

MINESTIS, THE ROUTE TO RESOURCE ESTIMATES

Laurent Wagner
Product Manager
wagner@geovariances.com

Geovariances
Where no one has gone before

LEADER IN ADVANCED GEOSTATISTICS
WITH NEARLY 30 YEARS OF EXPERTISE

LEADER IN ADVANCED GEOSTATISTICS

Independent Software Vendor

Founded in **1986**

Specialized in **Geostatistics**

Strong Partnership with the

Center of Geostatistics (Paris School of Mines)

Helps Mining Companies to meet their

Resource Estimation & Risk Assessment challenges

COMPLETE SOLUTION BASED ON GEOSTATISTICS

Software

technical
support included

Consulting

mentoring &
technical
assistance

Training

software use &
methodologies

isatis
ALL-IN-ONE
SOFTWARE
SOLUTION
FOR GEOSTATS

The most complete, general
purpose geostatistics software
Industry benchmark geostatistics
software

Leading technology: development in
partnership with **Paris School of
Mines**

isatis

ALL-IN-ONE
SOFTWARE
SOLUTION
FOR GEOSTATS

Robust software resulting from **20+ years** R&D

Tried & tested software solution **used for 20+ years** by top mining / consulting companies

800
licenses

275
companies

Geovariances

TRAINING SERVICES

**Last
2 years**

550+

Geoscientists
trained worldwide

Gain your autonomy:

- dedicated to **software use / geostatistics**
- **public / private** sessions
- **classroom / web-based** training
- **standard / customized** content
- for **beginners / advanced** users /
awareness of project leaders

CONSULTING SERVICES

**Last
2 years**

150+

studies / assistance
worldwide

High quality studies accomplished by highly skilled consultants

→ **Resource evaluation**

Exploration feasibility & production

→ **Resource classification**

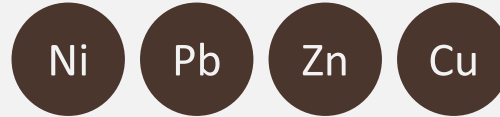

→ **Answers to resource reporting codes**

OUR REFERENCES IN MINING

Our clients deal with **various commodities**

→ **Base metals**

→ **Precious metals**

→ **Bulk commodities**

→ **Energy**

→ **Diamond**

OUR REFERENCES IN MINING

THE ROUTE
TO RESOURCE ESTIMATES

**NEW
GENERATION
SOFTWARE
FOR MINERAL
RESOURCE
ESTIMATION**

- 1 Dedicated to the Mining industry
- 2 Windows-Native Application
- 3 User-Friendly
- 4 Fast & Secure Workflow

**FOR ANY
SIZE
COMPANY**

Top & mid-tier mining companies

- Technical Services / Exploration / Resource Estimation departments
- Mine sites

Junior mining companies

Consulting firms

Auditors and financial analysts

SIMPLIFIED & OPTIMIZED WORKFLOW

Data Import (Boreholes, Wireframes)

Validation (Data QC)

Domain Management
(Domain QC)

Resource Estimation
(variography, kriging)

Recoverable
Resources
(UC, LUC,
simulations)

