YOU may examine the 1935 Ford V-8 point by point and almost every detail will be found to contribute in some manner to the car's safety.

But, in these days of fast driving and crowded roads, these eight outstanding Ford V-8 safety features deserve your most serious consideration.

- Safety Glass all around in all body types, at no extra charge.
- Positive mechanical brakes have been made more powerful, and operate with less pedal pressure. No finer brakes today in any car.
- A welded-into-one-piece solid steel body. Hub, spokes and rim welded into a solid steel wheel.
- Ford transverse springs, always without a peer for safety, are longer this year. This added length in-creases the Ford's natural stability.
- Give yourself the experience of driving this brilliant car. Every day you delay owning the 1935 Ford V-8 is a day of complete motor satisfaction gone forever.
