heavy heavyweight.

He is expected to become only the eighth heavyweight title fight contestant to top 250 pounds. Holyfield is expected to

weigh 210.
"I didn't retire because of age," Moore said. "It was because the commissions told me I couldn't get a license. I intended to fight until I was 50." Moore was 49 when he knocked out Mike DiBiase in 1962 in the

last fight of a career, which began in 1936 and in which his record was 183-22-9, with 129 knockouts.

Moore won the light heavyweight title from Joey Maxim Dec. 17, 1952, four days after his 39th birthday and he won all nine deenses, the last at age 48. His record after his 42nd birthday was 38-3-2. The three defeats

were knockout losses to Rocky Marciano and Floyd Patterson in heavyweight title fights and to a young Muhammad Ali. Moore means it when he says, "I know George is in the vintage of his life."

Moore, who was in Foreman's corner when he lost the title to Ali in 1974, was reunited with Foreman for the 20th fight of his comeback — a second-round knockout of Gerry Cooney Jan. 15,

"We sit and talk," Foreman said. "I never argue with Archie. He's an inspiration and really the only teacher."
