<i>Preface</i>	xvii
CHAPTER 1	
<b>Historical Introduction</b>	<b>1</b>
1.1. Early History	1
1.2. Astronomical Observations	3
1.3. Carbon Cluster Studies	3
1.4. Recent History	6
1.5. Architectural Analogs	7
1.6. Biological and Geological Examples	9
1.7. Road Map	12
References	13
CHAPTER 2	
<b>Carbon Materials</b>	<b>15</b>
2.1. General Considerations	15
2.2. Graphite	18
2.3. Graphite Materials	20
2.4. Graphite Whiskers	21
2.5. Carbon Fibers	21
2.6. Glassy Carbon	24
2.7. Carbon Blacks	25
2.8. Carbon Coated Carbide Particles	29
2.9. Carbynes	31
2.10. Carbolites	32
2.11. Amorphous Carbon	33

2.12. Porous Carbons . . . . .	34
2.13. Liquid Carbon . . . . .	36
2.14. Graphite Intercalation Compounds . . . . .	37
2.15. Diamond . . . . .	39
2.16. Other Diamond Materials . . . . .	41
2.16.1. Chemical Vapor Deposited Diamond Films . . . . .	41
2.16.2. Diamond-like Carbon Films . . . . .	43
2.17. Diamond-like and Cage Hydrocarbon Molecules . . . . .	44
2.18. Synthesis of a Fully Unsaturated, All-Carbon Polymer . . . . .	46
2.19. Metallo-Carbohedrenes (Met-Cars) . . . . .	48
2.20. Carbon-Free Fullerenes . . . . .	50
2.21. Metal-Coated Fullerenes . . . . .	51
References . . . . .	54
CHAPTER 3	
Structure of Fullerenes . . . . .	60
3.1. Structure of C <sub>60</sub> and Euler's Theorem . . . . .	60
3.2. Structure of C <sub>70</sub> and Higher Fullerenes . . . . .	66
3.3. The Projection Method for Specifying Fullerenes . . . . .	74
References . . . . .	77
CHAPTER 4	
Symmetry Considerations of Fullerene Molecules . . . . .	80
4.1. Icosahedral Symmetry Operations . . . . .	80
4.2. Symmetry of Vibrational Modes . . . . .	86
4.3. Symmetry for Electronic States . . . . .	90
4.4. Going from Higher to Lower Symmetry . . . . .	96
4.4.1. Symmetry Considerations for C <sub>70</sub> . . . . .	96
4.4.2. Symmetry Considerations for Higher-Mass Fullerenes . . . . .	104
4.5. Symmetry Considerations for Isotopic Effects . . . . .	104
References . . . . .	109
CHAPTER 5	
Synthesis, Extraction, and Purification of Fullerenes . . . . .	110
5.1. Synthesis of Fullerenes . . . . .	111
5.1.1. Historical Perspective . . . . .	111
5.1.2. Synthesis Details . . . . .	112
5.2. Fullerene Extraction . . . . .	116
5.2.1. Solvent Methods . . . . .	116
5.2.2. Sublimation Methods . . . . .	118
5.2.3. Solubility of Fullerenes in Solvents . . . . .	120
5.3. Fullerene Purification . . . . .	121
5.3.1. Solvent Methods . . . . .	121

