This Syllabus is brought to you for free and open access by the Course Syllabi at ScholarWorks at University of Montana. It has been accepted for inclusion in Syllabi by an authorized administrator of ScholarWorks at University of Montana. For more information, please contact scholarworks@mso.umt.edu.

UNIVERSITY OF MONTANA
DEPARTMENT OF GEOGRAPHY
GPHY 588: VECTOR GIS
FALL 2014

Instructor: Dr. Diep Dao
Office location: Stone Hall 207
Telephone: (406) 243-6821
Email: diep.dao@mso.umt.edu
Office hours: Tue 11:00AM-1:00 PM or by appointment via email

Class days/time: Tue & Thu 9:40-11AM
Classroom: Stone Hall 217
Lab days/time: Mon 10:10-12AM or 1:10-3PM
Lab room: Stone Hall 218
Class website: On Moodle
Prerequisites: Students are expected be familiar with GIS & Cartography fundamentals.
Credit Units 4

Course description: The course addresses entity-based spatial problem solving by focusing on both the theoretical/conceptual and practical aspects of vector GIS spatial analysis and modeling.

Recommended Books:

O'Sullivan, D. and Unwin, D. (2010, 2nd ed) Geographic Information Analysis, Wiley.

Mitchell, A. (2009) The ESRI Guide to GIS Analysis, Volume 2: Spatial Measurements and Statistics.

Additional readings will be available on Moodle.

Online resources: Lecture ppts, lab assignments, and additions/modifications to the class schedule will be posted on Moodle class site and it is your responsibility to check it weekly! Additional required and recommended readings that supplement the course material will also be posted on Moodle.

Grading Policies:

Final grades will be calculated using the following thresholds: 90.0 (A), 80.0 (B), 70.0 (C), 60.0 (D), below 60.0 (F). The “+/-” grading system will be used. There will be no extra credit of any kind.

Task Percentage of Final Grade

| Task | Final Grade |
|-------------------|-------------|
| Labs | 40% |
| Mid-term Exam | 20% |
| Final project | |
| Presentation | 15% |
| Paper | 15% |
| Class interaction | 10% |

Extra Course Guidelines

1. Lab: Lab reports are due one week after the last scheduled lab time devoted to them. Submit before lecture time on Moodle. Word format electronic submission.
2. Exam: Cover the lecture materials. It may have multiple choice, matching, definitions, and short-answer questions.
3. Project: Individual. Topics are to be chosen by the student and approved by the instructor.
 - Proposal: more instruction will be provided.
 - Presentation: Individual formal 15-min presentation. Briefly state your research question(s), literature, methodology, and results. PowerPoint is recommended.
 - Paper: more instruction will be provided.
4. If you want the full credit possible for assignments:
 - SHOW YOUR CONCEPTUAL UNDERSTANDING
 - BE WELL-PLANNED, WELL-ILLUSTRATED, NEAT, AND CLEAR!
 - WHEN IN DOUBT - ASK!

UM Policy Statements

Academic Dishonesty: The university policy for cheating is clearly addressed on the website <http://www.umt.edu/studentaffairs/sccacademicconduct.htm>. Students cheating will be reported to the proper offices and receive a failing grade for the course.

Reasonable Accommodation: The university policy on students with disabilities is clearly addressed on the website <http://www.umt.edu/dss/default.htm>. Students who need assistance should contact the instructor immediately so that appropriate forms and procedures can be completed.

Course Schedule

| Week | Date | Topics | Reading |
|------|-------------|--|-----------------|
| 1 | 8/26 & 28 | Class overview; Introduction of geographical information analysis and entity-based spatial data model Pitfalls/potential of spatial data | Ch. 1 Ch. 2 |
| 2 | 9/1 | Labor day: No lab | |
| | 9/02&04 | Pitfalls/potential of spatial data (cont.) Mapping with spatial patterns and processes | Ch. 2 Ch. 4 |
| 3 | 9/08 | Lab 1 | |
| | 9/9&11 | Point pattern analysis Statistical tests, cluster detections, kriging | Ch. 5 |
| 4 | 9/15 | Lab 2 | |
| | 9/16&18 | Point pattern analysis (cont.) | Ch. 6, 9, 10 |
| 5 | 9/22 | Lab 3 | |
| | 9/23&25 | Area objects and spatial autocorrelation analysis | Ch. 7 |
| 6 | 9/29 | Lab 4 | |
| | 9/30&10/2 | Global vs. local statistics for autocorrelation analysis | Ch. 8 |
| 7 | 10/7 | EXAM | |
| | 10/9 | Spatial regression | On Moodle |
| 8 | 10/13 | Lab 5 | |
| | 10/14&16 | Spatial regression (cont.) Project Proposal due | On Moodle |
| 9 | 10/20 | Lab 6 | |
| | 10/21 | Spatial regression (cont.) | On Moodle |
| | 10/23 | Network fundamentals | |
| 10 | 10/27 | Lab 7 | |
| | 10/28 & 30 | Network analysis Updated project proposal due with data details and proposed methods | On Moodle |
| 11 | 11/3 | Lab 8 | |
| | 11/4 | No class – Election Day | On Moodle |
| | 11/6 | Network analysis (cont.) Implementing models in GIS | |

| | | | |
|----|--------------------------------|--|--|
| | | Wrap-up, practical applications of spatial analysis | |
| 12 | 11/10 11/11 11/13 | Work on final project: Q&A within assigned time slot No class - Veterans Day Wrap-up, spatial analysis & big data | |
| 13 | 11/17,18&20 | Work on final project: Q&A within assigned time slot | |
| 14 | 11/24&25 | Work on final project: Q&A within assigned time slot <i>Thanks giving week – safe travel!</i> | |
| 15 | 12/1 | Work on final project: Q&A within assigned time slot | |
| | 12/2&4 | Student presentations | |
| | 12/8 | Paper due @ 11:59PM electronic submission | |

This syllabus may be modified as necessary during the course. Last updated on Aug 22, 2014
