Virginia Marine Resource Report No. 2000-04

VSG-00-07

Thanks to:

Those anglers who took the time and effort to attend tag training workshops, then put their fishing skills to work to tag, release and record tagging data.

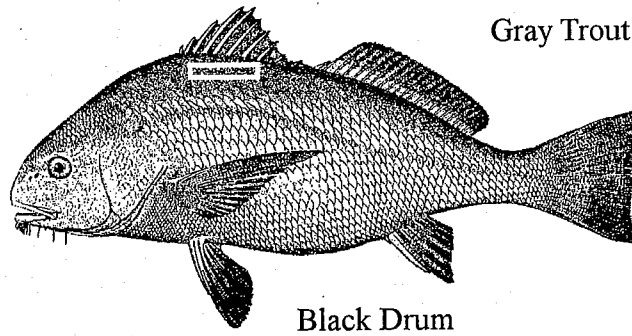

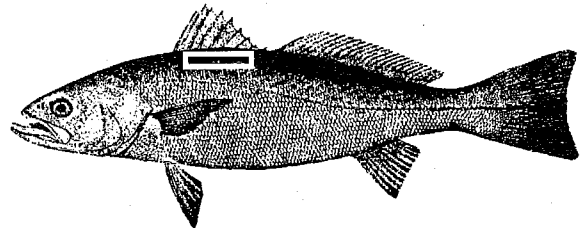

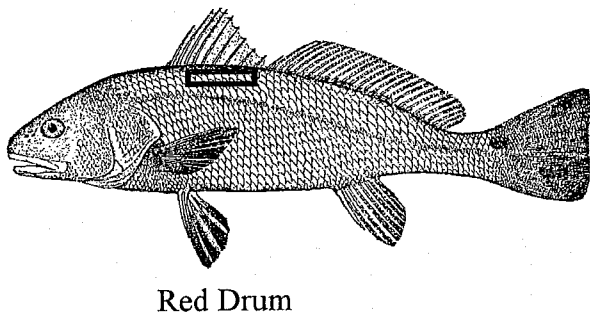

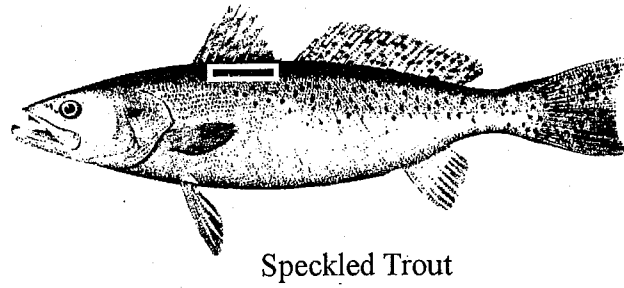

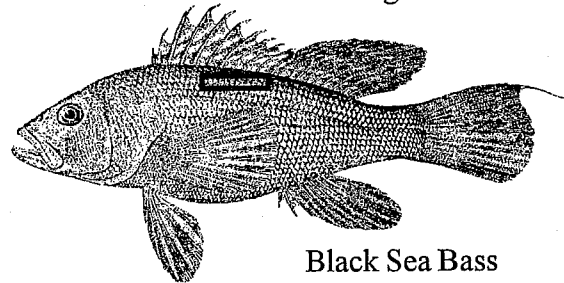

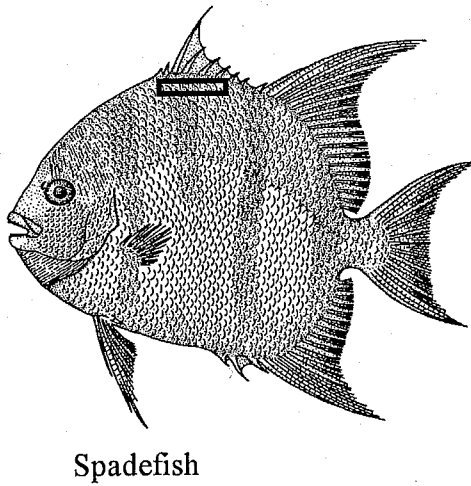

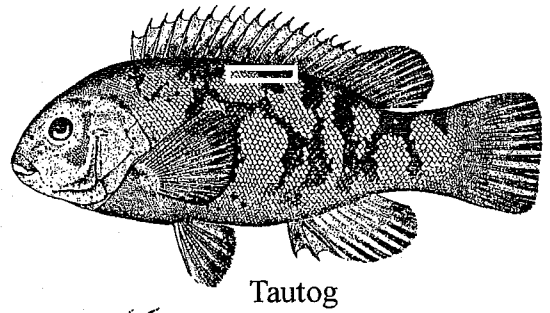

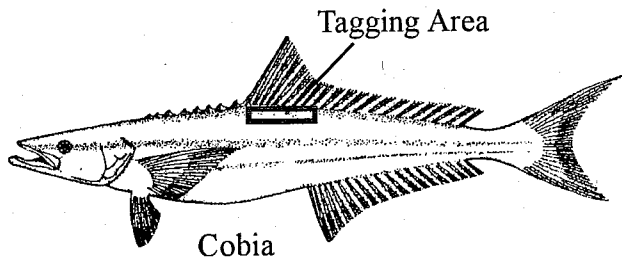

Those individuals out on the water in the recreational and commercial fisheries, and those working onshore in seafood businesses, who took enough interest and effort to report tags in recaptured fish.

The Virginia Game Fish Tagging Program, on behalf of the co-directors and the Virginia Recreational Fishing Advisory Board, greatly appreciates the dedication of those contributing to this effort to expand understanding of the fish stocks on which we all depend.

This work is the result of research supported in part by NOAA Office of Sea Grant, U.S. Department of Commerce, under grant No. NA90AA-D-SG045 to the Virginia Graduate Marine Science Consortium and the Virginia Sea Grant College Program

Target Species for Tagging

Virginia Game Fish Tagging Program

PROGRAM DESIGN

The Virginia Game Fish Tagging Program (VGFTP), a cooperative project of the Virginia Marine Resources Commission and the Virginia Institute of Marine Science (VIMS), set records for fish tagged and recaptured during 1999, its fifth year of operation. The VGFTP is primarily funded with revenues from Virginia's saltwater recreational fishing license. In addition, support for the program is provided by Virginia's Sea Grant Marine Advisory Program at VIMS.

PROGRAM GOALS

The VGFTP is designed to accomplish three specific goals:

1. To develop a quality-oriented tagging program utilizing recreational anglers to enhance data collection efforts for specific species of fish;
2. To educate anglers about the need, benefits, limitations, and operation of tagging programs and other information gathering efforts directed toward saltwater finfish, including the proper methods for reporting the recapture of tagged fish; and,
3. To reinforce efforts to educate anglers about the benefits and proper techniques for catching, handling, releasing, and tagging fish.

Anglers returning information and tags from recaptured fish are awarded caps and decals featuring the VGFTP logo.

PROGRAM OPERATIONS

The VGFTP limits participation and requires attendance at a minimum of one training session for all volunteers. This provides the program directors an opportunity to interact with all program participants to help assure the quality of their tagging efforts.

Registration is on an annual basis, beginning in January. Participation is generally limited to 160 anglers. Anglers participating in the program are requested to renew their registration each year. Training workshops for new taggers were held during February and March in Virginia Beach, Newport News, Wachapreague, and Gloucester Point. Instruction and discussion of proper fish handling techniques, tagging techniques, procedures for the accurate and efficient reporting of tag events, and the goals and philosophy of the VGFTP were featured at these sessions. Many experienced anglers, while not required to repeat the workshops, still attending the programs and contributed valuable insight at the sessions.

Receiving tagging equipment and going through written tagging instructions, anglers also practiced inserting tags in fish obtained from local seafood markets. The practice element of the training program clarifies questions about proper tagging technique, reinforces proper fish handling, and allows anglers the chance to develop a feel for the tagging process while under supervision. Mistakes in tag placement and improper anchoring of tags, common occurrences during practice tagging, provide an excellent learning situation through which anglers immediately benefit from their mistakes and gain confidence in their skills.

