Registrar Bain stable after heart surgery

Josh Pichler Kaimin Reporter

UM Registrar Philip Bain successfully underwent open-heart bypass surgery Wednesday afternoon to relieve clogged arteries. He was listed as stable Wednesday

Bain's wife, Marleen, said he will remain in the Intensive Care Unit until noon today, and could be released from the hospital within five to seven days.

Bain, 51, had an angiogram Monday that revealed the clogged arteries. He had been experiencing pain in his arms, Marleen said.

"He's in pretty good physical shape, he as and we've been eating low-fat, Marleen said. "He wasn't in physical pain, so they let him stay home and get a good night's sleep.

Although she hadn't talked to Bain Wednesday night, Marleen said his doctors assured her that he had done well in the surgery. She said her husband was in good

spirits Wednesday morning.
Bain has been UM's Registrar for 20
years. Associate registrar Laura Carlyon aid the office received many calls asking about Bain's health.

"Everyone's very interested and con-cerned for his situation," she said.

Switch to well-water cooling system saves UM money in energy costs

Nathan Schweber Kaimin Reporter

UM's recent switch to a well-water cooling system is saving the university money possibly enough money to cut the cost of an education down

"With the money we save from wells, we can either spend that money on maintenance, or possibly cut tuition, in the future," Facilities Services engineer Tom Javins said.

Although cutting tuition is more of a token statement. Javins said the more efficient systems could add up to substantial savings in energy and

money.
"The Pharmacy/Psychology
Building had its 150 horsepower air-conditioning system replaced with a 20 horsepower well cooling system," Javins said. "It saved the university over \$12,000 last year."

UM has replaced air condi-tioners in seven buildings in the past three years. Air-condi tioning systems were replaced by a total of 16 wells in the University Center, McGill Hall the Lodge, the Gallagher Business Building, the Science Complex, the

Pharmacy/Psychology Building and the Music Building. The soon-to-be-built Printing Services Building will also be equipped with a well.
Though Javins sees wells as

an excellent way to cut costs,

the profits won't necessarily come quickly. Installing a well sts \$225,000 and would take 21.6 years to pay back using the money that would be saved because of decreases water bills. When other savings are taken into account, however, such as electrical bills that would have been spent on air conditioning systems, the payback time for wells is less than

With the money we save from wells, we can either spend that money on maintenance, or possibly cut tuition in the future.

-Tom Javins, Facilities Services engineer

The wells were paid for by grants from the Montana Department of Energy and bonds from the Environmental Protection Agency and State Energy Conservation Agency The bonds will be paid back with savings generated by the

Javins said UM would like to drill enough wells to pump the 48-50 degree aquifer water through the university's tunnel system, cooling all the build ings on campus. But this plan costs too much money to comFour years ago, UM got water rights for up to 22 wells on campus, but the university

can't afford to drill the last six The next building to get a well cooling system will probably be the law school, Javins said. UM's water rights state that

the wells are to be used only for cooling and irrigation. Javins said UM isn't yet ready to equip wells for drinking water. To use well water for drinking would require a surface seal to keep the water from being con taminated. The water would also have to be disinfected and checked regularly for cross contamination with polluted

For the time being, drinkg water at UM comes from Mountain Water Co.

UM's largest well pumps 650 gallons per minute through the UC while the smallest well cools the aquariums in the Science Complex and pumps 15 gallons per

UM rests directly over the headwaters of Missoula's aquifer. The aquifer is an average of 70 feet under the ground, but fluctuates 25 feet horizontally throughout the course of a day. Each well goes down 120 feet

Javins routinely tests the ater for oil, minerals and 28 heavy metals to ensure it's clean before UM's two re-injection wells pump it back into the aquifer

ASUM clubs must battle for limited travel funds

Sonja Lee Kaimin Reporter

Nearly 128 ASUM-recog nized clubs will have to fight for the \$9,000 left in the student senate's new travel fund, after senators Wednesday doled out

about \$1,000 to only two clubs. The ASUM Senate approved a \$730 travel allocation to the Society of American Foresters and \$287 to Students For a Free Tibet. Senators turned down a \$559 request by the Division of

Last year's senate voted to strip requested travel funds from every club's budget. Instead of receiving travel allowances in their individual travel budgets, groups now have to ask the senate for travel money on a case-by-case basis

ASUM's travel fund holds \$20,000, or \$10,000 for each

The new system lacks rules to help senators decide how much money each group should

Wednesday's decisions were based on "unwritten guidelines." Senators asked clubs to reduce the number of students traveling or to come up with alterna

tive funds to cover costs.
While \$1,000 already has been taken from the \$10,000 total, ASUM President Jeff Merrick said the new system will not mean fewer dollars for fewer groups.

