**PERAKUAN KERJA KERTAS PROJEK**  
**(Certificate of Project Paper)**

Saya, yang bertandatangan, memperakukan bahawa  
(*I, the undersigned, certify that*)

**BASHIR M. MOHAMED GEBLAWI**

calon untuk Ijazah  
(*candidate for the degree of*)      **MSc. (ICT)**

telah mengemukakan kertas projek yang bertajuk  
(*has presented his/her project paper of the following title*)

**REQUIREMENT MODEL FOR WEB BASED CUSTOMER ORDERING SYSTEM**  
**- SEGAR MART AS CASE STUDY**

seperti yang tercatat di muka surat tajuk dan kulit kertas projek  
(*as it appears on the title page and front cover of project paper*)

bahawa kertas projek tersebut boleh diterima dari segi bentuk serta kandungan  
dan meliputi bidang ilmu dengan memuaskan.  
(*that the project paper acceptable in form and content, and that a satisfactory  
knowledge of the filed is covered by the project paper*).

Nama Penyelia Utama  
(*Name of Main Supervisor*): **MRS. NUR HARYANI ZAKARIA**

Tandatangan  
(*Signature*) :  Tarikh (Date): 18/10/2006

Nama Penyelia Kedua  
(*Name of 2<sup>nd</sup> Supervisor*): **ASSOC. PROF. DR. WAN ROZAINI SHEIK OSMAN**

Tandatangan  
(*Signature*) :  Tarikh (Date): 18/10/2006

## **PERMISSION TO USE**

In presenting this thesis, the author agrees that Universiti Utara Malaysia's library may make this thesis freely available for reference and inspection. The author further agrees that permission for photocopying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by the author's supervisor or, in her absence, by the Dean of the Faculty of Information Technology. It is understood that any photocopying, publication, use of this thesis, or parts thereof for financial gain shall not be allowed without the author's written permission. It is also understood that, due recognition shall be given to the author and Universiti Utara Malaysia for any scholarly use of the materials presented in this thesis.

## **ABSTRACT (ENGLISH)**

The major concern among the farmers these days are on distributing their products to the right customers at the right time. These farmers have been depending on "middle-person" to take their products to customers. This situation has restricted farmers to be more successful in selling their products and earn better profits. In today's digital economy, selling goods have moved from the traditional way to the new way of doing business on the Web. Seeing this as an opportunity, agricultural goods should not be excluded from this golden opportunity. This research project is intended to propose a requirement model for web-based customer ordering system. Requirement model provides a more structured and integrated guide for the development of the system and serves as a good starting point for system development to understand users' requirement. To accomplish this research project, a case study has been conducted at Segar Mart which is a shop initiated by MOA for the farmers to sell their products direct to the customers.

The requirements captured from the study are modeled out using Unified Modeling Language's (UML) notation. The prototype technique is used to validate the requirements. In this technique, a simple prototype is developed by using ASP as programming language, My SQL Database server and Macromedia Dreamweaver for interfaces.

## **ABSTRAK (BAHASA MALAYSIA)**

Perkara penting yang menjadi isu di kalangan para petani pada masa kini adalah untuk memasarkan produk mereka kepada sasaran pelanggan yang betul serta bertepatan pada masanya. Kebanyakan daripada golongan petani ini terlalu bergantung kepada “orang tengah” selaku peraih untuk membawa produk mereka kepada pelanggan. Situasi ini telah mengekang kejayaan golongan petani untuk memperolehi keuntungan yang lebih baik. Dalam ekonomi digital hari ini, penjualan barang-barang telah beralih daripada kaedah tradisional kepada kaedah baru dan moden iaitu menjalankan perniagaan melalui Web. Memperlihatkan ini sebagai suatu peluang keemasan, produk pertanian seharusnya turut tidak ketinggalan dalam menggunakan peluang ini sebaik mungkin. Projek penyelidikan ini bertujuan untuk mencadangkan model keperluan untuk sistem tempahan pelanggan berdasarkan Web. Model keperluan menyediakan panduan yang berstruktur serta berintegrasi untuk pembangunan sistem dan bertindak selaku titik permulaan yang penting untuk memahami keperluan pengguna sesebuah sistem. Untuk melengkapkan projek ini, suatu kajian kes telah dilaksanakan di Segar Mart iaitu sebuah kedai yang dilhamkan oleh Kementerian Pertanian untuk para petani menjual produk mereka terus kepada pelanggan. Keperluan yang didapati daripada kajian telah dimodelkan menggunakan notasi UML (*Unified Modelling Languages*). Teknik prototaip juga telah digunakan untuk mengesahkan keperluan sistem yang dibangunkan. Dalam pembinaan prototaip, bahasa pemprograman yang telah digunakan ialah ASP (*Active Server Pages*) My SQL selaku pangkalan data serta program Dream Weaver telah digunakan dalam pembangunan antaramuka pengguna bagi sistem tersebut.

## **ACKNOWLEDGEMENT**

First, I would like to express my appreciation to Allah, the Most Merciful and, the most compassionate who has granted me the ability and willing to start and complete this study. I do pray to his greatness to inspire and enable me to continue the work for the benefits of humanity.

My most profound thankfulness goes to my supervisor Mdm. Nur Haryani bt Zakaria for her scientifically proven and creativity encouraging guidance. Moreover, I would like to thank deeply my second supervisor A.P. Dr. Wan Rozaini Sheik Osman for her enthusiasm waking guidance, scientific discussions and great support in doing this study.

My deepest thanks go to my family for their love, supporting and understanding. My appreciation also goes to all of my fellow friends who have helped me in giving me valuable ideas and encouragement that has motivated me to complete this thesis.

Last, but not least. I would like to thanks to all who lend a kindly hand in materializing this project.

Thank you UUM.

# **CHAPTER 1**

## **BACKGROUND OF THE STUDY**

This chapter contains an overview of the study, problem statement, research questions, research objectives, scope, significance of the study and also output to be expected at the end of this research study

### **1.1 An overview of the study**

Agriculture is the process of producing food, feed, fiber and other desired products by the cultivation of certain plants and the raising of domesticated animals (livestock). The agricultural economics profession has been constantly reshaping itself since the beginning of the 20th century. At that time, the economic importance of agriculture and the large proportion of the population working in this sector increased the value of research on farm management and the economics of agriculture, leading to the establishment of the farm management profession.

The contents of  
the thesis is for
