

## FOREWORD

Resenha's Volume 4 is dedicated to the 25th anniversary of the Institute of Mathematics and Statistics. It is my honor to be the director of this unit of the University of Sao Paulo at this moment after so many achievements conquered. One of the most important is the scientific level that Resenhas have reached. In behalf of the colleagues of IME I thank the editors for the energy they have spent to make this publication such a success.
