# Technical Appendix: Economic Impact of Commercial Fisheries on Local County Economies from Catch in California National Marine Sanctuaries 2010, 2011 and 2012

## **Abstract**

This report documents the data and methods of estimation used in estimating the economic impact of commercial fishing catch from all four National Marine Sanctuaries in California on local county economies in terms of harvest revenue received by fishermen and the associated economic impacts, including multiplier impacts, on total output, value added, income and the number of full- and part-time jobs.

This report is part of a series of reports meeting the priorities in the “Office of National Marine Sanctuaries (ONMS) West Coast Region Socioeconomic Plan FY 2013 – FY 2014” and “national program priorities” on establishing the connection between sanctuary resource uses and local, regional and national economies. This report documents how economic impact estimates were made for the commercial fisheries in all four California National Marine Sanctuaries (NMS); Cordell Bank, Channel Islands, Gulf of the Farallones, and Monterey Bay.

### *About the Marine Sanctuaries Conservation Series*

*The Office of National Marine Sanctuaries, part of the National Oceanic and Atmospheric Administration, serves as the trustee for a system of 14 marine protected areas encompassing more than 170,000 square miles of ocean and Great Lakes waters. The 13 national marine sanctuaries and one marine national monument within the National Marine Sanctuary System represent areas of America's ocean and Great Lakes environment that are of special national significance. Within their waters, giant humpback whales breed and calve their young, coral colonies flourish, and shipwrecks tell stories of our maritime history. Habitats include beautiful coral reefs, lush kelp forests, whale migrations corridors, spectacular deep-sea canyons, and underwater archaeological sites. These special places also provide homes to thousands of unique or endangered species and are important to America's cultural heritage. Sites range in size from one square mile to almost 140,000 square miles and serve as natural classrooms, cherished recreational spots, and are home to valuable commercial industries.*

*Because of considerable differences in settings, resources, and threats, each marine sanctuary has a tailored management plan. Conservation, education, research, monitoring and enforcement programs vary accordingly. The integration of these programs is fundamental to marine protected area management. The Marine Sanctuaries Conservation Series reflects and supports this integration by providing a forum for publication and discussion of the complex issues currently facing the sanctuary system. Topics of published reports vary substantially and may include descriptions of educational programs, discussions on resource management issues, and results of scientific research and monitoring projects. The series facilitates integration of natural sciences, socioeconomic and cultural sciences, education, and policy development to accomplish the diverse needs of NOAA's resource protection mandate. All publications are available on the Office of National Marine Sanctuaries Web site (<http://www.sanctuaries.noaa.gov>).*

## **Introduction**

This report is part of a series of reports meeting the priorities in the “*Office of National Marine Sanctuaries (ONMS) West Coast Region Socioeconomic Plan FY 2013 – FY 2014*” and “national program priorities” on establishing the connection between sanctuary resource uses and local, regional and national economies. This report documents how economic impact estimates were made for the commercial fisheries in all four California National Marine Sanctuaries (NMS); Cordell Bank, Channel Islands, Gulf of the Farallones, and Monterey Bay. There are separate reports containing the results of the estimation for each NMS (Leeworthy et al 2013a, Leeworthy et al 2013b, Leeworthy et al 2013c, and Leeworthy et al 2013d). An additional report combines the results for all the NMS (Leeworthy et al 2013e).

## **Data Sources**

***Catch or Landings.*** For commercial fishing data, the California Department of Fish and Wildlife (CDFW) California Fishing Information System (CFIS) landings receipts database was used for years 2000 through 2012 (CDFW-CFIS 2013). The CDFW-CFIS contains daily landings by CDFW 10-minute by 10-minute blocks where the catch was made and by port and county where landed. Pounds and value of catch (revenue received by the fishermen) are also reported by species, gear used, and condition of catch when landed (e.g. live, dressed heads off, etc.). Additional information includes vessel identification and fisherman identification and length of vessel. The vessel identification and fisherman identification codes are recoded by CDFW to database arbitrary codes to protect privacy, but consistency over time is maintained so trends by vessel can be assessed as well as dependency on the fisheries inside and outside NMS. Appendices 1 - 4 contain the port, county, gear, and species codes provided by CDFW for the CFIS.

