DONOR WELCOME—EMU President William E. Shelton took a moment to welcome many of the University's donors under the "Big Tent" before EMU's opening football game. The donor tent was one of many pregame tailgates for the EMU-Akron matchup which attracted 20,211 spectators.

Campus Capsules

Congressional Briefing to Center on ICARD Study

A Congressional briefing on the Institute for Community and Regional Development's Willow Run and related plant closings impact study will be held Thursday, Sept. 17, at 9 a.m. in Room 428 of the Capitol Building in downtown Lansing.

Sponsored by Michigan Sen. Lana Pollack and Rep. Kirk Profit, the briefing will precede the start of the House and Senate sessions and focus on the report, "Willow Run and Related Plant Closings: Causes and Impacts."

Open to the Legislature, interest group representatives and members of the media, the briefing will feature Dr. Charles Monsma, ICARD director; Dr. David Crary, EMU economist and associate director for ICARD; and research associate Carol Hogan. Crary and Hogan are co-authors of the study.

For more information, call Pollack's office at (517) 373-2406.

University Planning, Budgeting And Analysis Relocates

University Planning, Budgeting and Analysis offices have moved from Pease Auditorium to 306 Owen (College of Business).

This move includes the offices of Al Levett, director of budget management; Paul Moniodis, director of institutional analysis and reporting; and John Senko, coordinator of management and information systems.

George Johnston, executive director, will remain in 102 Welch. All telephone numbers will remain the same.

A fax number for University Planning, Budgeting and Analysis has been assigned. It is (313) 487-1035.

Retirement Seminar Begins Oct. 16

A two-weekend retirement seminar sponsored by EMU's Benefits Office and the EMU-American Association of University Professors will be held at Domino's Farms Best Western hotel Friday and Saturday, Oct. 16-17, and 30-31, from 2 to 5 p.m. both Fridays and from 9 a.m. to 5 p.m. both Saturdays.

The seminar will review medical benefits after retirement, attitude planning, fitness and recreation, financial investment and management, housing, work options, estate, will and trust planning, social security concerns and exiting EMU.

The cost of the seminar is \$50 which includes the program materials, lunches and snacks. No additional cost will be assessed for a spouse, significant other or guest. Participants must attend both weekends.

Reservations are due Friday, Sept. 25, and will be accepted on a first come first-served basis.

For more information or to reserve a space, call the AAUP at 7-1070.

New Staff And Faculty Invited To Bookstore Reception

Human Resources, in conjunction with University Marketing and Student Affairs, is hosting a new staff and faculty reception in McKenny Union's Guild Hall, Wednesday, Sept. 16, from 4 p.m. to 5 p.m.

Refreshments will be served! This is an opportunity to welcome new staff and faculty hired since July 1, 1992, as well as acquaint them with the bookstore's services.

Town and Gown Additions

Two names were inadvertently omitted from last week's Town and Gown Committee story. John Nordlinger, EMU assistant director of Intercollegiate Athletics, and Robert Oliver, director of media in the Ypsilanti Public Schools, also are 1992 Town and Gown Committee members.

Foreign Service Examination Scheduled

Registration materials for the Nov. 7, Foreign Service Written Examination now are available in the Career Services Center, 418 Goodison.

To be eligible for the exam, applicants must be a U.S. citizen and at least 20 years old on the date of the exam.

More than 10,000 people are expected to take the exam this year with only, perhaps, 250 eventually being offered employment with either the Department of State, the U.S. Information Agency or the Department of Commerce.

The deadline for registration is Friday, Oct. 2. Call 7-0400 for more information.

Weather Trivia

Carl Ojala, professor in the Geography and Geology Department, announced the calculated temperature averages for June, July and August from the EMU weather station, confirming that it was a colder summer than usual.

June came in six degrees Fahrenheit below normal. July and August both were four degrees below normal.

United Way Campaign to begin Sept. 21

September 15, 1992

Dear EMU Colleagues:

On Monday, September 21, Eastern Michigan University will kick off the 1992 EMU Employees United Way Campaign with its annual luncheon at 11:45 a.m. on the fifth floor of the Olds Student Recreation Center.

