ABSTRAK

Tesis ini mengkaji hubungan antara elemen-elemen kemanusiaan seperti peranan, kekuatan dalaman dan komunikasi dengan kejayaan penyumberan luar sistem maklumat. Kajian ini turut meninjau kesan amalan perkongsian ilmu tersirat sebagai perantara terhadap hubungan tersebut. Sebanyak 500 borang soal selidik telah diedarkan melalui mel kepada pengurus projek syarikat penyumberan luar sistem maklumat yang berdaftar dengan Multimedia Super Corridor Malaysia. Daripada jumlah tersebut, sebanyak 168 borang soal selidik telah dikembalikan dan hanya 166 sahaja yang telah dikod dan dianalisis. Analisis kajian ke atas hipotesis-hipotesis dijalankan menggunakan analisis regresi berganda dan regresi hierarki berganda. Dapatan kajian menunjukkan bahawa elemen-elemen peranan seperti skop projek dan galas tanggungjawab, elemen-elemen kekuatan dalaman seperti keyakinan diri, menghormati rakan, keikhlasan dan bersedia untuk berubah, dan elemen-elemen komunikasi seperti perbincangan formal dan tidak formal, dan perbincangan rasional mempunyai hubungan yang positif dan signifikan terhadap kejayaan penyumberan luar sistem maklumat. Selain itu, dapatan kajian juga menunjukkan bahawa amalan perkongsian ilmu tersirat merupakan perantara penuh kepada hubungan peranan dengan kejayaan penyumberan luar sistem maklumat dan juga perantara sebahagian penuh kepada hubungan komunikasi dengan kejayaan penyumberan luar sistem maklumat. Secara keseluruhannya, dapatan kajian ini adalah konsisten dengan saranan teori atribusi, teori berasaskan sumber dan hasil dapatan kajian terdahulu. Kajian ini juga menyumbang kepada proses penyediaan dan pengesahan instrumen kajian, yang mana item pengukuran bagi elemen kemanusiaan seperti kekuatan dalaman dan komunikasi sukar diperolehi dan tidak disahkan secara statistik. Dapatan kajian ini juga boleh membantu pihak industri untuk merangka modul latihan yang khusus bagi memastikan setiap staf mereka memiliki elemen-elemen kemanusiaan tersebut. Hal ini kerana elemen-elemen tersebut mempunyai kesan yang positif dan signifikan terhadap kejayaan penyumberan luar sistem maklumat. Pihak industri juga perlu memberi perhatian yang serius terhadap amalan perkongsian ilmu tersirat dalam kalangan staf mereka kerana amalan tersebut adalah penghubung atau perantara kepada hubungan tersebut.

Kata kunci: kejayaan penyumberan luar sistem maklumat, elemen kemanusiaan, peranan, kekuatan dalaman, komunikasi dan perkongsian ilmu tersirat

ABSTRACT

This thesis examines the relationship between human elements such as roles, internal strengths and communication and the information systems outsourcing success. It also assesses the impact of tacit knowledge-sharing practices as the mediator of the relationship. A total of 500 questionnaires were distributed by mail to the project managers of information systems outsourcing companies registered with Malaysia's Multimedia Super Corridor. Of the total, 168 were returned and only 166 questionnaires were coded and analyzed. The analysis of the hypotheses were carried out using multiple regression analysis and hierarchical multiple regression. The findings indicate that the elements of role such as the project scope and undertaking tasks, the elements of internal strength such as self-confidence, compassion, sincerity and willingness to change, and the elements of communication such as formal and informal discussions, and rational discussion had positive and significant impacts on the outsourcing information systems' success. In addition, the study also showed that the practice of sharing tacit knowledge fully mediates the relationship between role and the information systems' outsourcing success and also partially mediates the relationship between communication and the information systems' outsourcing success. Overall, these findings are consistent with the recommendations of the attribution theory, the resource-based theory and the findings of previous studies. This study also contributes to the process of developing and validating the research instrument, in which the items of measurement for human elements such as internal strengths and communications are scarce and not statistically validated. The findings of this study may also help the industries to develop specific training modules for their staff to ensure that each has elements of humanity. This is because these elements have a positive and significant impact on the success of the outsourcing of the information systems. The industry also needs to give serious attention to tacit knowledge-sharing practices among their staff because the practice is a liaison or mediator to the relationship.