***Economic Model.*** For the economic model, the California Ocean Fish Harvester Economic (COFHE) Model (Hackett et al 2009) was used. This model is based on a survey of the commercial fishing industry. Cost-and-earnings were obtained by 20 “*Operational Categories*” or OCs. The OCs are key to the economic impact analyses. OCs are combinations of species, gear type, catch condition, and vessel length. Each OC has its own cost function and multipliers are derived from the IMPLAN Input-Output Model (MIG, Inc. 2010). CDFW provides the multipliers for translating harvest revenue landed in each county to the estimated economic impact for each county measured in total output, value added, labor income (wages & salaries plus proprietors’ income), property income, indirect business taxes, and employment (number of full- and part-time jobs). Although not presented here due to excessive length, the models for estimating economic impact for 2010, 2011 and 2012 are available from the authors in Microsoft Excel workbooks for each NMS.

***Economic Impact.*** Economic impact here is limited to the impacts of commercial fishing operations and the multiplier impacts from the spending in conducting their fishing operations.

The estimates underestimate the total economic impact because the COFHE Model used here did not include the processing, wholesaling, retail and restaurant market channels and market markups of the fish landed in each county. Only the costs of production from commercial fishing operations was included and the associated indirect and induced economic impacts (i.e. the ripple or multiplier impacts) of this spending. Although information on market channels and market-markups are presented in Hackett et al (2009), the information was not available at the county level to include in the COFHE Model.

The economic impacts estimated here relative to the “full” economic impacts will vary greatly by fishery and county of landings. For fisheries characterized by little processing, wholesaling, local retail sales and local restaurant sales, the differences will be small. In these cases, most of the landings are exported out of the county with little added value locally. Estimating the market channels and market mark-ups by county should be a high priority for the next version of the COFHE Model. In the peer review of this document, one of the authors in Hackett et al, 2009 argued that the COFHE Model was designed to estimate the impacts of management strategies and regulations and the effects on processing, wholesaling, retail and restaurant markets would be minimal since these sectors can easily substitute lost catch from other places and therefore there would be little, if any, impacts on local economies. The reviewer also admitted that this might be less true for some processors.

In Leeworthy et al, 2005, the Fishery Economic Assessment Model (FEAM) developed by the Pacific Fishery Management Council (PFMC 1999) was used to estimate the potential economic impacts of the network of marine reserves (no-take areas) in the Channel Islands National Marine Sanctuary (CINMS). FEAM multipliers were very similar to the COFHE Model’s in that the IMPLAN input-output model was used to derive multipliers defined in terms of income to harvest revenues. The FEAM multipliers were only done for income in each county by species/species groups instead of OCs as in the COFHE Model and the FEAM multipliers included all market channels (e.g. processing, wholesaling, retailing and restaurant sales).

In 1998, the CINMS multipliers for income to harvest revenue (ratio of income generated at all market levels divided by harvest revenue) ranged from 1.2 for most *Finfish* to 4.5 for *Market Squid*, while for *Crab* it was 2.8. The overall average was about 3.1, which was heavily influenced by *Market Squid* which accounted for 59% of CINMS harvest revenue. In comparison, the COFHE Model income multipliers for CINMS averaged about 1.00 for years 2010 through 2012. So the total economic impact could be three times higher than was estimated here using the COFHE Model for the CINMS. We don’t have the FEAM multipliers for the other ONMS sites in California, but given the dominance of *Market Squid* and *Dungeness Crab* in MBNMS, the total economic impact for MBNMS could also be about three times higher than estimated here. For CBNMS and GFNMS, which are more dominated by *Finfish* catch, the multipliers for total economic impact are likely lower, probably less than 2.0, so the estimates of total economic impact for these sanctuaries could be double that estimated here for total income generated.

## Chapter 1: Preparation of CDFW-CFIS Landings Data

### Missing Value of Catch Data

Not all records in the CDFW-CFIS landings receipts database are complete, some contain missing information on the harvest revenue or the value the fishermen receive often referred to as “ex vessel value” in the fishery economics literature. When pounds of catch were available, missing information on value was interpolated using the average annual price per pound by species. Interpolation was required of only a fraction of one percent of all records from 2000 through 2012.

### Conversion of Value to 2013 Dollars

All harvest values were adjusted for all years to 2013 dollars using the “Consumer Price Index for All Urban Workers 1982-84=100” (BLS 2013). Table 1.1 contains the conversion factors.

