**Course Description:** Archaeology covers more than four million years to study past human cultures through ruins and other physical remains. This course highlights major archaeological discoveries on a worldwide scale, with an emphasis on the history of the human condition over the past several millennia. Case studies providing historical insight germane to navigating the modern world will be explored via lectures, class discussions, readings, and documentaries. Students will use critical thought and a series of writing assignments to articulate how such findings shed light on the dynamic timeline of the rise of complex societies. Students will be encouraged to use interdisciplinary evidence by integrating knowledge from the humanities, social sciences, and natural sciences in order to understand regional, continental, and transnational approaches to managing and conserving the world's cultural and natural heritage. The course will prepare students to be involved in ethical, educated decision-making related to protecting such heritage amid the context of intense cultural and global changes while navigating environmental, economic, and social issues intertwined with cultural heritage. This course will also prepare students for upper division course by developing writing skills through writing assignments and reviews of various publications.

---

**REQUIRED READINGS FOR THIS COURSE INCLUDE:** selections from *Eyewitness to Discovery* by Brian M. Fagan, along with other assigned readings (e.g., journal articles, book excerpts) that will be electronically distributed throughout the semester. See details in course schedule below.

**OPTIONAL TEXTBOOK:**

*Images of the Past* by T. Douglas Price and Gary M. Feinman. Mayfield-McGraw-Hill Publishing Co.

**COURSE STRUCTURE:**

This course meets for 50 minutes, three days a week, throughout the semester. Class meetings will include lectures, films, in-class activities/discussions, writing assignments, and exams geared toward students' understanding of the

ways in which archaeological discoveries have changed how we perceive the past and to consider how archaeological evidence cultivates an awareness of the diverse ways humans structure their lives.

Students can expect to participate in class—and earn participation points—by sharing their ideas with the rest of the class in informal discussions and by using archaeological evidence as a backdrop for presenting the ways in which human behavior and cultural ideas are part of a global and indigenous network of complex and interdependent relationships between nations and societies and their physical environments.

**ATTENDANCE:**

Attendance will be taken each class period. There will be some in-class projects and participation exercises that require attendance to get full points.

---

**GRADES:**

**STUDENTS WITH DISABILITIES:**

The Department of Anthropology is committed to equal opportunity in education for all students, including those with documented physical disabilities or documented learning disabilities. University policy states that it is the responsibility of students with documented disabilities to contact instructors DURING THE FIRST WEEK OF THE SEMESTER to discuss appropriate accommodations to ensure equity in grading, classroom experiences, and outside assignments. The instructor will meet with the student and the staff of the Disability Services for Students (DSS) to make accommodations. Please contact DSS (243.2373, Lommasson Center 154) for more information.