Recently, the leadership of our five bargaining units—UAW Local 1975, UAW Local 1976, AAUP, AFSCME and the FOP—indicated their intent to organize and conduct the United Way campaign among their respective memberships. We applaud the unions' volunteer participation in this important campaign and extend the University's continued support for the effort. We have invited each union president to address their representatives at the kick-off luncheon.

Pledge cards and United Way information will be available through Doris Komblevitz, Director of State, Federal and Community Relations, and the University will aid in processing payroll deductions as designated by individual employees for the 1992 campaign. Additionally, the Executive Division will coordinate the solicitation of our employees who are not represented in a bargaining unit.

The United Way campaign is our opportunity to share with those who are less fortunate in our communities. And in these difficult economic times, our support is more critical than ever.

Please give generously to one of the EMU Employees United Way Campaigns. Although slightly different in design, we must make every effort to see that the campaigns' net results meet or exceed our past successes. To do any less would be counterproductive and would hurt those in our community who need our help most.

Sincerely,

Roy Wilbanks
Executive Vice President

Ronald Collins
Provost and Vice President
for Academic Affairs

Golden Key honored

EMU's Chapter of the Golden Key National Honor Society recently received a prestigious Key Chapter Award at the national organization's convention and awards banquet in Scottsdale, Ariz.

The Key Chapter Award is presented to outstanding Golden Key chapters throughout the United States and Puerto Rico that have

excelled in five major areas: communication at the local and national levels; leadership support of the adviser and officers; involvement of honorary members in programs and activities of the chapter; the institution of a successful campus awareness and reception; and involvement of members in chapter ac-

Continuing Education to offer Columbus series

EMU's Continuing Education will offer a six-week history series titled "Cultural Encounters: The Impact of the Discoveries of Christopher Columbus" for six consecutive Saturdays, Oct. 3 through Nov. 7.

Guest professors and topics include: "The European Background of Exploration," with Professor Donald E. Chipman, University of North Texas; "The Spanish Empire and the Indians," with Professor Oakah Jones, Purdue University; "The English, the French and the Indians," with Professor David Edmunds, Indiana University; "Black Slavery in Spanish America," with Professor Frederick Bowers, Stanford University; "Black Slavery in English America," with Professor

Johnie D. Smith, Central Michigan University; and a concluding panel discussion by EMU faculty.

The lecture and discussion sessions will be held each Saturday from 9 to 11:30 a.m. at EMU's Corporate Education Center with discussion groups from 1 to 3 p.m. on EMU's main campus.

Individuals interested in earning two hours of graduate credit for the course numbered HIS-591 must attend all six lectures.

This series is being sponsored by EMU's World College and the Michigan Humanities Council.

All lectures are free and open to the public.

To register, call EMU Continuing Education at (313) 487-0407 or 1-(800) 777-3521.

Challenge prepares Habarth for EMU

By Tiffany Anteau

Janice Habarth of St. Clair Shores recently won one of EMU's Presidential Scholarship's. After taking the scholarship's competitive exam, Habarth confessed it was a challenge but felt her knowledge in some areas balanced out the subjects she was lacking in.

"As hard as the test was, I was excited to actually know as much as I did. I've had so much music training that when I didn't do so well in the science part it really balanced out," she said.

Janice Habarth

Habarth was excited about the award and the effect of the financial gift on her family.

"The best part of winning is that I'm the oldest of four children, and I'm glad my parents don't have to worry about my college tuition and can use their money for my brothers and sisters," she said.

Habarth had scholarship offers from other schools, but chose EMU because of the friendliness of

the students and faculty.

"The reason I picked EMU is that the people are warm. That is the first feeling I got when I walked onto the campus," she said. "I really wanted to attend Eastern after that."

Habarth's extracurricular activities include playing in her Lakeview High School Symphony Orchestra and marching band and serving as vice president of the National Honor Society and president of the Student Congress at Lakeview. However, Habarth said, extracurricular activities at EMU will have to take a back seat to academic pursuits.

"I probably won't be too involved in extracurricular activities at first, maybe during my second semester I'll try to get into the orchestra," she said.

Habarth's academic pursuits never suffered in high school in spite of all the extracurricular activities she participated in. She maintained all A's throughout high school and her grade point average was 4.13, including honors points, when she graduated.

