

PENGISYTIHARAN KERTAS KERJA
(Declaration of Thesis Work)

Saya, Farihan Elyana Binti Zahari calon bagi ijazah Sarjana Sains (Teknologi Maklumat) Universiti Utara Malaysia mengakui bahawa :

I, candidate for the degree of Universiti Utara Malaysia certify that:

- i) Tesis saya telah dijalankan, digubal dan ditulis sendiri di bawah penyeliaan :
My thesis was personally developed, conducted and written by me under the supervision of
- ii) Data saya adalah data asal dan saya sendiri mengumpul dan menganalisisnya; dan
My data is original and personally collected and analyzed by me and
- iii) Saya akan sentiasa mematuhi sayarat, polisi dan peraturan UUM mengenai penulisan tesis, termasuk undang-undang Hakcipta dan Paten Malaysia.
I shall at all times be governed by the conditions, policies and regulations of the UUM on thesis writing, including the copyright and Patent laws of Malaysia.

Jika saya didapati melanggar perkara-perkara di atas, saya dengan relanya menepikan hak penganugerahan Ijazah saya dan tertakluk kepada syarat dan peraturan disiplin Universiti Utara Malaysia.

In the event that my thesis be found to violate the conditions mentioned above, I voluntarily waive the right of conferment of my degree and be subjected to the disciplinary rules and regulations of University Utara Malaysia.

FARIHAN ELYANA ZAHARI

Nama Calon
Candidate's Name

Tandatangan Calon
Candidate's Signature

Tarikh
Date

Calon dikehendaki menandatangani pengisytiharan kerja tesis ini sewaktu menyerahkan tesis ke Sekolah Siswazah. Dokumen ini tidak perlu dijilid bersama tesis.

The candidate is to sign this declaration of thesis work when submitting the thesis to the

Graduate School. This document must not be bound with the thesis.

ONTOLOGY APPLICATION FOR THE AL-QURAN

A thesis submitted to the Graduate School in partial
Fulfillments of the requirement for the degree
Master of Science (Information Technology)
Universiti Utara Malaysia

PERMISSION TO USE

In presenting this thesis in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor(s) or, in their absence by the Dean of the Graduate School. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Requests for permission to copy or to make other use of materials in this thesis, in whole or in part, should be addressed to

Dean of Graduate School
Universiti Utara Malaysia

Kedah Darul Aman.

ABSTRACT (BM)

Pengetahuan berkait rapat dengan data dan maklumat yang telah diubahsuai. Pengurusan pengetahuan boleh dikongsi dan dihubungkan. Perkara yang paling penting, ia boleh digunakan untuk memodelkan sesuatu ilmu pengetahuan. Untuk skop yang lebih luas ia boleh digunakan untuk menstrukturkan *ontology*. Penggunaan *ontology* ke atas pengetahuan membantu pengguna memahami struktur itu dengan lebih mudah. Perkara penting dalam *ontology* ialah menunjukkan hubungan diantara kelas di dalam domain. Apabila hubungan telah dikenalpasti, barulah boleh memodelkan struktur *ontology* untuk Al-Quran. Bagi memodelkan struktur *ontology* ini kami menggunakan Protégé. Hasil daripada rekabentuk model menggunakan Protégé, satu struktur *ontology* untuk sembahyang telah terhasil dalam bentuk gambarajah. Penghasilan struktur *ontology* ini membantu dalam berkongsi ilmu pengetahuan dengan cara yang lebih mudah.

ABSTRACT (ENGLISH)

Knowledge is related to data and information that already modified. Knowledge management can be shared and interlinked. For broader scope, it can be used to structure the ontology. The use of ontology on knowledge helps users to understand the structure easier. The important matter in ontology is represented by showing the relation among classes in domain. When the relation is already identified, then the structure of ontology for the Al-Quran can be modeled. Protégé is used to model the structure of ontology. Then, the pray visualization form will be produced. This structure of ontology will assists in sharing knowledge.

CHAPTER 1

INTRODUCTION

1.1 Introduction

The shape of the earth and how it evolves is often discussed in science. Nevertheless, it had been mentioned in the Al-Quran for a long time. The Al-Quran provides clear explanation about human and natural. Due to this, the Al-Quran has very essential knowledge to be shared by all human. As Khan (2005) said in “What Is Al-Quran”, that the Al-Quran is the Holy Scripture of the Muslims and was revealed precisely by Allah to the Prophet Muhammad through Jibreel. It provides the basic codes of conduct in all spheres of life. Ontology is the way to share knowledge in the Al-Quran. The Al-Quran in the form of conceptual model helps us to find suitable verse related to our problems. Model conceptual is used to map text representation onto ontology concept. Relationships among the verse in every *sura* are defined. As an example, a woman prays will define verse of *sura* according to justification about women. The *suras* and the verses are arranged in the Al-Quran in the manner indicated by