"What we have to take into consideration is that the Society of American Foresters is an extremely active group on cam

Merrick also said the new system will be more "democrat-

"The bottom line is that it gives every group an equal opportunity," he said.

The Society of American Foresters initially requested \$3,000 for airfare to a conference in Memphis, Tenn. Because the group already paid the registration fees for eight students to take the trip but now only has enough money to take four students, the society will lose about \$530, said Brian Pew, Society of American Foresters chair.

The society was the first group to go through the new system for distributing travel

"It's a good step," Pew said. "But it needs to have some of the kinks worked out.

The initial request from Students For a Free Tibet was for \$1,298 to pay for travel to a conference in Madison, Wis. Now instead of sending two students to the conference, only one will be able to go, said Paul Ryan, a member of the group.

ASUM administration, Legal

Read on.
As you may

As you may
know, the Montana
Power Company has
signed on as the
sole corporate sponsor of the annual Cat-Griz sor of the annual Cat-Griz football game. For the privilege of placing their logo on certain predominant features of Washington-Grizzly Stadium (not Mick Dennehy), they will be giving each school \$45,000 and, for at least the next two years, will have the game renamed in their honor as the "Montana Power Fall Classie".

At least that's what they'll

At least that
tell you.
Last week, the Kaimin
intercepted a fax from Montana Power executives sent to the athletic directors of both schools. It spelled out in glaring terms exactly the type of fiasco MPC will unveil at Reno H. Sales Stadium in

at Reno H. Sales Stadium in Bozeman on Nov. 22.

The memo was an outline of the spectacle that MPC is planning in conjunction with the game. Written in esoteric and strangely foreboding language, it was apparently being submitted for official

approval by the schools.

I was just a few lines into reading the document when I became confused by the writer's off-hand use of phras-

writer's off-hand use of phrases like "insert the mind bombs" and "complete psychological submission." But as I read on, I learned the truth. Accompanying the game will be an orgy of electrical prowess — an elephantine pageant of sights and sounds designed to coerce all those in extenders into a ullestive. designed to coerce all those in attendance into a collective biorhythm that binds, blinds and whispers a sweet song

Column by

about the impor-tance of prompt bill

tance of prompt bill payments. You will notice the difference between this game and those of years past the minute you take your seat. The hair on your arms will rise. An incessent buzz will twit. sant buzz will twit-ter your head and shimmy your nether regions.

Pre-game excite-ment? Hardly. More likely, you're sitting too close to the latticed frame

work of frayed power cords set up over the stadium for the half-time show. It's called "Meterman Mort's Stunt Spectacular.

Spectacular."
From what I could discern, the show is a rock opera of sorts (set to Styx's "Mr. Roboto") starring Meterman Mort as a semi-retired tragic hero who must prove his alle-giance to his electric company in order to regain his job and the love of his family. He must the love of his family. He must first, however, contend with a cast of nefarious forms of alternative heating devices that have been burning and choking the residents of the fictional town of Utilityville.

The climax apparently mes when Mort uses the hanging frayed cords to swoop down to rescue a group of albi-no children from the bowels of

a wood-burning stove.

There is no question this show is the cornerstone of the company's program, but they are taking other subtle suggestive measures to ensure their promotion dollar is not

wasted.