"I truly have enjoyed my high school studies and activities, and I hope to pursue a similarly diversified lifestyle as I progress through college and postgraduate life," she said.

Habarth has an interest in teaching, particularly special education, and after gaining certification, she plans to spend several years in the Peace Corps before attending graduate school.

"A temporarily undeclared major will enable me to discover my strengths and desires while helping me in career decision," she said. "I hope to offer what I can to help society and those whom society has overlooked."

Milz picks EMU for program, scholarship

By Karmen Butterer

Jillian Milz's response to winning a Presidential Scholarship at EMU sounded like an epic movie review.

"I laughed. I cried. It was a shock," Milz said.

Although she was courted by several other universities, such as Case Western Reserve and Bradley University, Milz decided on EMU for several reasons.

Jillian Milz

"I liked EMU because of the friendly people on campus, it was close to home, has a good nursing program and they offered me the best scholarship," she said.

Earning that scholarship, however, was no easy task.

"I didn't think I would get the scholarship," said Milz, noting the tough math section of the test.

The daughter of Stephen and Dawn Milz of Ann Arbor, she plans to pursue a double major in nursing and German language.

"I hope to work overseas, or for an international health care organization such as the Red Cross. I would like to combine my ability to care for others while maintaining an awareness and respect for the different cultures in which they live," she said.

Milz's dual interests were well developed in high school where she participated in the German Club as co-president, hosted a German-American Partnership Program student, traveled to Germany and Poland with a school group for five weeks and hosted, with her family, a Spanish exchange student for six months. She also is a member of the Huron Valley Ambulance Explorers Post where she completed her first responder training, allowing her to ride as an emergency team member in an ambulance.

Continuing her extracurricular activities while at EMU is something Milz is planning on.

"My philosophy is to try everything and not be scared—it limits you," she said. "I can't wait! I would like to do some writing for the newspaper and join the German Club."

Another group she has already joined is the Honor's Program.

"EMU's Honor's Program can provide me with the challenges and benefits necessary to succeed with my goals," she said.

Milz said she is a little worried about her GPA because this semester she has chemistry. However, she feels the Honor's Program will help her make the adjustment to college.

"The classes are small and should be interesting. It has good benefits," she said.

Lancaster plans to enjoy scholarship benefits

By Tiffany Anteau

James (Pat) Lancaster is a calm, confident young man who recently won a EMU Presidential Scholarship. Now he just wants to "relax" and plan for his next eight years of school.

"I'm keeping my options open, but I know I want to do something in chemistry or biochemistry," Lancaster said. "I'll probably be in the research field, so I'm planning at least 8 years of school."

A Plymouth-Canton High School graduate with a 4.051 grade point average, Lancaster feels that the required GPA of 3.5 to keep the scholarship shouldn't be a problem for him.

"I don't believe that the grade point average should be a problem; a slight concern maybe, but not a problem," he said.

Lancaster believes there isn't an easy way to prepare for the competitive examination for the scholarship, but suggests future competitors rely on knowledge learned through the years and relax to help ease test anxiety.

"Generally, brush up and try to be diversified in all learning," he advises. "But relax, and definitely, don't get uptight. Be logical and stay calm."

This method obviously worked

for Lancaster.

"Although I was surprised to be invited back for the interview due to my scores on the test, I felt the interview went really well," he said.

Lancaster believes his participa-

Pat Lancaster

tion in community activities helped him win the scholarship.

"Recently, I was working at a carnival to benefit mentally and physically handicapped children. I've also participated in the Michigan Youth Arts Festival," he

said. "Through the National Honor Society, I've worked with the Salvation Army, the local Rotary Club and with the Knights of Columbus."

EMU wasn't the only college interested in Lancaster; several other universities and colleges made scholarship offers.

"Wayne State, Michigan State University, Western Michigan and the University of Miami all made scholarship offers, but EMU's was much better and I'm in the Honors Program here," he said.

"The Honors Program is something to be proud of. It has a tradition of excellence and a record of outstanding academic achievement," he said. "The close-knit relationship between the professor and the student is something I know will benefit me."

