1. In Fig. 8, the ϵ values for the upper and lower panels have to be interchanged, i.e., $\epsilon = 2.427$ meV (upper panel) and $\epsilon = 2.567$ meV (lower panel).

2. In Sec. III D 4 entitled "A compromise potential" on page 6485, the parameters of the HFD-B2 potential as expressed by Eqs. (6)–(9) were omitted and are as follows:

$$A^* = 9.959\ 237\ 2 \times 10^4 \quad \epsilon/k(\text{K}) = 28.953$$
$$\alpha^* = 7.471\ 112\ 4 \quad r_m(\text{A}) = 3.961$$
$$\sigma(\text{A}) = 3.547$$

$$c_6 = 1.223\ 761\ 5 \quad C_6(\text{au}) = 19.735$$
$$c_8 = 0.630\ 851\ 52 \quad C_8(\text{au}) = 570.0$$
$$c_{10} = 0.264\ 697\ 44 \quad C_{10}(\text{au}) = 13\ 400.$$
$$\beta^* = -4.947\ 690\ 4 \quad \beta = -0.315\ 35\ \text{Å}^{-2}$$
$$D = 1.6425$$

3. Add to Acknowledgments: U. B. thanks F. Vecchiocattivi for useful discussions on the correction of the diffusion data.

4. Table II: $E_{\min}$ (meV) $= -2.635$ for DK potential.

Erratum: Interference effects in surface enhanced Raman scattering by thin adsorbed layers [J. Chem. Phys. 92, 4600 (1990)]

Douglas Blue, Kate Helwig, Martin Moskovits, and Robert Wolkow

Equation (11) of this article contained a misprint. The correct equation should read:

$$n_f = \left[\frac{3 + 8\pi\rho_f\alpha}{3 - 4\pi\rho_f\alpha} \right]^{1/2}.$$
