MT VERNON, OHIO

When Your Neighbor's House Burns—

When fire springs up in a neighboring building—is your home safe? Will flying sparks and brands drop on your roof and die out harmlessly—or will they kindle your roof to flames and contribute your home to another dreaded community conflagration?

If there are buildings anywhere near you, and if your home is covered with inflammable roofing, you are not safe from the menace of roof-communicated fire. Your home is recognized by town, city, state and insurance authorities as a fire risk—a danger to you and your family.

But through Asbestos, Johns-Manville offers you safety—a shingle roof which cannot burn—a positive barrier to roof-communicated fire. This shingle roof not only takes a base rate of insurance but should last as long as the building it covers. It enhances the architectural appearance of your home and gives you the cheapest per year service of any roofing obtainable.

An investment in Johns-Manville Asbestos Shingles for your home is both a contribution to civic safety and to individual economy. Your money is returned to you many times over in safety, appearance, long life and remarkably low upkeep.

Let us show you samples and give you estimate.

Cooper Gas Engines Pump Gas To Heat Ohio Homes

Many of these Cooper gas engine pumping units are expected to run twenty-four hours a day, winter and summer, with only a brief rest of a few days during each year for a general tuning up. Cooper engines lead in this field where reliability is of prime importance.

The photograph reproduced above shows one Cooper 80 and six 160 B. H. P. gas engines driving gas compressors in Ohio Fuel Company's Brown Station near Jelloway, Ohio.