For example, MPC officials are banning the use of any song that doesn't contain the word "electric" from being played on the stadium PA sysplayed on the stadium PA sys-tem. In a song list included in the memo, titles such as "Electric Avenue" by Eddy Grant, "Electric Youth" by Debbie Gibson and the theme to the 80s children's show "The Electric Company" are to be played at every intermis. be played at every intermis-sion. They're even replacing

Lambda invites all

Dear Editor, In regard to the editorial written by Thomas Mullen, I would like to express my frus tration and disappointment with the opinion he stated of Lambda Alliance. I realize his intentions were to provoke amusement, or simply a reac tion in the reader. However, Mr. Mullen is obviously unaware of the impact that such negative connotations can have on our organization. Language such as, "To become a member of our gay student organization, Lambda Alliance... you have to be a rabid homosexual..." only per petuates and strengthens the existing negative stigma on homosexuality, and in this case, the Lambda Alliance

Mr. Mullen is also unaware of the membership and the focus of the Lambda Alliance.
The Lambda Alliance exists to provide a safe, social and sup portive space for homosexual members of both the UM campus and the Missoula community. Members of the organization strive to inform the UM students of current homosexual issues and the importance of their integration on campus and within the community. In addition, the Lambda Alliance office holds a diverse range of resource materials available to any member of the community.

Furthermore, the Lambda Alliance is avialable to everyone regardless of sexual orientation and student/non-student status. Anyone can benefit from the educational and supportive experience provided by the Lambda Alliance. Please come to a meeting if you are curious, are in need of support, simply want to have fun, or are skepti cal. We welcome everyone Meetings are held every Monday at 8 p.m. in the Montana rooms (3rd Floor of the UC) Ext. 5922.

Variety on tap for dance showcase

Nathan Scweber Kaimin Reporte

More than 50 people strutted their stuff last week during try-outs for the annual fall dance

About 30 of them made the About 30 of them made the cut for the November show, featuring 18 acts designed by more than 15 choreographers.
Coordinator Michelle
Antonioli said she is particular-

ly excited about the collabora-tive work between the dance department and the choreogra-

phers.
One of those choreographers is Jeanne Christopherson, a former UM dance student who has lived in the Missoula community for several years. She is choreographing a Brazilian dance number that incorporates African music invitia care. African music, singing and

chanting.
Dance student Jason Dance student Jason Gutzmer is working on a multi-media piece. Gutzmer recently spent time in Mexico perform-ing with a traveling show, and Antonioli is auxious to see the influence that experience has on

his choreography.

"Any one of these people can be real surprising," Antonioli

Some of the choreographers have worked in the show before, while others are new. Together

while others are new. Logether they form a mixed bag. "Generally these shows have quite a bit of variety," she said. "Your senses get opened on lots of different levels."

This variety will be apparent in the show's wide menu of music, ranging from opera to country western to "stuff I've never even heard of," Antonioli

The production will even fea-ture its share of humor.

"It's wonderful to see a show with so many different forms of expression," Antonioli said. "And to be a part of it as an audience member."

member."
This year the show will run two weeks instead of just one as it has in the past.
"It's a nice long time for people to see us because in the past people had to crowd in and have standing room only for the shows," Antonioli said. "Before, we've had to turn people away, often the moms and dads of the dancers."
The production will be held

The production will be held Nov. 11-15 and Nov. 18-22. Tickets are \$4 and are avail-able at the box office in the Fine Arts Building.

Bicyclists learn they too face the long arm of the law

Daniel Roberts
Kaimin Reporter

Chris Woodall got a traffic ticket over the summer. Though he admits now that he broke the law, he was surprised and more than a little upset when he got pulled over. Woodall was on his bicycle.

"It was... unexpected," he said.

Missoula police have begun to crack down on two-wheeled lawbreakers, and nearly every cyclist you talk to knows at least one person who has been in Woodall's toe-clips.

Missoula officials said that a steady increase in bicycle accidents and complaints about bicycles over the past few years have prompted the change. But some, like Woodall, think these officials are going too far. "At this point I think they

"At this point I think they are cracking down harder on bicycles than they would on cars." he said.

Woodall, a graduate student in forestry, got busted for riding on the sidewalk across from Pantzer Hall on the city side of Arthur Avenue.

Riding a bicycle on a city sidewalk is illegal. But Woodall said he didn't know that and said that few people do.

City Police said that sidewalk riding, especially downtown, is what concerns them most.

"Since April we've really

been concentrating on sidewalks in the city,"
Officer Rick
Munfrada said.
"It is a real safety hazard. I focus on sidewalks that have a lot of pedestrians and use common sense when I (ticket)"

Woodall also said that three of his friends have been handed tickets for riding at night without a light.