Extracurricular activities are important to Lancaster as well as academics. In high school, he was on the varsity swim team in addition to his volunteer work, and plans to try many activities at EMU to broaden his future and attain his goals.

"I want to become active in EMU's student government and eventually go out to the swim team," he said. "I plan to use most of my spare time constructively, when I'm not in class or studying."

Presidential Scholars join elite group

The 10 students featured on these pages are the academically-superior 1992 high school graduates from Michigan and Ohio who have been awarded Eastern Michigan University's most prestigious academic award, the Presidential Scholarship.

Valued at \$30,000 each, the scholarships provide all tuition, fees, room, board, books and supplies for four years of undergraduate study.

This is the first year EMU has awarded 10 Presidential Scholarships, after the Board of Regents voted to double funding for the program from its previous five awards each year.

All 10 students also have been accepted into EMU's Honors Program, a specialized and rigorous course of study for academically-talented students.

High school seniors are invited each year to compete for the EMU scholarships based on their grade point averages and scores on the American College Test.

Approximately 265 students took a faculty-designed exam at EMU last December in competition for the awards. The top 30 scorers on that exam were invited back to EMU for interviews from which these 10 winners were chosen. In addition to superior academic skill, the interview panels looked for students who were well-rounded in their interests, goal-oriented and involved in their communities.

Waterloo to pursue ambitions

By Karmen Butterer

After completing the competitive exam to qualify for consideration for a Presidential Scholarship at EMU, Laurie Waterloo said she felt like a zombie. Excited is how she felt after she found out she had won.

"I was very surprised when I found out I had won," Waterloo said.

A 4.0 graduate from Huron High School, Waterloo is planning to work toward an occupational therapy degree at EMU because she wants to benefit the lives of other people.

"This career is one that really excites me and that I am sure will

Laurie Waterloo

be very rewarding. More importantly, however, as an occupational therapist I could be creative in truly helping others," she said.

Waterloo eventually would like to work with developmentally- or physically impaired children, or stroke and accident victims to help them live relatively normal lives again.

Creativity is something that Waterloo enjoys in her life. She has studied clarinet for the past seven years and has an interest in both academic writing and writing poetry.

Continued on page 4

McGuckin proud of scholarship win

By Karmen Butterer

Akron's Kathryn McGuckin is proud of herself for having been awarded EMU's Presidential Scholarship.

"There were a lot of kids taking the test so I knew there was a lot of competition. I'm proud of myself for the work I've done, and relieved that the test is over," she said.

While at EMU, McGuckin, the daughter of Michael and Virginia McGuckin of Akron, Ohio, will be part of the academically-challenging Honor's Program and said she is ready for the experience.

"I took honors courses in high school and liked them. The Honor's Program at EMU also is prestigious and will be a challenge. I'm looking forward to living in the (Honor's residence hall) with peo-

ple that have the same interests."

Kathryn McGuckin she said.

At EMU, McGuckin plans to enter the dietetics program and pursue a career as a dietician. She developed this interest while serving as a volunteer at Akron Children's Hospital.

"I like to work with doctors and patients to discover problems and plan meals around their needs," she said.

McGuckin also would like to work with children with eating disorders or move into an administrative role in the dietetics area.

Volunteering at an area hospital is one of the activities McGuckin plans to continue through college as well as becoming involved with a local Catholic church.

In high school, she was a cheerleader, a member of the National Honor Society, in the foreign language club and a Future Medic.

Wieland has right combination for scholarship award

By Karmen Butterer

Hard work, luck, parental encouragement and motivation, plus family and church is the equation Bonnie Wieland of Midland put together to come out as one of EMU's Presidential Scholarship winners.

Wieland, who plans to major in chemistry, said that while driving home from the scholarship's competitive exam she told her dad not to expect her to win because the test was really hard.

"I felt confident during the literature, history and government parts, but I started to lose my concentration during the math section when the whole idea of the contest and how hard the test was started to set in," Wieland said.

The EMU scholarship wasn't her only financial aid offer. Central Michigan University courted her with a full-ride scholarship, but Wieland selected EMU after she compared the science programs at the two schools.

"I was more comfortable with EMU's science program and it was more geared to the major I want to pursue," she said.

