Google Data Studio: An Introduction to One of Google's Hidden Tools

HELLO!

We are Audrey Richardson and Emily Guhde from Georgetown University

What is Google Data Studio?

66 Google Data Studio turns your data into informative dashboards and reports that are easy to read, easy to share, and fully customizable. Dashboarding allows you to tell great data stories to support better business decisions.

Combines narrative and number to give a holistic view of the data collected to various audiences.

As A Data Visualization Tool

Combines elements of commonly used products

- Google
- Excel
- PowerPoint
- InDesign

Engage with Stakeholders

- Combines reports with descriptive stats
- Familiarity with Google

Dynamic

- Interactive for users
- Avoid linear only view
- Collaborative between data reporters

...How Can It Work With Library Assessment?

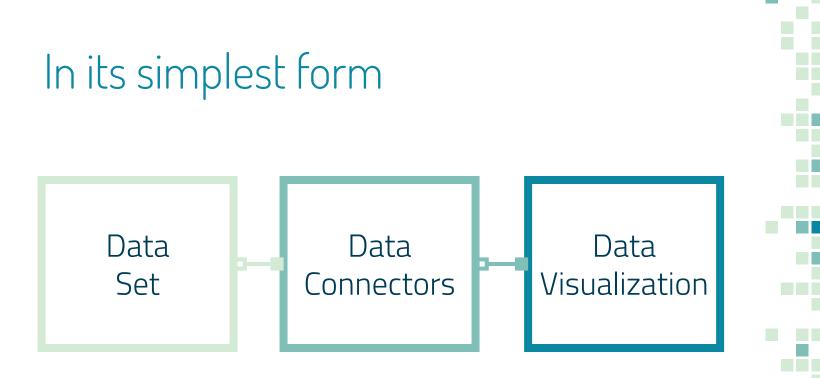

Uniqueness

Gives you a chance to highlight Data Visualization and Analysis
Allows for creativity

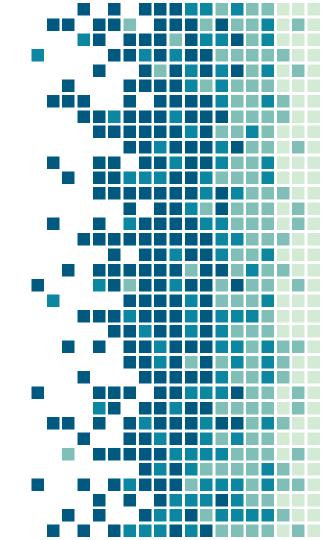

Ease of Use

Fast learning curve for audience
Can quickly comprehend the information
Easy to read and follow

How does it work?

Let's dive in!

Question Break

What are the Pros?

Assessment Leves a Positive

Google Product

Familiarity for you and your coworkers

Ever Growing

Continuing to expand fonts, features, and types of graphs

Appendices

Y

Provide meaningful data and add additional analysis

Assessment Leves a Positive

Secure Sharing

Levels of sharing from view to edit data connectors you can decide! Set and Forget 🍄 Data can flow directly into Google Data Studio and can update regularly

...It's Just Pretty Looks like an interactive slide deck and acts like one too

How about the Cons?

Not everything is sunshine 🦊

One incorrect connection or data point can cause a graph to fail

The more robust your Google Data Studio is, the slower it can be

Opening up to interpretation from your stakeholders

16

Not everything is sunshine 🥏

Sharing is Tricky

Adding collaborators to fully edit your report can happen, it just takes additional steps

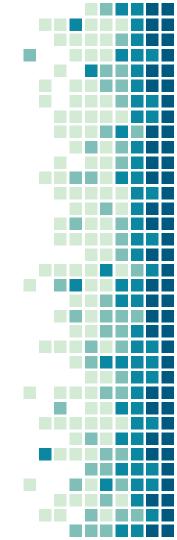

Hidden Tool

Doesn't show up in your Google menu so you have to search for it

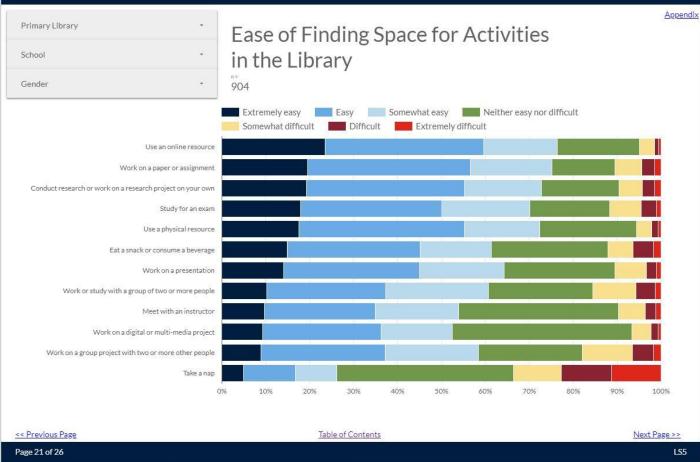

How have we used Google Data Studio at Georgetown?

Ithaka S+R Graduate and Professional Student Survey Report of Findings

LIBRARY

Blommer Science Library Customer Satisfaction Survey Results

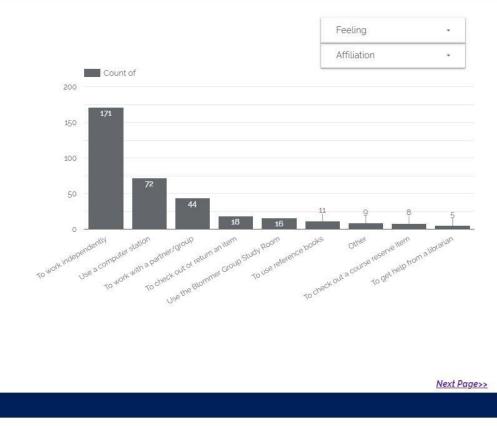

Customer Satisfaction

Purpose of visit

One of the first things we asked participants was why they were in the library that day. Participants were able to select all options that applied. This allowed for our participants to choose from a wide array (including "Other") and for us to ask further questions about those who used the Group Study Room, without everyone having to answer that question. In asking for all that applied, we were able to see the full spectrum of why someone visited the space, and not just what their main reason was for visiting. Some of the "Other" topics have been highlighted below.

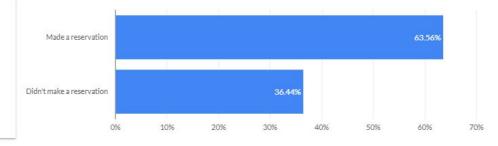

How did you make a reservation for your equipment? \int_{118}^{118}

Equipment Reservation Study

Over one-third of respondents said that they didn't make a reservation before showing up at Gelardin to pick up their equipment.

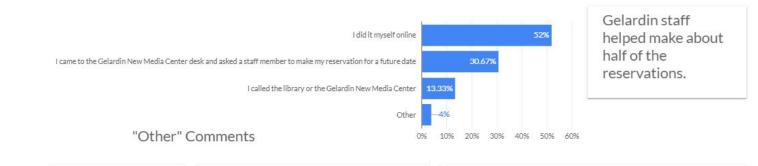

"e-mailed [staff

member]"

Those who DID make a reservation

ⁿ⁼ 75

"I did it online but when I came they told me I had rented a Nikon through the wrong center"

"I made the reservation online with CSE by mistake and was unable to change it. I emailed [staff member] and he fixed it"