MINESTIS KEY ADVANTAGES

User-friendly

Smart, intuitive, modern
user interface

**Geostatistics made
available** to
non-experts

Fast

Just one click to get
deterministic and risk
models all at once

**Powerful
technology
Fast learning curve**

Secure

All-in-one **streamlined
workflow**

Focus on **most useful
parameters** only

Provides **support tools to
the parameter setting**

HIGH QUALITY ESTIMATES

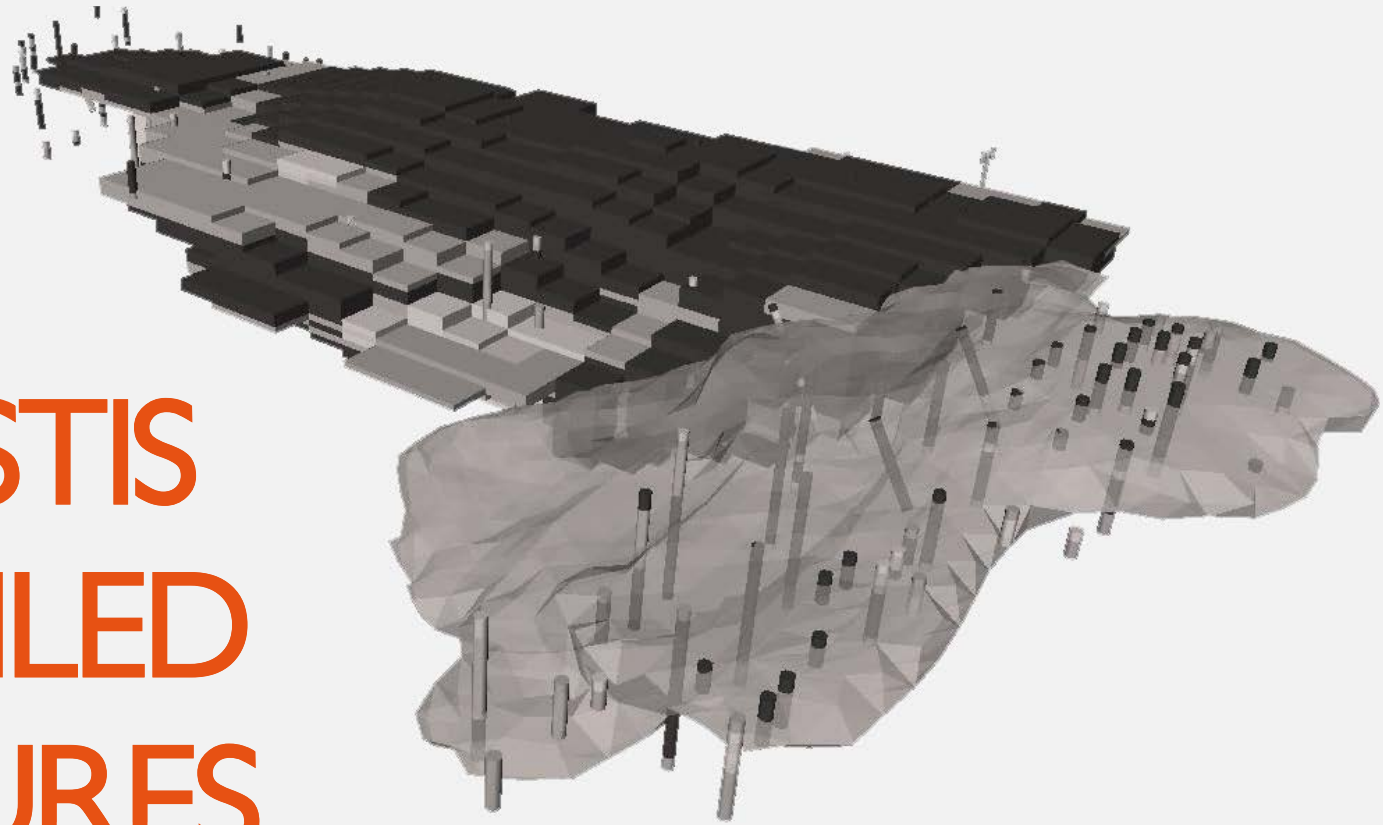

Coherent management
of estimation domains
and block models

**Tried-and-tested
geostatistics** derived
from Isatis well-proven
key algorithms

23^{YEARS}
expertise

MINESTIS DETAILED FEATURES

PRESENTATION CONTENTS

- User interface
- Background technology
- Integrated workflow

SMART USER INTERFACE

Grades

- Al2O3
- Fe
- Mn
- P
- SiO2

Auxiliary Numerical

- Oxy

Auxiliary Categorical

- Geol Code

Domains & Results

Partitions

WHOLE_FIELD

1.7729E-10 m³

mineralized

6.32581E+08 m³

North_0

WORKFLOW

Data Import

Validation

Domaining

Resource
Estimation

Recoverable
Resources

ALL-IN-ONE WORKFLOW: FROM DOMAINING TO RESOURCE ESTIMATION

Data import from **CSV file** or **Isatis study**

Original data kept unchanged in the database
for complete data traceability

Control of **borehole geometry consistency**

Management of **duplicates** and **measurement detection limits**

Global compositing

Exploration data analysis

- **Compositing** per domain
- **Declustering**
- **EDA**: histogram modeling, variography
- Global **change of support**
- **Kriging, UC, LUC, simulations**

