Board of Trustees

Instructional Television Fixed Service (ITFS) to the Firelands campus became a reality on Friday, April 12, during the regular meeting of the Board of Trustees held at the Firelands campus.

During the meeting, a brief program was telecast live from the main campus to Firelands, which previously had been unable to receive the WBGU-TV signal.

The capability to transmit from Bowling Green to Firelands is the result of several years of planning and fund-raising on the part of Firelands and WBGU-TV personnel. Approximately \$200,000 was raised to make ITFS a reality for Firelands, which will now be able to view all WBGU-TV programming.

In addition, Firelands now has the capability to access all instructional support materials made available through WBGU-TV. It also will be possible to transmit classroom lectures to Firelands, creating the possibility for broadcasting upper division courses taught at Bowling Green to the Firelands campus.

The new service utilizes WBGU-TV's existing transmission tower and booster transmitters in both Fremont and Castalia. In addition to serving Firelands, it will provide two channels of educational programs for use by schools, colleges and hospitals in Bowling Green, Fremont and Huron/Sandusky.

The system was designed by William Leutz, WBGU-TV's chief engineer and is the first of its kind in northwest Ohio.

In other business at the April 12 meeting of the Board of Trustees, approval was given to a new area of specialization in hospitality management within the College of Business Administration. The program, which also received the support of the Ohio Board of Regents on April 12, is to be implemented beginning with the fall semester 1985.

Peter M. Hutchinson, business administration, told the Board the new area of specialization supports the University's Role and Mission Statement, offering practical, liberal education in a field where there is great need. The program is designed to give students a strong background in general business administration and the specifics needed for

Continued on page 2

Master Teacher's primary goal is helping students to succeed

When Carl Holmberg grades his students' papers, he doesn't mark what's wrong. He marks what's right — and he does it with any color of ink but red.

Dr. Holmberg, speech communication, is the Alumni Association's 1985 "Master Teacher," nominated by students for his outstanding work in the classroom.

But his "work" actually goes far beyond the traditional classroom — often to the Student Recreation Center or the Falcon's Nest where he sometimes keeps his "posted" office hours.

Dr. Holmberg's style of teaching, he says, is personal and flexible. "I have no formula. It varies from person to person." What he believes, however, is that as a teacher he has some basic responsibilities — to make a class fun, but not entertaining; to find the "genius" that exists in every student; to build students up rather than tear them down; to be personal with his students and not let social barriers get in the way.

That's why he marks what's right on their papers. "I believe not just in positive reinforcement, but in getting clients to give themselves the strokes that encourage them to reach for improvement and 'get off' on the process," he said. "The first word I always write down on a speech evaluation is 'good.' Too many people tell us we fall short, aren't up to snuff, cannot succeed. With me, you succeed."

Dr. Holmberg also expects something from his students in return. "I expect them to be creative," he said. "I ask them to do 'weird' things." He is concerned, he says, with getting students to express themselves in the classroom the same way they do in a less threatening environment.

Although he took a somewhat non-traditional path in getting where he is today, Dr. Holmberg admits, "I always knew I wanted to be a teacher." And he kept that in mind as he progressed through school.

He has no single mentor after whom he has patterned his teaching style. Rather, he views himself as a kind of composite of the qualities he has admired in many other teachers.

"I always paid attention to my teachers in school — how they worked, what made them effective on what occasions. The ones I admired the most were the ones who could inspire the poorest students," he said, adding that he has also been careful to avoid those qualities he has found annoying in others.

Dr. Holmberg received his bachelor's degree in applied music in 1971 from Heidelberg College, where he also studied oriental and interdisciplinary studies. In 1972 he earned a master's degree in rhetoric, interdisciplinary and classical studies from the University of Chicago.

He got his first real taste of teaching when he worked for a year as a high school English teacher at the Southern Ohio Correctional Facility, where he taught creative writing and basic reading and writing to convicts at the maximum security prison. He then returned to academics, receiving a doctorate in communication studies, Attic Greek and phenomenology at Ohio University.

Dr. Holmberg joined the Bowling Green faculty in 1982 after a stint as assistant professor of speech communication at Pennsylvania State University at Hazleton. At Bowling Green he has taught courses at both the graduate and undergraduate levels in communication theory, group communication and public speaking, and he has designed several courses, including rhetoric and fantasy, intercultural communication, and communication and creativity.

