PERMISSION TO USE

In presenting this study in partial fulfillment of the requirements for a postgraduate degree from Universiti Utara Malaysia, I agree that the University's Library may take this project freely for any purpose. I further agree that permission for copying of study in manner, in part or whole, for scholarly purpose may be granted by my supervisor or in their absence by the Dean of Othman Yeop Abdullah Graduate School of Business. It is understood that any copying or publication or the use of this study or parts thereof for financial benefits are not allowed without my written permission. It is also understood that due recognition shall be given to me and to Universiti Utara Malaysia for any scholarly use which may be made of any material from my thesis. Request for permission to copy or use regarding on this materials in this study should be addressed to:

ABSTRACT

Training is an important function of human resource management. However, prior research about the relation between employee training and power distance mostly focuses on private higher education institutional within Kuala Lumpur, uses a few single case studies or examines only power distance. To address this need, the researcher will provide a theoretical framework which proposes that power distance factors affect training methods and training motivation. Data was gathered through distributed questionnaires answered by 300 respondents from employees in higher education institutional within Kuala Lumpur. Data was analyzed using the Statistical Package for Social Sciences (SPSS v.16) where descriptive analysis was used to analyze the social demographic variable of the respondent; and the Pearson Correlation Analysis was used to analyze the level of significant relationship between training methods with power distance and training motivation with power distance. Implications for practice and future research are discussed.

ABSTRAK

Latihan Kursus merupakan salah satu fungsi penting di dalam pengurusan sumber manusia. Walau bagaimanapun, kajian ini adalah berkaitan tentang hubungan di antara jarak kuasa dan faktor utama latihan, di mana ia tertumpu kepada pekerja di institut pengajian tinggi swasta di sekitar Kuala Lumpur dan juga menggunakan beberapa kajian kes. Bagi memenuhi keperluan kajian ini, satu rangka kerja teori dicadangkan berkenaan faktor jarak kuasa yang mempengaruhi keberkesanan latihan iaitu kaedah latihan dan motivasi latihan. Data kajian akan diperolehi melalui borang kaji selidik yang diisi oleh 300 orang responden terdiri daripada pekerja institut pengajian tinggi swasta di sekitar Kuala Lumpur. Data yang diperolehi telah dianalisa menggunakan Pakej Statistik Sains Sosial (SPSS v.16) di mana, Analisis Diskriptif telah digunakan untuk menganalisis maklumat peribadi responden dan Analisis Korelasi Pearson digunakan untuk analisis tahap hubungan signifikan antara kaedah latihan dan motivasi pekerja terhadap latihan dengan jarak kuasa. Implikasi untuk penyelidikan masa hadapan akan dibincangkan.

ACKNOWLEDGEMENT

In the name of **ALLAH**, Most Gracious and Most Merciful. First and foremost, Alhamdulillah, praise to Allah Subhanahhuwata'alah for giving me the will and strength in enduring problem in completing this thesis.

To my beloved mother, **Hajah Zauyah Binti Mahmood**, thank you for tirelessly taking on many of the family responsibilities to afford me time I needed. And also to my siblings, **Dila Bahar, Nisa Bahar, Syahir Bahar & Mira Bahar**, my truly friends, **Tuty Haryanty Rahim, Nur Syazana Osman, Nor Azian Ros** and **Mohd Sufian Jamaludin** my who understood my commitment and are always be my source of inspiration.

My profound gratitude and thanks to **Dr. Wan Shakizah Binti Wan Mohd Noor**, supervisor for this research, and **Mr. Ghazali Bin Din** for all assistance rendered and advice generously given to me.

I also wish to express my sincere appreciation to all the respondents who unhesitant spent time filling the questionnaires in spite of their busy schedule. It would not have been possible for me to complete this tedious and painstaking research without the understanding and sacrifice of my parents, wife and children for the entire period of my study.

First and last, thank Allah the Almighty for whatever I achieved.

CHAPTER 1

INTRODUCTION

1. Introduction

1.1 Background of the Study

Training in organizations is an organized educational activity that helps employees develop their personal and organizational skills, knowledge, and abilities. It is one of the most important functions of human resource management because it reflects organizations' recognition of the value of human capital investment (Noe, 2005). However, the majority of existing conceptualizations did not fully acknowledge the cultural contexts where training is conducted. According to Cervero and Wilson (1994), most training models can be traced back to Tyler's classic *Basic Principles of Curriculum and Instruction* as early as 1949. Wilson also cited that Tyler (1949) contended that any adequate educational activity must begin by identifying four fundamental questions: (1) what educational purposes or objectives should be attained? (2) what educational experiences can be provided in order to attain these purposes? (3) how can these educational experiences be effectively organized? and, (4) how can the effects of attaining these purposes be determined?

Nowadays these four questions have been transformed into four basic elements or stages of training process: (1) needs assessment, (2) instructional design, (3) training methods, and (4) training evaluation (Swanson, 2009). Although some literature has explored the issue of cultural impact on education or learning to a certain extent (Hofstede, 1986), this article goes beyond them by using a systematic set of cultural dimensions and being more comprehensive and holistic in examining the relationship