Table 1.1. Value Conversion Factors to 2013 Dollars

---

Year	CPI	CPI
	1982-84 = 100	2013=1.00
2000	172.2	1.3519
2001	177.1	1.3145
2002	179.9	1.2941
2003	184	1.2652
2004	188.9	1.2324
2005	195.3	1.1920
2006	201.6	1.1548
2007	207.3	1.1230
2008	215.3	1.0813
2009	214.5	1.0853
2010	218.05	1.0676
2011	224.9	1.0351
2012	229.6	1.0139
2013	232.8	1.0000

---

### Species/Species Groups

There are hundreds of species in the CDFW-CFIS database and each species has a three-digit code starting from “001” for *Tuna, yellow fin* to “999” *Fish, unspecified* (Appendix 1). To summarize catch by species/species groups for analyzing trends of the major fisheries, species

were organized into two sets of species/species groups; one for the Channel Islands National Marine Sanctuary (CINMS) that contained 27 species/species groups plus an *All Other* category and one for the other three NMS plus the expansion area which contained 23 species/species groups plus and *All Other* category. These two lists of species/species groups were a starting point for the analyses based on past reports and ONMS staff advice. These lists were altered after analyzing in detail the *All Other* category and results demonstrating that a particular species/species group was not significant. Some species/species groups in the *All Other* category were broken out, while others that were in the original list and were not significant were put in the *All Other* category. If value of landings (adjusted for inflation using the Consumer Price Index to 2013 dollars) was less than \$1,000, it was put in the *All Other* category.

For the CINMS, the species/species groups were organized to be consistent with what was done in Leeworthy et al (2003) and Leeworthy et al (2005) as part of the socioeconomic impact assessment of the marine protected areas in the CINMS. *Anchovies*, *Sardines* and *Mackerel* were aggregated into *Wetfish* in Leeworthy et al (2003) and in Leeworthy et al (2005). For the current analyses, all three species/species groups were broken out separately at the request of CINMS management/staff. There are many species of *Rockfish*. For CINMS, we maintained the aggregation of the species/species group *Rockfish*. However, three different groups were also created to reflect current management into *Shallow Nearshore Rockfish*, *Deeper Nearshore Rockfish* and *Shelf Rockfish*. The CINMS list of species/species groups that met the \$1,000 harvest value threshold for 2012 are listed in Table 1.2.

For the Cordell Banks National Marine Sanctuary (CBNMS), the Gulf of the Farallones National Marine Sanctuary (GFNMS), and the Monterey Bay National Marine Sanctuary (MBNMS) the list of species/species groups started out with a base list of 27 species/species groups and then was modified using the \$1,000 threshold for reporting. Some of the species/species groups were formed not just as groupings of species, but also gear type used (e.g. *Dover Sole-Thornyheads-Sablefish Trawl*, *Sablefish Non-trawl*, and *Dover Sole Non-trawl*). The species/species groups meeting the \$1,000 threshold for the CBNMS, GFNMS, and MBNMS are summarized in Table 1.3.

Table 1.2. Species/Species Groups for the CINMS

Species/Species Groups	Species Codes in Group Definition
Squid	710, 711
Urchin	752,753, 756
Spiny Lobsters	820
Crab	341, 342, 343, 800 to 809

1. Species Groups that were originally in the "All Other" category that were broken out because their value exceeded \$1,000.

Table 1.3. Species/Species Groups for the CBNMS, GFNMS, and MBNMS (continued)

Species/Species Groups	Species Codes in Group Definition	CBNMS	GFNMS	MBNMS
Bolina Rockfish <sup>1</sup>	957			x
CA Spiny Lobster <sup>1</sup>	818			x
Shrimp, Red Rock <sup>1</sup>	818	x	x	
Shrimp, coonstriped <sup>1</sup>	817	x		
Slope Rockfish <sup>1</sup>	975	x	x	x
All Other				

1. Species Groups that were originally in the "All Other" category that were broken out because their value exceeded \$1,000.

*Special Requests.* ONMS sites made a couple of special requests for species/species groups. For the CBNMS, *Groundfish* was created since this is a grouping that receives special management (Table 1.4).

Table 1.4. Groundfish Definition

Species/Species Group	Species Codes in Group Definition
Groundfish	147, 152, 153, 159, 166, 176, 177, 190, 195, 197, 198, 198, 200 to 273, 262, 290, 495, 651 to 679, 956 to 976

## Gear Types

CDFW-CFIS has 65 gear type codes (Appendix 2). Initially, eight gear type groups, plus an *All Other* category were formed based on ONMS management/staff advice. Preliminary analysis revealed too much of the catch was relegated to the *All Other* category, so several additional groupings were formed leading to 11 gear type groups, plus an *All Other*. A small percent, for which gear codes were missing, are reported as *Unspecified* (Table 1.5). It is also true that some gears have been restricted over time by fishery managers so some gear type groups that accounted for significant portions of catch in the early 2000s now account for insignificant portions of catch (e.g. trawling, set gill nets, and drift gill nets).