He also has continued to take courses for his own enrichment in areas ranging from tennis to contract law and filmmaking. And he has continued to observe his teachers, assimilating some of what he views as their strengths.

That kind of observation is something which Dr. Holmberg wishes every faculty member would continue as part of professional teaching development. "You can always learn from colleagues, both good things and bad," he said.

He also makes every effort to keep on top of things in the "real world" and to incorporate "skills for life" into his classes. He pursues an active program of research and writing with a goal of writing a book on fantasy and the imagination, and he maintains a high level of interest in student advising, hoping to complete some studies in that area. This year he advises some 100 students, both officially and unofficially, and several student organizations.

Dr. Holmberg admits, however, that his teaching has not been flawless. "I experiment; I make mistakes," he said, adding that he believes he profits from those mistakes. He also values the student evaluations completed at the end of each term. "It's important to get feedback from your students," he said.

And, he likes the students he meets at Bowling Green. Their backgrounds are such that "I feel what I'm really doing is introducing them to themselves," he said. "I view myself as an artist — as a creator. I do. I make. I tickle. You itch; I scratch. If you do not itch, then I haul out the itching powder."

"After traditional material is learned, I give students the freedom to grow beyond the narrow confines of peer pressure and cultural upbringing. If they grow, great. If they do not, I ask them to become more perfect at what they like to do."

"The most important event I create is the opportunity for a person to stretch, to find corners of their ability they never looked into, to act and go for an excellence that they never thought they could do."

Dr. Holmberg was selected from 175 nominees to receive the Master Teacher Award. Finalists included Elliot Blinn, chemistry; M. Neil Browne, economics; Ernest Champion, ethnic studies; Harold Fisher, journalism, and John Piper, health, physical education and recreation.

Previous recipients of the Master Teacher Award, which includes a \$1,000 cash prize, have been Raymond Tucker, speech communication; Steven O. Ludd, political science, and Peter Hutchinson, economics.

Mott, Shrude win scholar/artist awards

Two faculty whose creative and scholarly works have received international attention during the past year are the recipients of the first scholar/artist awards presented by the Bowling Green chapter of Phi Kappa Phi national honor society.

Michael Mott, English/creative writing, is the recipient of Phi Kappa Phi's first "outstanding scholar" award. Marilyn Shrude, music composition/history, has received an award recognizing her artistic endeavors.

The awards, which include a certificate and membership in Phi Kappa Phi, were presented at the society's annual initiation banquet April 14. Mott is the author of the internationally acclaimed official biography of 20th century monk Thomas Merton. His book *The Seven Mountains of Thomas Merton* earned a 1985 Christopher Award, given to recognize those who have achieved

artistic excellence in books, films and television specials affirming the highest values of the human spirit.

Shrude last fall won the \$1,000 third-place prize in the 1984 Kennedy Center Friedheim Awards competition for her composition "Psalms for David." She was the first woman ever to win an award in the prestigious competition, which recognizes outstanding works by American composers. She also is co-director of the University's New Music Festival.

Two students also received special recognition for their scholarly and artistic accomplishments. Brian Powers, a senior economics and pre-law major from Parma Heights, received the new Phi Kappa Phi student scholarship award. Timothy James Mumen, a junior speech and English education major from Toledo, received the scholar-artist award. Both also were initiated into the honor society.

GOING ONCE, GOING TWICE. The annual spring auction of University surplus is scheduled at 10 a.m. Wednesday (April 24) at the Pike Street Warehouse.

All items currently being held as University surplus will be auctioned to the general public at that time. Among the items to be placed on the auction block are television sets, couches and chairs, vehicles and office equipment.

Faculty and staff are invited to be among the bidders. Merchandise will be on display beginning at 9 a.m. the day of the auction.

FEE WAIVER FORMS DUE. Employees are reminded by the Office of the Bursar that Dependent/Employee Fee Waiver forms for the summer term should be completed and forwarded as soon as possible.

Summer sessions begin on Monday, June 10. The

first five-week term runs through July 12. The eight-week term continues through Aug. 2. The second five-week term begins July 15 and ends Aug. 16.