TARGETED SPECIES

Black Drum	(<i>Pogonias cromis</i>)
Black Sea Bass	(<i>Centropristis striata</i>)
Cobia	(<i>Rachycentron canadum</i>)
Gray Trout	(<i>Cynoscion regalis</i>)
Red Drum	(<i>Sciaenops ocellatus</i>)
Spadefish	(<i>Chaetodipterus faber</i>)
Speckled Trout	(<i>Cynoscion nebulosus</i>)
Tautog	(<i>Tautoga onitis</i>)

No changes in targeted species were made during 1999, except to request in early summer that anglers cease tagging gray trout due to continued low tag returns. Selected species are targeted by the VGFTP for several reasons. First, they contribute significantly to Virginia's recreational fisheries. Second, gaps exist in the scientific data available on the species regarding how "Virginia's" populations of these species interact with, and impact upon, the overall populations of which they are a component. Third, selected species are not included in other tagging efforts in this region. Fourth, tagging studies can provide insight into aspects of the species' life history. Examples of such life history parameters include local and regional movement patterns of young as well as sexually mature fish, documentation of species' utilization of specific types of habitat to include substrate and water areas, limited growth data, and insight into survival rates of released fish.

1999 TAGGING AWARDS

Volunteers participating in the VGFTP have the opportunity to earn recognition for their conservation efforts. Participants tagging a minimum of 25 fish are awarded Conservation Certificates. During 1999, 49 participants qualified for awards (Table 1), a tie with 1997 as the second highest number of conservation awards in the VGFTP since 1995. The most conservation awards were earned in 1998 (54); 16 awards were given in 1995 and 32 awards given in 1996.

For the second year in a row (1998, 1999) the angler tagging the most fish was Mike Perron.

Special recognition is given to anglers tagging the most fish in each species category. Because of his special tagging effort during 1999, Mike Perron again dominated these awards, and was the top tagger of black sea bass, tautog, and black drum. Dave Barbee was the lead tagger of cobia in 1999 and Hank Norton tagged the most speckled trout in 1999. Rob Holtz again tagged the most spadefish in 1999. Al Paschall was the lead gray trout tagger in 1999 and Mike Firestone was the lead red drum tagger in 1999.

Two taggers in the VGFTP (Sonny Spiers and Capt. Jim Jenrette) directly assisted a research study funded by Virginia's saltwater recreational fishing license revenues. These two gentlemen collectively tagged and released more than 350 tautog at several sites in conjunction with an ultrasonic telemetry study on tautog conducted by VIMS between November 1998 and September 1999, from which 51 recapture events occurred, providing invaluable comparisons between conventional and ultrasonic tagging data.

As part of its ongoing effort to reward quality tagging efforts, not just number of fish tagged, the VGFTP recognizes the volunteer, from the current year or a prior year, who has the most tag returns during the year from fish which he/she originally tagged. In addition, anglers having 10 or more tagged fish recaptured during the year are listed in Table 2. Mike Perron again won this award in 1999, having had 195 fish recaptured.

Tautog-342	Mike Perron

TAG AND RECAPTURE DATA

VGFTP volunteers tagged and released 7,566 fish in 1999, the second largest annual tagging effort to date for the program (Figure 1). Although the total number of fish tagged and released in 1999 was slightly reduced (13%) from the total number of fish tagged and released in 1998 (8,705), 1999 was still a productive year in terms of tagging and releasing fish. Since 1995, a total of 26,377 fish have been tagged and released in the VGFTP, 62% of which were tagged in 1998-1999. Nine hundred twenty-eight recapture events occurred in 1999, the largest number of recapture events in a year (Figure 2). Many of these recapture events involved multiple recapture of the same individual tagged and released since the programs inception (Table 3). Since 1995, a total of 2,222 recapture events have been recorded, 81% of which occurred in 1998-1999.

Tagging effort for two species (tautog, red drum) occurred at record levels in 1999. Tagging effort for three species decreased by 19% (black sea bass), 49% (gray trout), and 51% (spadefish) from 1998, while tagging effort for three species (cobia, black drum, speckled trout) remained relatively unchanged from 1998.

Distribution of tagging effort among targeted species in 1999 was similar to distribution of tagging effort since 1997, with gray trout, tautog, and black sea bass continuing to represent the top three species tagged. For the first time in the history of the VGFTP, more than 1,000 red drum were tagged in a single year, making this the fourth species in the program in 1999 to have this distinction. These four species (red drum, tautog, black sea bass, and gray trout) accounted for 88% of all fish tagged in 1999. Speckled trout and spadefish accounted for 10% of fish tagged in 1999, while cobia and black drum only accounted for 2% of fish tagged in 1999.

Red drum, black sea bass, and tautog recapture events constituted the bulk of recapture events. With the exception of gray trout (for which very little recapture data is available), distribution of recapture data by species mimics the trend observed for tag-release data. In 1999, recapture events of tautog increased by 55% and recapture events of red drum increased by 65% from 1998 levels. Black sea bass recapture events decreased by 18% from 1998 levels, while the number of recapture events for the remaining five species (cobia, black drum, gray trout, speckled trout, spadefish) remained relatively unchanged.

Table 3. MULTIPLE RECAPTURE EVENTS OF THE SAME INDIVIDUAL, 1995-1999

Species	2 nd Rcp	3 rd Rcp	4 th Rcp	5 th Rcp
Black Sea Bass	53	10	2	1
Tautog	35	3		
Red Drum	22	1	1	
Black Drum	5	3		
Spadefish	5			
Cobia	2	1		
Speckled Trout	1			
Gray Trout

