

Reconstruction of Transport Regulatory On Marine Toll to Support Sea Connectivity Based On Pancasila Justice

Hartanto¹

Abstract

The idea of marine toll is an attempt to realize the first *Nawacita* that is strengthening Indonesian identity as a maritime country and the third of *Nawacita*, that is to develop Indonesia from the periphery to strengthen these areas and villages within the framework of a unitary state, in addition to the marine toll is also a confirmation that the country is actually present to all areas through ships that visited the region. Accelerating infrastructure development in particular the implementation of toll expressway connectivity of sea or ocean (sea connectivity) if it can be done well it will be able to unite the archipelago by sea, especially to unite Indonesian islands in one national connectivity. Based on the documents of the National Medium Term Development Plan (RPJMN) 2015-2019, in the framework of the development of national connectivity to achieve a balance of development, the government has set a target increase of 24 strategic ports to support marine toll program². The marine toll presence is expected to drive the wheels of the economy efficiently and equitably so that Pancasila justice can be realized.

Keywords: Reconstruction; Marine Toll; Connectivity; Pancasila Justice.

1. Introduction

The idea of marine toll is not a mere discourse to overcome the problems of price disparities occur in Indonesia, marine toll has been successfully carried out by Japan and the Philippines, the islands both countries managed to reduce the cost of logistics so that it becomes cheaper and managed to push the price disparity with sea connectivity³.

Understanding marine toll emphasized by President Joko Widodo is a concept of strengthening the cruise line focused on the eastern part of Indonesia. The concept is in addition to connecting cruise lines from west to east Indonesia will also facilitate trade access of Pacific countries to the southern part of the East Asian countries. The idea of the Marine toll concept will open a regional access by making a large-scale two-port hub that can serve international ships of big trade above 3,000 TEUs⁴ or class Panamax vessels of 6000 TEUs. Through the realization of the plan is expected to Indonesia may have a significant role in supporting the

international logistics distribution⁵.

2. Research Methods

This type of research is a qualitative research and the approach that used is juridical-sociological normative law from the standpoint of sociology as an *Interpretation Understanding*. While collecting data with literature and interview⁶.

3. Results And Discussion

3.1. Marine toll Concept

Open access to the region through the implementation of the concept of Marine Toll can provide industrial opportunities cargo/logistics nationwide to participate in international distribution, which is currently 40% through the territory of Indonesia. To become players in their own country as well as the support of cabotage and cabotage beyond, so this time the government has set two ports located in front of the region as an international connectivity on the port of Kuala Tanjung and Bitung port⁷.

Support it, then also developed a fleet of ships/cruise port hub that connects both international as well as through national hub port of the eastern region to the western region of Indonesia. Cargo/logistics of a national hub port will be distributed to feeder ports using different vessels. Above sea connectivity concept then served by a fleet of regular and scheduled from west to east Indonesia later referred to as the marine toll concept⁸.

Marine toll transport concept is suitable for Indonesia, which is mostly covered are aquatic and have 17,500 large and small islands⁹. However, realizing the sea motorway concept not only build ports, but also must be accompanied by improvement of the national marine transportation system as a whole. If only build ports, without fixing the existing transportation system, the marine toll system launched by President Jokowi¹⁰ will be difficult to realize. Implementation marine toll should be supported by increased capacity and productivity of existing ports to speed up the flow of goods in and out of the harbor. The low productivity of the port in Indonesia can be seen from the length of time loading and unloading goods (*dwelling time*) at Tanjung Priok port which last year reached 5.2 days or

longer than dwelling time in the port of Malaysia and Singapore¹¹.

3.2. Regulations Pertaining to the Marine Toll

Government Regulation No. 20 of 2010 on Transport in the waters (Article 65-69), and the Regulation of the Minister of Transportation No. AM 104 of 2017 on the Implementation of Transport Crossing (Article 23-25), regulates the placement of Ferryboat transport ship. Things were set up, covering¹²:

- 1) Placement of the ship at each trail crossing must comply with the technical specifications of traffic and port facilities used to serve Transport Crossing¹³;
- 2) Placement of the number of ships on each trail crossing must consider the balance between the needs of service users and providers of transport services;
- 3) Placement of the vessel to be operated at the crosswalk is done by considering:
 - a) The need for ferry transport; and
 - b) The availability of port facilities used to serve the ferry transport / ferry terminals.
- 4) Placement of the vessel to be operated at every crosswalk must meet the requirements that have been set.

