# Practical C Programming

*Third Edition*

Steve Oualline

**O'REILLY®**

*Beijing • Cambridge • Farnham • Köln • Sebastopol • Tokyo*

---

# *Table of Contents*

<i>Preface</i> .....	xv
How This Book is Organized .....	xvi
Chapter by Chapter .....	xvi
Notes on the Third Edition .....	xix
Font Conventions .....	xix
Ohtaining Source Code .....	xx
Comments and Questions .....	xxii
Acknowledgments .....	xxii
Acknowledgments to the Third Edition .....	xxiii
<i>L Basics</i> .....	1
<i>1. What Is C?</i> .....	3
How Programming Works .....	4
Brief History of C .....	6
How C Works .....	7
How to Learn C .....	9
<i>2. Basics of Program Writing</i> .....	11
Programs from Conception to Execution .....	11
Creating a Real Program .....	12
Creating a Program Using a Command-Line Compiler .....	13
Creating a Program Using an Integrated Development Environment .....	16
Getting Help on UNIX .....	33

Getting Help in an Integrated Development Environment .....	34
IDE Cookbooks .....	34
Programming Exercises .....	37
<b>3. <i>Style</i> .....</b>	<b>38</b>
Common Coding Practices .....	42
Coding Religion .....	45
Indentation and Code Format .....	45
Clarity .....	46
Simplicity .....	47
Summary .....	48
<b>4. <i>Basic Declarations and Expressions</i> .....</b>	<b>49</b>
Elements of a Program .....	49
Basic Program Structure .....	50
Simple Expressions .....	51
Variables and Storage .....	52
Variable Declarations .....	53
Integers .....	54
Assignment Statements .....	54
printf Function .....	56
Floating Point .....	57
Floating Point Versus Integer Divide .....	58
Characters .....	60
Answers .....	61
Programming Exercises .....	<u>62</u>
<b>5. <i>Arrays, Qualifiers, and Reading Numbers</i> .....</b>	<b>63</b>
Arrays .....	63
Strings .....	64
Reading Strings .....	67
Multidimensional Arrays .....	70
Reading Numbers .....	71
Initializing Variables .....	73
Typesof <sup>Integers</sup> .....	75
Typesof <sup>Floats</sup> .....	77
Constant Declarations ....	.. 77

---

Hexadecimal and Octal Constants .....	78
Operators for Performing Shortcuts .....	78
Side Effects .....	79
++x or x++ .....	80
More Side-Effect Problems .....	81
Answers .....	82
Programming Exercises .....	<u>83</u>
<b>6</b> <i>Decision and Control Statements</i> .....	<b>84</b>
if Statement .....	84
else Statement .....	85
How Not to Use strcmp .....	86
Looping Statements .....	87
while Statement .....	87
break Statement .....	<u>89</u>
continuc Statement .....	
Assignment Anywherc Side Effect .....	91
Answer .....	92
Programming Exercises .....	93
<b>7.</b> <i>Programming Process</i> .....	<b>95</b>
Setting Up .....	97
Specification .....	98
Code Design .....	98
Prototype .....	99
Makefile .....	101
Testing .....	104
Debugging .....	104
Maintenance .....	107
Revisions .....	107
Elcctronic Archacology .....	107
Marking Up the Program .....	108
Using the Debugger .....	108
Text Editor as a Browser .....	108
Add Comments .....	109
Programming Exercises .....	111

<b>H. Simple Programming</b> .....	<b>113</b>
<b>8. More Control Statements</b> .....	<b>115</b>
for Statement .....	115
switch Statement .....	118
switch, break, and continue .....	123
Answers .....	124
Programming Exercises .....	125
<b>9. Variable Scope and Functions</b> .....	<b>127</b>
Scope and Class .....	127
Functions .....	130
Functions with No Parameters .....	134
Structured Programming .....	135
Recursion .....	136
Answers .....	138
Programming Exercises .....	138
<b>10. C Preprocessor</b> .....	<b>140</b>
#define Statement .....	140
Conditional Compilation .....	146
include Files .....	148
Parameterized Macros .....	150
Advanced Features .....	152
Summary .....	152
Answers .....	152
Programming Exercises .....	154
<b>11. Bit Operations</b> .....	<b>156</b>
Bit Operators .....	158
The and Operator (&) .....	158
Bitwise or (   ) .....	160
The Bitwise Exclusive or ( ^ ) .....	161
The Ones Complement Operator (Not) ( ~ ) .....	161
The Left- and Right-Shift Operators ( << , >> ) .....	162
Setting, Clearing, and Testing Bits .....	163
Bitmapped Graphics .....	166