Number of Fish Tagged and Released

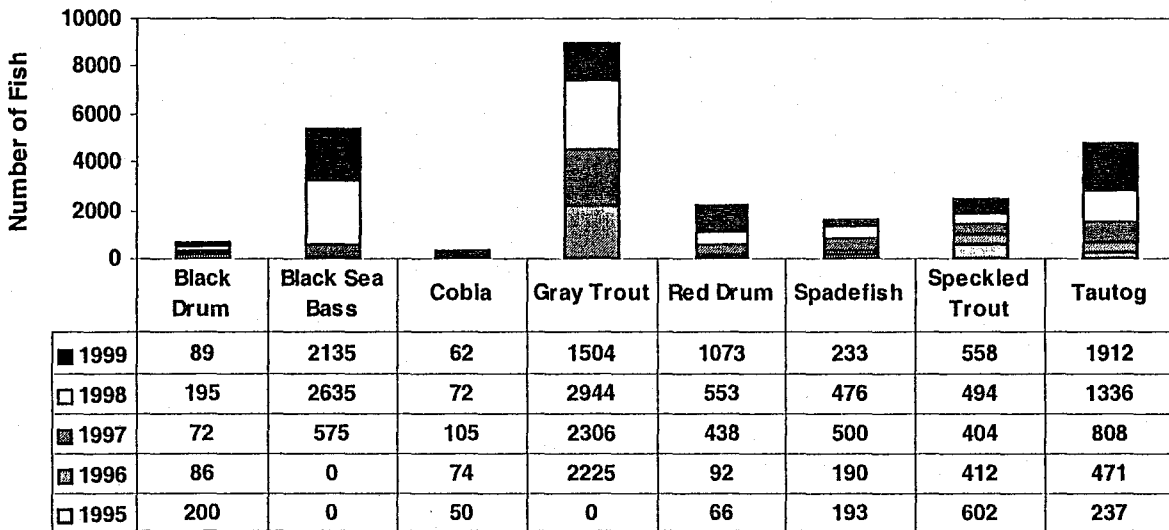

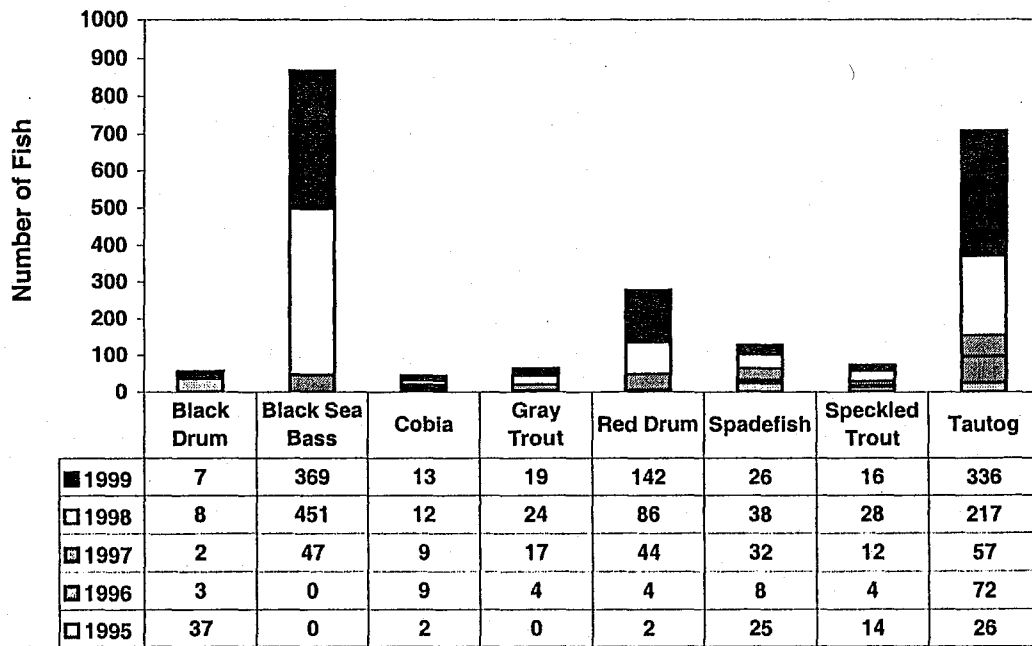

Figure 2.

Number of Recapture Events

NOTEWORTHY OBSERVATIONS, 1999

(DAL = Days at large since fish tagged/released and recaptured. Days at large show site affinity, but do not necessarily imply that fish remained at sites the entire time between release and recapture.)

BLACK SEA BASS

- **Approximately 81% of black sea bass recaptured in 1999 were caught at their initial tagging site. Significant examples include:**

(1) 4A Drydock Wreck

143 recapture events for sea bass tagged at this site between 8/98 and 11/99 occurred in 1999. Of these 143 recapture events, 137 recapture events (96%) occurred at this site: 126 recapture events occurred between 0-127 DAL and 12 recapture events occurred between 244-456 DAL.

(2) CBBT Islands

32 recapture events for sea bass tagged at these sites between 10/98 and 10/99 occurred in 1999, of which 26 events (81%) involved fish recaptured at the same island where released after 4-70 DAL.

(3) Chesapeake Light Tower Reef

33 recapture events for sea bass tagged at this site between 11/98 and 10/99 occurred in 1999, of which 26 events (79%) involved fish recaptured at this site between 6-95 DAL (18 events) and 136-458 DAL (8 events).

- **Approximately 15% of black sea bass recaptured in 1999 were caught at sites less than 10 nm away from sites where these fish were tagged and released. Significant examples include:**

(1) 4A Drydock Wreck

- A sea bass tagged and released at this site on 7/31/99 was recaptured at this site on 9/25/99 (56 DAL), re-released, then recaptured at the offshore Airplane Wreck on 11/4/99 (40 DAL).
- A sea bass tagged and released at this site on 11/29/98 was recaptured at the Santore Wreck on 6/5/99 (188 DAL).
- A sea bass tagged and released at this site on 6/8/99 was recaptured at the Dump Site Bouy on 7/20/99 (42 DAL).

(2) Cape Henry Wreck

Of 6 sea bass tagged and released on 5/5/99 and recaptured, 5 were recaptured inside Lynnhaven Inlet between 28-31 DAL (3 sea bass) and 52-73 DAL (2 sea bass).

(3) CBBT, 3rd Island

A sea bass tagged and released on 9/5/99 was recaptured in Lynnhaven Inlet on 10/3/99 (28 DAL).

(4) Hanks Wreck

Of 24 sea bass tagged and released between 9/19/99 and 10/2/99 and recaptured, 5 moved south to the 4A Drydock Wreck between 6-33 DAL.

- **Approximately 4% of black sea bass recaptured in 1999 were caught at sites ≥ 10 nm away from sites where these fish were tagged and released. Significant examples include:**

<u>Released</u>	<u>Location</u>	<u>Recaptured</u>	<u>Location</u>	<u>Days Out</u>
09/19/99	Hank's Wreck	11/07/99	Triangle Wrecks	49
09/12/99	4A Drydock	10/31/99	Corolla, NC	49
10/11/99	CBBT, 2 nd Island	12/12/99	Tiger Wreck	62
05/31/99	CHLT	08/04/99	Atlantic Beach, NC	69
7/31/99	4A Drydock	10/16/99	Triangle Wrecks	77
11/22/99	CHLT	03/22/99	The Cigar	100
06/30/99	Sand Shoal Inlet	10/29/99	Marine Electric Wk, MD	121
05/31/99	CHLT	10/30/99	Atlantic Mist Wk, MD	152
11/09/98	Santore Wreck	04/20/99	Spring Chicken Wreck	162
10/19/98	CBBT, 1 st Island	04/10/99	The Fingers	173
03/17/99	CHLT	09/21/99	Off Chincoteague, MD	188

- **More than 50 multiple recapture events of the same tagged sea bass were recorded in 1999. These events document that proper catching, handling, and releasing small sea bass can result in high survival and is useful in evaluating the effectiveness of minimum size limit restrictions. Significant examples of multiple recapture events of the same tagged sea bass in 1999 include:**

(1) Five recapture events for the same sea bass

A sea bass (9.75" TL) tagged at the New Point Comfort Rockpile on 9/24/99 was recaptured at the same site on 10/2/99 (8 DAL). This fish was re-released with the tag in place and subsequently recaptured at the same site four more times: 10/29/99 (27 DAL), 10/30/99 (1 DAL), 10/31/99 (1 DAL), and 11/18/99 (18 DAL). Total days at large between initial release and last recapture was 55.

(2) Three recapture events for the same sea bass

- A sea bass (9.00" TL) tagged at the 4A Drydock Wreck on 6/8/99 was recaptured at the same site on 7/16/99 (38 DAL). This fish was re-released with the tag in place and subsequently recaptured at the same site on 7/17/99 (1 DAL) and 9/12/99 (57 DAL). Total days at large between initial release and last recapture was 96.
- A sea bass (10.00" TL) tagged at the 4A Drydock Wreck on 7/17/99 was recaptured at the same site on 7/31/99 (14 DAL). This fish was re-released with the tag in place and subsequently recaptured at the same site the same day and then on 9/25/99 (56 DAL). Total days at large between initial release and last recapture was 70.
- A sea bass (8.50" TL) tagged at the Chesapeake Light Tower Reef on 12/6/98 was recaptured at the same site on 4/25/99 (140 DAL). This fish was re-released with the tag in place and subsequently recaptured at the Santore Wreck on 5/5/99 (10 DAL), then recaptured again at an unknown location on 9/11/99 (129 DAL). Total days at large between initial release and last recapture was 279.

(3) Two recapture events for the same sea bass

50 sea bass (7.50-13.50" TL) were recaptured two times in 1999 between 0-382 DAL. Of these 48 events, 32 events involved sea bass initially released at the 4A Drydock Wreck and recaptured at this site 30 out of 32 times (1-292 DAL).