<b>Contents</b>	<b>vii</b>
5.3.2. Sublimation in a Temperature Gradient . . . . .	125
5.3.3. Gas-Phase Separation and Purification . . . . .	128
5.3.4. Vaporization Studies of C <sub>60</sub> . . . . .	129
5.4. Endohedral Fullerene Synthesis . . . . .	131
5.5. Health and Safety Issues . . . . .	138
References . . . . .	138
 <b>CHAPTER 6</b>	
<b>Fullerene Growth, Contraction, and Fragmentation . . . . .</b>	<b>143</b>
6.1. Fullerene Growth Models . . . . .	143
6.1.1. Stone-Wales Model . . . . .	144
6.1.2. Model for C <sub>2</sub> Absorption or Desorption . . . . .	147
6.1.3. Fullerene Growth from a Corannulene Cluster . . . . .	148
6.1.4. Transition from C <sub>60</sub> to C <sub>70</sub> . . . . .	150
6.2. Mass Spectrometry Characterization . . . . .	152
6.3. Stability Issues . . . . .	153
6.4. Fullerene Contraction and Fragmentation . . . . .	156
6.4.1. Photofragmentation . . . . .	157
6.4.2. Collision of Fullerene Ion Projectiles . . . . .	159
6.4.3. Collision of Fullerene Ions with Surfaces . . . . .	163
6.4.4. Fragmentation of C <sub>60</sub> by Energetic Ions . . . . .	165
6.5. Molecular Dynamics Models . . . . .	166
References . . . . .	168
 <b>CHAPTER 7</b>	
<b>Crystalline Structure of Fullerene Solids . . . . .</b>	<b>171</b>
7.1. Crystalline C <sub>60</sub> . . . . .	171
7.1.1. Ambient Structure . . . . .	173
7.1.2. Group Theory for Crystalline Phases . . . . .	175
7.1.3. Low-Temperature Phases . . . . .	184
7.1.4. Merohedral Disorder . . . . .	193
7.1.5. Model for Phase Transitions in C <sub>60</sub> . . . . .	194
7.2. Crystalline C <sub>70</sub> and Higher-Mass Fullerenes . . . . .	197
7.3. Effect of Pressure on Crystal Structure . . . . .	203
7.4. Effect of Temperature on Crystal Structure . . . . .	208
7.5. Polymerized Fullerenes . . . . .	209
7.5.1. Photopolymerization of C <sub>60</sub> . . . . .	209
7.5.2. Electron Beam-Induced Polymerization of C <sub>60</sub> . . . . .	212
7.5.3. Pressure-Induced Polymerization of C <sub>60</sub> . . . . .	213
7.5.4. Plasma-Induced Polymerization of C <sub>60</sub> . . . . .	214
7.5.5. Photopolymerization of C <sub>70</sub> Films . . . . .	215
References . . . . .	217

<b>CHAPTER 8</b>	
<b>Classification and Structure of Doped Fullerenes</b>	224
8.1. Classification of Types of Doping for Fullerenes	225
8.2. Endohedral Doping	228
8.3. Substitutional Doping	233
8.4. Exohedral Doping	234
8.4.1. Exohedral Charge Transfer Compounds	235
8.4.2. Exohedral Clathrate C <sub>60</sub> Compounds	236
8.4.3. Positron Exohedral Trapping	238
8.5. Structure of Alkali Metal-Doped C <sub>60</sub> Crystals	238
8.5.1. M <sub>3</sub> C <sub>60</sub> Alkali Metal Structures	241
8.5.2. M <sub>1</sub> C <sub>60</sub> , M <sub>4</sub> C <sub>60</sub> , and M <sub>6</sub> C <sub>60</sub> Structures (M = K, Rb, Cs)	247
8.5.3. Na <sub>x</sub> C <sub>60</sub> Structures	249
8.5.4. Structures for M <sub>2</sub> M' <sub>1</sub> C <sub>60</sub> and Related Compounds	251
8.5.5. Structure of Ammoniated M <sub>3</sub> C <sub>60</sub> Compounds	253
8.6. Structure of Alkaline Earth-Doped C <sub>60</sub>	253
8.6.1. Ca <sub>x</sub> C <sub>60</sub> Structure	254
8.6.2. Sr <sub>x</sub> C <sub>60</sub> and Ba <sub>x</sub> C <sub>60</sub> Structures	254
8.6.3. Rare Earth R <sub>x</sub> C <sub>60</sub> Structures	256
8.7. Structure of Other Crystalline Fulleride Phases	256
8.7.1. Halogen-Doped Fullerenes	257
8.7.2. Fullerene Epoxides and Related Compounds	258
8.7.3. TDAE-C <sub>60</sub>	260
8.7.4. Metal-C <sub>60</sub> Multilayer Structures	261
8.8. The Doping of C <sub>70</sub> and Higher-Mass Fullerenes	262
References	263
<b>CHAPTER 9</b>	
<b>Single-Crystal and Epitaxial Film Growth</b>	271
9.1. Single-Crystal Growth	272
9.1.1. Synthesis of Large C <sub>60</sub> and C <sub>70</sub> Crystals by Vapor Growth	272
9.2. Thin-Film Synthesis	274
9.2.1. Epitaxial C <sub>60</sub> Films	276
9.2.2. Free-Standing C <sub>60</sub> Films, or Fullerene Membranes	281
9.3. Synthesis of Doped C <sub>60</sub> Crystals and Films	283
9.3.1. Charge Transfer Compounds Based on Alkali Metals and Alkaline Earths	285
9.3.2. Fullerene-Based Clathrate Materials	288
References	289
<b>CHAPTER 10</b>	
<b>Fullerene Chemistry and Electrochemistry</b>	292
10.1. Practical Considerations in Fullerene Derivative Chemistry	293
10.2. General Characteristics of Fullerene Reactions	294

