PERMISSION TO USE

In presenting this thesis as partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the Universiti Utara Malaysia may make it freely available for inspection. I further agree that permission for copying of this thesis in any manner, in whole or in part, for scholarly purposes may be granted by my supervisor, or, in their absence, by the Dean of the College of Business. It is understood that any copying or publication or use of this thesis or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to University Utara Malaysia for any scholarly use which may be made of any material from my thesis.

Request for permission to copy or to make other use of material in this thesis, in whole or in part should be addressed to:

**Dean of Research and Innovation
College of Business
Universiti Utara Malaysia

ABSTRACT

The purpose of this study was to investigate the effectiveness of academic program towards supporting lifelong learning in a technical university in Malaysia. This study explored the relationship between various components in academic programs namely teaching and learning strategies, learning materials, role of instructors, course content, support system, and practical sessions; and students' attitude towards learning and their motivation to learn. A total of 263 students from semester 2 to semester 7 in eight academic programs were surveyed. The finding reveals that the students have good perceptions on each component of the academic programs and all those components have significant relationship with the students' attitude towards learning. It is also further learnt that the students' motivation to learn has a very strong positive connection with the students attitude towards learning.

ABSTRAK

Tujuan kajian ini adalah untuk menyelidik sejauh mana keberkesanan program akademik dalam menyokong pembelajaran sepanjang hayat di salah sebuah universiti teknikal di Malaysia. Kajian ini melihat dari sudut hubungan di antara pelbagai komponen dalam program akademik iaitu strategi pengajaran dan pembelajaran, bahan mengajar, peranan pengajar, kandungan kursus, sistem sokongan, dan sesi praktikal; dengan sikap pelajar terhadap pembelajaran serta motivasi mereka untuk belajar. Sejumlah 263 pelajar dari Semester 2 hingga Semester 7 dalam lapan program telah dikaji. Hasil kajian telah menunjukkan bahawa responden mempunyai persepsi yang baik terhadap setiap komponen dalam program akademik dan kesemua komponen tersebut juga didapati mempunyai hubungan yang signifikan terhadap sikap pelajar terhadap pembelajaran. Hasil kajian juga telah membuktikan bahawa motivasi pelajar mempunyai hubungan secara positif yang sangat kuat dengan sikap pelajar terhadap pembelajaran.

ACKNOWLEDGEMENT

In the name of Allah, the Greatest and the Most Merciful. Praise to Allah S.W.T. for granted me strength, courage, patience, passion, and inspirations in completing this dissertation.

My utmost thank to my Supervisor, En. Ghazali bin Din, who was advising and mentoring me throughout the research process until the producing this dissertation.

A special thank is also dedicated to my beloved wife, Hazmila Abdul Hamid, who always be my source of inspiration and taking on many of the family's responsibilities to afford me time that I needed; and to my sons and daughters, Hafizi, Hakimi, Huda and Husna, who understand on your father's limited time to entertain all of you.

A heartfelt thank to my boss, Professor Ahmad Zahir Mokhtar who is also the Dean of UniKL MIAT, who granted the access for me to conduct the research within UniKL MIAT's facility and who always provide supports to me until I was able to finish this report.

Last but not least, this dissertation could not have been completed without the supports from my all office colleagues who directly or indirectly provide assistance and encouragement until the completion of this dissertation.

CHAPTER 1

INTRODUCTION

1.1 Background

The term of “lifelong learning” is no more an alien terminology nowadays. Most nations and leaders are now talking about its importance. Upgrading ones education to the highest level as possible is no longer a luxurious things to achieve, instead it becomes a necessity to individuals. Whereas for countries, economic growth is increasingly driven by knowledge and no country can remain competitive without applying knowledge that can boost their efficiency in producing goods and services and delivering them more effectively and at lower costs to a greater number of people (Kagia, 2002). As for the companies, employers start to realize the importance for their employees to keep pace with the speed of development of information and knowledge as well as to learn new skills in rapid changing business environment (Añonuevo, 2001). Thus, engaging seriously in lifelong learning is no longer an individual agenda, but also to companies as well as countries. Researchers (Anuwar, 2005; Daing Zaidah and Abu Daud, 2007; Erlane, Jamaliah, and Noraini, 2008) described many reasons why lifelong learning becoming so important nowadays such as rapid pace of change and globalization, economic opportunity, quality of life and security, and the development of ICT, to name a few.