Only one form per student need be completed for the summer, regardless of the number of sessions in which the student will be enrolled.

Board of Trustees

Continued from page 1

hospitality management. The degree requirements include an 800 clock-hour practicum. Dr. Hutchinson said there is no other four-year institution in the state currently offering a similar business-related degree.

The trustees also approved official handbooks for administrative staff, full-time classified staff and permanent part-time classified staff, and they endorsed a new Racial and Ethnic Harassment Policy for the University. That policy was drafted by the Equal Opportunity Committee and had previously been approved by the Faculty Senate.

Also approved were promotion/tenure recommendations to take effect in the 1985-86 academic year. In approving those recommendations, William Spengler, chair of the Board's Personnel and Facilities Committee, noted that the trustees were impressed "with the very thorough fashion in which the University reviews people for promotion and tenure... and with the calibre of the teaching staff at Bowling Green and at Firelands." Spengler said the trustees discussed each personnel action in detail with Eloise Clark, vice president for academic affairs, and with the college deans.

Approved for tenure and promotion to associate professor in the College of Arts and Sciences were Stan Smith, biological sciences; William Coggin, Janice Alberghene and SueEllen Campbell, English; James Albert, mathematics and statistics; Carl Holmberg, Michael Rastatter and David Ostroff, speech communication.

Approved for tenure in the College of Arts and Sciences were Adrian Tio, art; Carol Heckman, biological sciences; David Chilson, computer science; Joseph Frizado, geology; Donald Callen, philosophy; John Cavanaugh and Kenneth Pargament, psychology.

Promotions to full professor were approved for Margy Gerber, German and Russian; David Weinberg, history, and Ron C. Woodruff, biological sciences. Promotions to associate professor were approved for Robert Hurlstone and Marilyn Griewank, art, and Kenneth Hibbein, political science. Promotion to assistant professor was approved for Srinivas

Melkote, speech communication.

In the College of Business Administration tenure was approved for Warren Hauck and James McFillen, management.

Promotion to full professor was approved for Bartley Brennan, legal studies.

Tenure and promotion to associate professor were approved for Patricia Cunningham, home economics, and Rosalind Hammond, educational curriculum and instruction, in the College of Education.

Tenure was approved for Eloise McKitric and Lucille Terry, home economics, and Deborah Tell, health, physical education and recreation.

Promotion to full professor was approved for Leigh Chiarelott, educational curriculum and instruction; Sooja Kim, home economics; Ronald Partin, educational foundations and inquiry, and Martha Tack, educational administration and supervision.

Promotion to associate professor was approved for Steven Russell, special education, and promotion to assistant professor was approved for Judith Kisselle, health, physical education and recreation.

At Firelands, tenure was approved for Ronald Willard, applied sciences. Promotion to assistant professor was approved for Teresa Marano, applied sciences.

Judy Adams, medical technology, was approved for tenure in the College of Health and Community Services.

In the College of Musical Arts, promotion to full professor was approved for John Sampen and Herbert Spencer, performance studies.

Ernest Ezell, technology, also was approved for tenure in the School of Technology.

The Board also approved miscellaneous auxiliary budgets for 1985-86;

— heard a report on the Student Legal Service which is concluding its first year of operation and has served approximately 1,100 clients to-date;

— approved a photo I.D. system for all students, effective beginning fall semester 1985. Students will pay \$2 for a photo I.D. The proposal for the new identification cards was initiated by the Undergraduate Student Government.

Technology receives computers for manufacturing research

More than \$125,450 in computers and software has been given to the School of Technology by Intel Corporation, the first manufacturer of computer microchips in the world.

The award provides six faculty in the school with equipment to implement high-level technology via computer-in-manufacturing processes, according to David Gedeon, technology.

"The (School of Technology's) ultimate goal is to develop and demonstrate appropriate hardware configurations and software packages to teach the concepts of computer integrated manufacturing (CIM) for preparing technical personnel," Dr. Gedeon said. "We also hope to make, to some degree, the hardware and software packages transportable to industry."

Of the total amount awarded to the School of Technology, Ernest Ezell, coordinator of design technology, received \$27,950 in equipment and software for his proposed development of a software package that will create simple three-dimensional objects on a computer and transfer the computer-drawn designs to the mode of production.

