This Flora of California is brought to you for free and open access by the Open Educational Resources and Data at Digital Commons @ Humboldt State University. It has been accepted for inclusion in Botanical Studies by an authorized administrator of Digital Commons @ Humboldt State University. For more information, please contact [kyle.morgan@humboldt.edu](mailto:kyle.morgan@humboldt.edu).

# A CHECKLIST OF THE FAMILIES AND GENERA OF CALIFORNIA VASCULAR PLANTS

James P. Smith, Jr.  
Professor Emeritus of Botany  
Department of Biological Sciences  
Humboldt State University

22 May 2019

My purpose is to provide an inventory of the families and genera of extant lycophytes (fern allies), ferns, gymnosperms, and flowering plants that are native or naturalized. I have also included plants whose historical occurrence is well documented, but that have not been collected in many years (typically 50 years) and are now best considered extinct or extirpated. Plants known only in cultivation as crops and ornamentals are excluded. The number of genera, species, and minimum ranked taxa is shown in parentheses at the end of each family. This checklist contains 212 families and 1447 genera. I estimate that they contain 7185 species and 8614 minimum ranked taxa. These numbers are noticeably higher than those reported in the second edition of *The Jepson Manual*, primarily because of my more inclusive criteria for inclusion.

This list is based on a number of sources, including:

- regional floras – Abrams (1923-1951), the *North American Flora*, and the *Flora of North America North of Mexico*;
- statewide floras – Brewer, Watson, & Gray (1880); Jepson (1909-1943 & 1923-1925); Munz (1959, 1968, 1974); Hickman (1993); and Baldwin et al. (2012);
- databases – the Consortium of California Herbaria, the Consortium of Pacific Northwest Herbaria; the U. S. D. A. Plants Database, Calflora, and the North American Plant Atlas of the Biota of North America Program;
- county and local floras;
- herbarium specimens, and
- recently published monographs, and reports, such as “Noteworthy Collections” in Madroño.

Family concepts follow more closely those adopted by Takhtajan, Heywood et al., Kubitzki, and many of the Angiosperm Phylogeny Group’s recommendations.

Significant departures in family concepts from the revised edition of *The Jepson Manual* include:

- retention of the traditional circumscription of Plantaginaceae;
- segregation of Ehretiaceae, Heliotropaceae, Hydrophyllaceae, and Namaceae from Boraginaceae;
- Orobanchaceae included in Scrophulariaceae;
- recognition of Buddlejaceae, Linderniaceae, and Myoporaceae
- retention of Lemnaceae;
- retention of Sterculiaceae;
- retention of Aceraceae;
- retention of Hippocastanaceae;
- recognition of Sambucaceae and Viburnaceae in place of Adoxaceae; and
- recognition of fewer segregates of Liliaceae, as per Christenhusz et al.

I ask that you bring errors and omissions to my attention at [jps2@humboldt.edu](mailto:jps2@humboldt.edu).

Physalis		Osmorrhiza	Glandularia
Quinqua	<b>Ulmaceae</b>	Oxypolis	Lantana
Salpichroa	Ulmus	Pastinaca	Phyla
Solanum		Perideridia	Verbena
	<b>Umbelliferae</b>	Petroselinum	
<b>Staphyleaceae</b>	( <i>Apiaceae</i> )	Podistera	<b>Viburnaceae</b>
Staphylea	Ammi	Sanicula	Viburnum
	Anethum	Scandix	
<b>Sterculiaceae</b>	Angelica	Sium	<b>Violaceae</b>
Ayenia	Anthriscus	Spermolepis	Viola
Brachychiton	Apiastrum	Sphenosciadium	
Fremontodendron	Apium	Tauschia	<b>Viscaceae</b>
<b>Styracaceae</b>	Berula	Torilis	Arceuthobium
Styrax	Bowlesia	Vesper	Phoradendron
	Bupleurum	Yabea	Viscum
<b>Tamaricaceae</b>	Cicuta		
Tamarix	Conioselinum	<b>Urticaceae</b>	<b>Vitaceae</b>
<b>Tecophilaeaceae</b>	Conium	Boehmeria	Ampelopsis
Odontostomum	Coriandrum	Hesperocnide	Cissus
<b>Thymelaeaceae</b>	Cyclospermum	Parietaria	Parthenocissus
Dirca	Cymopterus	Soleirolia	Vitis
	Daucus	Urtica	
<b>Tofieldiaceae</b>	Eryngium		<b>Zingiberaceae</b>
Triantha	Foeniculum	<b>Valerianaceae</b>	Hedychium
	Glehnia	Centranthus	Zosteraceae
<b>Tropaeolaceae</b>	Heracleum	Plectritis	Nanozostera
Tropaeolum	Ligusticum	Valeriana	Phyllospadix
	Lilaeopsis	Valerianella	Zostera
<b>Zygophyllaceae</b>	Lomatium		
Fagonia			
Kallstroemia			
Larrea			
Tribulus			
Zygophyllum
