## The Benchmark Analysis Modern Political Concept on Border of the Ages

### BENCHMARK ANALYSES SUR LE CONCEPT POLITIQUE MODERNE À LA FRONTIÈRE DES ÉPOQUES

Vladimir Sapon<sup>1</sup>

**Abstract:** On border of the age, old political theories as base manipulate has shown its insolvency.

The world fell into the political crisis, connected with global political and civil landmark. This thesis analyzes the current political condition while evaluating the political theory, concerned with the issue of modernization as well as globalization. The thesis is divided into five parts: Liberals on start again, the intellectual institutes - a myths and reality of the political paradigms, the history political manipulate - The Principles of the building catalogue coalition and The Regional policy aspects and global world.

**Key words:** benchmark; manipulate; criterion; politics

**Résumé:** À la frontière de différentes époques, les vieilles théories politiques ont montré leur insolvabilité. Le monde est tombé dans la crise politique, liée aux repères politiques et civils globaux. Cette thèse a analysé la situation politique actuelle, tout en évaluant la théorie politique, concernée par la question de la modernisation et de la mondialisation. La thèse est divisée en cinq parties: les libéraux au nouveau démarrage, les institutions intellectuelles- les mythes et la réalité des modèles politiques, l'histoire politique de manipulation, les principes de la coalition et les aspects de la politique régionale et du monde global.

**Mots-Clés:** benchmark; manipulation; critères; politiques

The Process globalization has caused on border XXI age new generation political reality, being subject of the study in modern politologie to science. Globalization - an amount new element мироустройства, collection global trends and new semantic unity глобалистики as structured description of the world processes, writes beside. Bec`s.

The Practice of the cosmopolitan thinking opens in three ways: This nationalism, liberalism and social democracy.

The Old theories and practical persons to modernizations as base manipulate has shown its insolvency by the end of 1980-h years already. With "end to histories" world fell into phase of institution political risk. The New world order already quarter of the age searches for all new ways on the base of the global integration - however political risks while prevail. In given format of the consequence of these processes, notes D. Stiglic, "simply terrible".

The Identical intellectual corporation, processing this political weight while no, accordingly no and subject of the world political processes. Axial time, what wrote Carl Yaspers, has generated the new desk side a sense, tacit forming modern politician - has occurred the polarization a subject global politicians.

The Main question - there is subject, defining main topics and ideology world politicians?

The Following question - as the main forms and mechanisms political dominate?

The Premises of the political scaling the problems globalization and identical him forms of the political semantics - a political processes, which reading is built on special method of the understanding text. The Method "political hermeneutic" is bound with acknowledgement of periodicity of the renovation social and politicians logically. The Scheme in principle trivial - a syllogism pulls out the metaphor, determination construct allogism, asymmetry analysis defines the criteria and rules of the dialectics of the method manipulation. The Method forms up the notional device- Politicians emerge as "speaking heads".

Previously than begin in earnest to understand with this problem, shall fluently enumerate the possible slogans and demarches "current moment":

"Zones future and peripheral enclaves. The Multipolarity dictates the thesis "future s today", slogan to new political situation beats in purpose. Here is only - whom and for who? Future - carefully pure present etc.

"Near and distant plans political conceptualist and causal sense (the political semantics of the election campaigns and pr) are reduced to mask method.

Arisen in the world global crisis natural - are changed only forms of the spreading and developments. Political and idea vacuum example theory- modern antisystem as feature aasymmetry global growing, which was already changed global degradation. In what aspect is it possible to consider the present chaos and disintegration world sodium as theoretical pathway political gnosic and alternative concept state and authorities? Since-in so far as firm development or technological globalism require the minimum risk and stationary balance as firm trend of the qualitative alternatives of the growing

## **1. LIBERALS ON START AGAIN**

Periodicity of the political waves and regional-tribes installation - a world molders with paradoxical punctuality. Nomady and tribe - a forms of the cosmopolitan world-outlook, what notes U.BEK, are liquidated all elements postversal and Helisinki liberal world. The Regress of the political paradigm absolutely pointed- an isolated and modern attempt do not bring about success - on agenda apocalypse and the end to histories.

The Centre to civilizations and Axial time as axioms of the development are embroiled in craters of the existential losses and gaps - in unencountered virtual world these history craters constant, as well temperer clavir beside Bah`s.

Supervisioni life surges nation as development political stage new project - as already antisystem gets through several phases - intellectual - a life resource - a modernization.

The National government inside new messages - a global world unable to recook this heated crucible of the culture and caldron to general history. In so far distant cultural prospect mankind - or existence of the person in culture, possible will in principal be other "glue" communication or socio-humanitarian aspect, closed on hierarchy and liberal status. In any event this future not humanism and not crushial, but

postliberal civilization.

