NO ONE BUT A MOTHER can appreciate the benefit sloop gives to an ailing, teething, feverish, colicky, fretty infant Almost distracted by its constant crying, and worn out with weary, anxious care and watching, she tries everything possible to obtain even relief for the little sufferer.

With what comfort and delight she sees her little one drop off into a deep peaceful health-giving slumber, after its little clogged bowels are cleared of their pelseneus burden by a single dose of Laxakola, the great tonic laxative and mother's remedy.

Laxakela is a pure, gentle and painless liquid laxative, and contains valuable tonic properties which not only act upon the bowels, but tone up the entire system and purify the blood. A few drops can be given with safety to very young babies, which will often relieve colic by expelling the wind and gas that cause it. Great relief is experienced when administered to young children suffering from diarrhos, accompanied with white or green evacuations, as it neutralizes the acidity of the bowels and carries out the cause of the fermentation. LAXAKOLA will aid digestion, relieve restlessness assist nature, and induce sleep. For constipation, simple fevers, coated tongue, or any infantile troubles arising from a disordered condition of the stomach it is invaluable,

Laxakola, the great tonic lavative, is not only the most efficient of family remedies, but the most economical, because it combines two neclicines, viz.: laxative and tonic, and at one price. No other remedy gives so much for the money. At druggists, 25c. and 50c., or send for free sample to THE LAXAKOLA CO., 1/2 Nassau Street, N. Y., or 356 Dearborn Street, Chicago.

Would Like To Have Tracks on Sixth Street

The G. R. H. & L. M. Rapid Railway company would like to have the original street railway franchise granted to Charles M. Humphrey amended in several respects, and introduced an ordinance providing for these amendments at Tuesday night's meeting of the common council. The amendments are necessary on the part of company to a great extent on account of the sections in the original franchise which did not allow freight curs to be run through the city in the day time. The railway company would like to have the privilege of using Sixth street for the transportation of freight at any time.

The ordinance asked permission to construct a line of tracks through Sixth street commencing at its eastern limits and running west to River street, south on River to Eighth, west on Eighth to Lake avenue, on Lake avenue to Van Raalte avenue, on Van Raalte avenue to Thirteenth street, making a complete loop of tracks in the city.

Pending the construction of these tracks and until Eighth street is paved the company asks permission the Hoorn polder; 1211 square miles. to carry freight on the line in the day containing 107 square miles of fertile time instead of after ten o'clock p. m. as provided by the original franchise.

The ordinance introduced last Tuesday night provides that along Sixth street, Eighth street and River from Sixth street to Tenth street, and in the eighteenth year the same along Lake and Van Raalte avenues thing will have happened to the only a single track railway, wib Hoorn polder. necessary and convenient turnouts, side tracks, switches and connections or \$38,265,001.42, which sum will be shall be constructed and operated. raised by loans. So particular are the Grand Haven people that when a person is suffering from a contagious disease watchmen are appointed to see that visitors are test strongly against having the not allowed to see the patient. That is all very well. But the board of that street for the transportation of supervisors thinks it is not very well freight cars and are circulating a De- when the county, instead of the city tition asking the common council not of Grand Haven, is asked to pay the to give the railway company that bills. Therefore it is not strange that when bills for watchmen's services amounting to about \$450 were presented to the board at its last session they were turned down with scant ceremony. The watchmen think the board was wrong in the matter and mandamus proceedings have been orought to compel the board to pay the bills. The supervisors are not alarmed as they think that the

**Splering Quartette At Winants** Chapel Next Wednesday Night

The third number of the Hope college lecture course will be given at Winants chapel next Wednesday night. It will be a musical number and promises to be the best entertainment of the kind ever given in Holland. The Spiering quartette will make its first appearance in this city. This quartette is composed of Theodore Spiering, Herman Diestel, William Diestel and Otto Rochrborn, all musicians of the highest rank. Herman Diestel, the cellist, was here about a year ago and made a decided hit by his wonderful command of that sweet toned instrument, the violincello.

