User Acceptance of Prepaid Wireless Internet Technology (Guthrie College in UUM) As Case Study

Thesis submitted to the Faculty of Information Technology in
partial fulfillment of the requirements for the degree Master of
Science (Information Technology),

Unlversltl Utara Malaysia

By

Maher Abdulla Almahdi Alghali

KOLEJ SASTERA DAN SAINS
(College of Arts and Sciences)
Universiti Utara Malaysia

PERAKUAN KERJA KERTAS PROJEK
(Certificate of Project Paper)

Saya, yang bertandatangan, memperakukan bahawa
(I, the undersigned, certify that)

MAHER ABDULLA ALMAHDI ALGHALI

calon untuk Ijazah
(candidate for the degree of)   **MSc. (IT)**

telah mengemukakan kertas projek yang bertajuk
*(has presented his/her project paper of the following title)*

USER ACCEPTANCE OF PREPAID WIRELESS INTERNET TECHNOLOGY (GUTHRIE COLLEGE IN UUM) AS CASE STUDY

seperti yang tercatat di muka surat tajuk dan kulit kertas projek
(as it appears on the title page and front cover of project paper)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan dan meliputi bidang ilmu dengan memuaskan.
(that the project paper acceptable in form and content, and that a satisfactory knowledge of the field is covered by the project paper).

Nama Penyelia Utama
(Name of Main Supervisor): **MR. AZMI BIN MD. SAMAN**

PERMISSION OF USE

In presenting this thesis in partial fulfilment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the university library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor or, in their absence by the Dean of the graduate School. It is understood that any copying or publication or used of this thesis or parts thereof for financial gain shall not allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis

Request for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to:

Dean of Graduate School

Universiti Utara Malaysia

ABSTRACT

Technology Acceptance Model (TAM) is capable of explaining user behavior across a broad range of end-user computing technologies and user populations. The prepaid wireless internet technology provide to the students great opportunities and challenges. This aims of this research is to measure "student's acceptance of the wireless internet technology in the Guthrie College in UUM" by use Technology Acceptance Model (TAM) .This research investigates and discusses the TAM results involving use prepaid wireless internet technology. It will also attempt to understand students' beliefs, perceptions, attitudes and intentions. Findings will also find out the impact of wireless internet on the teacher's job performance.

Acknowledgements

First of all, thank the almighty God, for generously supporting me through all my studies. I would like to express my sincere gratitude to my supervisors, Mr. Azmi Md Saman for his kind help, support and guidance and pieces of advice throughout the whole process of writing this thesis .I would like to express my gratitude to many staff at the University were a constant challenge and source of support. I owe to them a lot for what they taught me during these years.

I would like to show my sincere appreciation to Mr. Ahmad Hisham bin Zainal Abidin, for all of his kind supports.

Many thanks go to my relatives back home especially to my beloved father and mother, Mr. Abdulla Almahdi Alghali and Mrs. Amsad Ali Abdulla Sekah. I wish to take this opportunity to express my deepest thanks to my brothers, sisters, brother in law and for the love affection and support they have provided me with on every step of my life, specially this important part of my education.

Last but not least I want to extend my warmest thanks to those that have helped me, in any way, during my thesis work.

My Allah bless us

CHAPTER ONE

INTRUDUCTION

1.0 Interdiction

The Internet plays a crucial role in the access of information resource. Source of information and other opportunities available via the internet are increasing exponentially. This comes with the steady increase in internet use for education (Edward and Bruce, 2002).

In a campus location, wireless technology allows users to achieve total computers and location independence. Computer resources can now be put wherever they are needed without wire connections for every computer. If any changing in educational environment, wireless technology can reduce the cost and complexity of facility configurations. Moreover with a WLAN, a single access point provides network access for multiple PCs with WLAN client adapters. Users can move among access points without connection interrupt. This means freedom to move in the area with

The contents of the thesis is for internal user only