TAUTOG

- **Approximately 91% of tautog recaptured in 1999 were recaptured at the same sites where these fish were originally released. Significant examples include:**
- (1) Cape Henry Wreck**
47 recapture events for tautog tagged at this site between 11/98 and 11/99 occurred in 1999, of which 46 events (98%) involved tautog recaptured at this site between 10-90 DAL (24 events) and 138-361 DAL (22 events).
 - (2) Chesapeake Bay Bridge Tunnel Islands and Vicinity**
54 recapture events for tautog tagged and released at these sites between 6/98 and 11/99 occurred in 1999, of which 51 events (94%) involved tautog recaptured in this vicinity between 2-46 DAL (19 events), 159-303 DAL (17 events), and 362-692 DAL (15 events).
 - (3) Off Cape Charles, VA**
63 recapture events for tautog tagged and released at several sites off Cape Charles harbor between 12/97 and 10/99 occurred in 1999, of which 57 events (90%) involved tautog recaptured within 3 nm from sites where fish were originally released. Of these events, 42 occurred between 0-174 DAL, 13 occurred between 211-382 DAL, and two events occurred after more than 2 years (682, 737 DAL).
 - (4) New Point Comfort Rockpile**
46 recapture events for tautog tagged and released at this site in Mar-Apr 1999 and Sep-Oct 1999 occurred in 1999, of which all recapture events with known recapture locations occurred at this site between 1-63 DAL (18 events) and 165-232 DAL (19 events).
 - (5) Westmoreland Wreck**
36 recapture events for tautog tagged and released at this site between Mar-May 1999 occurred in 1999, of which 32 events (89%) involved tautog recaptured at this site between 9-74 DAL (30 events), 127, or 192 DAL.
- **Approximately 5% of tautog recaptured in 1999 were caught at sites less than 10 nm away from sites where these fish were tagged and released. Significant examples include:**
- (1) Back River Artificial Reef**
A tautog (12.50" TL) released here on 10/30/99 was recaptured at Fort Wool on 12/4/99 (35 DAL).
 - (2) Cape Henry Wreck**
A tautog (13.75" TL) released here on 4/11/99 was recaptured at CBBT, 1st Island on 5/6/99 (25 DAL).
 - (3) Cape Charles, VA**
Three tautog (12.50, 14.00, 18.50" TL) released off Cape Charles harbor in Oct-Nov 1998 were recaptured near Cherrystone Reef in Apr 1999 (168 DAL) and Oct 1999 (354, 383 DAL).
 - (4) Westmoreland Wreck**
Three tautog (11.75, 14.00, 15.00" TL) released at this site in Feb 1999 were recaptured at the Cape Henry Wreck in Mar 1999 (21-26 DAL).

- **Approximately 4% of tautog recaptured in 1999 were caught at sites ≥ 10 nm away from sites where these fish were tagged and released. Significant examples include:**

Released	Location	Recaptured	Location	Days Out
05/05/99	Back R. Reef	05/28/99	CBBT, 4 th Island	23

- **More than 30 multiple recapture events of the same tagged tautog were recorded in 1999. These events document that proper catching, handling, and releasing can result in high survival and is useful in evaluating the effectiveness of minimum size limit restrictions. Significant examples of multiple recapture events of the same tagged tautog in 1999 include:**

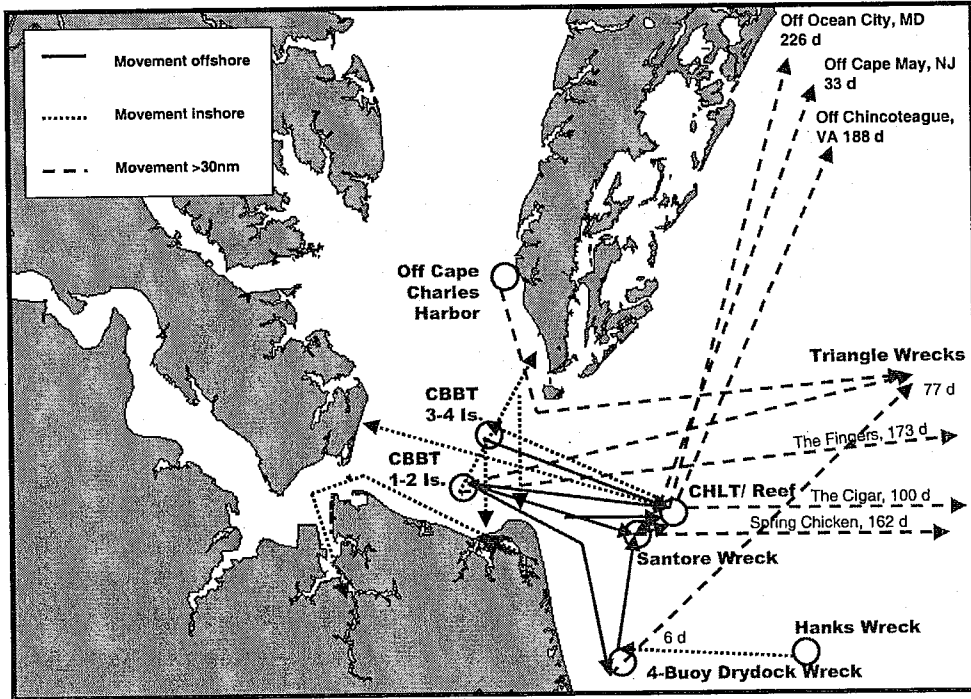

(1) Three recapture events for the same tagged tautog

- A tautog (11.00" TL) tagged at an unnamed wreck 27 nm east of Cape Henry on 4/27/97 was recaptured at the Katy Brown Wreck on 6/26/98 (425 DAL). This fish was re-released with the tag in place and subsequently recaptured at the Turn of the Century Wreck on 11/20/98 (147 DAL), re-released a second time, then recaptured a third time back at the Katy Brown Wreck on 12/31/99 (406 DAL). Total days at large between initial release and last recapture was 978.
- A tautog (12.50" TL) tagged at the Turn of the Century Wreck on 3/31/98 was recaptured at the same site on 4/3/98 (3 DAL). This fish was re-released with the tag in place and subsequently recaptured again at the same site two more times: 7/3/98 (91 DAL) and 5/31/99 (332 DAL). Total days at large between initial release and last recapture was 426.

(2) Two recapture events for the same tagged tautog

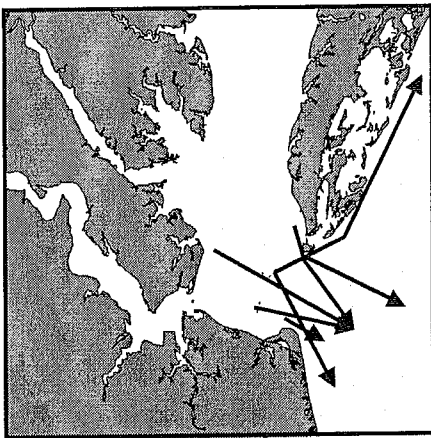

- 5 tautog (12-13.50" TL) previously tagged and recaptured in 1997 and 1998 were recaptured for a second time in 1999. All tautog (initially released at the Concrete Ships, Cape Henry Wreck, Turn of the Century Wreck, and Cape Charles, VA) were recaptured for a second time at respective release sites (or within 5 nm of initial release sites) in 1999 (Total DAL = 173, 294, 321, 349, and 526).
- 25 tautog (9.50-16.50" TL) tagged and released primarily near the mouth of the Chesapeake Bay (Cape Henry Wreck, Westmoreland Wreck) and the New Point Comfort Rockpile were recaptured twice in 1999 (0-289 DAL).

