Datum comes from N.E. corner of ST 4.

1) STAKE 3 METERS N of NE CORNER ST 4 Azimuth, 42°

600E/01 NE CORNER of unit is 3m N of DATUM at 42°  
.50 x .50 x .50 METER TP 0-20cm BGS

STEVE MESSES UP  
AND GIVES ME MY  
OWN PIT TO DIG.

STEVE + VANESSA START TO DIG BECAUSE OF OUR lethargic DESPALIO WORKERS

600F/01 3 METERS N of DATUM, 5 METERS WEST Azimuth 311° 5 METER WEST  
0-20 cm BGS .50 x .50 x .50

SHERDS collected (small BAG) NOT AS MUCH AS FOUND IN 600E/01  
less tumble as well some cow shit.

600F/02 SAME LOCATION AS 600F/01 20-40cm BGS.  
shards collected (more than at 01, NOT much tumble -  
medium size Baggy shards.

600F/03 SAME LOCATION AS 600F/01, 02 40-60 cm BGS.  
medium size Bag of Shards collected, not a Tumble (a few RIVER cobbles  
~~possible surface at~~ much found)

~~600G/01 3 meters N of DATUM and 10 METER WEST of DATUM  
West 10 meters Azimuth 311°  
West location 10-20 cm BGS .50 x .50 x .50~~

600F/04. same location as 600F/01-3 possible ~~ground~~  
surface at 60 cm below (S). This lot is MADE TO describe  
and collect shards found ON this possible surface,  
a lot of Rocks flat surface, ground is much harder.

60cm  
B6S

shards at this level <sup>stuck in the ground</sup> are in lot 4 of 600F to keep them separate from the rest of Lot 600F/03 which contains shards found ~~in~~ <sup>in</sup> 40-60 cm B6L.

## FINAL NOTES

This TP was dug almost 60cm down where we reached a possible surface floor with shards and came to a soil level where river cobbles began to appear (3 level) lot 03/04. we used 4 lots to separate this TP ~~into~~ one for each 20cm down and a 4th for the surface found at the bottom of the test pit. shards were found and collected from each level.

Well the days over STEVE FOUND THE TRIPOD I MANAGED TO SPEAK SPANISH AND HAVE A GOOD TIME. THIS IS NOT HALF AS TIRING AS SURVEY BUT MUCH MORE FUN. I DID MY OWN TEST PIT! IT'S BEEN A GREAT DAY EXCEPT FOR THE WASP BITES.

**WARNING POSTED: WHEN VISITING THIS SITE BEWARE OF KILLER WASPS AT MOUND 8 ON THE EAST SIDE**

WARRING (CITIZEN) WHEN VISITING THE SITE OF WARRING  
RIVER WARRING AT MOUND 8 ON THE EAST SIDE

SITE 415 Land of Jiami Rosenthal

SITE CONSISTS OF 3 MOUNDS MADE OF MEDIUM TO LARGE ANGULAR ROCKS used for hills. (Limestone) structure visibility is ~~good~~ <sup>fair</sup> surface visibility is POOR. Ground cover is medium scrub growth. A few small trees are growing on and around the structures. Structures are well preserved. Structure 3 has a tree growing from the top structure 2 has a tree on the South side structure 2 has a partial terrace.

there is a 5 mound cluster area  
2 mound cluster in the east field.

This site is 300 meters through the hill to the south of site 414. a large hill stands to the north between the sites. The structures sit on a rise ~~to the~~ that slopes steeply down 2 meters <sup>on</sup> the north side of the site.

There are hills directly to the south at the edge of the site approx. 25 meters from transit. The hill separating 414 from 415 to the north is 100 meters away. to north.

They are plowing the two fields to the east. Field looks deep and brown

~~the surface collection~~ SURFACE COLLECTION MADE, SOME SHEEPS, some obsidian

~~East of these 3 structures at the top they are 2 mounds lower than these. Shards were collected~~

~~There is a road~~ The drop off to the N and NE use to be part of a cabrada in the field to the east of the S structure there are more lower structures, also made of medium to large cobbles. although in a plowed field structures are well preserved w/ good lines. 2 ROCK CONCENTRATIONS FOUND

They are set back 20 meters from group of 5 and 30 meters from edge of terrace to the north. R concentration found remains of but it's been plowed.

PVN 91-42-20  
7.2-91

~~Site #15~~  
~~2nd rock concentration~~

Site 420 land owned by Janice Rosenthal.

low scrub grass field used for grazing has been heavily plowed in the past. There is a drainage ditch running NW ↔ SE cutting into ST 1. Structure preservation is fair. Structures are primarily made of medium to large angular stones limestone and ~~marble~~ marble.

Terrain is rising up to the hill Northwest of us.

There are hills to the North and West

Site is in ~~the~~ a cal da sac, an indentation surrounded by hills on the North and West ground drop gradually eastward into flatland. scattered large angular rocks on hills.

Soil is dark brown, kind of soil forming on limestone.

Site visibility - structure visibility is good.  
artifact visibility - ground visibility is poor.

a surface collection was made.

We are 100 meters ~~SW~~ to the NE of ~~the~~ site 420