Dr. Gedeon and Richard Kruppa, technology, received an equipment

grant of \$20,300 to develop electronic interfaces and a software package that will drive physical simulators. Physical simulators are operational plastic models that realistically represent conveyors, sorters, machine tools and other industrial equipment.

Dr. Gedeon also received \$22,650 to design an electronic interface and software package that will drive numerically-controlled milling machines.

Edward Schwerkolt, technology, also was granted \$15,000 in equipment to produce a simulation program that will, through computer graphics, train workers to control robotic movement.

Equipment valued at \$22,550 has been awarded to John Sinn, technology, for use in refitting a manually-based lathe, making it computer controlled and capable of producing cylindrical shapes.

David Wagner, technology, received \$17,000 in equipment to install computer-based controls on a Versamat film processor, a machine known as the "workhorse of the photography industry," to increase the speed and precision of the film processor. Dr. Gedeon noted that the Kodak company is interested in Dr. Wagner's research.

A&S college seeks new assistant dean

The College of Arts and Sciences is seeking to fill the new position of assistant dean.

Applicants for the position should hold a probationary or tenured faculty appointment in a department/school in the College of Arts and Sciences and a terminal degree in an academic discipline. They also should have a substantial record of professional accomplishment in teaching and research/creative activity, the interpersonal skills necessary to work effectively with a variety of persons, and a commitment to the objectives of the college. Experience in administration or budget management is desired.

The assistant dean will be generally responsible for the management of instructional activities in the college, including coordinating the schedule-building process; managing special program

budgets; monitoring special fee budgets and the summer school budget; managing leave requests and monitoring faculty teaching assignments. The assistant dean also will coordinate interdisciplinary programs in the college.

The faculty member appointed to the new position will be converted to a fiscal year contract. The summer assignment will be 100 percent administrative; the fiscal year contract will show a 60 percent administrative/40 percent instructional split. In addition, an appropriate stipend will be added to the fiscal year salary rate.

Interested faculty should send a current resume and three current letters of recommendation to Stephen Vessey, chair of the Search Committee, c/o the college office, no later than May 10. The position will begin on July 1.

The President's Report

President Olscamp told the Board of Trustees at its meeting April 12 that the University now expects a freshman class of 3,300 for fall semester 1985.

The number of applications received is down slightly from a year ago, he said, adding that the number of applications from transfer students also is down by 11.5 percent. Dr. Olscamp said he expects 450 transfer students to begin their studies at Bowling Green next fall, compared to 501 in fall 1984. There were 2,990 new freshmen on campus last fall.

The president also reported that the number of new applications to degree programs received by the Graduate College has increased from a year ago, and he noted that current registration for the 1985 summer term is 2,069, 345 fewer than at a corresponding time a year ago.

COLUMBUS DEVELOPMENTS

Dr. Olscamp reported that \$550,000 of the \$730,000 required from local sources for completion of an addition

to the Business Administration Building has been placed into the budget bill approved by the House of Representatives' Finance Committee.

The capital appropriations bill approved last year included only 80 percent of the funds for construction of that addition.

The president also noted that he is optimistic about passage of H.B. 309 which will provide University administration the opportunity to effect wage increases for classified staff.

COMPUTER SERVICES UPDATE

Dr. Olscamp reported to the trustees that a new microcomputer laboratory has been opened in the Jerome Library for use by faculty, students and the library staff. The lab is equipped with 25 IBM PCs and 18 Apple Macintosh microcomputers.

He announced that a new VAX 785 research computer purchased last summer for \$555,000 (\$250,000 of which was donated by the Digital Equipment Corporation) has been

installed. Most of the University's research computing has been transferred from the older VAX 780 system to the VAX 785, allowing the transfer of some instructional computing from the heavily used DEC 2060 computer to the VAX 780. The new VAX 785 system also provides a base for a high quality research graphics facility, the president said.

SPEAKERS ANNOUNCED

Dr. Olscamp reported that Charles E. Perry, a Bowling Green alumnus, will be the keynote speaker for the 75th anniversary convocation on Nov. 10, 1985. Dr. Perry is vice chair, chief executive officer and partner of Golden Bear International — Jack Nicklaus Companies and is a former president of Florida International University.