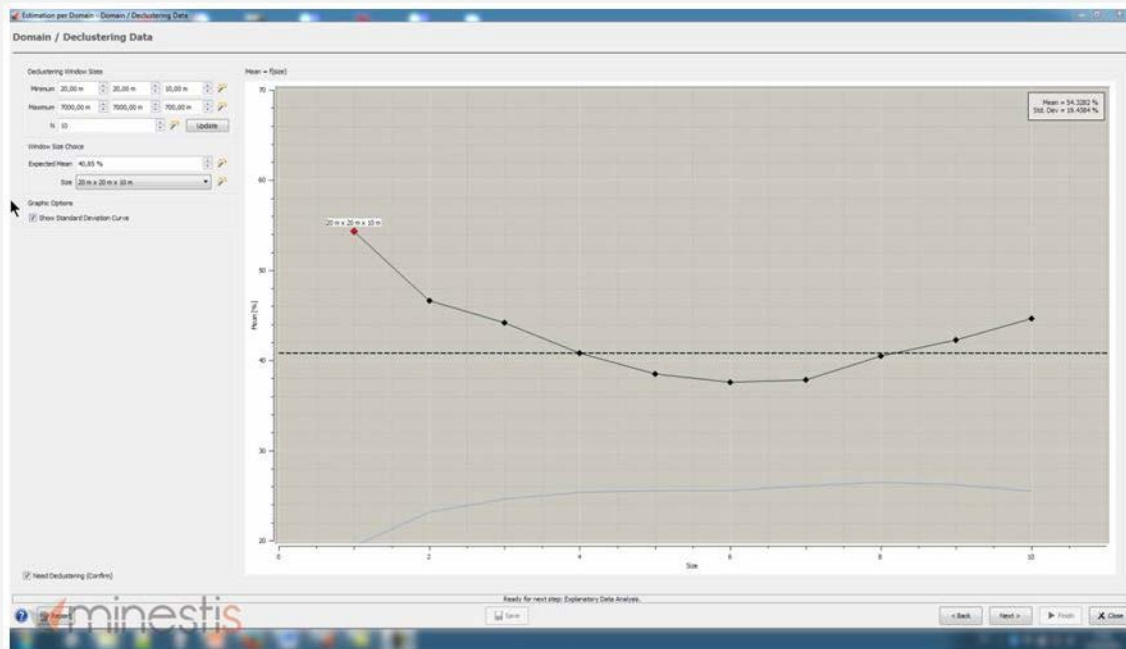

Data
Import

Validation

Domaining

Resource
Estimation

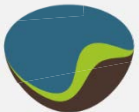

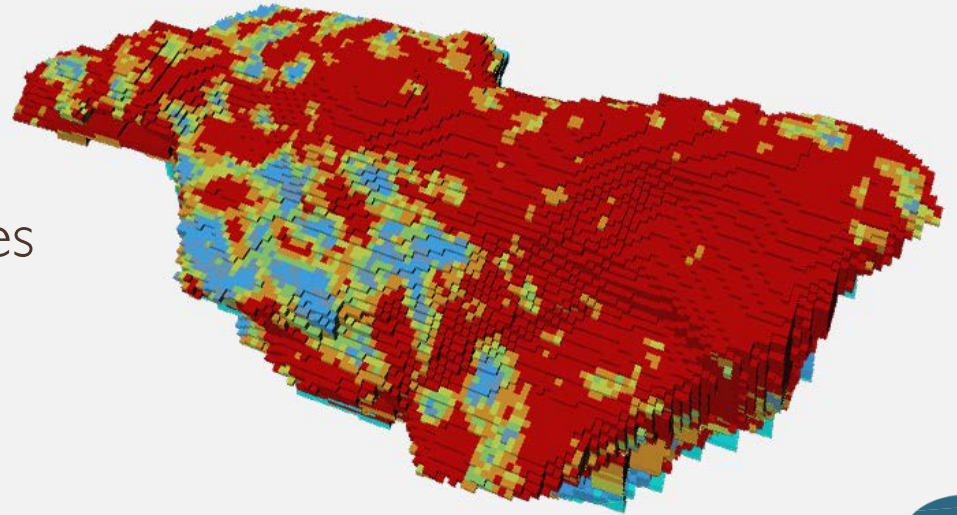

Recoverable
Resources

Output

- In-situ estimation
- Recoverable resources
- Uncertainty analysis

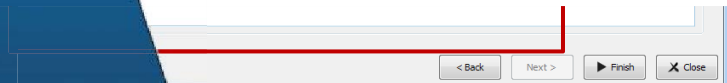

Flexibility in result reporting

- outputs from OK, UC, LUC, and/or simulations
- by panel and/or SMU
- for 1 or several variables
- for 1 or several domains

Resources Table (Calculated from Panels Simulations)

Cutoff [%]	Tonnage [Kt]	Metal (Al ₂ O ₃) [Kt]	Grade (Al ₂ O ₃) [%]	Benefit [Kt]	Volume [m ³]
0	2.37021E+06	67852	2.8627	67852	8.77856E+08
4	499758	46348.6	9.2742	26358.2	1.85096E+08
6	325856	37837	11.6116	18285.7	1.20688E+08
12	110542	19707.8	17.8284	6442.83	4.09414E+07
16	57743.3	12454.4	21.5686	3215.48	2.13864E+07

MINESTIS VERSUS ISATIS

Dedicated to the
Mining industry

Windows-native
application

Modern & intuitive
Graphical User Interface

Fast & secure
workflow

isatis

General purpose
geostatistics toolbox

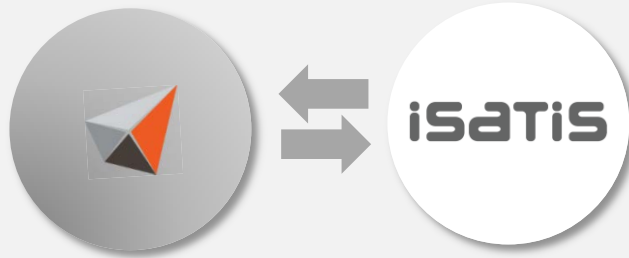

The **most complete**
geostatistics software

Advanced
geostatistics users

MINESTIS AND ISATIS

Both packages are fully **connected**

MINESTIS SELLING MODEL

Perpetual license + maintenance

One-year, two-year and three-year subscriptions (including maintenance)