10.3.	Reduction and Oxidation of C <sub>60</sub> and C <sub>70</sub>	297
10.3.1.	Fullerene Reduction—General Remarks	298
10.3.2.	Electrochemical Fullerene Reduction and Oxidation	300
10.3.3.	Chemical Oxidation of C <sub>60</sub>	303
10.4.	Hydrogenation, Alkylation, and Amination	304
10.5.	Halogenation Reactions	307
10.6.	Bridging Reactions	307
10.7.	Cycloaddition Reactions	312
10.8.	Substitution Reactions	314
10.9.	Reactions with Free Radicals	315
10.10.	Host–Guest Complexes and Polymerization	316
10.10.1.	Host–Guest Complexes	316
10.10.2.	Polymerization	320
	References	325

## CHAPTER 14

Transport and Thermal Properties . . . . .	556
14.1. Electrical Conductivity . . . . .	557
14.1.1. Dependence on Stoichiometry . . . . .	557
14.1.2. Temperature Dependence . . . . .	564
14.1.3. Alkaline Earth-Doped C <sub>60</sub> . . . . .	566
14.1.4. Alkali Metal-Doped C <sub>70</sub> . . . . .	569
14.1.5. Transport in Metal-C <sub>60</sub> Multilayer Structures . . . . .	570
14.1.6. Lewis Acid-Doped C <sub>60</sub> . . . . .	572
14.2. Electron-Phonon Interaction . . . . .	573
14.2.1. Special Properties of Fullerenes . . . . .	573
14.2.2. Magnitudes of the Coupling Constant . . . . .	575
14.2.3. Symmetry Considerations . . . . .	578
14.2.4. Jahn-Teller Effects . . . . .	579
14.3. Hall Coefficient . . . . .	580
14.4. Magnetoresistance . . . . .	581
14.5. Electronic Density of States . . . . .	583
14.6. Pressure Effects . . . . .	586
14.7. Photoconductivity . . . . .	587
14.8. Specific Heat . . . . .	594
14.8.1. Temperature Dependence . . . . .	594
14.8.2. Specific Heat for C <sub>70</sub> . . . . .	598
14.8.3. Specific Heat for K <sub>3</sub> C <sub>60</sub> . . . . .	598

14.9. Scanning Calorimetry Studies . . . . .	600
14.10. Temperature Coefficient of Thermal Expansion . . . . .	601
14.11. Thermal Conductivity . . . . .	602
14.12. Thermopower . . . . .	603
14.13. Internal Friction . . . . .	608
References . . . . .	609

