CERTIFICATION OF THESIS WORK

PERMISSION TO USE

In presenting this thesis in fulfillment of the requirement for the award of Doctor of Philosophy Degree from University Utara Malaysia, I agree that the University Library may make it freely available and accessible for academic purposes. I further agree that the permission for copying of this thesis in any manner, in whole or in part, for scholarly purpose may be granted by my supervisor, or in her absence, by the Dean Ghazali Shafie Graduate School of Government, College of Law, Government and International Studies.

It is understood that any copy, publication, or use of this thesis in any manner or part thereof for financial gain shall not be allowed without my written permission. It is also understood that due recognition shall be given to me and to the University Utara Malaysia for scholarly use which may be made of any material from my thesis.

Request for permission to copy, make other use of material in this thesis in whole, or in part should be address to:

**THE DEAN,
GHAZALI SHAFIE GRADUATE SCHOOL OF GOVERNMENT,
COLLEGE OF LAW, GOVERNMENT AND INTERNATIONAL STUDIES
UNIVERSITY UTARA MALAYSIA (UUM) 06010 SINTOK,
KEDAH DARUL AMAN, MALAYSIA**

ABSTRAK (BAHASA MELAYU)

Abad ke-21 menyaksikan peningkatan konflik keganasan antara petani dan penggembala dalam kedua-dua koridor pedalaman Barat Laut dan Timur Laut Nigeria. Sejak kebelakangan ini, Tasik Chad telah menjadi salah satu medan pertempuran bagi konflik ini. Lembah ini mempunyai potensi ekonomi yang sesuai untuk kegiatan pertanian dan penggembalaan, lantas menarik penggembala dari zon yang mempunyai corak ekologi berbeza, seperti Chad, Niger dan Republik Cameroun untuk menetap di kawasan pedalaman di lembangan tasik Nigeria. Sememangnya, keganasan antara penggembala yang baru tiba dan petani tuan rumah yang membawa kepada beberapa pembunuhan dan kemusnahan telah menjadi satu kebiasaan dan semakin menjadi-jadi. Kajian ini yang menggunakan kaedah temubual dalaman (In-depth interview), perbincangan kumpulan fokus (Focus Group Discussion), serta pemerhatian bukan-peserta (Non-participant observation, dalam mengumpul data dari responden sasaran [petani; penggembala; pemimpin tradisional dan pegawai-pegawai kerajaan]. Hasil kajian ini menunjukkan bahawa faktor faktor seperti kekurangan kawasan ragut dan laluan binatang peliharaan, perubahan di dalam sistem pemegangan tanah, kelemahan perundangan di kawasan pedalaman, perkembangan polisi pertanian, faktor-faktor ekonomi serta perubahan cuaca adalah penyumbang kepada punca jangka masa panjang konflik, manakala kemusnahan hasil tanaman, serangan ke atas binatang ternakan, kepercayaan etnik dan socio-budaya, peranan sesebuah negeri, faktor politik serta tingkah laku ganas penggembala telah membawa kepada punca serta merta konflik antara petani-penggembala di kawasan Tasik Chad. Kajian juga menunjukkan bahawa, di kawasan kajian, konflik diuruskan melalui pendekatan tradisional dan moden. Kepimpinan sosial, ekonomi, politik dan tradisional merupakan pendekatan tradisional, manakala pentadbiran, perundangan dan kehakiman merupakan pendekatan moden. Sebagai kesimpulannya, kedua dua pihak; petani dan penggembala percaya evolusi. Negara moden telah mengubah sistem urus tadbir konflik tradisional berdasarkan komuniti yang telah dibangunkan berdasarkan kesucian norma norma dan nilai nilai tradisi. Akhir kata, kajian ini mencadangkan satu alternatif untuk menguruskan konflik antara petani dan penggembala di dalam masyarakat majmuk di Nigeria, yang menekankan kepada strategi pencegahan melalui urus tadbir yang baik.

ABSTRACT (ENGLISH)

The 21st Century heralded an upsurge of violent conflict between farmers and herders in the two pastoral corridors of Northeast and Northwestern Nigeria. The Lake Chad region has been one of the battlefields for these conflicts in recent years. The basin's economic potentials for both farming and herding attracted herders from other ecological zones, in Chad, Niger and Cameroun Republics to settle in the hinterlands of the Nigerian lake basin. Indeed, violence became common and widespread between newly arrived herders and their host farmers leading to several killings and destructions. The study utilized In-depth Interview, Focus Group Discussion, Non-participant observation in eliciting data from targeted respondents [farmers; herders; traditional leaders and government officials]. The study found out that, factors such as inadequate grazing reserve and stock routes; changes in land tenure system; insufficient legislation pastoralism; expansion in agricultural policies; economic factors and climate change are the long-term causes of the conflict. While crop damage; cattle raids; ethnicity and socio-cultural believes; the role of the state; political factor and herders' aggressive behaviors have been responsible for the immediate causes of farmer-herder conflicts in the Lake Chad region. The study also found out that, there exist traditional and modern approaches through which farmer-herder conflicts are manage in the study area. The traditional approaches include social, economic, political and traditional leadership. While administrative, legislative and judicial constitute the modern approaches. In conclusion, both farmers and herders believe that the evolution of modern state has altered their community-based traditional conflict management systems that developed on the sanctity of traditional norms and values. Finally, the study articulated an alternative proposal for managing of farmer-herder conflict in a plural society like Nigeria, which emphasizes prevention strategies through good governance.