Although she isn't sure if her interest in chemistry will take her on a research and development route or teaching trail, Wieland is sure

why she is interested in the subject. "I like seeing how things work. I like to work on a more molecular level, it's something I can relate to and I mostly like the number of possibilities for chemistry's use," she said.

Bonnie Wieland

Science isn't the only thing on Wieland's mind though as she begins college at EMU. She plans on continuing her involvement in various campus activities.

"I haven't set my mind on anything yet. I was in so many

groups in high school that I can't remember all of them. But I am looking into the Chemistry Club or perhaps, continuing volunteering," she said.

Wieland also hopes that living in the Honors' residence hall will provide her with more motivation and help her set higher goals.

One of those goals is to attend graduate school, which now is more of a reality because of the financial significance of the scholarship and not having to work when she could be studying, she said.

And studying is something she recommends to future Presidential Scholarship applicants. Wieland advises high school scholars to, "take as many academically-hard classes that you can. Take a broad range of classes and don't be afraid to take an honors class because you might get a lower grade."

Grades and classes aren't the only ways to get an education though, Wieland said it takes a lot of reading on your own as well as having your own academic interests as well.

While grades and classes have consumed a lot of her young life, Wieland has been active as a volunteer as well at her local hospital and with the Salvation Army.

Black surprised by beating competition

By Tiffany Anteau

Nicole Black was a very surprised woman when she found out she won one of EMU's Presidential Scholarships.

"There were so many people competing. I didn't believe I had a chance in the world. I was absolutely shocked," Black said.

Black also was accepted into EMU's Honors Program and hopes that it will help and benefit her academically during her first years in college.

"I have been told by several people how beneficial the Honors Program can be to new students and I certainly wouldn't refuse anything that would help me adjust," she said. "The extra support will be very welcome and I hope to contribute as much to the program as I receive."

Black graduated with a 3.83 grade point average from Saline High School where she varied her academic interests in order to broaden her horizons.

"I have taken many of the advanced placement courses that my school offers like advanced math analysis and advanced placement physics," she said. "I have made an effort to keep my academics geared toward college prep classes, but also have tried to keep them in a wide scope to keep my possibilities open in college."

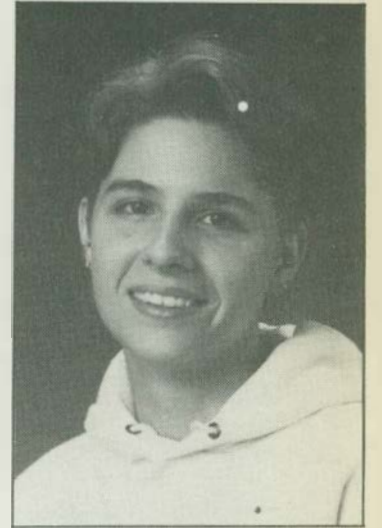

Black said her extracurricular activities included her membership in Saline High School's Science Olympiad team and the Future Problem Solving team.

On the Science Olympiad team I took several medals at regionals and competed twice at the state tournament in Lansing," Black said. "On Saline's Problem Solving Team, I worked as a scenario writer and was awarded fourth place in the state for my story's portrayal of global warming's effects on the future."

Black is interested in special education and wants to work with

the hearing impaired after graduation. She plans to minor in mathematics or philosophy.

"I am very excited about my future possibilities at EMU," she said. "They have a wonderful education program."

Nicole Black

Although academics will play a dominant role in Black's college career, she plans to take on some personal pursuits of her own.

"I plan to master the guitar and get really involved in intramural sports," she said. "That will definitely help me meet more people."

Black said she is looking forward to her EMU experience.

"I see Eastern playing a very important role in my future and I am looking forward, with anticipation and a few butterflies, to seeing what the future holds," she said.

She's also delighted to be part of EMU's academically-challenging Honors Program.

"I would have to say that it all boils down to the fact that I am delighted to be a member of that program and will do everything possible to make my membership beneficial to everyone involved," Black said.

Gryniewicz surprised and relieved by scholarship

By Laurie Rorrer

A typical response of students who win a EMU Presidential Scholarship is one of disbelief, and Ann Arbor's Deborah Gryniewicz's reaction was no different.