According to city and state law, it is illegal to ride at night without a front light and a rear reflector.

Munfrada said that this too is being enforced more than it has in the past.

Phil Smith, coordinator of Missoula's bicycle-pedestrian program, said he has been pushing for more law enforcement but has been doing so as an advocate for bicyclists.

"I want bikes to be taken as seriously as cars," he said. "When people see bikes run a red light, or when cars narrowly miss hitting someone at night

Sam Hall surfs on his Cruiser across the Higgins Street Bridge on Tuesday afternoon.

because they didn't have a light and they couldn't see them, their resentment builds. This really does hurt bicyclists."

Smith, whose job it is to encourage alternative transportation in Missoula, said that if people ride with respect, then people will drive with respect.

Jeff Scaton, manager of The Bike Doctor, said that three of his employees got tickets over the summer and that enforces ment of bicycle laws has increased dramatically over the past few months.

"The biggest change has been on riding on the sidewalk in the city," Scaton said. "The police won't give you a warning — just a ticket."

Scaton said he has seen several instances of cyclists getting tickets for riding on the sidewalks, even though they were just riding far enough to lock

their bikes on a rack.

He said that kind enforcement is too extreme but agreed that flagrant violators do hurt all cyclists.

"But what people have to remember is that it has nothing to do with the bikes," he said, "It has to do with who the vider is."

Police said they are also enforcing complete stops and use of hand-signals.

These racks overflow with bikes in front of Jesse Hall on Wednesday afternoon.

Forest areas offer bikers great escape

Josh Pichler Kaimin Reporter

So you've been riding your bike to school every day, avoiding cars, the bicycle police and your fellow students, and now you're pining to pedal away from the crowds.

Get ready. There are several weeks of sunshine left before winter strikes, and Missoula offers a plethora of opportunities for biking enthusiasts.

Joe Kipphut, resource forester for the Missoula Ranger District, said solitude-seeking bikers' best bet is to spin their wheels into the national forests.

"There are literally hundreds of miles of open and closed forest roads that bikers can use," Kipphut said. "You can pick out some really nice routes and get a great workout."

There are also challenging bike

trails at the Blue Mountain and Pattee Canyon recreation areas.

Bikers can get to Blue Mountain by heading south on Highway 93 for two miles, then turning right on Blue Mountain Road and traveling 1/2 mile before reaching the trailhead.

"Blue Mountain is great because it has several designated biking trails so you don't have to worry about running into pedestrians and hikers," said Jason Hudson of Big Sky Cycling. To get to Pattee Canyon bikers

To get to Pattee Canyon bikers should travel south on Higgins, then turn left on Pattee Canyon Drive for about four miles until reaching the trailhead.

"Pattee Canyon offers a number of good, well-marked intermediate trails," said the Bicycle Hangar's Sean Hardy. Maps for Lolo, Blue Mountain,

Maps for Lolo, Blue Mountain, Pattee Canyon and other recreation areas can be picked up at the trailheads, the Lolo National Forest building at Fort Missoula and bicycle shops around town.

Area experts also offered other tips for prospective mountain bikers.

Bicyclists inevitably encounter crowded recreation areas, and it's important to remember that pedestrians have the right-of-way, said Mark Aagenes of the Open Road bicycle shop.

"That's not always an easy thing for us to remember, but it really helps avoid conflicts," Aagenes said. "It may take us only 15 minutes to get to some areas, but hikers may think they are in the middle of nowhere, and we can be an invasion for them."

Kipphut said bicyclists should also avoid off-road trails when the ground is wet to minimize landscape damage.

Illegally parked bikes draw the attention of University Police

Nathan Schweber Kaimin Reporter

Motorists aren't the only ones getting parking violations around UM's campus.

University Police are busy patrolling the area,

University Police are busy patrolling the area, putting locks on bikes that are illegally parked and issuing fines to their owners.

Bikes locked to rails and ramps at handicapped entrances are the first to draw police attention, University Police Sergeant Charles Gatewood said.

"All we're trying to do is to get people to realize there's other people on campus less fortunate who need access to buildings," Gatewood said. "And those people are being inhibited by bicyclists."