The Certificate about time as biblical picture - where universum consciousness is contained in material point evangel challenge. For instance, parcel - a church imaginative millennium - forms the firm stereotype about receivership of spiritual valuables in Eurasian project.

The Cosmopolitism - a form of the existence future, but democracies collide mental true cause of the new generations, assigning sometimes unexpected sidebars future.

## **2. THE INTELLECTUAL INSTITUTES - A MYTHS AND REALITY OF THE POLITICAL PARADIGMS**

Valuing modern intellectual thought, we expect certain design orthodox verbal game of frame subculture groups, as claim on phenomenon proselite.. V.PODOROGA describes this motion as value thoughts, thought synonymous language material - what spoke F.SOSSYUR "dialect" this thought extending from word and focused in route.

Apropos say, Platon in determination classical апории expected same system a category, as deployment "coan" in confusian of the traditions. The Dialogue - a system to translations and exchange formal sense or typical play – series plot and roles what wrote J.Deles.

## **3. THE HISTORY POLITICAL MANIPULATE - A RETROSPECTIVE ANALYSIS**

F. Fukuyama and D. Stiglic defined the end 20 ages as phase "end to histories", built both on equilibrium, and uncertainty factor, explaining long structured cycles political and social speakers depending on organizing criterion of the political innovations.

According to base determinations cratologia to technologies are defined by degree destruction and sphere of the influence being qualitative instruments social speakers.

Kratologia - a science of the single act of the creation new authorities i.e. the development on base of the new knowledges and methods of the new product, facilities and technologies, potentially possessing competitive quality in contrast with existing political mode.

The Power - a result to activity, got entailment in the manner of universal law, possessing evident qualitative advantage under preceding political cycles Appears the question about measurement political potential change, codifications her information field.

### **The Principles of the building cratologie coalition.**

As the main institute factors manipulate political stratum?

First, Fixing political paradigm.

Second, Новый sample to political technology.

Third, Установление fixed political rate.

Fourth, Bargaining question.

What noted D. Nort and P. Burdie, institutes define the long-term trends and mechanisms of the change political speakers, forming political climate socium.

Klaster and points of the growing modern политологии knowledges rest in key possibilities - a human capital, investments, technologies, institutes, интeргрии and кластеры.

The Transnational political corporations are a main conductor liberal идей, defining maximum демаркации to political expansion and actively поляризуя and глобализируя world. In this instance operates the factor political myfing - a perversion sense, the localization institute and globalisation to national idea. Appears the new form political leader (the businessman-politician) - shaping management, actively changing world political idea.

Alongside with modernization passes and process to demodernizations - forms the time inverse vector. Analysing processes myth to national idea, shall note that qualitative growing begins with growing holy potential to nations and ethnoce. The Plan Marshall and program L. Erhard in Germany are classical example liberal countries in condition of the transformations politicians.

In present-day Russia exists the problem to assimilations political institute - a problem social гармонизации, and she is a base of the shaping firm and balanced development of the country on base political preference, developments political autarchy -as shaping political horizon.

Kratologiya as science in modern theoretical approach to control power is crossed with district and with institute theory developments political institute. We shall Note one of the base assume - relevance politicians and institute high under high level and quality to lives.

All this is indicative of permanent unstable development society, margin squeeze in zones of the risk.

The Leading researchers note that fact that progressive political change most actively develop in phase of the transformations of the political cycle.

Shaping to real political strategy depends on realization of specifics and institute of the possibilities to Russia in the world, her further action - a governmental program of the reforms while completely does not operate. There is unique chance Beside Russia to become the leader world khratologie experiment.

We shall define some intermediate postulates a khratos system.

First. Political safety. Our analysis takes into account information and economic safety under any share - whether flash-mob or victim and terrorist actions, on nature radical state (for instance radical исламизма), need advanced-ratio and care from dark economy, terrorism.

On our glance, the political stabilization covers only visible part "iceberg" authorities, financial and regional activity such conglomerate, as political corporations.

Second. Structured change and political processes. We shall Note the slowing processes an global and output in new phase of the world political cycles, bearing in mind transformation and parabase institute, both in Russia, and in developed country (the problem integrie). Actual ethnoconfession and geopolitical process in the world enlarging scale passionnare and lability masses. In this sense theory elite brings forth point of view - limited or legitime democracy.

