PERMISSION TO USE

In presenting this project in partial fulfillment of the requirements for a postgraduate degree from the Universiti Utara Malaysia, I agree that the University Library may make it freely available for inspection. I further agree that permission for copying of this project in any manner in whole or in part, for scholarly purposes may be granted by my supervisor(s) or in their absence by the Dean of Postgraduate Studies and Research. It is understood that any copying or publication or use of this project or parts thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my project.

Request for permission to copy or make use of material in this project, in whole or in part, should be addressed to

Dean of Postgraduate Studies and Research
College of Arts and Sciences
Universiti Utara Malaysia

ABSTRAK

Tujuan kajian ini adalah untuk mengkaji tahap penerimaan dan kesediaan menguna Sistem Maklumat Murid (SMM) dan Sistem Analisis Peperiksaan (SAP). Model jangkaan yang direkabentuk adalah berdasarkan kepada kajian-kajian lepas untuk menentukan factor-faktor seperti kegunaan persepsi, pemudahguna persepsi, tahap kecelik IT, kekayaan maklumat, penawaran produk, kesulitan dan kemudahan sekitar terhadap kesediaan dan kesanggupan menguna sistem-sistem tersebut. Berdasarkan kajian lepas, model TAM digunakan asas dan ia berjaya mencungkil dan menerangkan kesediaan menguna sistem-sistem tersebut. Model jangkaan turut disokong menunjukkan tahap perhubungan terhadap pembolehubah-pembolehubah cadangan dengan kesediaan menguna sistem-sistem tersebut. Kajian ini dijalankan di sekolah rendah di Kota Setar, Kedah Darulaman sebagai satu kaji selidik. Borang kaji-selidik digunakan sebagai alat dalam kaedah kajian dan data mentah yang diterima diproses dan dianalisis dengan menggunakan statistic analisis (PASW SPSS 18.0). Kaedah analisis yang digunakan adalah seperti analisis diskriptif, cronbach's alfa, hubungan Pearson Chi-Square, hubungan logistic. Hasil kajian menunjukkan bahawa terdapat hubungan yang signifikan dengan pembolehubah-pembolehubah yang dicadangkan terhadap kesediaan mengguna sistem SMM dan SAP. Jadi, hasil kajian ini membuktikan bahawa enam factor menyumbang kepada kesediaan/kesanggupan menguna SMM dan SAP dalam arena pendidikan.

ABSTRACT

The aim of this study was to evaluate teachers' acceptance of Student Information System (SMM) and Examination Analysis System (SAP). The research model created based on prior research to address the factors of perceived usefulness (PU), perceived ease of use (PEOU), IT literacy level, information richness, product offering, complexity and facilitating conditions towards intention to use and actual use of these systems. Based on the previous study, Augmented Technology Acceptance Model (TAM) has been to determine the teachers intention to use SMM and SAP. This study has been carried out in primary schools in Kota Setar, Kedah Darulaman as case studies. Questionnaire has been used as instrument in this descriptive survey method and the raw data is preprocessed and analyzed using statistical analysis. Statistical analysis software (PASW SPSS 18.0) were used to analyze the primary data using descriptive analysis including crosstabulation, chi-square and logistic regression analysis. The results from the statistical analysis indicate the significant contribution of these independent variables towards intention to use these systems. Thus, this analysis reveals that there are six factors significantly contribute and influence the intention to use SMM and SAP in education institution.

ACKNOWLEDGEMENT

First and foremost, I would like to express my deepest thankful to my God for His blessing, giving me the strength in completing this study.

My sincere and deepest gratitude to my supervisor, Associate Professor Fadzilah Siraj, who willing to supervise and lead me patiently with plot a routing and charitably sharing her abundant source of knowledge in this thesis. Indeed, I really grateful for my supervisor because without her assistance numerous of beneficial comments, this studyt would have never been possible.

It would not have been possible for me to complete the program and this study without the support of my family. My utmost gratitude goes to my loving mother, Rajamal Arumugam for her prayers and encouragement, also gave me strength to complete this course. To my loved husband Kumar, you never stopped in encouraging me special thanks and appreciation to my children Dinitha , Mivesh Kumar and Sehveetrraa. My family, you will be always in my heart, love you all.

Last but not least, a million thanks to all those who had lent a helping hand in permitting me to become visible of this project.

DEDICATION

*To my beloved mother Rajamal Arumugam, my husband Kumar, and also to
my children Dinitha, Mivesh and Sehveetrraa.*

CHAPTER ONE

INTRODUCTION

1.1 Overview

Globalization and technology change the processes that have speeded up the global economy together over the past twenty years which leads to a new global economy creation, powered by technology, fueled by information and driven by knowledge through computer science, information and communication technology (ICT). The form of this new global economy has serious implications for the nature and purpose of educational institutions.

Most developing countries have the capabilities to develop and increase the value of education through ICT (Blurton *et al.*, 2002). In fact, ICT is reported has changed the traditional educational foundation and assist as well as improving learnin among the students. ICT transformation has brought with it a variety of means, including productivity software, multimedia and network devices along with the dispersal of personal computers which opened new horizon of the development and implementation