Table 1.5. Gear Type Groups

Gear Type Groups	Gear Codes In each Group <sup>1</sup>
1. Troll	07, 08, 09, 32
2. Pots & Traps	20, 21, 22, 25, 27
3. Longlines	03, 04, 05, 30, 31
4. Hook & Line	01, 02, 06
5. Hooka - diving	13, 14, 15, 18
6. Set Gill Nets	66
7. Trawl	33, 34, 47 to 59
8. Purse Seine	71
9. Other Seine - Dip Nets	35, 40, 73, 74, 78
10. Drift Net	65
11. Harpoon - Spear	12
	10, 16, 17, 19, 20, 23 to 26, 28, 36, 41, 42, 72, 80,
12. All Other	90, 91, 95
13. Unspecified	0

1. See Appendix 2 for gear codes.

### Port Complexes

CDFW-CFIS has 122 port codes for where fish are landed. Each port is assigned a three-digit code starting at 201 for Crescent City to 889 for Chula Vista (Appendix 3). The code sheet provided by CDFW also contains the county where the port is located. Each county is assigned a two-digit code starting with 01 for Alameda County and ending with 58 for Yuba County (Appendix 4).

For some summaries, ONMS management/staff wanted the information organized by “port complex”. Ports were organized into nine port complexes (Table 1.6).

Table 1.6. Port Complexes

Port Complexes	Ports in each Complex <sup>1</sup>
1. Eureka	Crescent City (201), Orick (204), Klamath (210), Albion (211), Arcata (212), Point Arena (213), Shelter Cove (215), Fields Landing, ( 217), Humboldt Bay (219), Eureka (220), Trinidad (231), King Salmon (246)
2. Fort Bragg	Elk (222), Fort Bragg (223), Little River (227), Westport (233), Anchor Bay (427)
3. Bodega Bay	Suisun City (325), Pittsburg (345), Timber Cove (424), Drakes Bay (437), Dillion Beach (441), Marshall (462), Bodega Bay (473), Inverness (474), Point Reyes (476), Tomales Bay (477), Bolinas (487), Marconi Cove (488)
4. San Francisco	Benicia (341), Martinez (348), Crockett (357), Fremont (401), Foster City (409), Glen Cove (412), Newark (417), Emeryville (425), San Leondro (430), Pacifica (439), San Francisco (440), Redwood City (442), Alviso (449), Pinole (450), Rodeo (451), Princeton-Half Moon (452), Vallejo (453), China Camp (455), Petaluma (459), Oakland (464), San Rafael (468), Sausalito (469), South San Francisco (470), Alameda (471), (471), Berkeley (472), richmond (478)
5. Monterey	Big Creek (515), Mill Creek (516), Willow Creek (517), Monterey (550), Moss Landing (592), Santa Cruz (593),
6. Morro Bay	Avila/Port San Luis (602), Morro Bay (606), San Simeon (615)
7. Santa Barbara	Gaviota Beach (604), Port Hueneme (605), Oxnard (608), Santa Barbara Harbor (611), Ventura (613), Goleta Beach (614), Gudalupe Beach (618), Surf Beach (621), Carpinteria (635)
8. Los Angeles	Malibu (729), Catalina Island (733), Avalon (741), Redondo Beach (742), Long Beach (743), Los Angeles (744), Terminal Island (745), Wilmington (746), Santa Monica (747), Newport Beach (748), Hermosa Beach (756), Seal Beach (760), Balboa (764), Dana Point (767), Huntington Beach (768), San Pedro (770), Marina Del Rey (776)
9. South Coast	Imperial Beach (868), Mission Bay (869), San Ydidro (870), San Diego (880), Point Loma (881), National City (882), Oceanside (883), Coronado (884), La Jolla (888), Cula Vista (889)

1. Port codes in parenteses. See Appendix 3 for Port codes.

## Catch Condition

CDFW-CFIS also contains catch condition codes. This is important for the COFHE Model since one of the 20 OCs is the *Hook-and-Line Live* category. Special tanks to keep fish alive for sale are an important expense thus involving a different cost-and-earnings profile for this OC. There are only five different codes for catch condition (Table 1.7).