Charles McDowell of the Richmond Times-Dispatch, Washington, D.C., will be the spring commencement speaker on May 11. McDowell has been a Washington correspondent and columnist since 1965.

Continuing education wins national awards

The continuing education program has received two national awards for excellence in marketing and promoting continuing education programs.

Bowling Green was one of 30 colleges and universities presented awards by the National University Continuing Education Association April 14 in Louisville, Ky.

Judges for the 1984-85 NUCEA competition awarded the University first place in the category of institutional identity and program communication for a campaign designed to reach business and industry.

Bowling Green also received a second place award in the category for a single tabloid promoting a program or activity with its schedule of 1985 summer classes which the judges praised for its effective use of a theme — scoops of ice cream — and graphics.

Edieann Biesbrock-Didham is director of marketing and promotion for continuing education.

LIBRARY MATERIALS DUE. Faculty and staff are reminded that all items currently on loan from the University libraries must be returned for processing by May 10, even if renewal is desired.

Items must be returned to the library from which they were borrowed.

Instructions for renewal have been mailed to faculty and staff who have materials on loan. Questions can be directed to the Jerome Library at 372-2051; the Ogg Science Library at 372-2591, or the Music Library (sound recordings only) at 372-2307.

WANT TO REACH FRESHMEN? All academic departments interested in submitting materials for possible inclusion in the 1985 Pre-registration packets to be distributed to incoming freshmen should contact David Weinandy, orientation (372-2843), no later than May 15.

Faculty & Staff

Recognitions

Richard W. Bowers, health, physical education and recreation, has been appointed to a two-year term on the Research Peer Review Committee for the Ohio Affiliate, American Heart Association.

The 40-member committee reviews research proposals and makes recommendations for AHA funding. Committee members represent the field of medicine and allied health professions.

Undergraduate Council

Undergraduate Council will meet at 1:30 p.m. Wednesday (April 24) in the Capitol Room of the University Union with the following agenda:

- Call to order
- Review of minutes
- Second discussion of four reconfiguration proposals from the College of Arts and Sciences: Establishment of a School of Mass Communication; establishment of a department of interpersonal communication; establishment of a department of theater; transfer of programs in communication disorders to the College of Health and Community Services
- First discussion of reconfiguration proposals for the College of Health and Community Services
- Other business
- Adjournment

Faculty Senate

Richard Hebein, romance languages, and Genevieve Stang, educational foundations and inquiry, were elected vice chair and secretary of Faculty Senate, respectively, at a meeting April 16 in the McFall Center Assembly Room. Both will assume their offices at the end of the current academic year. Dr. Hebein will automatically assume the Senate chair in the 1986-87 academic year.

In other business, Senate continued its discussion of grievance and arbitration procedures, acting on a report from a Senate Committee to Evaluate the Grievance Arbitration Procedures. The committee was chaired by Donald Boren, legal studies, who is vice chair of the Senate.

Senators acted on three sets of suggested revisions to the Academic Charter, approving two with some amendments.

The committee's recommended revisions to Article IV, Section 6.D of the charter, dealing with the composition and operation of the Committee on Faculty Personnel and Conciliation, were approved as presented. An attempt to amend the committee operation by deleting a provision for an FPCC executive committee which would complete an initial review of all petitions filed before the FPCC was defeated.

According to the charter provisions approved by Senate, FPCC will be composed of 19 tenured faculty, excluding chairs and school directors, elected by the Faculty Senate for three-year terms. No faculty member who has been an appellant or respondent in a case filed before the committee in the past three years will be eligible to serve.

FPCC will be composed of three sub-committees: a sub-committee on hearings composed of six members; a subcommittee on conciliation composed of 10 members, and an executive committee, composed of the chair, vice-chair/chair-elect and the immediate past chair.

Kathy Jo Cleveland, residential services, received the Outstanding Student Staff Member Award at the recent national conference of the American College Personnel Association in Boston. She is unit director in Mooney Hall at Founders Quadrangle.

At the same meeting, John Johnson, residential services, received the Residence Hall Program Award for "Final Frontier," a year-long program designed to expand students' opportunities for learning outside the classroom. Faculty, staff and campus resources have been utilized in the program, which has covered such topics as alcohol use, the future of space exploration, physical and mental illness. Johnson is hall director at Conklin Hall.

