

QUALITY CONTROL AND CUSTOMER SERVICE AT BESSY

J. Feikes and K. Holldack
BESSYII, Berlin 12489, Germany

Abstract

The Users of BESSYII are used to a small source point with a position stability in the order of some microns. This is monitored by staggered pair systems on each beamline and a high-developed beam position system. There is a constant collaboration between experimental and machine group to guarantee constant working conditions using the information of these systems.