SIGNIFICANT SEABASS MOVEMENT (1995-1999)

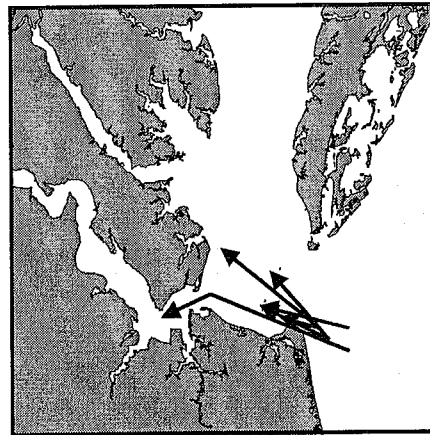

INSHORE AND OFFSHORE MOVEMENT OF TAUTOG, 1995-1999

Inshore to Offshore

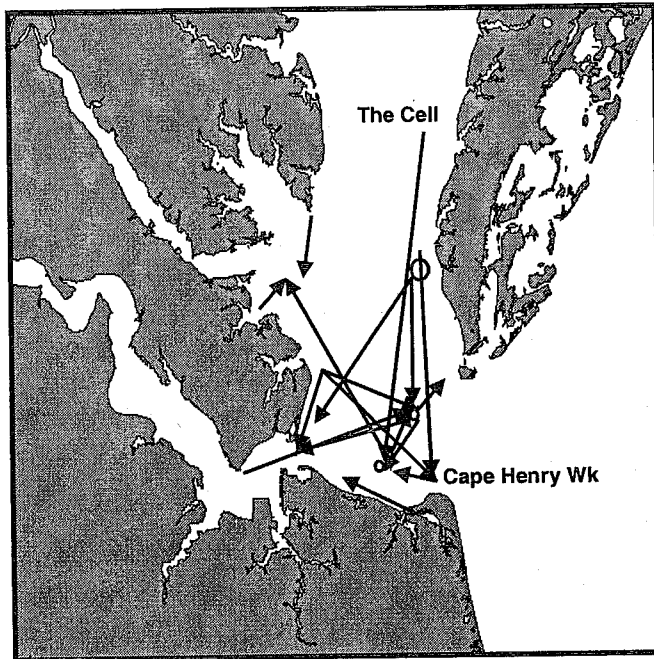

- N = 13 Recapture Events
- 21 to 333 Days Later

Offshore to Inshore

- N = 11 Recapture Events
- 21 to 731 Days Later

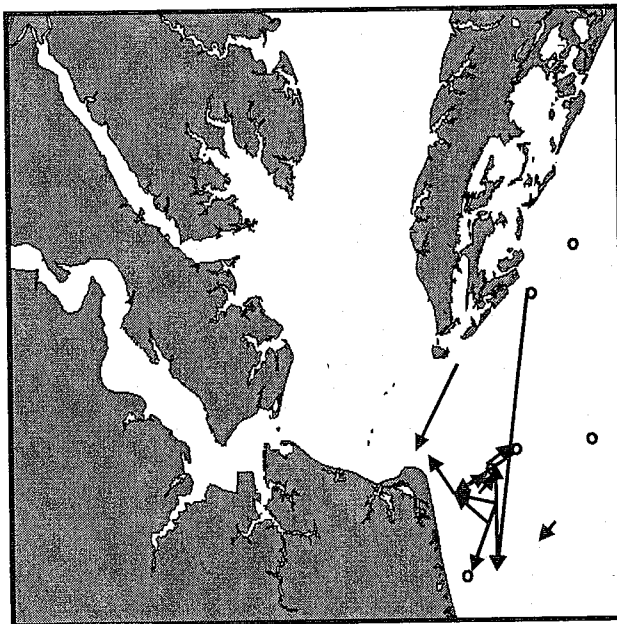

MOVEMENT OF TAUTOG WITHIN INSHORE AREA, 1995-1999

- N = 64 Recapture Events
- 0 to 682 Days Later

○ = <3 nm movement

MOVEMENT OF TAUTOG WITHIN OFFSHORE AREA, 1995-1999

- N = 27 Recapture Events
- 29 to 618 Days Later

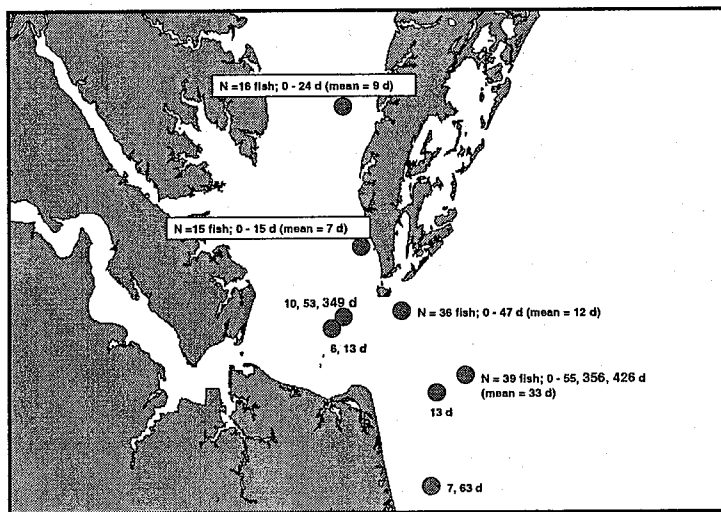

○ = <3 nm movement

SPADEFISH

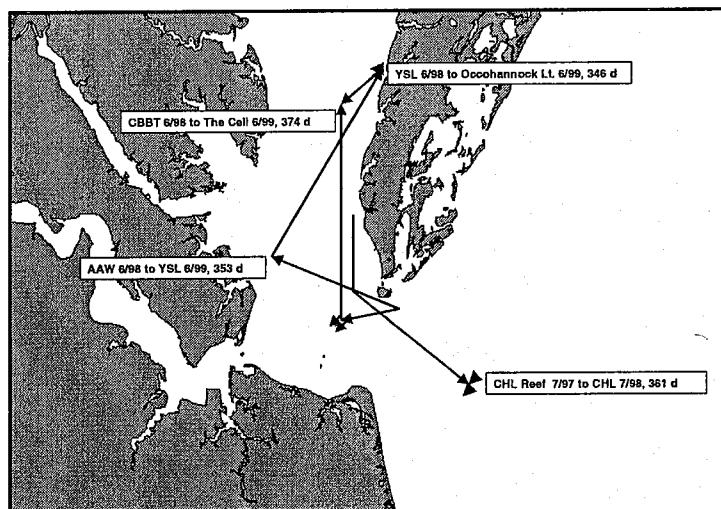

- **Recapture events for spadefish in 1999 documented regional and site affinity with return of individual spadefish to the same or nearby sites more than one year after tagging**

Released	Location	Recaptured	Location	Days Out
6/27/98	York Spit Light	6/8/99	Ocohanock Range Light	346
7/25/98	CBBT, 4th Island	7/9/99	CBBT, 4th Island	349

SPADEFISH SITE AFFINITY (1995-1999)

SPADEFISH MOVEMENT AND REGION AFFINITY (1995-1999)