#### **4. THE REGIONAL POLICY ASPECTS AND GLOBAL WORLD**

We introduce the following vision of the place and dug of the knowledge on modern stage Experience west economy shows that for firm development of our country necessary development scientifically based sector for stability politicians. This particularity modern global studies, or "politologie knowledge", which "human capital" discriminating particularity is increasing to electoral activity of the political companies, spheres "soft political" technology (soft technology and soft power), comprising of itself development political concept, programs and electoral influence.

In country with settled by political system, founded on traditional protestant value (in Europe), share political risk not less than for the rest world. Here necessary to note following. The Development to political idea without active interference state impossible since representatives of the average class itself will hardly want to invest the facility in sector with high primordial risk. Follows to note that efficient policy must be based on two opposite obligatory forming - control and policy struggle.

Making the similar infrastructure at the moment is realized through building chronology systems (KS).

The Estimation to efficiency of the models depends on politicians and influences her on political activity. The Coalitions expect legitimate democratic influence so phase of the political consensus expects the firm nature a coalition. The Forecasting global trend and greater waves allows integrating policy in real program of the political development society - a shaping «Summa politica».

Futurology models to political situation speak of qualitative change - cluster, information policy, leading reality becomes to creation world government already presently.

We shall present the list of the models, having scholars and observed nature.

First. Linear Malthusian's model is oriented on qualitative gradual growing democratic institute in "one third world".

Second. The Model of the firm development defines the development qualitative global politician institute of the factor - a main vector of the development of the political system in condition of the reshaping.

Third. Alarmist model expects change a parameter to transportability political preference and strong polarization of the masses on question future world civilization.

The Integration of the new political knowledge is connected with political consensus and development determined to strategies. The Approaches to global political strategy are only marked.

The Comparison estimation economic growing was conducted particularly actively, as from the Second World War, in particular ccomparative material on political comparisons between USA and USSR in 1960-1980 y. (Shreder). Scope and operate political design to implies the strict categorization political risk.

## **5. THE POLITICAL CONTEXT AND POLITICAL RISKS**

The Action centripetal and centrifugal power, both in regional, and scale actively places "axial" difference main religion and miracle and idiom liberal.

In this connection is put certain dilemma: in than special nature balanced politicians to Russia - politicians, directed on real political processes or on short-term competitive waiting politician? With developments of the political processes, directly working at euro communism began the reforms in Hollow, China and the other country, founded on transit waiting. Insofar sanguine world trends for political cycle in Russia? See, they more sanguine in long-term prospect.

The Track record of the development political substratum, regional enclave including, carries the imprint to unevenness, noted alarme trend, vision nature political transfer, and sloppy condition political components socium. The Methodological twofold determination of the notion *кратологический* experiment in modern literature requires the conceptual matter united, on essences, theoretical and conceptual decisions. For political analysis most accept method dynamic alternatives, including syntheses of the noted methods.

The History phase chratology manipulate. The Code Napoleon. Certainly, paradoxical to conduct the analogies a political reason model from situation of the post revolutionary France, recoil Directory and the whole epoch's napoleon wars to updated European institute.

However internal logic to evolutions of the Leviathan-state, internal logic to evolutions authorities, so to speak "internal Austerlice", gives the deeper analysis occurring and reconstructions to situations. The Nerve of the history discrete is opened in powerful opposition and manipulates monarch and their minister.

The Events 1789-1812 were characterized by as classical revolution элит. Taleyran, Fushe and Alexander as father "Viennese congress" held up the progress, in however than revealed itself their reaction, really she was so dominant? As a result a redistribution of the spheres of the influence was organized. However to 1850-gg situation changed: chartist motion, de Kyustin, Dikkens - here is reper of the point political мmainstreamed and reality capitalism - "napoleon or", Pitt, Dizraeli and the whole fight Tory with vig. In consequence, следуя logic of the history progress Churchill has handily caught the pause and has emerged with Fultonskoy speech under curtain its quarries. The English parliamentarianism ended on Margaret Tetcher and with privatization, tetcherism and reiganomics began the new era.

The strategy begins with what - with subjective основ of the Positions of the strategist who creates the myth typical of community. Mircha Eliade wrote about referent of the positions of the shaman. Napoleon began the epoch "modernist style" demand to positions -a winner in any war (economic and information including): "First it is necessary enjoy in greater fight, but is there seen will!"