Table 1.7. Catch Condition Codes

Description	Codes
Dead in Round flesh	blank
Dressed Head off	2
Head and tail off	3
Dressed Head on	5
Live	6

## National Marine Sanctuary Definitions using CDFW Blocks

To define catch within each NMS, overlays of CDFW-CFIS 10-minute by 10-minute blocks were overlaid in a geographical information system (GIS) with NMS boundaries. The “Centroid” rule was used i.e. if the center point of a block was within the NMS boundary, then it was included for counting catch as within the NMS, except for the CINMS. For the CINMS, the 22-block definition was established in the “Marine Reserve Process” (Leeworthy et al, 2003 and Leeworthy et al 2005). In that process, one-minute by one-minute distributions were obtained from the fishermen and most of the catch was within the first three miles (State Waters) of the six-mile CINMS boundary and were therefore fully in several of the partial blocks that did not include the centroid of the block. The overlays for CDFW-CFIS blocks and NMS boundaries are shown in Figures 1.1 and 1.2. Table 1.8 shows which block numbers were included broken down by those blocks that are fully within the NMS boundaries and those that are partially included (met the Centroid rule and thus included).

Table 1.8. Definition of National Marine Sanctuaries for where Fish are Caught using CDFW-CFIS Blocks

Sanctuary/Full or Partial Blocks	CDFW-CFIS 10-minute by 10-minute Blocks <sup>1</sup>
<b>CBNMS (5)</b>	
Full Blocks (2)	440, 441
Partial Blocks (3)	432, 442, 451
<b>CINMS (22)</b>	
Full Blocks (3)	690, 687, 711
Partial Blocks (19)	691, 689, 688, 686, 685, 684, 683, 706, 707, 708, 709, 710, 712, 713, 714, 744, 745, 764, 765
<b>GFNMS (15)</b>	
Full Blocks (8)	430, 438, 447, 448, 449, 457, 458, 459
Partial Blocks (7)	431, 439, 450, 456, 460, 466, 467
<b>MBNMS (64)</b>	
Full Blocks (47)	446, 464, 472, 473, 474, 475, 478, 479, 480, 481, 501, 502, 503, 507, 508, 509, 510, 511, 512, 516, 517, 518, 519, 520, 521, 525, 526, 527, 528, 529, 530, 532, 533, 534, 535, 538, 539, 540, 541, 547, 548, 549, 553, 554, 560, 561, 562
Partial Blocks (17)	465, 476, 482, 504, 505, 513, 522, 531, 536, 542, 550, 551, 601, 602, 603, 604, 568

