Media History and Literacy

Syllabus - Fall 2014

Scope: This is a survey course of mass media – newspapers, magazines, books, television, radio and the World Wide Web – and journalism and their effects on American history and culture. It also includes an introduction to media literacy and the profession of journalism. The course traces the historical development of mass media from the invention of the printing press in 15th century Germany to the explosion of the Internet around the world in the 21st century. It also examines how media have helped shape history, culture and government in the United States and other countries. Students will learn basic critical thinking and media literacy skills to help them become smart media consumers.