Arjun K. Gupta, mathematics and statistics, has been elected a member of the International Statistical Institute.

Members of ISI are selected on the basis of their distinguished contributions to either the development of applications of statistical methods or to the administration of statistical services. The world's leading statisticians comprise the body.

Dr. Gupta was elected earlier this year as a Fellow of the Royal Statistical Society and a Fellow of the Institute of Statisticians.

Virginia Marks, music performance studies, served as a judge for the Richmond Symphony Young Artist's Competition in Indiana during March.

Edward A. Schwertolt, technology, has been recognized as a Certified Manufacturing Engineer by the Society of Manufacturing Engineers. The designation reflects his attainment of a high level of knowledge and experience in manufacturing engineering technology.

Senate also approved amendments on faculty grievance procedures in Part B, Division I, Section 5 of the charter. The amended charter gives the FPCC authority to access material relative to an appellant's personnel files, provides for initial review of a petition by the FPCC executive committee within 10 days of its receipt and establishes a time table for appointment of a conciliator and appropriate responses from the respondent in a case.

Senate also discussed a section of proposed amendments relative to the procedure for a formal hearing and the selection of a hearing board. The amendments proposed by Dr. Boren's committee suggest that four members of a five-member hearing board be chosen by lot from the entire tenured faculty. A motion to delete that provision in favor of having only experienced faculty on the hearing board was defeated.

A vote on the section of charter amendments dealing with hearings and disposition of cases was not taken for lack of a quorum in the Senate.

Discussion will continue at the next meeting on Tuesday (April 23) at 2:30 p.m., place to be announced.

In other business at the April 16 meeting, Arthur Neal, Senate chair, requested that faculty submit nominations for the Faculty Governance Award to the Senate office.

The award was instituted last year to recognize outstanding contributions to University governance by a faculty member. Lloyd Buckwell, accounting and management information systems, received the \$1,000 cash prize at the opening convocation in August. The prize was funded by the Presidents Club and the Alumni Association.

Nominations should be made based on a faculty member's single contribution during the past year or a number of smaller contributions over a period of years. All faculty may nominate. The Senate officers will select the award recipient.

Award-winning teacher loved school, profession

This is the second in a series of stories on recipients of the Undergraduate Student Government's 1984 Faculty Excellence Awards. Award-winner Alice Philbin, English, was featured earlier this year. Julie Lengfelder, HPER, will be featured in a forthcoming issue.

Cathy Pratt, journalism, has always "known" she would be a teacher, and she has spent most of her life preparing to be a good one.

Earlier this year, she was recognized by the Undergraduate Student Government for her work in the classroom, and now she is even more certain that she will teach for the rest of her life.

Pratt was one of three faculty to receive the USG's "Faculty Excellence Award" last fall. The awards are presented to an outstanding faculty member from each college based on student nominations and careful review by a USG committee.

A 1972 graduate of Bowling Green with a major in English, Pratt's first inclination was to teach high school English. While a student at the University, however, she began to sense that what she really wanted to do was teach at the college level, and when she graduated, she began to acquire the experience she believes is essential to be a good college teacher. She worked in a variety of public relations positions — at WWWE Radio in Cleveland, at Fitz Simons Advertising Agency, at Bobbie Brooks, and at Carl Byoir and Associates in New York, one of the top PR agencies in the country. Through all those jobs, the desire to teach still burned, she said, and eventually she returned to the University to pursue the graduate work which would further equip her for the college classroom. While a graduate student, she was offered a position as instructor of journalism — something which convinced her that she should stay in Bowling Green.

Now an assistant professor, Pratt currently teaches both introductory and advanced journalism classes, advises approximately 100 students and two campus organizations and is hostess of the WBGU-TV sports talk show "Time-Out."

"I guess I teach because I always loved school," she said, adding, "I was one of those kids who just couldn't wait for summers to be over so I could go back to school."

She continued, "I've led an exciting life and have met exciting, important people, but if that's all you do for a living, it might be hard to sleep at

Cathy Pratt

night. With teaching, I really think I can make a difference. I don't think a week goes by when I don't get a glow inside from helping a student."