1. See Figures 1.1 and 1.2 for maps with NMS boundaries overlaid on CDFW-CFIS Blocks.

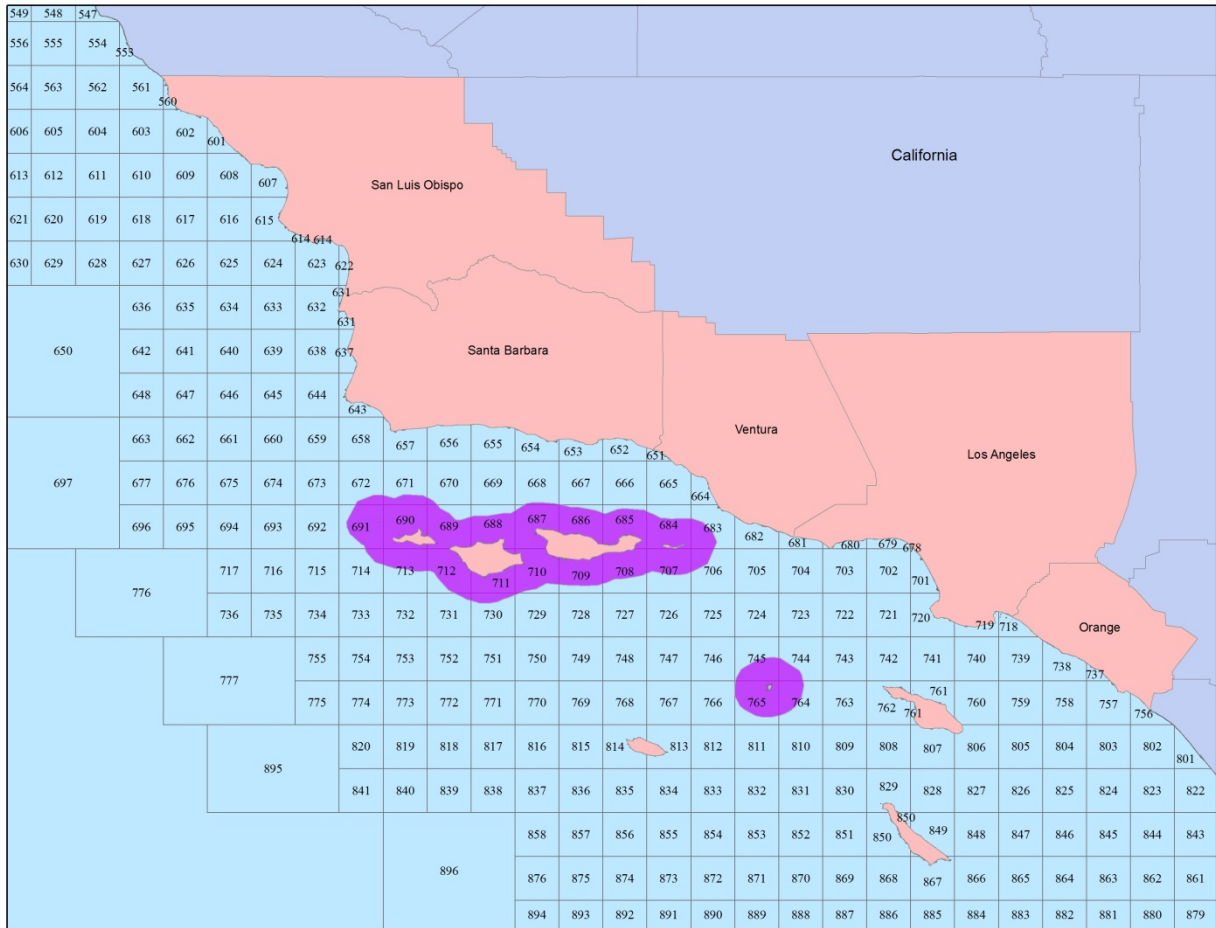

Figure 1.1 CDFG Fishing Blocks that define the CINMS and the Counties where most of the Economic Impact takes place

Figure 1.2 CDFG Blocks that define CBNMS, GFNMS and MBNMS and the Counties where Most of the Economic Impact takes place

## **Chapter 2: Estimation of the Economic Impact on Local County Economies**

### **Operational Categories (OCs)**

The first step in the economic impact analysis is to process the CDFW-CFIS harvest revenue into estimates for each OC. This is a complicated process since some OCs are a combination of species/species groups, gear types, vessel length, and catch condition. In two cases, *Salmon & Dungeness Crab* Small Vessels and *Salmon & Dungeness Crab* Mid to Large Vessels, one has to determine which vessels are engaged in both fisheries (i.e. *Salmon* and *Dungeness Crab*). These are seasonal fisheries, so part of the year the vessels classified in these OCs participate in both fisheries in a given year. This required running cross-tabulations by year, vessel, and each fishery (*Salmon* and *Dungeness Crab*) to determine which vessels would be classified in these two OCs. Cross-tabulations were also run for catch by gear type and species to determine which species to include in each OC definition. The 20 OCs in the COFEH Model are listed in Table 2.1.

Not all catch maps into one of the 20 OCs. In the reports for each NMS, the summary tables for each NMS include footnotes providing the percent of total harvest value for a given year that did not map into one of the 20 OCs. Generally, the percent of harvest revenue excluded from the economic impact estimates was only a fraction of one percent.

In addition to the exclusion from OCs, some catch was not included in the economic impact estimates because the catch was landed in distant ports outside the study area for which the main impacts take place. Generally, the amounts excluded were only a small fraction of one percent of the total harvest value for a given NMS in a given year.

### **Operational Definitions of OCs**

Here the codes used for gear types, species, and catch condition that were used to define each OC are provided. For OCs that are also dependent on vessel length, length of vessel used is provided. It should be noted that not all OCs are mutually exclusive for computer coding, so sequencing of the computer code doesn't necessarily go from OC 1 to OC 20. OC codes that were not mutually exclusive were sequenced so that they were consistent with the catch reported by gear type (e.g. trawling and longlines). In addition, the CPS Seine (OC 3) and Tuna-Other Seine (OC 20) were sequenced with OC 3 placed after OC 20. The sequencing does make a difference in which OC catch is mapped to and the estimates on output, value added, income, and employment. In running the results in numerical order versus the altered sequence, no large differences were detected in the estimates of output, value added, and income, but significant differences were obtained for employment. Generally employment estimates were greater for the numerical ordering approach versus the altered sequencing approach used here.