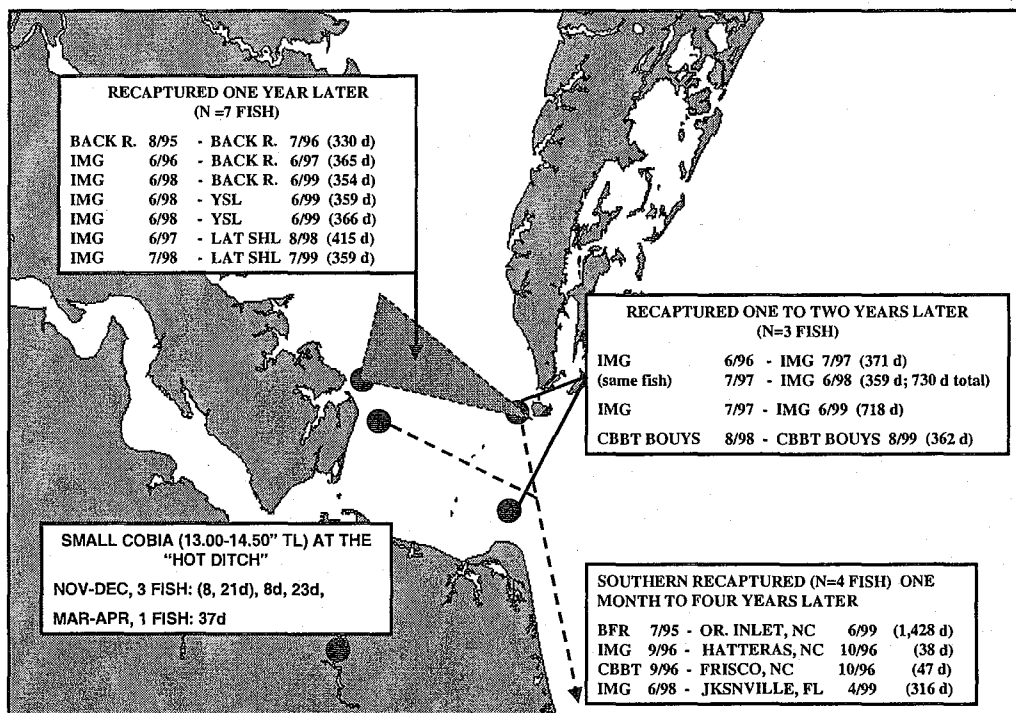

COBIA

- **Recapture events in 1999 continue to document regional and site affinity of cobia in Chesapeake Bay during summer months**
 - 7 cobia tagged and released in lower Chesapeake Bay in summer 1998-1999 were recaptured in lower Chesapeake Bay in summer 1999.
 - 2 cobia tagged and released in lower Chesapeake Bay in summer 1997 were recaptured in lower Chesapeake Bay in summer 1999.
 - A cobia tagged and released in lower Chesapeake Bay in summer 1995 was recaptured in lower Chesapeake Bay in summer 1999.

- **Recapture events for cobia continue to document north-south migration routes**
 - A cobia tagged in Chesapeake Bay in June 1998 was recaptured off Jacksonville, FL, in April 1999 (316 DAL)
 - A cobia tagged in Chesapeake Bay (Bluefish Rock) in July 1995 was recaptured 4 nm east of Oregon Inlet, NC, in June 1999 (1,428 DAL)

- **Recapture events for cobia in 1999 continue to document short-term utilization and over-wintering of small cobia at the "Hot Ditch" in the southern branch of the Elizabeth River.**
 - A cobia (14.5" FL) released at the "Hot Ditch" in Dec 1998 was recaptured at the "Hot Ditch" in Jan 1999 (23 DAL).
 - A cobia (13.0" FL) released at the "Hot Ditch" in Mar 1999 was recaptured at the "Hot Ditch" in Apr 1999 (37 DAL).

SIGNIFICANT COBIA RECAPTURE EVENTS (1995-1999)

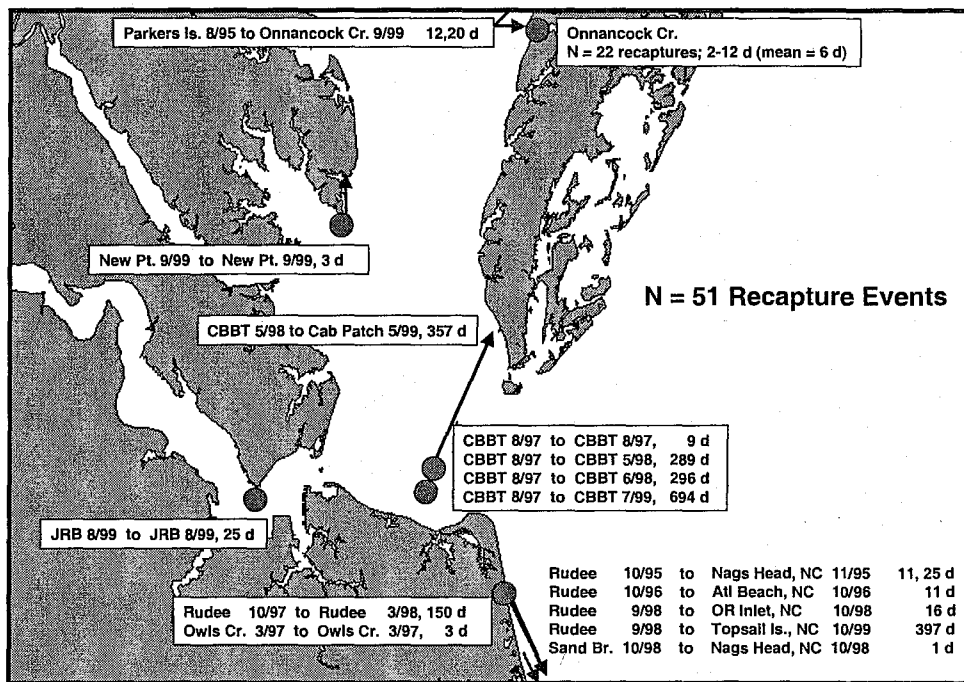

BLACK DRUM

- Directed southerly movement of small black drum from VA to NC was documented for a single black drum (8.0" TL) in 1999 (fish released in Rudee Inlet on 9/26/98 and was recaptured at Topsail Island, NC on 10/28/99, 397 DAL).
- Continued documentation of long-term affinity of small (<20" TL) and large (>40" TL) black drum to Chesapeake Bay was observed from 3 of 6 recapture events in 1999.

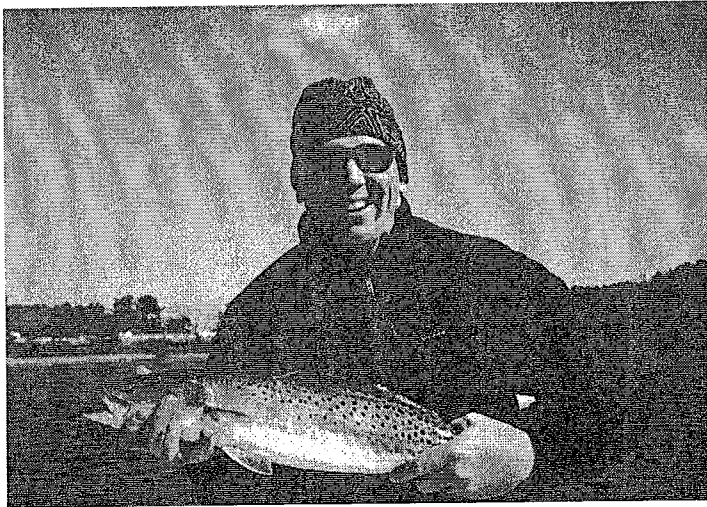

Released	Location	Recaptured	Location	Days Out
6/12/98	York River (lower)	2/1/99	James River – Hog Island	234
5/28/98	CBBT, 2nd Island	5/20/99	Cabbage Patch (C4 Buoy)	357
8/30/97	CBBT, 1st Island	7/25/99	CBBT, 1st Island	694

BLACK DRUM MOVEMENT AND REGION/SITE AFFINITY (1995-1999)

SPECKLED TROUT

- A speckled trout (15.50" TL) released in Plantation Creek on 10/13/95 was recaptured in northern Pamlico Sound 11/8/99 (1,487 DAL), the longest DAL for any species in the VGFTP to date.
- 7 of 16 recaptures in 1999 continued to document residence (10-68 DAL) of small and large speckled trout (9.00-20.50" TL) at the "Hot Ditch" in winter.
- A speckled trout (26.50" TL) tagged and released at the Hot Ditch on 12/26/98 was recaptured in the lower Potomac River on 7/28/99 (214 DAL). This event documents long-distance movement out of the "Hot Ditch" into the Bay during the same time that speckled trout are moving into Chesapeake Bay.

