Radiocarbon Dating Reports of Tohoku University No. 13

Radiocarbon Dating Committee of Tohoku University*

This date list follows Radiocarbon Dating Reports of Tohoku University No. 12 (1989). Instruments and dating techniques are essentially the same as those used for a previous report by Omoto (1979). Dates are calculated based on the half-life of 5,568 years for ^{14}C , and the modern standard is based on the value of 74.59% of NBS oxalic acid. TH-917 and TH-919 dates are based on the half-life of 5,570 years, and the value of 95% of NBS oxalic acid. The errors are expressed as one standard deviation ($\pm 1\sigma$).

Sample descriptions are based on the submitter's informations in following form.

Code No.	Name of sampling site	Radiocarbon age of sample (years B.P.)
1.	Locality (with latitude and longitude) of sampling site	
2.	Altitude (in meter a.s.l.) of sampling site and depth of sampling horizon	
3.	Materials of sample	
4.	Date of sampling (submitter)	
5.	Date of dating (operator)	
6.	Chemical assays of pretreating	
7.	Comment and reference	

The committee wishes to express his appreciations to submitters for their informations on their samples.

Philippine Series

1. The samples were collected from two field survey area for recognition of mangrove habitat development located in the Luzon Island, Philippines.
2. Shown in Figs. 3 and 4
7. The data such as TH-1410 and TH-1418 in Pagbilao indicate origin of tidal flat type mangrove while TH-1347, TH-1348 *etc.* indicate driftage of the mangrove habitat (T. Miyagi *et al.* 1989).

TH-1347 Infanta (1) **1,570 ± 100**

1. Binonoan, Infanta, Quezon (14°41'58.5"N, 121°38'20.5"E)
2. G.L. 0 m a.s.l., 1.8 m below surface
3. Peat
4. Aug. 11, 1986 (T. Miyagi)
5. Dec. 10, 1986 (S. Hirano)
6. Treated with 1N-NCl, 2%-NaOH and 6N-HCl (K. Kigoshi *et al.* 1978)

TH-1348 Infanta (2) **700 ± 100**

1. Binonoan, Infanta, Quezon (14°41'06.6"N, 121°38'30.8"E)
2. G.L. 0 m a.s.l., 1.25-1.30 m below surface
3. Peat
4. Aug. 13, 1986 (T. Miyagi)
5. Dec. 18, 1986 (S. Hirano)
6. Treated with 1N-HCl, 2%-NaOH and 6N-HCl (K. Kigoshi *et al.* 1978)

TH-1349 Infanta (3) **450 \pm $\frac{100}{90}$**

1. Antikin, Infanta, Quezon (14°43'35.9"N, 121°41'11.7"E)
2. G.L. 0 m a.s.l., 0.65-0.70 m below surface
9. Wood
4. Aug. 14, 1986 (T. Miyagi)
5. Jan. 21 1987 (S. Hirano)