Bikes that block entrances to buildings or that are locked to water lines, electric lines or gas lines, are also in violation, Gatewood said. "If a bike was attached to a gas line and someone came along and accidentally kicked it and created a spark, we could have quite a party on our hands," Gatewood said.

Trees, posts and fences are also off limits because they could be damaged by bicycle locks.

There are 56 bike racks scattered across the campus.

University officers secure illegally-parked bikes with a grey "Kryptonite" lock bearing the words "The control of the secure of th

with a grey "Kryptonite" lock bearing the words, "UM Police." To get the bike unlocked, the rider must call campus security. A \$10 fine is issued for bikes parked along a handicapped entrance and \$5 for those parked anywhere else. All the money goes to the university general fund.

"We've locked up quite a few this year," Gatewood said.

If a bike isn't claimed within two days of being

locked up by University Police, the owner's lock is cut off and the bike is impounded. If it still goes unclaimed, the bike is given to the city's bike program and is auctioned off.

"We don't enjoy locking up bikes," Gatewood said.
"But people have to have access to our buildings.
That's the main thrust of this operation."

Gatewood said that officers can also give citations for reckless riding and speeding. Bike regulations state that riders may only ride twice the speed of pedestrians. Copies of the regulations are available at both the Office of Campus Security and the information booth in the University Center.

"The university has taken many steps to encourage riding bikes and we want everybody to ride their bike," Gatewood said. "But we need to ride them responsibly and park them responsibly. If you do that, you won't have any problems with us, ever."

Sports

A sport where bruises and friends go hand in hand ...

Rugby vets no strangers to comaraderie

Steven Parker Gingras Kaimin Sports Reporter

On the field it's easy to see team camaraderie. But off the field more and more teams seem to split up, and that unity disappears leaving distinct cliques between teammates.

Rugby seems to be one of the few exceptions to this trend.

Rugby players eat, drink, live, and to some extent, exist together.

Every person on UM's men's team has a nickname, a nickname that will last for-

"People can gain nicknames," said team member and treasurer Dan "Atlas" Wartell, "but they can never lose them."

The nicknames reflect qualities about each player. Blondie, Sully, Atlas, Rookie for Life, One Lung and Tails name a few. Other elements that hold these athletes together are long road trips and tight bud-

Money for food and travel expenses is scarce. With a budget of about \$1,000 from ASUM and miscellaneous

"People can gain nicknames, but they can never lose them."

–Dan "Atlas" Wartell, UM Rugby player

small contributions from local business, rugby players invest their own money and other resources to travel to games.

No buses are rented, and players commonly ride from Missoula to Spokane, Wash., in the back of pickup trucks. Hotel money is non-existent so nights are spent in tents. "We have spent nights pretty much everywhere," player/press secretary Troy "Blondie" Henri said. "We camped in the snow, at ferry terminals, even by the side of the highway."

Wartell and Henri believe that much of the connection between rugby players comes from traveling and touring together.

"When you play seven games in 10 days, you end up in pretty bad shape," Wartell said. "That's when you really get to know what everybody's like."

Many players refer to rugby as a gentleman's game, and also think of themselves as normal people who enjoy a common sport.

"Many of the top players in the word still don't get paid for it," Henri said.

Most players can't say specifically why they play, but they all say it's a passion

"You don't play rugby," Wartell said. "It play's you."

Foley's Follies: A Green Bay following and a proud little brother

It was recently brought to my attention that every one of my columns men tions a certain pro football team that plays on the shore of Lake Michigan e the hat in the mug shot)

People may be getting the impression that I'm a crazed lunatic about my team or something. They may think I'm incapable of carrying on a conversation with out mentioning the Super Bowl XX

So today, I'm making a point not to mention the team founded by George Hallas back in the 1920s. Also, I won't even mention that this team is an early contender in the Peyton Manning sweep-stakes after an 0-2 start.

• Cheese cult

At the beginning of every season, there is always a bunch of "fans" who jump on the bandwagon of the defending Super Bowl champions. This year is worse than usual with the so-called Green Bay Packers fans.

The cheesehead bandwagoners are going way too far. It's no longer about football. It's more like a cult following that has reached Star Trek-like proportions

· Cut the cheese

If every Packers fan has religiously followed their beloved team since Vince Lombardi was coach like they say, how come we never heard much from these peo ple until last year? Most never even spoke up until

sometime in January And how is it that even people college age and vounger have also loved the since the great coach was there? He died before they were born. Something sn't quite add up.