"I was very surprised," she said. "Then I felt relieved because it took care of my need for financial aid."

Another realization Gryniewicz shares with other winners is the satisfaction of knowing that she scored well enough to even be considered for one of the scholarships.

"After I finished, I didn't think I did well," she said. "For some parts of the test, such as physics and music, I wasn't as prepared because I didn't study these subjects as much in high school."

EMU was not the only school to offer her a scholarship. Michigan State and the University of Michigan also were among her choices. But after learning that EMU would grant her a Presidential Scholarship, she said her decision to attend EMU was easier.

The daughter of Tom and Ellen Gryniewicz of Ann Arbor, she is a 4.0 graduate from Pioneer High School. While at Pioneer,

Gryniewicz was on the yearbook staff and was part of the International Club and National Honor Society.

Debbie Gryniewicz

Volunteer work and community projects also are part of Gryniewicz's high school experiences. Last summer she served at an orphanage in Honduras helping children.

"I was there for three weeks," she said. "I did some cleaning and

played with the children; they don't get much attention."

While at EMU, Gryniewicz plans to expand her life experiences into her college career.

"I want to major in secondary education and go on to get my masters in guidance counseling because I want to work with children," said Gryniewicz. "I also am thinking about studying history."

Already accepted into EMU's academically challenging Honors Program, she is looking forward to the benefits of being a part of this elite group of scholars.

"The classes are small and I'll receive personal attention," Gryniewicz said. "I'll get to know the students too." She feels this is a plus because she found in a big school you can feel lost at times.

Gryniewicz isn't too worried about fulfilling the expectations of the scholarship.

"I had no problems in high school but...I'm a little scared," she said. "I think I'll be able to handle it."

"So far," she added. "I've had a good experience and I am very optimistic."

Collett's attitude helps net award

By Karmen Butterer

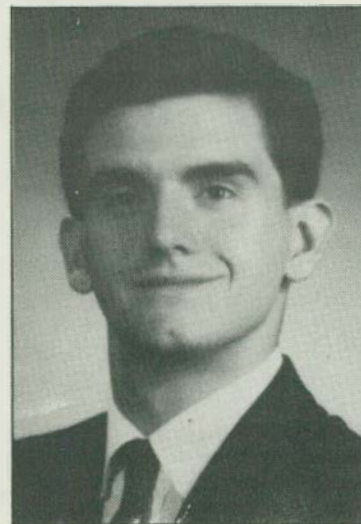

Ohio's Adam Collett prides himself on his positive attitude and credits that attitude with helping him win one EMU's Presidential Scholarships.

The test for the scholarship has a reputation as being a terrific challenge and Collett said he had conflicting feelings about his performance when he was finished.

"The humanities section was my strong point and I finished in a half-hour. On the second half (math and science), I was still working when they called time," he said. Collett said he figured that if he did exceptionally well on the first part and guessed right on the second part, he had a chance.

The son of Mary Jane Collett, he plans to major in special education while at EMU and already has explored his career choice through volunteer work both at a day and residential camp for handicapped

children.

Adam Collett

"I had no idea what I was getting myself into when I went with my brother to Camp Stepping Stones. I volunteered two or three days a

week, but I enjoyed the work so much I went back the next summer," said Collett, who later volunteered five days a week at the camp during the summer, eventually as games specialist.

Community involvement is one of the activities that Collett feels made him an excellent candidate for the Presidential Scholarship.

"Community service work really helps because it pays off in the end (for everyone). It distinguishes you from other people with the same qualifications," Collett said.

Participation in the Honor's Program at EMU also will help distinguish Collett from the crowd and further support his goals.

"I intend to continue my level of consistency in scholastic and community involvement while a part of the Honor's Program at EMU. I feel that the high level of intensity can carry me through everything I attempt," he said.

Zepp wins honor, sets goals for future

By Karmen Butterer

A cold, midterm exams and a coughing attack couldn't stop Plymouth's Angela Zepp from earning EMU's most prestigious and valuable award, a Presidential Scholarship.

"I had missed a few days of school because I was sick and was just finishing midterms," Zepp said of the day she took the competitive test to qualify for the scholarship. "I had a coughing attack during the test and thought I would have to leave."