Table 2.1. Operational Categories for the COFHE Model

Number	Operational Category
1	Trawl - Northern California
2	Trawl - Southern California
3	CPS Seine
4	Herring Gillnet
5	Other Gillnet
6	Salmon
7	Salmon & Albacore
8	Salmon & Dungeness Crab - Small Vessels
9	Salmon & Dungeness Crab - Mid to Large Vessels
10	Dungeness Crab - Small Vessels
11	Dungeness Crab - Mid to Large Vessels
12	Longline
13	Harpoon - Spear
14	Hook & Line
15	Hook & Line - Live
16	Lobster & Crab
17	Nearshore & Groundfish Trap
18	Prawn Trap
19	Sea Urchin
20	Tuna - Other Seine

Source: Hackett et al, 2009.

**OC 1: Trawl - Northern California.** Trawl is gear type number 7 (Table 1.5) and Northern California was defined by ports where landed catch, which included all ports 201 to 602 (Appendix 3).

**OC 2: Trawl – Southern California.** Trawl is gear type number 7 (Table 1.5) and Southern California was defined by ports where landed catch, which included all ports 604 to 889 (Appendix 3).

**OC 3: CPS Seine.** Gear is purse seine, which is gear type 8 in (Table 1.5). CPS species included *Market Squid* (species code 711, Appendix 1) *Sardines* (species codes 100 and 101, Appendix 1), *Anchovies* (species codes 110, 111, and 113, Appendix 1), and *Mackerel* (species codes 19, 50, 51, and 55). *Sardines*, *Anchovies*, and *Mackerel* are often referred to as the “Wetfish Fishery” because water pumps are used to pump the fish aboard from the purse seines, so they board the boat wet.

**OC 4: Herring Gillnet.** Gear included several types of gill nets and other nets used to catch *Herring*. Gear codes included 60, 61, 65, 66 and 70 (Appendix 2). Species included codes 105, 121, 122, and 995 (Appendix 1).

**OC 5: Other Gillnet.** Gear included several types of gill nets and other nets used to catch *Herring*. Gear codes included 60, 61, 65, 66 and 70 (Appendix 2). Species included all species caught by these gears not in OC 4 (Appendix 1).

**OC 6: Salmon.** This OC is a little more complicated because it includes species other than *Salmon*. For *Salmon*, gear included hook & line and trolling (gear codes 1 and 9, Appendix 2) and species included all *Salmon* (species codes 300, 301, 302, 303, 304 and 306, Appendix 1). For other species, gear used included gear codes 6, 8 and 9 (Appendix 2) and species included many *Groundfish* species including *Rockfish* (species codes 245 to 259, 263 to 271, 651 to 671 and 956 to 976, Appendix 1), *Flatfish* (species codes 200 to 245, Appendix 1), and *Lingcod* (species code 195, Appendix 1). *California Barracuda* (species code 130, Appendix 1) was also caught by the gear types used in this OC.

**OC 7: Salmon & Albacore.** In Hackett et al 2009, it was determined that this OC used the same gears as the *Salmon* OC, but that this OC should include those vessels that did not catch *Salmon*, but caught *Albacore*. Gears used included gear codes 1, 7 and 9 (Appendix 2) and species included *Albacore* (species code 5, Appendix 1), *Sablefish* (species code 190, Appendix 1), *Flatfish* (species codes 200 to 240) and *Thornyheads* (species codes 678 and 679).

**OC 8: Salmon & Dungeness Crab – Small Vessels.** This is one of the more complex OCs to create since as noted above it requires looking at whether a vessel engages in both the *Salmon* and *Dungeness Crab* fisheries each year during different seasons of the year. Small vessels were those of length less than 26 feet and caught *Salmon* (species codes 300, 301, 302, 303, 304, and 306) and *Dungeness Crab* (Species code 800).

**OC 9: Salmon & Dungeness Crab – Mid to Large Vessels.** This is one of the more complex OCs to create since as noted above it requires looking at whether a vessel engages in both the *Salmon* and *Dungeness Crab* fisheries each year during different seasons of the year. Mid to Large vessels were those of length greater than or equal to 26 feet and caught *Salmon* (species codes 300, 301, 302, 303, 304, and 306) and *Dungeness Crab* (species code 800, Appendix 1).

**OC 10: Dungeness Crab- Small Vessels.** This included vessels that only fished for *Dungeness Crab* (species code 800, Appendix 1) and vessel length was less than 26 feet.

**OC 11: Dungeness Crab- Mid to Large Vessels.** This included vessels that only fished for *Dungeness Crab* (species code 800, Appendix 1) and vessel length was greater than or equal to 26 feet.

**OC 12: Longline.** This included the use of gear type group 3 (Table 1.5). All species caught using this gear type were included.