Pratt finds standing in front of a classroom a transforming experience. "I can be in a rotten mood, and all I have to do is stand in front of the students and I get energy from them," she said.

But her motives in teaching are far from selfish. "I want to make kids want to learn and enjoy it. A student has to accomplish something, and I try to initiate it or pique it."

She does this, she said, by being "as interesting and enthusiastic as possible. I don't read lectures and I won't read from a textbook."

Her biggest dilemma, she added, is deciding whether "to nurture or demand."

She also acknowledges being far from perfect, despite winning an award for her teaching. "I never think I give enough," she said, adding, "There are some days when I know I don't succeed."

Videotape teaches use of MultiMate

A videotape which introduces viewers to word processing with the MultiMate software package is now available through the closed circuit office of WBGU-TV.

"MultiMate, An Introduction to the Word Processor" discusses creating, storing, editing and printing documents such as business letters with the MultiMate program. Also covered are creation of a long document, merge printing, mathematics functions and the MultiMate "spell check" function.

The program can be scheduled for viewing in classrooms equipped with closed circuit television by contacting Karen Mason at 372-0121. It also can be viewed in the reserve section of the Jerome Library where monitors are available for direct access to the closed circuit office.

Public safety dept. sponsors demonstration of security equipment

The police division of the department of public safety will coordinate a demonstration of security equipment from 9-11 a.m. Thursday (April 25) in the Capitol Room of the University Union.

A representative from Anchor Pad international will conduct the demonstration of equipment designed to protect a variety of items from theft.

Methods will be shown for securing such items as audio cassette recorders, balances, calculators, check imprinters, CRTs, disk drives, electronic test equipment, facsimile equipment, microfilm readers, microscopes, microwave ovens, modems, personal computers, postage meters, printers, slide projectors, stereo units, telecommunications equipment, telephone answering equipment, telephones, televisions, terminals, typewriters, video cassette recorders and word processors.

The department of public safety does not specifically endorse this equipment but is simply facilitating the demonstration for anyone interested.

GOT A MESSAGE? The athletic department's electronic messageboard is now available for use by campus organizations wishing to promote a non-profit event.

There is no charge for use of the board. All messages must be submitted in writing at least 10 days prior to the running of the message. Messages must be limited

to a maximum of 75 characters, including spaces.

The athletic department reserves the right to accept or reject any and all advertising and to coordinate availability of messageboard time.

For further information, contact Jim Treeger, athletic promotions, 372-2401.

CLUB MEMBERSHIP DRIVE BEGINS. The athletic department will kick off its annual Falcon Club membership drive on April 29.

Falcon Club members will be contacted for renewal of their memberships and new members also will be solicited.

The membership drive will continue through May 27.

Datebook

Exhibits

The 34th Annual BGSU Undergraduate Student Art Show, through April 30, Fine Arts Gallery, School of Art. Free. Gallery hours are 8:30 a.m. to 5 p.m. weekdays and 2-5 p.m. on weekends.

Handmade Paper Display featuring the work of Dorothy Linden, through May 3, James Paul Kennedy Green Room, Moore Musical Arts Center. The exhibit can be viewed daily during regular building hours.

Monday, April 22

COCO Creative Writer's Poetry Reading, 7 p.m., Off-Campus Student Center, Moseley Hall. Free.

"Agulre," German Film Series, 7:30 p.m., Gish Film Theater, Hanna Hall. Free.

Concert Performance featuring pianist Lisa Goldman, artist-in-residence, 8 p.m., Bryan Recital Hall, Moore Musical Arts Center. Free.

Tuesday, April 23

Piano Master Class featuring Maryan Filar, 9:30 a.m. to noon, Bryan Recital Hall, Moore Musical Arts Center. Free.

Geology Lecture Series with Martha Withjack, principal research geologist studying rift deformation at ARCO Oil and Gas Co., Dallas, Tex., 7:30 p.m., 70 Overman Hall. Free.

New Music Ensemble Concert, 8 p.m., Bryan Recital Hall, Moore Musical Arts Center. Free.

"Springtime of the Universe," planetarium presentation, 8 p.m., planetarium, Physical Sciences Laboratory Bldg. Admission by donation.