ACKNOWLEDGEMENTS

I first thank the ALMIGHTY ALLAH for giving me all what it takes to undergo this study from the beginning to its conclusion. My special appreciation goes to my supervisor Assoc. Professor Dr. Rohana Yusof, despite her tight schedules, she always create time to attend to my thesis when the need arise. Her meticulous observations, comments, suggestions and useful contributions are responsible for the success of this work. I also thank my external examiner Assoc. Professor Dr. Mohd Rizal Yaakop, my internal examiner Assoc. Professor Dr. Mohd Fo'ad Sakdan and the Dean Ghazali Shafie Graduate School of Government Dr. Ahmad Bashawir Abdul Ghani. They played significant role through their useful observations and comments during my viva session and subsequent approval of my thesis for the award of PhD degree by University Utara Malaysia.

Thursday 14th July 2011 will remain indelible in my mind because it was a mix feeling of joy and sadness. On that day morning, I successfully presented and defended my thesis for the award of PhD with joy and happiness. Barely eight hours later, had the joy suddenly cut short when I received the saddest news of the death of my beloved wife Hadiza Mohammed Kala (May her soul rest in ALJANNA FIDDAUSI) leaving behind four children (Maryam 6, Mohammed 4, Ahmad 2 and Aisha the youngest 4/months). Unmindful of all odd she stayed with me in Malaysia for seven months during my studies. Her impeccable love, support, patience and perseverance, advices are partly responsible for my successes in life. My prayers for her, our deceased parents and our children will endlessly remain until eternity.

I want to acknowledge the support of my late father Mallam Ahmadu Bamairama who died on Saturday May 21, 2011 and my late father in-law Alhaji Mohammed Kala (May ALLAH bless them with ALJANNA FIDDAUSI). I appreciate the

support of the entire members of the two families, for standing behind me at all times the need arises.

The program I went through in Malaysia could not have been feasible without the moral and financial support of Alhaji Mohammed Lawan Buba. May ALLAH bless him and his family. I want to use this medium to thank Professor Shettima Umara Bulakarima and Professor Mohammed Mala Daura for their encouragements. I want to also thank Mohammed Nuhu, Lawan Mohammed ohlala, Rabiou Mamman, Ahmadu Buba, Alhaji Ali Baima, Alhaji Ibrahim Tangwaya, Sulaiman Lawan Buba, Mallam Goni, Mallam Nura, Goni Imam Ngala and Barrister Mustapha Mohd Sani for their support.

Finally, I thank all Nigerian brothers in University Utara Malaysia for their cooperation and goodwill during our studies in the university.

DEDICATION

I dedicate this dissertation to my beloved late wife Hadiza Mohammed Kala and my children Maryam Hamman, Mohammed Hamman, Ahmad Hamman and Aisha Hamman. May Allah bless them. Ameen.

CHAPTER ONE: INTRODUCTION

1.1 BACKGROUND OF THE STUDY

The Nigerian state is a product of colonization contrived and conceded by the British in 1960. Nigeria is currently having an estimated population of over 154.7 million people (UNDP, 2009). Approximately, 70 - 80 percent of these populations are predominantly farmers leaving in the rural areas (UNDP, 2009).

The re-emergence of democratic rule in 1999 heralded a re-newed conflicts and convulsions, ranging from ethnic crises, religious intolerance, political instability and proliferation of resource conflicts, absence of good governance as well as lack of development. Nation building continued to suffer from strong divisive forces of ethnicity, religion and natural resources conflict, which presupposes the weakening of national cohesion and integration (Maiangwa and Ahmadu, 2007).

Most prominent resource conflicts are the upsurge of hostilities in the oil rich Niger Delta Region in Southern Nigeria, and widespread violence between two dominant production communities (farmers and herders) in Northern part of the country. Farmer-herder conflicts have existed since early beginning of agriculture in Africa (Fratkin, 1997). Nevertheless, its continued manifestation into violence against the backdrop of resource scarcity, increase in the population of resource users, lack of adequate grazing reserves and poor state of the existing ones, unequal resource distribution and the consequent failure of patrimonial states, the region has been susceptible to antecedents of what Robert Kaplan (1994) described as the “coming anarchy”. Farmer-herder conflicts are among the key manifestations of this anarchy and this is linked with the region’s socio-economic and political ecology (Kaplan, 1994; Hussien, 1998; Shettima and Tar, 2008).