Keywords: information systems outsourcing success, human elements, roles, internal strengths, communication and tacit knowledge-sharing

PENGHARGAAN

Syukur Alhamdulillah, dengan izin Allah, maka saya dapat menyiapkan tesis PhD ini. Saya ingin merakamkan setinggi-tinggi penghargaan serta jutaan terima kasih kepada isteri dan anak saya iaitu Julie dan ‘Ammar di atas segala doa, kesabaran, sokongan dan dorongan yang tidak berbelah bahagi daripada mereka berdua sehinggalah terhasilnya tesis PhD ini.

Seterusnya, saya juga ingin mengucapkan terima kasih yang tidak terhingga kepada penyelia-penyelia saya iaitu Prof. Madya Dr. Mohamad Hisyam Selamat dan Dr. Ram Al Jaffri Saad di atas bimbingan, nasihat dan tunjuk ajar yang diberikan sepanjang proses penyelidikan dan penulisan tesis PhD ini.

Penghargaan yang tidak terhingga juga ditujukan kepada Dekan, para pensyarah dan staf Pusat Pengajian Perakaunan, UUM di atas kerjasama yang diberikan kepada saya dalam menghasilkan tesis PhD ini. Akhir sekali jutaan terima kasih kepada semua rakan-rakan terutamanya Syahir, Alias, Rosli dan Syahrul di atas bantuan dan sokongan yang telah diberikan kepada saya dalam menyiapkan tesis PhD ini.

Tesis PhD ini ditujukan khas kepada Julie dan ‘Ammar yang sentiasa memberikan sokongan terhadap kecemerlangan kerjaya saya. Terima kasih.

ketentuan Allah adalah rahsia Allah....

BAB SATU

PENGENALAN

1.1 Latarbelakang Kajian

Perubahan dalam ekonomi, globalisasi dan perkembangan pesat teknologi telah menyebabkan organisasi menghadapi persekitaran perniagaan yang sengit (Stewart, 1997; Meihami, Varmaghani & Meihami, 2014). Bagi menghadapi cabaran ini, setiap organisasi sentiasa mencari strategi perniagaan yang boleh mengekalkan daya saingnya. Satu daripada strategi tersebut adalah penyumberan luar (McFarlan & Nolan, 1995; Akomode, Lees & Irgens, 1998; Lee & Kim, 2005; Qi & Chau, 2012; Moon & Lee, 2014; Tajari, Valmohammadi & Mohammadi, 2014; Zanganeh & Didekhani, 2014). Penyumberan luar ialah satu terma yang kompleks kerana ia merangkumi beberapa huraian dan pada amnya merujuk kepada pemindahan kerja (Cubides, 2006). Pada asasnya penyumberan luar adalah pemindahan perkhidmatan atau fungsi yang dahulunya dijalankan di dalam organisasi kepada pihak luar dan ia semakin menjadi strategi perniagaan yang penting (Hern & Burke, 2006).

Dalam bidang sistem maklumat (SM), penyumberan luar telah menjadi bahagian penting dalam strategi SM organisasi (Akomode et al., 1998; Zanganeh & Didekhani, 2014). Definasi penyumberan luar SM, menurut Gonzalez, Gasco, dan Llopis (2005), adalah sumber fizikal dan/atau manusia yang berkaitan dengan teknologi maklumat (TM) bagi sesebuah organisasi diberikan dan/atau diuruskan oleh pembekal luar yang pakar. Perkembangan penyumberan luar SM telah berlaku dalam skala yang besar dan ia