---

Answers .....	172
Programming Exercises .....	172
<b>12. <i>Advanced Types</i> .....</b>	<b>173</b>
Structures .....	173
Unions .....	175
typedef .....	177
enum Type .....	178
Casting .....	179
Bit Fields or Packed Structures .....	179
Arrays of Structures .....	181
Summary .....	182
Programming Exercises .....	182
<b>13. <i>Simple Pointers</i> .....</b>	<b>183</b>
Pointers as Function Arguments .....	188
const Pointers .....	189
Pointers and Arrays .....	191
How Not to Use Pointers .....	195
Using Pointers to Split a String .....	197
Pointers and Structures .....	200
Command-Line Arguments .....	201
Programming Exercises .....	206
Answers .....	206
<b>14. <i>File Input/Output</i>.....</b>	<b>209</b>
Conversion Routines .....	212
Binary and ASCII Files .....	215
The End-of-Line Puzzle .....	216
Binary .....	218
Buffering Problems .....	219
Unbuffered I/O .....	220
Designing File Formats .....	224
Answers .....	226
Programming Exercises .....	227

<i>15. Debugging and Optimization</i> .....	229
Debugging .....	229
Interactive Debuggers .....	240
Debugging a Binary Search .....	244
Runtime Errors .....	254
The Confessional Method of Debugging .....	255
Optimization .....	256
Answers .....	264
Programming Exercises .....	264
<i>16 Floating Point</i> .....	265
Floating-Point Format .....	265
Floating Addition/Subtraction .....	266
Multiplication .....	267
Division .....	268
Overflow and Underflow .....	268
Roundoff Error .....	269
Accuracy .....	269
Minimizing Roundoff Error .....	270
Determining Accuracy .....	270
Precision and Speed .....	272
Power Series .....	272
Programming Exercises .....	275
<i>III. Advanced Programming Concepts</i> .....	277
<i>17. Advanced Pointers</i> .....	279
Pointers and Structures .....	279
free Function .....	282
Linked List .....	283
Structure Pointer Operator .....	286
Ordered Linked Lists .....	287
Double-Linked Lists .....	288
Trees .....	292
Printing a Tree .....	296
Rest of Program .....	296
Data Structures for a Chess Program .....	300

---

Answers .....	302
Programming Exercises .....	303
<b>18. Modular Programming .....</b>	<b>304</b>
Modules .....	304
Public and Private .....	305
The extern Modifier .....	306
Headers .....	308
The Body of the Module .....	310
A Program to Use Infinite Arrays .....	310
The Makefile for Multiple Files .....	313
Using the Infinite Array .....	316
Dividing a Task into Modules .....	322
Module Division Example: Text Editor .....	323
Compiler .....	324
Spreadsheet .....	325
Module Design Guidelines .....	327
Programming Exercises .....	328
<b>19. Ancient Compilers .....</b>	<b>329</b>
K&R-Style Functions .....	329
Library Changes .....	332
Missing Features .....	333
Free/Malloc Changes .....	333
lint .....	334
Answers .....	334
<b>20. Portability Problems .....</b>	<b>337</b>
Modularity .....	337
Word Sire .....	338
Byte Order Problem .....	338
Alignment Problem .....	339
NULL Pointer Problem .....	341
Filename Problems .....	341
File Types .....	342
Summary .....	342
Answers .....	343

21. <i>C's Dustier Corners</i> .....	344
do/while .....	344
goto .....	344
The ?: Construct .....	346
The , Operator .....	346
volatile Qualifier .....	346
Answer .....	347
22. <i>Putting It All Together</i> .....	348
Requirements .....	348
Specification .....	348
Code Design .....	350
Coding .....	355
Functional Description .....	355
Expandability .....	357
Testing .....	358
Revisions .....	359
A Final Warning .....	359
Program Files .....	359
Programming Exercises .....	381
23. <i>Programming Adages</i> .....	382
General .....	382
Design .....	383
Declarations .....	383
switch Statement .....	383
Preprocessor .....	384
Style .....	384
Compiling .....	384
Final Note .....	384
Answer .....	385
<i>IV Other Language Features</i> .....	387
A. <i>ASCH Table</i> .....	389
B. <i>Ranges and Parameter Passing Conversions</i> .....	391

*C. Operator Precedence Rules ..... 393*

*D. A Program to Compute a Sine Using a Power Series .... 395*

*Glossary..... 399*

*Index ..... 421*