But exist else and objective factors of the Victory: same Napoleon speaking that "God on side greater battalion always!" While first in Spain, but afterwards in Russia outside the West Europe Karoling has found national-religious "destroyed" on principle "We and they!" that first on Elba, but afterwards on Saint Elen. "Code Napoleon", however, remained - and in Spain now "became its believe". In this just idea group elite speakers, when WASP and puritain create as club prototypes their own mental of the models. Max Veber at the point regressor, he just against marxist idee about transition from "kindom to need in kindom of the liberty". Kopernik model universes and monetaire e of incantation political adventurer in epoch of the mercantilism fixed the ideological frames of the political system of that time. Immanent inherent epoch political pluraliste. The Club Mon-Capes - a product A.HAYEK and D.HIKS, exactly also as "Great Loge of the Orient" - an effect to Great French revolution. Taleyran and Metternih used acceptance manipulate king and emperor. In this plan Lui-Filipp and Carl X were manipulate, but Napoleon, opposite, was a transcommunicator, inheriting part to revolutions.

The Political strategies in премордиальном society. D. Toynbi in its book "Understanding to histories" and T. Morgan in book "Ancient society" considered the collisions burn socium-capitalism, when archaic community collectively worked out the myths become rule of the play and the authorities and afterwards specified the rules of the behavior - a law and his determinations.

The Main idea is concluded in that that purely humanitarian and политологические of the system leave on level more complex narrative structures.

E.DYURKGEYM at the beginning initially XX in. has put social philosophy in chapter of the corner of the decision of the existential problems of the individual.

The Ancient Scandinavian myths, "Senior Eddie", for instance, trace the speaker of the medieval myth with specific pantheon Scandinavian god. Thence appeared the idea holarx and hierarchy as structures of control mass and society by means of high power.

We shall Remind, mankind since ancient years владела pulling to change the places - "where heat, there and native land" - spoke the ancient Greeks. Other alternative - a hard authoritarian power in socium clear visualizes the purpose, culture realizes this purpose in practical actions and conquest social space. "Uprising the masses" have found the significant political prospect with the end XIX age.

Politiya and the policy - a dichotomy kratos and ohlos. This system of the Greek myth about the authorities - a position Sizif.

As accents authorities in modern system - for instance biopolitical?

What the researchers from Santa-Fe write, complex systems become all more origine, factors and interpreted models gain all more psychological and biological nature, however substitution of the powerful principle as structured unity on fragmentary success not always justified.

The Structured unity authorities are substituted and behavioral factor to democracies. Mental processes to complement hierarchical and subculture phenomenon. This tradition is connected with teaching about fit of the Scottish philosopher D. Um. Behavioral dominate becomes the vigouresse rule of the play and hereinafter law already in postversal era.

The State as Leviathan T. Gobbsa confirms the idea about celebrates ideal state, managed by caste or elite controlling.

N. Makkiavelli presented the dilemma Gosudari - a Society as dominant power leader, rather than law.

The Civilizations were changed, improved nation mechanisms, were worn down new pensioner of the wave, when power was mutated came the new leaders. What wrote Machiavelli, true vision to situations making only Gosudar. Vetch, opposite, spoke of public authorities.

The Border of the political process as microcosm defines the new order of the things, typical greater history cycles and space. P. Burdie has exactly noticed that sociology authorities all to a lesser extent depend on pragmatics of the ordinary sense, rising to anoreю of the postmodernist style and civile way.

The Secularization - one of the possible variant mundane politicians state. Political манихейство orthodox ортодоксов allowed, for instance, within the framework of bipartisan system to obtain the некоеро of the concensus, having formed habeas body in England as determined doctrine for the future.

As negative symbol of the american geopolitics, axis of the ill - a wild variant D. Cheini trying create the new buffer-лимитроф on border of the Russia, "axial time", on our glance, requires in principal new variant and strategy global community.

Possible neoconservative syntheses on given stage of the development of the political structure society?

Future s today, determined "zones" future (Russia in the first place) already exist, mankind cost on fetter of the choice of the own way of the development. Russia at 3 millennium - one of the variant and scenario of the world strategic project - when barriers frontier in multim are predestined and present - however universal recipe and models future, design technology - while no. No modern to strategies, founded on humanitarian designing, system approaches to risk and generated by them target landmark of the way in nowhere. Today on hand demodernization - a complex of the measures on реституции liberal recipe and new technological redistribution. The Nations, rather than politicians, must strive to new self-determination.

Pluralism authorities and arbitration functions - my "new right". Possible establish that democracies on the whole world at present feels the serious dysfunctions.

Complicating system - before us layered system - for instance, political corporation. The Effect can be maximum, but can be and loss - it is necessary to reduce the risks and enlarge the effect.

The Task of the political leader-pioneer - collect from sloppy element stable working system.

Appear some doubts comparatively liberal path dependent, however and socialist ideas itself has not justified.

In conclusion, wanted note that modern political situation is complicated by crisis; however exist the potential prospects, for Russia in particular, connected with global political and civile landmark. The base there is a qualitative criterion of the political progress and efficient political institutes.
