WASHINGTON.

General and Mrs. John D. Rast of Rockport were in town a few days ago.

HOPE.

A baby cyclone passed over here Tuesday night leaving it cold enough for fires. A. Sweetland and wife of Charlestown visited at Mrs. D. A. Payson's last week.

THE MODERN SANCTUM.

The Burlington Hoaxer. No, Edith, you are in error regarding the editorial sanctum. The dark and dusty garret of a former age has passed away, with its festoons and wreaths of cobwebs thick with the dust of years—its windows with the faint pane sufficed with the dissonant fragments of garments that have been better days—its rickety stove with crazier pipe, and the sawdust-filled box resplendent with the odor of stale tobacco, the plain pine table guiltless of paint, separated with ink and littered with an inscribable mass of literature, correspondence, and the Lord knows what, is the pastetop of other days. No longer the festive cockroach wanders at will, and the shears, once the potent vector in the satisfying of the insatiate appetite of the "copy" fiend, hang listless on the wall.

The editorial rooms of to-day are somewhat different. They are always situated on the upper floors of the building, as more befitting the lofty sentiments of which they are the birthplace. As you step from the elevator your feet sink into the softest and richest of carpets. You enter a room which is fairly spacious apartment, well furnished. A page takes your card upon a silver salver into the presence of the magnate beyond the folds of the heavy curtains, and presently returning ushers you into the inner temple, the "sanctum sanctorum," a large and well-lighted room furnished in every appointment to the extreme limit of the upholstery capacity. Near the door a comb-shaped and nickel-plated combing-springs in a velvet-covered frame attract your attention. This is the famous kicker, patented by Bob

Every adjunct possible for the boundless editorial staff to secure has been added with a lavish hand. Modern appliances have so eliminated the drudgery from the editorial room that the chief desideratum is the cultivation of a calm and equitable frame of mind, suitable for the reviewing of the greater questions of the day.

The public demand of to-day is for original matter (no scissors and paste-now). This great advance in scientific methods is now furnished by the factories in the East, so much a part of the press—this leaves no time to devote to the editorial work. The necessity for elaborate surroundings to harmonize the beauty of the thoughts within our heads.

Women are frequently accused of training their fathers and husbands to extravagance, with an emphasis on the adjective. They probably do so at their downfall, in repeated instances, not from willfulness, but from an understanding of the value and money. The idea of any normal woman being so maligned is entirely foreign to her nature as to be beyond hypothesis. She would be capable of it, if she were totally indifferent to the man. Nothing but the densest selfishness or the deepest malice would furnish the motive for such an act, which is as a rule, incompatible with woman's nature or woman's methods.

BILL NYE'S INCOME.

Bill Nye is a child of nature. He, however, makes a sufficient concession to this hard and material civilization to earn \$1,000 a week. He gets \$600 a week from a newspaper syndicate for his weekly humorous letter. He earns \$20,000 a year by lecturing. His books are sold everywhere, and the royalty he receives on them would afford a welcome income to many a small prince in Europe. Mr. Nye's income is not less than \$50,000 a year, and as he becomes more popular every year it is only a question of time when his income will be larger than that of any other humorist who has held aloof from the publishing business.

TWENTY QUESTIONS.

- 1. How many miles of railway in the United States?—150,000; about half the mileage of the world.
2. How much have they cost?—\$9,000,000,000.
3. How many people are employed by them?—More than 1,000,000.
4. What is the fastest time made by a train?—122 6/10 miles in 7 hours, 23 minutes; one mile being made in 41 1/20 seconds on the West Shore Railroad.
5. What is the cost of a high-class eight-wheeled passenger locomotive?—About \$8,500.
6. What is the longest mileage operated by a single system?—Atchison, Topeka, and Santa Fe, 8,000 miles.
7. What is the cost of a palace sleeping-car?—About \$14,000, or \$17,000 if "vestibuled."
8. What is the longest railroad bridge span in the United States?—Cantilever span in Poughkeepsie bridge, 518 feet.
9. What is the highest railroad bridge in the United States?—Kinzua viaduct, on the Erie road, 305 feet.
10. Who built the first locomotive in the United States?—Peter Cooper.
11. What road carries the largest number of passengers?—Manhattan Elevated Railroad, New York City, 425,000 a day, or 191,625,000 yearly.
12. What is the average daily earning of an American locomotive?—\$100.
13. What is the longest American railway tunnel?—The Hoosac on the Fitchburg Railroad, 4.34 miles.
14. What is the average cost of constructing a mile of railroad?—At the present time about \$30,000.
15. Where and when was the first sleeping-car used?—Upon the Cumberland Valley Railroad, Pennsylvania; from the year 1836 to 1848.
16. What are the chances of fatal accident in railway travel?—One killed in 10,000,000. Statistics show that more are killed by falling out of windows than there are in railway accidents.
17. What line of railway extends farthest east and west?—Canadian Pacific Railroad, running from Quebec to the Pacific Ocean.
18. How long does a steel rail last, with average wear?—18 years.
19. What road carries the largest number of commuters?—Illinois Central, \$28,128 in 1887.
20. What is the fastest time made between Jersey City and San Francisco?—3 days, 7 hours, 39 minutes, 16 seconds. Special theatrical train, June, 1876.

THE HUMAN EYE.

Science gives us interesting details about what the human eye has been and what it may become. The Vedas of India, which are the most ancient written documents, attest that at times more remote, but still recorded in history, only two colors were known—black and red. A very long time elapsed before the eye could perceive the color green, and a still longer time before green could be distinguished; and it is remarkable that in the most ancient language the term which designated yellow insensibly passed to the signification of green. The Greeks had, according to the generally received opinion, the perception of colors very nearly as we have, and yet authors of a more recent date assure us that in the time of Alexander the Great the Greek painters knew but four colors, viz.: White, black, red and yellow.

