## From the Associate Provost & Associate Vice President for Research

This has been a record-setting year for Eastern Michigan University (EMU) as the volume of scholarly and creative efforts by Eastern's faculty and students continues to grow. In last year's 2009 Annual Report, I noted that EMU had established a new record in federal grant awards, for a new benchmark of \$9.87M. This year, we are pleased to report that EMU has again established new all-time highs in external funding: receipt of federal grant awards in FY10 totaled \$12.98M, with overall grant and contract awards surpassing \$16M. I offer my genuine congratulations to everyone, faculty and staff alike, for not only this past year's accomplishments, but their ongoing efforts to build the intellectual environment at the University.

Success in external funding is only one component of an overall academic enterprise designed to maximize opportunities for scholarly and artistic pursuits among our faculty and students. This report summarizes an impressive array of activities in which our faculty and students are engaged, ranging from artistic expression, to the scholarship of teaching and learning, to community engagement and through traditional research. These activities illustrate the deep commitment that our faculty and students share for their disciplines in pursuit of new knowledge, service, and works of art.

As I have previously noted, one vitally important role of any public university is to to serve as a resource for local, state, and federal governmental units and to contribute to economic growth and stability. Thus, as you browse through this report, please pay particular attention to the numerous examples in which the efforts of our faculty, staff, and students have provided regional and statewide benefit. We are excited and proud to be part of building a foundation for the future of Michigan.

As always, the University is particularly indebted to all external organizations--private and public-that have supported the efforts of our faculty and students during the past year. These partnerships are vital to the health of Eastern and its overall learning

environment.

In closing, we thank you for your interest in this report and in Eastern Michigan University.

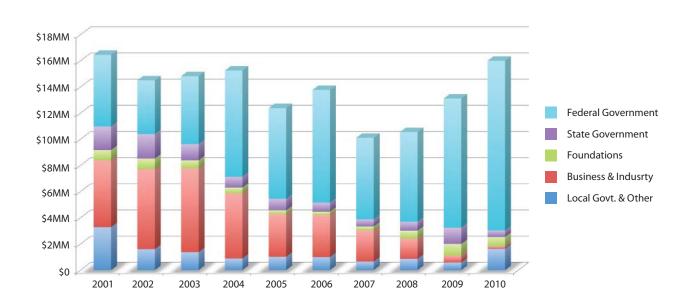

Best wishes,

**Robert Neely** 

Bole Duly

## Technology Transfer Summary for FY 2010

**Technology Transfer**, also known as Technology Commercialization, is the transfer of University-developed innovations into the marketplace for the benefit of the community, general public, and University. Innovation and its dissemination is the first and foremost goal. Revenue generation, through licensing royalties and option agreements, perpetuates the research and technology transfer process. The following is a summary of technology transfer activity at Eastern Michigan University during FY 2010.