3.3. Reconstruction Of The Support Connectivity Marine Toll Transport Regulatory Based On Pancasila Justice

There are some rules that are likely still need to be reconstructed as Law No. 17 of 2008 on the voyage as follows:

No.	PROVISION	SANCTIONS
	Article 27: To carry out transport activities in the waters of the Indonesian citizens or business entities shall have a business license.	Article 287: Each person operating the vessel in transit in waters without a license as referred to in Article 27 shall be punished with imprisonment for a period of 1 (one) year or a maximum fine of Rp 200,000,000.00 (two hundred million rupiah).
	Article 28 (4): In addition to having a business license for river transport and lake vessels operated shall have route permits given by:	Article 59: administrative sanctions such as: a. warning; b. administrative fines; c. license suspension or freezing of the

	<p>Article 38 Paragraph (1): Freight company in the waters shall transport passengers and / or goods transport especially post agreed in the transport agreement.</p>	<p>Article 291: Everyone who does not carry out its obligations to transport passengers and / or goods transport especially post as referred to in Article 38 paragraph (1) in criminal imprisonment for a period of 1 (one) year or a maximum fine of Rp 200,000,000.00 (two hundred million).</p>
	<p>Article 41 Paragraph (3): Freight company in the waters must insure liability as referred to in paragraph (1) and carry out basic public passenger protection insurance in accordance with the provisions of the legislation</p>	<p>Article 292: Anyone who did not insure its liability as referred to in Article 41 paragraph (3) shall be punished with imprisonment of six (6) months and a fine of Rp 100,000,000.00 (one hundred million rupiah).</p>
	<p>Article 42 Paragraph (1): Freight company in waters is obliged to provide special facilities and services for the disabled, pregnant women, children under the age of five (5) years old, the sick, and the elderly.</p>	<p>Article 293: Anyone who does not provide special facilities and services referred to in Article 42 paragraph (1) in criminal imprisonment of 6 (six) months and a fine of Rp 100,000,000.00 (one hundred million rupiah).</p>
	<p>Article 46: The transport of dangerous goods and</p>	<p>Article 294: a. Every person who transports hazardous</p>

	<p>special items referred to in Article 44 shall meet the following requirements:</p> <ul style="list-style-type: none"> a. packaging, stacking, and storage at the port, handling loading and unloading, and stacking and storage while in the boat; b. accordance with the regulations and safety standards, both nationally and internationally for specialized vessels transporting dangerous goods; and c. certain signaling in accordance with the dangerous goods being transported 	<p>goods and special items are not in accordance with the requirements referred to in Article 46 shall be punished with imprisonment of three (3) years or a fine of not more Rp400.000.000,00 (four hundred million).</p> <ul style="list-style-type: none"> b. If the act referred to in paragraph (1) resulting in loss of property shall be punished with imprisonment for a period of 4 (four) years and a maximum fine of Rp 500,000,000.00 (five hundred million rupiah). c. If the act referred to in paragraph (1) resulted in the death of a person and property loss shall be punished with imprisonment of ten (10) years and a maximum fine Rp1.500.000.000,00 (one billion five hundred million rupiah).
	<p>Article 122: Each operation of ships and ports shall meet the requirements of safety and security and maritime environmental protection.</p>	<p>Article 303: Each person operating the ship and the port without fulfilling the requirements of safety and security of shipping and the protection of the maritime environment as referred to in Article 122 in the penal with imprisonment of 2 (two) years and a fine of Rp300,000,000.00 (three hundred million rupiah) ,</p>

4. Conclusion

Reconstruction of the support connectivity marine toll transport regulatory had to be done to remember a few things related to operational systems and policies that are not appropriate as mandated by law and not lead to the achievement of *Nawacita* president Joko Widodo which basically program the toll the sea is used as a means of acceleration infrastructure development to equalize wealth and economic inequality in Indonesia. Marine toll is also used as a platform to show to the eyes of the world that Indonesia is a great nation and fit into the shaft maritime world. Therefore needed a proper legal construction in every policy and regulations related to marine toll and implement in full responsibility and the spirit of Pancasila nationalism so that justice can be realized.