Note to the handwag oners: We don't believe you We don't like you. And you're insulting the real Packer-backers, who have always been among the best fans in

Attention Wayne Hogan and NCAA rules officials: Get your fine books ready.

It's rumored that several UM coaches have been caught in the following acts: Kissing babies, giving blood, donating to the Jerry Lewis telethon, and displaying random acts of kindness throughout the

Please, for the good of college sports,

Column by

Bill Foley

for the good of mankind, put an end to this madness.

· Celtic Pride

With Rick Patino now the ch of the Boston Celtics, the NRA's all-time winningest team, some people still have low expectations of this year's squad.

The other night, a Fox Sports guy said the team won't put many wins on the board. But he said they'll excite Bean Town with Patino's style of play

I disagree. The only question I have is who my Celts will play in the

NBA Finals.

• Sportsmanship 101 I'm sick of the showoff antics of s of today's athletes. I wish more would demonstrate sportsmanship and stop the celebrations designed to show up their

There's a difference between being excited and being conceited after a score. And believe it or not, taking your helmet off and running for the television camera after a touchdown is just plain wrong.

Thomas Boswell, a great sports writer

for The Washington Post, wrote it best in 1989. Players who think Deion Sanders

"Wilt Chamberlain never smashed a backboard, because nobody doubted that he could. Bill Russell didn't have to talk trash at his foes. He just stared at them. He didn't try to scare them; he did scare

"Jackie Robinson never wore a Day Glo lime-green batting glove. He concentrated on stealing home, not headlines Bob Cousy never dribbled between his legs as he came up court unguarded, although he might dribble between your legs once you tried to guard him. One is showboating, the other is art."

We need more artists.

• Tiger who?

On his 26th birthday last Sunday, my older brother Don, who took the pictures of me in Fenway Park this summer, won the club championship at the municipal golf course in Butte for the third year in

I know it's not going to have a major impact on the local or national sports scene. It will probably go mostly unno-

But I thought I'd mention it because I'm proud of my brother and I can't pass up a great opportunity to brag about my

Way to go bro.

Cave art in Main Hall

Josh Pichler Kaimin Reporter

Tuesday morning the basement in Main Hall came alive with saber-tooth tigers, buffalo and antelope.

No, UM's administrative offices haven't been transformed into a wildlife preserve. Rather, they provided a convenient location for Professor Rafael Chacon's Art of the Western Civilization class to study neo-paleolithic cave paintings.

Students were divided into 10 groups and asked to reproduce a specific culture's style of art, using colored chalk and paper. Mesopotamians, Egyptians and Etruscans are some of the civilizations who are represented in the Main Hall basement this week.

After an hour of drawing, the students transformed the basement, which houses UM's international programs, into a strange mix of nee-paleolithic images and posters advertising study opportunities abroad.

Chacon, who has been teaching for three years, said these activities help art history come alive.

"Traditionally art history is taught in a lecture format," Chacon said. "The lights go down, the slides go up and students fall asleep, so instead of having students reading and talking about art, I get them to take a hands-on approach."

Chacon couldn't take his class to a real cave, so he found the next best place, the Main Hall basement.

"It's dark and cool and cavelike," Chacon said. Sophomore Jeremy Porter

said the activity was time well spent.

"It was really fun. It totally

"It was really fun. It totally allowed the information we're studying in class to sink in," he said. "It's a great way to interpret the information."

Chacon said he will leave the works up through the week.

AVAILABLE AT

Recognition deadline for ASUM clubs nears

Groups looking to receive ASUM recognition need to drop by the ASUM office and fill out their forms by Oct. 1.

fill out their forms by Oct. 1.
Only about 86 clubs have filled out the
forms during the past two weeks, said
Carol Hayes, ASUM office manager. There
are usually around 130 ASUM-recognized
groups.

If groups want to keep their budget allocations and be eligible for funding in the spring, they need to drop by the ASUM office and fill out the recognition form, she said. Groups who received ASUM funding for the 1997-98 fiscal year but neglect to fill out the forms could see their budgets taken away or frozen.