Wednesday, April 24

Piano Master Class featuring Maryan Filar, 9:30 a.m. to noon, Bryan Recital Hall, Moore Musical Arts Center. Free.

Concert Performances featuring bassoonist Roger Kantner and the University Symphonic Band, 8 p.m., Kobacker Hall, Moore Musical Arts Center. Free.

"Folk Art and Culture in Northwest Ohio," a lecture/presentation by Joseph Ahad, a lecturer; folksingers Pat and Gordon Cleveland; Barbara Rothrock, Calico, Sage and Thyme, and Rosalind Hammond, EDCI, 7 p.m., 306 Hanna Hall. Free.

Employment Opportunities

CLASSIFIED EMPLOYMENT OPPORTUNITIES

'Computer Awareness Day' set Wednesday

University Computer Services will host its fourth annual Microcomputer Awareness Day Wednesday (April 24) in the Community Suite of the University Union.

Apple Computer Inc. and several software vendors will give demonstrations on the Apple Macintosh personal computer and the Macintosh office system in the Campus Room of the Community Suite from 9 a.m. to 5 p.m.

In addition, various software packages will be demonstrated along with Apple's new Laserwriter printer and University Consortium-produced software for various academic areas.

Several faculty and staff presentations on the IBM PC also are scheduled in the Town Room of the Community Suite as follows:

Overview of campus microcomputer facilities and capabilities, by Dale

Schroeder, computer services, 1:30-2 p.m.;

Computer searches used in the University libraries, by Floris Wood, library, 2-2:20 p.m.;

Introduction to PC-File III, an inexpensive file management system, by Wood, 2:20-2:40 p.m.;

Overview of IFPS/PERSONAL (8 copies of this financial planning system have been purchased for the library microcomputer laboratory), by Ron Hartley, accounting and MIS, 3-3:20 p.m.;

Overview of MINITAB (10 copies of this statistical software have been purchased for the library lab), by Stephen Simon, applied statistics and operations research, 3:20-3:40 p.m.

The entire day's events are free, and interested faculty and staff may come and go as they wish.

Lunde receives Hollis Moore service award

Harold Lunde, management, received the Hollis A. Moore service award from the Undergraduate Student Government at the USG banquet April 16.

Established in 1981, the Moore awards are presented annually to the student, faculty and staff member who have contributed "outstanding service to the welfare of the entire University community."

A former staff economist for General Motors and corporate vice

president of planning and research for the May Department Stores Co., Dr. Lunde has taught at the University since 1980.

He is a member of Phi Beta Kappa national honor society and Omicron Delta Kappa national leadership honor society.

Joseph Gottron Jr., a senior business administration major from Fremont, received the student award. There were no staff members selected this year.

Medici Circle honors librarian, art faculty

An assistant professor of library information services and two art faculty were among recipients of the Medici Circle's "Il Magnifico Awards" this year.

The awards, which recognize contributions to the School of Art, were presented to Ruth Hoffman, library, for her work with and assistance to art students; Dawn Glanz, art, for her teaching excellence, and Tom Hilty, art, for his outstanding creative achievement, teaching and service. Presentations were made during the Medici Circle's fifth annual Primavera Gala April 13.

An "Il Magnifico Award" also was presented to Marilyn Singleton for her five years of continued, dedicated service to the school of art as a founding member, advisory board member and past president of the Medici Circle, friends and patrons of the school.

The Medici Circle was instrumental in securing approximately \$36,900 in cash contributions and pledges and \$14,000 in gift-in-kind contributions and scholarships for the School of Art this year.

Also presented during the gala was

the Dorothy Uber Bryan Award, named in honor of the first Medici Circle president. The recipient was Carol E. Aldridge, art resource librarian.

WICI recognizes faculty, former staff

John Huffman, journalism, and Denise Trauth, radio-television-film, have received the Outstanding Faculty-Staff Member in Communications Awards from the University chapter of Women in Communications.

The awards were presented in recognition of the high standards they have set as heads of their respective academic units and their concern for and work with students outside the classroom.

Also recognized by the campus WICI chapter was Joan Gordon, executive manager of the Bowling Green Chamber of Commerce and former director of public information at WBGU-TV. Gordon received the WICI Award for Contributions to the Advancement of Women.