DICTIONARY FOR THE PEOPLE.

We have reached a point in human progress where the people want information about everything, and a dictionary of the ordinary words used in common literature will not answer their purpose. Scientific terms are beginning to be freely used, even in the ordinary country newspapers, and the country readers are much more interested in the use of scientific terms than are the denizens of the city, who do not have to cultivate the soil and raise stock—occupations which include within their range most, if not all, the natural sciences. Botany, chemistry, physics, physiology, zoology, geology, zoology, and so on, are all being presented to the popular mind in installments by the experiment stations, and will continue to be presented more and more fully year after year, and hence the people want a dictionary that will give them complete and clear definitions of all the terms that are in vogue in all these sciences. Education can no longer be narrowed down to the learned few. The masses are coming up, and such a dictionary as we have indicated would be a great aid in lifting them up to a higher common level, where they can understand and become intelligent companions of their teachers. Webster and Worcester no longer "fill the bill." Who will give us the coming dictionary?

SEVEN HOURS SLEEP AT LEAST.

There is not a man or woman in 10,000 who can afford to do without seven or eight hours' sleep. All those stories written about great men and women who slept only three or four hours a night, make very interesting reading, but I tell you, my readers, no man or woman ever yet kept healthy in body and mind for a number of years with less than seven hours' sleep. Americans need more sleep than they are getting. This lack makes them so nervous and so insane as to pass a vacation, stuns up the situation as follows: Be merry. Laugh as often and as long as possible. Do not find fault with either your fare or your neighbors. If you are not pleased, go elsewhere, but do not spoil your vacation by grumbling or criticizing. Do not crowd to one word about anybody, nor permit anyone to gossip to you. Nothing mars a good time like unamiable. Avoid fashionable resorts, bores, and people who make you blue. Revel in sunshine, fresh air and good nature, and your vacation will be a success and bring you rich reward in health and happiness.

A FIERY TALE.

Told in an Irregular Manner of an Irregular Proceeding. "There was the sound of revelry by night, And Seven Tree Grange had gathered there. 'Her beauty and her chivalry,' 'And bright the lamps shone down' On fair and brave of old Beantown; And mirth waxed wild and high, And best time to music's chime, Anticipation fired each eye: That night, as all the country knows, The Grangers kept the 'Feast of Crows.' No 'black birds' there, all white, the farmer's friend, who the Granger did defend, But now their harmless lives will take, Though they have labored for his sake Athriving 't'bout in their stead, White crows were they, all fed on faith (?). And now the Granger smacks his lips, And thinks of epicurean meals, And sees not disappointment, nor Annihilation's wraith. 'Music arose in soft voluptuous strain, Soft eyes looked love to eyes which spake again, And went merry as a marriage bell; But hush! a deep sound strikes like a rising knell! Did heart leap at it? No, 'twas but the wind, On which the dance! let joy be unconfined, On with the reel! 'Now put your right foot in and turn yourself about, 'And still you'll be but hark! That sound once more, 'And nearer, clearer, deadlier than before!' It is—the burning buildings greesome roar!"

BE OF GOOD CHEER.

What's the use of pitching into everybody and everything? It doesn't do a bit of good. On the very contrary, it does a deal of harm. It hurts you. It warps the best of yourself out of shape, so that you can't see anything just right if you try. It is mighty tiresome to be always frowned on and always lectured, and if you are always making yourself so disagreeable people instinctively cross the street to get rid of you, or, if they must hear you, wonder to what purpose the Lord ever instituted you, anyway. The chances are that the Lord hasn't had much to do with it. You have just fallen into the habit of grumbling, and you haven't wit enough to see and get out of the habit. The chief agent for good in the world is good cheer. Sunshine and balmy air open the throats of the birds. A dog is happy and will do your will under the gentle stroke of your hand. A cold rain makes a gloomy day, and all the philosophy one can employ only makes the gloomy day tolerable; and when the sunlight streams through the rifts one feels loosened, and goes out himself in search of bright things.

His WIFE SUFFERED FROM ERYSIPELAS. Mr. John O. Rogers, of Dana, Illinois, writes as follows under date of March 27, 1890: "My wife was for years an invalid from a blood trouble, and suffered terribly at times from Erysipelas. She tried many remedies advertised in large series all over my body. I tried various remedies without receiving any benefits. Three bottles of SWIFT'S SPECIFIC S. S. S. cured her Erysipelas and other blood troubles. From the first her appetite increased, and her general health improved in every way. She considers S. S. S. the best blood purifier and tonic she ever saw, and is willing for any one suffering as she was to be referred to her. His BLOOD POISONED BY COW ICHU. About five years ago my blood was poisoned with cow itch, and every spring since then I have been troubled with the poison breaking out in large sores all over my body. I tried various remedies without receiving any benefits. Three bottles of SWIFT'S SPECIFIC S. S. S. effected a complete and permanent cure when all other blood remedies had failed. R. L. HENDERSON, Live Oak, Fla. Treatise on Blood and Skin Diseases mailed free. SWIFT SPECIFIC CO., Atlanta, Ga.

FOR OVER HALF A CENTURY. Mrs. Winslow's Soothing Syrup has been used for fifty years by millions of mothers for their children while teething with perfect success. It soothes the child, softens the gums, allays pain, cures wind colic, and is the best remedy for diarrhea. Sold by druggists in every part of the world. Be sure and ask for "Mrs. Winslow's Soothing Syrup," and take no other kind. Twenty-five cents a bottle.

When Baby was sick, we gave her Castoria, When she was a Child, she cried for Castoria, When she became Miss, she clung to Castoria, When she had Children, she gave them Castoria.