Angela Zepp

It was a good thing she stayed, however, because she ended up as one of the ten recipients of the scholarship.

"I was very happy when I found out I had won. I called all my grandparents and my dad at work."

she said.

True to her studious nature, Zepp has already decided on a math or science major. "I like math and science because there is always an answer. All you have to do is find it...you know when you're right."

Zepp has already started to make her mark on campus by attending the EMU Leadership Conference this summer. "I loved the Leadership Conference. I got on a committee to look into ways to improve the library, which I like because it's something that everyone uses."

The Presidential Scholarship, on the other hand, isn't something everyone gets and Zepp is looking forward to taking advantage of the opportunity. She also enjoys the uniqueness of EMU's Honors Program.

"I like the idea of small classes with no teaching assistants. In the Honors Program, I will be in a small field. I'll get to know the people in the program and live with them (in the Honors residence hall)," she said.

Zepp offers a word of advice to future Presidential Scholarship hopefuls. "Take a varied course load. Be relaxed and not too scared. Be involved in a lot of activities and be an interesting person."

Her high school activities certainly live up to her own advice. Zepp was active as the vice president of the Spanish club, which put on their own version of the Oprah Winfrey Show in Spanish. She also coached swimming for the

Zepp

Continued from page 3

Special Olympics, was a delegate in the Model United Nations and helped organize files for the Plymouth Historical Museum.

Although confident about her abilities, Zepp admits she's a worrier about academics.

"I always worry about my GPA. I hope I can keep it up," she said.

Waterloo

Continued from page 3

Waterloo credits her varied interests for her high score on the competitive exam.

"For the multiple choice questions there isn't a whole lot you can do to prepare at the last minute," she said. "You need to expose yourself to different subjects and learn a little about everything. For the essay, you need to know how to express yourself well."

While at EMU, Waterloo will participate in the academically rigorous Honor's Program and feels the program will help her accomplish her goals.

"The smaller class sizes and individual attention are what attracted me," said Waterloo, who added that an endorsement from her sister, Julie, who was awarded a Presidential Scholarship last year, didn't hurt either.

"I had a similar scholarship offers from Western Michigan University, but chose EMU because I wanted to be close to home and got a good feeling from the school when I visited campus for a day," said Waterloo of the orientation day she spent on EMU's campus.

In addition to classes, Waterloo hopes to round out her college experience by perhaps participating in band or the orchestra at EMU.

"I'm a little nervous and excited about starting classes. I'm hoping there won't be a problem keeping my GPA up," she said.

Openings

To be considered for vacant positions, all Promotional Openings Application Forms **MUST BE SUBMITTED** directly to the Employment/Affirmative Action Office and received no later than 4:45 p.m. on the expiration date. **Note: Incomplete forms will not be accepted.**

The Employment/Affirmative Action Office announces the following vacancies. The expiration date for applying for these positions is Monday, Sept. 21, 1992. **Detailed job descriptions** may be reviewed in Room 310 King Hall. Posting Boards across campus also highlight necessary and desired qualifications. Locations of these boards are main traffic areas in: King Hall, McKenny Union, Roosevelt Hall, Business and Finance Building, Sill Hall, Pray-Harrod, Rec/IM Building, Physical Plant, Mark Jefferson, Hoyt Meeting Center, Dining Commons I, University Library, and the Owen College of Business.

Vacancy information may also be obtained by calling our 24-hour Jobs Line at 487-2462. Employment/Affirmative office hours are Monday-Friday 9 a.m. to 4:50 p.m.

FOOD SERVICE/MAINTENANCE

(Minimum Hourly Wage)*

- FMSA9306 - FM-06 - \$6.53 - Pot and Pan Utility, Hoyt Dining Service, September through April, M-F, II a.m. - 7:30 p.m.
- FMBF9308 - FM-06 - \$6.53 - Custodian, Custodial Services, M-F, 5 a.m. - 1:30 p.m.

CLERICAL/SECRETARIAL

(Minimum Bi-Weekly Salary)*

- CSAA9309 - CS-03 - \$529.38 - Secretary, Leadership and Counseling, word processing experience and/or ability and willingness to learn.
- CSAA9310 - CS-04 - \$587.76 - Secretary II, Institute for the Study of Children and Families, word processing experience and/or ability and willingness to learn.

