Library Scholarly Communication Initiatives @ UND

Sara Kuhn & Holly Gabriel
NDLA Unconference, April 5, 2018

UND CHESTER FRITZ LIBRARY
UNIVERSITY OF NORTH DAKOTA.

Background

- *New* Library Dean
- *New* Scholarly Communication Librarian
- Campus initiatives for research visibility / impact
- Faculty awareness and resistance

Initiatives

- Research office collaboration
- Scholarly Communication LibGuides
- Promo video for faculty
- Web-recorded journal quality workshop
- Faculty P&T sessions
- Cabell's Whitelist / Blacklist trial
- UND Scholarly Commons (bepress institutional repository)

Faculty P&T Handout

Promotion & Tenure: Library help

Where is your research?

Are citations to your research outputs and endeavors all over the place? Use Google Scholar, ORCID ID, Publish or Perish, and other platforms and tools to find, organize, collocate, and manage them.

- Google Scholar Citations: https://libguides.und.edu/researcher-profiles/google-scholar
- Publish or Perish: https://libguides.und.edu/publishing/publish-or-perish
- Metrics for articles, journals, books, and researchers: https://libguides.und.edu/impact-metrics/discover
- Altmetrics: https://libguides.und.edu/impact-altmetrics

What's in a name?

How is your name reflected in researcher authority records? How many formats is it in, and in how many databases? Let ORCID ID help you.

ORCID ID has become a standard "go to" for scholars, peers and the publishing industry to identify you and your research.

ORCID can:

- Create a unique ID (ORCID ID) for every researcher
- Connect your IDs and citations across platforms like Web of Science, Scopus, CrossRef, and more
- Formulate citation counts and researcher h-indices from this data
- Identify you to colleagues and peers, letting them know where to find your research

ORCID ID registration / learn more: https://libguides.und.edu/researcher-profiles/orcid

Journal & Publisher Quality

Check out the Publishing Strategies (P&T) Research Guide for information on identifying quality and predatory publishers, and for publishing tips. Discover databases and tools for journal, article, book, and researcher metrics with the Research Impact – Metrics Guide.

- Publishing Strategies (P&T): https://libguides.und.edu/publishing
- Research Impact – Metrics: https://libguides.und.edu/impact-metrics

Find out more by contacting your Subject Librarian (https://library.und.edu/librarians/) or Scholarly Communication Librarian, Sara Kuhn (sara.kuhn@library.und.edu).

ASK A LIBRARIAN?

Research Visibility

How visible is your research? Do your peers know where to find it? Are you able to demonstrate that your work is being viewed? You can ensure that it is by depositing your work in the UND Scholarly Commons.

UND Scholarly Commons

UND Scholarly Commons (https://commons.und.edu/) is UND's open access institutional repository. It is administered by the Chester Fritz Library and provides a unified institutional home for research conducted at UND.

Not sure what you can deposit?

• UND Scholarly Commons accepts any work of research or archival value conducted by UND faculty, staff, and students. If you have a collection of works (for example, a dataset of research videos, or a collection of archival photographs) contact the Digital Initiatives Librarian, Zeineb Yousif at zeineb.yousif@und.edu to set up a consultation.

What about research I've already published?

• Most publishers will allow you to deposit a version of your journal articles or book chapters on an institutional repository. E-mail zeineb.yousif@library.und.edu your CV and a signed copy of the Scholarly Commons Permission form (available at https://commons.und.edu/author-submission-agreement.pdf) and the library will conduct a rights analysis on your CV and add all works that we are legally able to deposit.

LibGuides (Research Guides)

- Books by UND Authors 2016-2017
- Scholarly Communication Suite:
  - Scholarly Communication
  - Author's Rights
  - Data Management
  - Open Access
  - Open Educational Resources (OERs)
  - Publishing Strategies (P&T)
  - Research Impact – Altmetrics
  - Research Impact – Metrics
  - Researcher IDs

Research Guides project / design

Open Educational Resources

- Campus working group on OERs

- 2015-2018: North Dakota University System invested $200,000

- UND Student Government and Provost Office invested $100,000

Grant Proposals to Adopt OERs

- Request for grant proposals
- Target high enrollment classes and classes with expensive textbooks
- Instructors could receive $3,000 per course

Results

- About 30 classes/labs using an OER
- Wide variety of classes implementing OERs
- OER representation in almost every college

Librarian's Role

- Summits on campus
- Small workshops
- UND Scholarly Commons

Campus Outreach

- Good publicity for saving students money
- Student government and Provost are supportive
- OER working group has funds for more grants

Return on Investment (ROI)

In the first three rounds of OERs at UND, we have:

- invested approximately $85,000; and
- saved students a roughly estimated maximum of $3.7 million, for an ROI of $43.53 for every $1 invested.