19.2.2. Observation of Single-Wall Carbon Nanotubes . . . . .	765

19.2.3. Tubule Caps and Chirality . . . . .	769
19.2.4. Carbon Nanocones . . . . .	777
19.2.5. Nanotube Synthesis . . . . .	778
19.2.6. Alignment of Nanotubes . . . . .	785
19.3. Growth Mechanism . . . . .	785
19.4. Symmetry Properties of Carbon Nanotubes . . . . .	791
19.4.1. Specification of Lattice Vectors in Real Space . . . . .	791
19.4.2. Symmetry for Symmorphic Carbon Tubules . . . . .	795
19.4.3. Symmetry for Nonsymmorphic Carbon Tubules . . . . .	797
19.4.4. Reciprocal Lattice Vectors . . . . .	800
19.5. Electronic Structure: Theoretical Predictions . . . . .	802
19.5.1. Single-Wall Symmorphic Tubules . . . . .	803
19.5.2. Single-Wall Nonsymmorphic Chiral Tubules . . . . .	809
19.5.3. Multiwall Nanotubes and Arrays . . . . .	814
19.5.4. 1D Electronic Structure in a Magnetic Field . . . . .	818
19.6. Electronic Structure: Experimental Results . . . . .	825
19.6.1. Scanning Tunneling Spectroscopy Studies . . . . .	825
19.6.2. Transport Measurements . . . . .	827
19.6.3. Magnetoresistance Studies . . . . .	829
19.6.4. Magnetic Susceptibility Studies . . . . .	833
19.6.5. Electron Energy Loss Spectroscopy Studies . . . . .	838
19.7. Phonon Modes in Carbon Nanotubes . . . . .	839
19.7.1. Phonon Dispersion Relations . . . . .	840
19.7.2. Calculated Raman- and Infrared-Active Modes . . . . .	845
19.7.3. Experiments on Vibrational Spectra of Carbon Nanotubes . . . . .	850
19.8. Elastic Properties . . . . .	854
19.9. Filled Nanotubes . . . . .	858
19.10. Onion-Like Graphitic Particles . . . . .	860
19.11. Possible Superconductivity in C <sub>60</sub> -Related Tubules . . . . .	863

<b>CHAPTER 20</b>	
<b>Applications of Carbon Nanostructures . . . . .</b>	<b>870</b>
20.1. Optical Applications . . . . .	870
20.1.1. Optical Limiter . . . . .	871
20.1.2. Photoexcited C <sub>60</sub> -Polymer Composites . . . . .	873
20.1.3. Photorefractivity in C <sub>60</sub> -Polymer Composites . . . . .	876
20.2. Electronics Applications . . . . .	880
20.2.1. C <sub>60</sub> Transistors . . . . .	881
20.2.2. C <sub>60</sub> -Based Heterojunction Diodes . . . . .	884
20.2.3. C <sub>60</sub> -Polymer Composite Heterojunction Rectifying Diode . . . . .	885
20.2.4. C <sub>60</sub> -Polymer Composite Heterojunction Photovoltaic Devices . . . . .	886
20.2.5. Microelectronic Fabrication and Photoresists . . . . .	888
20.2.6. Silicon Wafer Bonding . . . . .	889

Contents	xv
20.2.7. Passivation of Reactive Surfaces . . . . .	891
20.2.8. Fullerenes Used for Uniform Electric Potential Surfaces . . . . .	891
20.3. Materials Applications . . . . .	893
20.3.1. Enhanced Diamond Synthesis . . . . .	893
20.3.2. Enhanced SiC Film Growth and Patterning . . . . .	893
20.3.3. Catalytic Properties of C <sub>60</sub> . . . . .	894
20.3.4. Self-Assembled Monolayers . . . . .	896
20.3.5. New Chemicals . . . . .	897
20.4. Electrochemical Applications of C <sub>60</sub> . . . . .	898
20.4.1. Hydrogen Storage and Primary Batteries . . . . .	899
20.4.2. C <sub>60</sub> Electrodes for Secondary Batteries . . . . .	899
20.5. Other Applications . . . . .	901
20.5.1. Nanotechnology . . . . .	901
20.5.2. Fullerene Coatings for STM Tips . . . . .	904
20.5.3. Fullerene Membranes . . . . .	905
20.5.4. Tribology—Lubricants . . . . .	905
20.5.5. Separations . . . . .	907
20.5.6. Sensors . . . . .	907
20.6. Commercialization and Patents . . . . .	908