The Baltimore News has the following regarding the quartette:

Even a minute quantity of Relatives in this city received word the virus injected into the blood will "snake stones"-still used in the east -which have been vaunted as specifics. but from an examination of specimens one finds them to be either pieces of ordinary mineral or bits of bone or pieces of plant roots. It is fairly safe to say that if any case of snakebite is said to be cured by the application of a "snake stone" the bite was not that of a poisonous species. Also it has been said that the immunity of the mondue to the animal eating some herb or other which counterbalanced the effect of the bite. Nobody, however, has ever been able to discover this herb, and it happens that a much more seimongoose to resist the virus of the serpent is forthcoming. That explanation rests on the fact that the blood of the animal contains a principle (or "antitoxin," as it may be named) which is destructive to the poison of the snake, or which, at any rate, renders the body of the mongoose resistant to the action of the venom.

Treasurer's Report Shows United States Was Never Stronger in a Financial Way.

LARGE RECEIPTS OF THE DEPARTMENT.

Surpus of \$77,717,984 Left Over All Disbursements - Supply of Gold Greater Than in Any Other Country -Monetary Stock Increases-Small Note Circulation.

Washington, Nov. 1 .- Ellis H. Robin his report for the last fiscal year SBYS:

The treasury was never stronger than at the close of that period. The operations of the first order, both in variety and magnitude, resulted in noteworthy changes in the paper currency, movel as a steady and healthful growth of gold in the treasury and in the general stock.

#### Receipts and Disbursements.

The net ordinary revenues were \$587,685,-37, an increase of \$20,444,485 over those of 1900, the next highest recorded. The increase came chiefly from internal revenue. On the side of the expenditures the total of \$509,967,353 has been exceeded only four times, in 1863, 1864, 1865 and 1899. The surplus of \$77,717,984 was slightly under \$2,000,-000 less than in 1900.

Inclusive of the transactions affecting the public debt the aggregate receipts were \$1,146,489,306 and the aggregate disbursements \$1,077,063,052.

#### The Gold Reserve.

The reserve of \$150,000,000 in gold required by the financial law of 1900 has been kept intact by the daily substitution of gold coin and bullion out of the general d for the notes redeemed. These redemptions amounted to \$24,697,858 for the ar. After making deductions for items not available in general payments the free cash was \$156,911,664, which was distributed among the ten offices of the treasury and the 12 offices of the mint, including 101,416,973 in the national bank depositories.

#### Country's Monetary Stock.

The monetary stock of the country received during the year an increase of upward of \$88,000,000 in gold, \$37,000,000 in silver coin and nearly \$16,000,000 in notes and certificates. The circulation per capita was \$26.50 July 1, 1900; \$28 July 1, 1901, and from July 1, 1997, there was an increase of 3,130,458 in the stock of gold, which was then estimated at \$1,160,353,790, and of this there was \$908,718,436 in circulation in the of coin or certificates. By October 31 the gold in the treasury, consisting of the reserve, the security for certificates and the sum in the general fund, was \$542,822,849, the highest in the history of the country.

#### Small Note Circulation.

To the extent that gold certificates, which are of the denominations \$20 and upward, have taken the place of other large paper. it has been possible to supply small notes and certificates much more freely than formerly. It is reasonable to believe that ever \$140,000,000 of paper will by influences now at work be changed from denominais above ten dollars to that size or arisen annually from the overwhelming and for small notes may be expected to diminish. On October 1 the total amount of outstanding paper money of the deinations of ten dollars and under was 830,121,921.

The redemptions of national bank notes were the heaviest in 22 years, amounting to \$147,496,577, an increase of \$50,503,970 over

Washington, Nov. 4. - President Roosevelt Saturday issued his proclamation fixing Thursday, November 28, as a day of national thanksgiving. It follows:

A PROCLAMATION. "The season is nigh when, according to the time-hallowed custom of our people, the president appoints a day as the especial occasion for praise and thanksgiving to God.

"This thanksgiving finds the people still bowed with sorrow for the death of a great and good president. We mourn President McKinley because we so loved and honored him; and the manner of his death should awaken in the breasts of our people a keen anxiety for the country, and at the same time a resolute purpose not to erts, treasurer of the United States, be driven by any calamity from the path of strong, orderly, popular liberty which as a nation we have thus far safely trod.