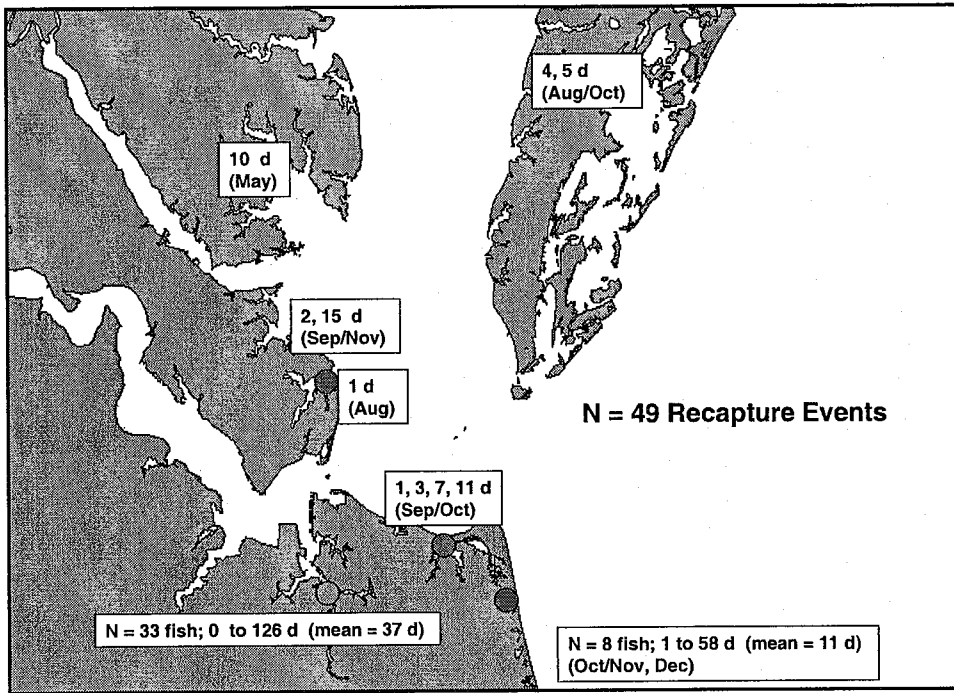

VGFTP tagger Kevin DuBois prepares to release a 26.00" TL speckled trout that he caught on a fly at the "Hot Ditch" in winter 1999. Tag-recapture data in 1999 continued to document short-term residence of speckled trout at this site during the winter.

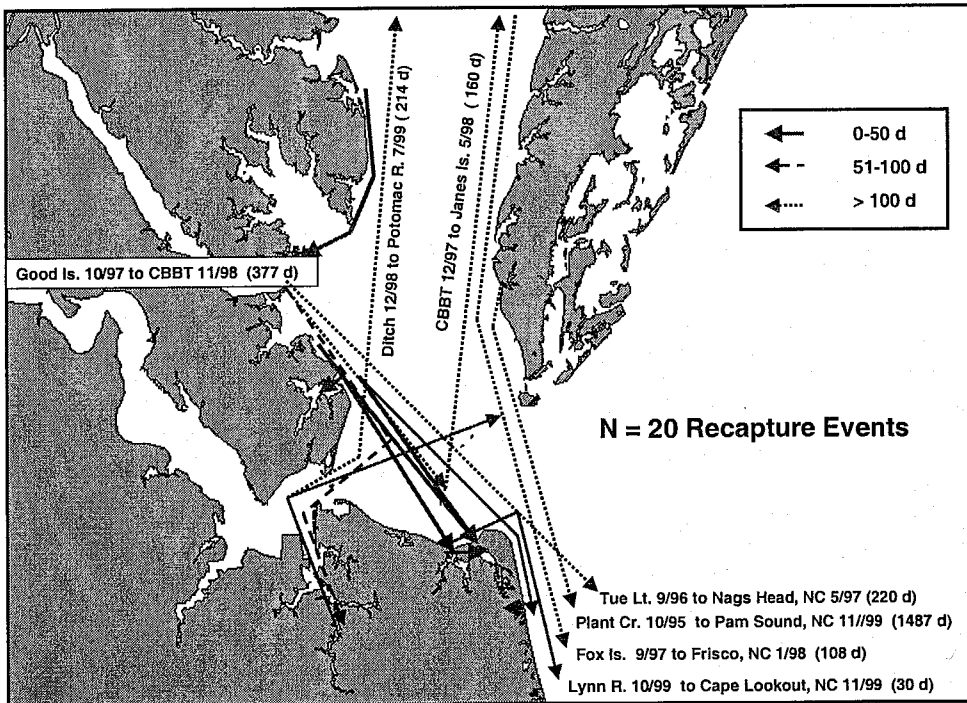

RED DRUM

- **21 recapture events (including three double recaptures) in 1999 continue to document extended residence at the "Hot Ditch" by small red drum (12.50-21.25" TL) from Nov – Apr; Two additional recapture events document extended residence of drum (18.00-25.00" TL) at the "Hot Ditch" in July.**
- **22 recapture events in 1999 continue to document movement of small red drum (15.00-18.00" TL) from Rudee Inlet in Apr-May into the Chesapeake Bay in spring and summer. Significant examples include:**
 - A red drum (17.50" TL) released at Rudee Inlet on 5/5/99 was recaptured at this site on 5/9/99 (4 DAL), re-released with the tag in place, then recaptured at the Goodwin Islands on 8/4/99 (87 DAL).
 - A red drum (16.00" TL) released at Rudee Inlet on 4/15/99 was recaptured at Plumtree Flats on 6/1/99 (47 DAL).
- **67 recapture events for red drum released at Rudee Inlet (primarily in April) document extended residence at this location by red drum (13.00-27.00" TL) in all seasons.**
- **16 recapture events for red drum in 1999 continue to document directed, southerly movement of fish from Virginia to North and South Carolina in fall. Significant examples include:**
 - A red drum (11.50" TL) tagged in Fleet's Bay on 8/26/99 was recaptured at a fishing pier in Kitty Hawk, NC on 9/11/99 (16 DAL).
 - A red drum (20.00" TL) tagged at Rudee Inlet on 8/22/99 was reported recaptured by a commercial fisherman in South Carolina on 10/29/99 (68 DAL).
 - A red drum (17.00" TL) tagged at Poquoson Flats on 10/2/99 was recaptured at the research pier in Duck, NC on 10/16/99 (14 DAL).

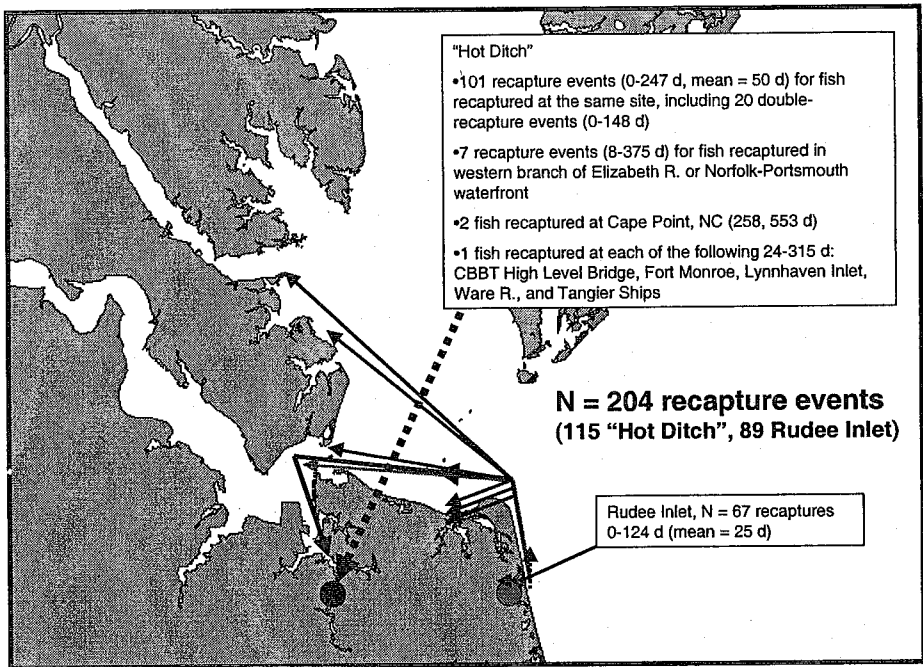

SPECKLED TROUT SITE AFFINITY (1995-1999)

