Building a scholarly online presence doesn't have to take hours

Scholars are taking advantage of online platforms to widen their readership, network with others in their field, and get metrics about the impact of their work. Staying up to date with these tools doesn't have to take hours. SelectedWorks lets you partner with your library to build an online scholarly presence that is reputable, sustainable, and complete. And most importantly, it can be done with minutes (not hours) of your time.

Maximize Readership

Scholarship in SelectedWorks ranks high in search results and is easily found by your peers. Simple follow features lets readers know about your newly added content.

Showcase your scholarship

Multimedia files and visual interface encourage readers to explore research. Showcase your areas of expertise with custom categories. Share your scholarly background and accomplishments.

Measure Impact

Interactive author dashboard lets you learn more about your readers. Share metrics for tenure review and promotion committees.

Pegasus

Professor at **University of Central Florida**

Dr. Pegasus came to UCF in 1968. He started his career as one of the best known figures in Greek mythology before moving to the northern sky as a constellation. He is currently a winged horse, and is one of the 88 modern constellations. He also serves as the logo of the University of Central Florida.