**OC 13: Harpoon-Spear.** This is gear type group number 11 (Table 1.5) and could include any species, but this primarily includes *Swordfish*.

**OC 14: Hook & Line.** This includes gear type group number 4 (Table 1.5) and all species, except *Salmon* and *Albacore*, which are already accounted for in OCs 6 and 7.

**OC 15: Hook & Line - Live.** This includes gear type group number 4 (Table 1.5) and all species, except *Salmon* and *Albacore*, which are already accounted for in OCs 6 and 7. But the added condition for inclusion is the catch condition code for live catch (condition code 6, Table 1.7).

**OC 16: Lobster & Crab.** Gear is gear code 27 (Lobster and Crab trap, Appendix 2). Species codes include not only *lobster* and *crab*, but also many other species that probably represent by-catch (species codes 820, 341, 342, 343, 685, 686, 801, 802, 803, 804, 805, 806, 807, 808, 809, 712, 731, 732, 815,452, 899, 826, 828, 830, 850, 999, 751, 752, 753, 755, 736, 747, 749, 689, 452, and 455).

**OC 17: Nearshore & Groundfish Trap.** Gear is gear code 21 (Fish trap, Appendix 2). Species codes include not only nearshore and groundfish species, but many species caught as by-catch by this gear (species codes 145, 147, 190, 260, 261, 457, 195, 290, 490, 200 to 240, 245 to 260, 263 to 272, 651 to 676, 956 to 976, 731, 3, 40, 51, 80, 100, 110, 153, 154, 159, 163, 165, 173, 174, 175,180, 262 to 272, 280, 302, 345, 400, 420, 435, 450, 456, 473, 475, 478, 480, 483, 495, 501, 550, 551, 552, 558,678, 679, 683, 736,, 747, 146, 150, 168, 169, 182, 184, 184, 187, 324, 341, 825, 828, 997, 999, 342, 343, 452, 455, 479, 481, 485, 487, 554, 559, 562, 689, 732, 749, 752, 801, 813, 814, 815, 817, 820, 823, 699, 710, 711, 712, 803, 804, 805, 809, 810 and 899).

**OC 18: Prawn Trap.** Gear is gear code 22 (Prawn Trap, Appendix 2). Species includes not only Spot Prawn, but other species caught as by-catch (species codes 816, 813, 815, 817, 823, 827, 825, 828, 712, 731, 732, 752, 757, 801, 802, 803, 804, 805, 809, 810, 812, 814, 818, and 820).

**OC 19: Sea Urchin.** Gear includes gear codes 13, 15, and 18 (Appendix 2). Species includes not only *sea urchins* but other species caught by the gear as by-catch (species codes 452, 754, 755, 757, 753, 752, 756, 747, 731, 750, 751, 769, 799, 803, 805, 806, 809, 342, 680, 681, 682, 683, 684, 685, 687, 688, 699, 709, 711, 712, 719, 720, 729, 730, 732, 736, 740, 741, 742, 746, 749, 820, 821, 840, 850, 851, 860, 899, 950, and 953).

**OC 20: Tuna – Other Seine.** Gear types include the gear type group number 9 (Table 1.5). Species include all species caught with this gear, including many by-catch species (species codes 1, 2, 3, 4, 5, 9, 195, 421, 422, 420, 435, 423, 202, 208, 237, 211, 206, 204, 209, 207, 203, 205, 210, 212, 200, 674, 663, 252, 251, 667, 665, 253, 662, 267, 671, 247, 673, 254, 258, 655, 246, 245, 257, 657, 263, 652, 661, 255, 654, 972, 956, 957, 971, 976, 958, 962, 973, 959, 961, 974, 975, 960, 660, 659, 676, 651, 271, 653, 264, 970, 675, 664, 268, 672, 669, 270, 666, 256, 668, 670, 658, 250, 249, 269, 265, 259, 225, 226, 227, 228, 656, 660, 664, 674, 51, 110, 150, 182, 184, 187, 190, 260, 550, 551, 554, 556, 678, 679, 711, 752, and 821).

## COFHE Model Results

COFHE Models were developed for each NMS for years 2010, 2011 and 2012. A linked Excel Workbook then is used to calculate 3-year averages. The Excel Workbooks are available upon request from the authors. The COFHE Models for each sanctuary by county for year 2012 are in Appendix 5. Below are the summary table results for each site.

County	Harvest Revenue	Output	Value Added	Total Income	Employment <sup>1</sup>
Alameda	3,876	6,884	4,153	3,694	0.08
Contra Costa	0	0	0	0	0.00
