Seattle University, "Award Metadata - Developing a Laser-Induced Breakdown Spectrometry (LIBS)-Based Method for Quantitation of Diesel Particulate Matter" (2019). *Developing a Laser-Induced Breakdown Spectrometry (LIBS)-Based Method for Quantitation of Diesel Particulate Matter*. 1. <https://scholarworks.seattleu.edu/libs-method/1>

This Award Materials is brought to you for free and open access by the College of Science & Engineering at ScholarWorks @ SeattleU. It has been accepted for inclusion in Developing a Laser-Induced Breakdown Spectrometry (LIBS)-Based Method for Quantitation of Diesel Particulate Matter by an authorized administrator of ScholarWorks @ SeattleU.

Award Metadata: Developing a Laser-Induced Breakdown Spectrometry (LIBS)-Based Method for Quantitation of Diesel Particulate Matter

Project Title	Developing a Laser-Induced Breakdown Spectrometry (LIBS)-Based Method for Quantitation of Diesel Particulate Matter
Principal Investigator	Gregory Mason
Co-Principal Investigator(s)	Ryan McLaughlin
College, School, or Division	College of Science & Engineering
Funder	Centers for Disease Control and Prevention - National Institute for Occupational Safety and Health
In Collaboration With	N/A
Funder Type	Federal
Award Date Range	06/15/2018-09/30/2019
Award Amount	\$10,000.00