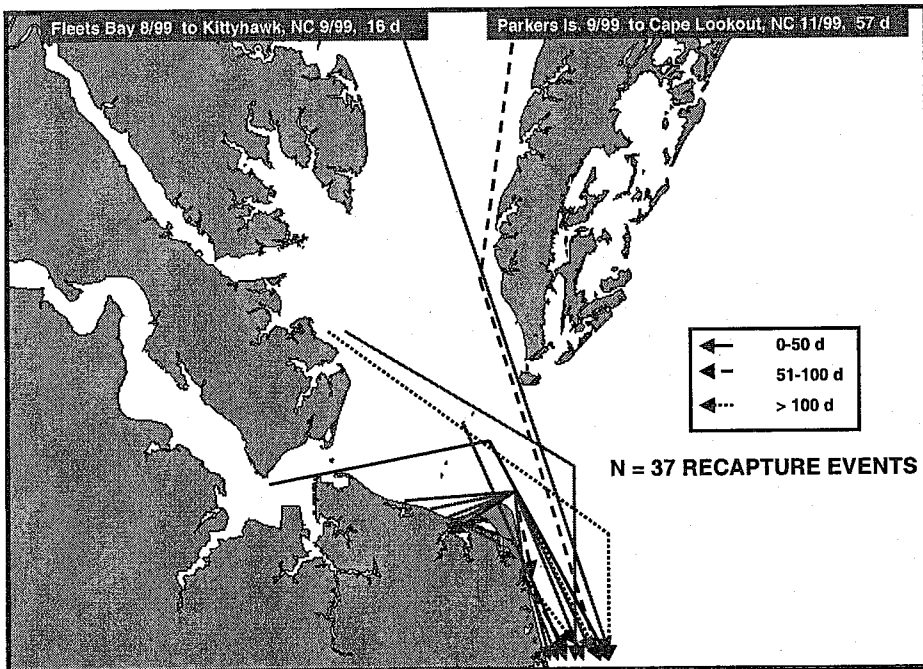

SPECKLED TROUT MOVEMENT (1995-1999)

DIRECTED MOVEMENT OF RED DRUM INTO CHESAPEAKE BAY AND RESIDENCE AT THE "HOT DITCH", 1995-1999

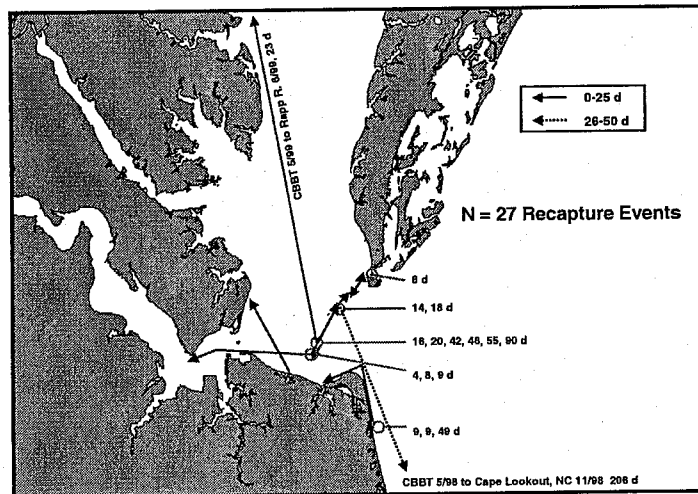

DIRECTED SOUTHERLY MOVEMENT OF RED DRUM FROM CHESAPEAKE BAY TO NORTH AND SOUTH CAROLINA, 1995-1999

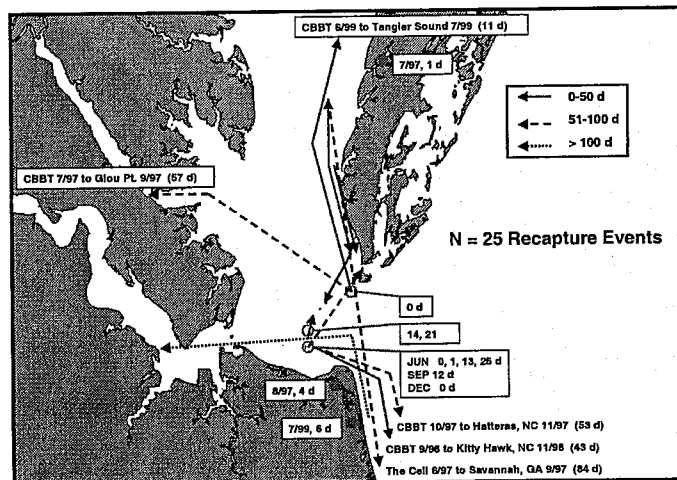

GRAY TROUT

- **Recapture rate for gray trout continued to be less than 1% in 1999, and this species was dropped from the program beginning June 1999.**
- **3 recapture events for gray trout in 1999 documented rapid movement of tagged individuals from the Bay mouth to the middle Bay.**
 - A gray trout (16.00" TL) tagged at the CBBT, 2nd Island on 5/27/99 was recaptured in the lower Rappahannock River on 6/19/99 (23 DAL).
 - A gray trout (14.00" TL) tagged at the CBBT 12 mile post on 6/30/99 was recaptured in Tangier Sound on 7/11/99 (11 DAL).
 - A gray trout (19.00" TL) tagged at Rudee Inlet on 5/8/99 was recaptured at Lynnhaven Inlet on 5/25/99 (17 DAL).
- **6 gray trout tagged and released at the First, Second, and Fourth CBBT Islands in May-June 1999 were recaptured at the same sites where released between June-August 1999 (16-90 DAL).**

WHAT TO DO WHEN YOU CATCH A TAGGED FISH

1. **The most important information on a tag is the tag number.** This is the key to identifying the fish. It is critical to record the exact tag number.
2. **If you plan on releasing the fish, quickly write down the tag number, measure or estimate the fish's length, then gently release the fish with the tag in place.** Multiple recaptures of a tagged fish are particularly valuable to the tagging program. If you keep the fish, remove the tag for reporting purposes. In either case, **contact the tagging office with the tag information (757-491-5160).**
3. **Measure and record both the total length and fork length of the fish, or estimate the length if you do not have a measuring device.** Provide an estimated weight for the fish.
4. **Record the species of fish, date of catch, and exact location where the fish was caught.**
5. **Record any information about the fish which could be useful; for example, any unusual markings or wounds.**
6. When you report the recapture of a tagged fish, you will be provided with information about the fish (when and where it was tagged; size when tagged) and **you will also be given a logo award from the Virginia Game Fish Tagging Program.**

HANDLING AND RELEASING FISH

1. **Plan ahead.** Minimize stress and exhaustion by using tackle strong enough to land fish quickly. Set hooks quickly to minimize the opportunity for fish to swallow hooks and avoid the use of treble hooks. When practical, bend down the barbs on hooks or use barbless hooks.
2. **Minimize the handling of fish, and do not touch the eyes or gills.** Large fish are best released by leaving them in the water and removing the hooks. Small fish should be brought on board and handled with a damp towel or damp cotton gloves, which will minimize damage to the skin and protective slime of fish. Control the fish, gently but firmly so it cannot "flop" around and cause itself any further injury. Do not use a gaff.
3. **Use the right tools to remove the hooks.** Needlenose pliers work well for fish hooked in the mouth, while a deep-throat dehooker or disgorger should be used for deeply hooked fish. Cut the leader close to the fish's mouth if hook removal is not possible. Never pull or jerk on the leader to remove a hook.
4. **Release fish gently, and if the fish is stressed or exhausted, revive it by gently moving it forward through the water until it is able to swim off.**

In the interest of good sportsmanship and good conservation...keep only what you need...release the rest.