PROFESSIONAL/TECHNICAL

(Minimal Bi-Weekly Salary)*

- PTAA9303 - PT-08 - \$1,074.94 - Administrative Associate, Teacher Education.
- PTAA9304 - PT-08 - \$1,074.94 - Administrative Associate, Leadership and Counseling.
- PTEX9310 - PT-08 - \$1,074.94 - Senior Programmer Analyst, University Computing
- PTSA9305 - PT-09 - \$1,234.54 - Assistant Director, Admissions Internal Operations, Admissions Office, valid Michigan Driver's license and ability to manage a specific recruitment territory.

ADMINISTRATIVE/PROFESSIONAL

(Minimum Semi-Monthly Salary)*

- APAA9305 - AP-09 - \$1,342.00 - Director, DECA Project, Business and Industrial Education, position terminates at expiration of grant.
- APAA9306 - AP-09 - \$1,342.00 - Director, BPA Project, Business and Industrial Education, position terminates at expiration of grant.

Research

Music Program

The National Endowment for the Arts has announced the availability of funding for its 1993 Music Program. The Music Program funds five categories of projects: Music Professional Training, deadline Oct. 23, 1992; Career Development Organizations deadline Sept. 25, 1992; Music Recording, due Sept. 25, 1992; Services to Composers, deadline Sept. 25, 1992; and Special Projects, due Feb. 12, 1993.

For further information, contact the Office of Research Development at 7-3090.

Disability and Rehabilitation Research

The National Institute on Disability of Rehabilitation Research of the U.S. Department of Education has set deadline dates for four of its 1993 grant programs. Funding is available for projects on knowledge dissemination and utilization, field-initiated research, rehabilitation research fellowships and research training and career development. Proposals for knowledge dissemination and utilization projects are due Feb. 23, 1993. Proposals for the other three competitions are due Oct. 5, 1992.

Contact ORD at 7-3090 for guidelines and application forms.

Exploratory Environmental Research

The Environmental Protection Agency is inviting applications to conduct exploratory research that focuses on any aspect of pollution identification, characterization, abatement or control or addresses the effects of pollutants on the environment.

Two deadline dates have been established for 1993: Feb. 1 and Aug. 2. For further information, contact ORD at 7-3090.

Humanities Grants

The Michigan Humanities Council supports public programs in history, literature, philosophy and other humanities disciplines. Working in cooperation with education, cultural and grass-roots organizations around the State, the Council makes grants, distributes resources and provides programs and services to all Michigan citizens through four types of grant programs: Regular Project Grants to encourage and support a variety of activities which bring humanities scholars and the public together to examine culture; Mini-Grants, which support the same activities of regular grants on a smaller scale; Planning Grants to support humanities scholars in developing an idea and preparing the proposal for an unusually promising projects idea; and Humanities Service Grants to help applicants make effective use of the offerings of MHC's Center for Humanities Services, an archive for products of Council-funded projects.

The next deadline for Regular grants is March 15, 1993. Mini-grant applications will be accepted until Dec. 1, 1992, and again until March 1, 1993. Planning grants have no set deadlines. Humanities Services Grants must be submitted at least eight weeks before the program date for the resources requested.

Further information and applications materials for all these programs are available from ORD at 7-3090.

Golden Key

Continued from page 1

tivities which benefit the campus and community.

Dr. James Devers, professor of English language and literature, is adviser to the EMU chapter, which now has won three such awards—in 1988, 1990 and 1992, under his stewardship.

"I'd like to take credit for these, but really it's the students who are responsible more than anything else," he said, adding that only 28 of the 181 chapters nationwide received Key Chapter honors this year. "It's really quite an accomplishment," he added.

Attending the convention and receiving the award on behalf of the chapter were Devers and students Angelique Camfield of Ypsilanti, Dawn Garmenn of Delta, Amy Fielder of Ypsilanti, John Nicolai of Enon, Ohio, and Michelle Smith of Chesaning.

Golden Key is a non-profit, academic honors organization which provides academic recognition, leadership opportunities and scholarships. Membership is by invitation only to the top 15 percent of juniors and seniors in all fields of study.