"Yet in spite of this great disaster, it is nevertheless true that no people on earth have such abundant cause for thanksgiving as we have. The past year in particular has been one of peace and plenty. We have prospered in things material and have been able to work for our own uplifting in things intellectual and spiritual. Let us remember that, as much has been given us, much will be expected from us; and that true homage comes from the heart as well as from the lips and shows itself in deeds. We can best prove our thankfulness to the Almighty by the way in which on this earth and at this time each of us does his duty to his fellow men.

"Now, therefore, I, Theodore Roosevelt, president of the United States, do hereby designate as a day of general thanksgiving. Thursday, the 28th of this present Novem-ber, and do recommend that throughout the land the people cease from their wonted occupations, and at their several homes and places of worship reverently thank the Giver of all good for the countless blessings of our national life.

"In witness whereof I have hereunto set States to be affixed.

"Done at the City of Washington this Second day of November in the year of railroad transportation, railway post Our Lord One Thousand Nine Hundred and office car service and railway mail One and of the Independence of the United States, the One Hundred and Twenty-Sixth.

"THEODORE ROOSEVELT." By the President: "John Hay, Secretary 542,000. of State."

#### Number Three For Holland.

#### Feeding an Army.

The Holland foot ball team won its third victory last Saturday. As in the general of subsistence, shows that previous games Holland was not the total expenditures for the subscored against and its goal was never sistence of the army during the fiscal in serious danger. This is an excellent year were \$15,622,228. The receipts showing and stamps it as the best during the same period were \$3,290,team that ever represented this city | 234. The G and Rapids Independents are a fast, scrappy lot and it looke1 dubious for Holland when the teams lined up for trouble. And there was trouble right away for Holland began to rip holes in the visitor's line without any preliminary sparring. The visitors could not hold the Holland rush line and after a few min utes of play the locals carried the ball over the line for a touchdown. Daven kicked goal successfully.

After fierce line bucking by DePree, Schouten, Assynias and Steketee another touchdown was made in the and half and goal was kicked. Again in the 2nd half the Holland boys got the ball near their opponents goal when something happened. It was a kick from the field, the ball sailed gracefully between the posts for a goal. Jim De Free made the punt and it was a beauty. Not only was it a beauty, but it was the first goal ever kicked from the field in this city. This was the end of the so wing, leaving the game 17 to 0 in favor of Holland.

Bradford, Kleinbesselink and Davidson were out of the game on account | ern and central Texas. of illness, weakening the team considerably. Davidson went in in the last half and did good work.

## STRANGE FOOD OF AMERICANS

An English Woman Tells Her Countrywomen About What She Ate While Here.

An English woman who visited America a short time ago has been telling her countrywomen about the "strange food across the water." Of course she discovered green corn, but she had crabs were quite new to her. "They look like Boston baked beans,"

she explains, "but they taste much better.

An oyster cocktail filled her with awe and enthusiasm. She tried it at Delmonico's and thought it was soup. Of course, in England, one didn't serve soup in a glass, but then neither did the English serve boiled eggs in a glass. One could never be sure of Americans. Of canvas back duck she has a poor opinion, but thinks she might like it better if Americans would have it cooked, or even warmed. As for terrapin, she sings its praise. She found it much like calf's head, and she always liked calf's head. Shades of Maryland gourmets, what a slur is there.

"All the puddings in America are pie or ice cream," she says, but it must be understood that pie does not mean is ubiquitous, she explains.

She sat next to an American man guard against the introduction who ate a lump of cheese with his through Atlantic ports of the plague 'strawberry pie and turned a plateful which has broken out at Liverpool of ice cream over both, but she doesn't know that that is a general custom.

The oysters were good, but had most impossible names, and the cockles, meaning clams, are excellent. On the whole Yankee food and cooking are good, but there is too much food on the table at one time.

Mexicans Offered Armed Resistance But the Rangers Helped Enforce Regulations.

Last year, says the writer of an article on "The Texas Rangers," in Frank Leslie's Popular Monthly, there was an outbreak of smallpox in the Mexican quarter of Laredo, and the inhabitants would neither be vaccinated nor would they permit the smallpox patients among them to be removed to the hospital. Capt. Rogers and seven rangers were ordered to the scene to enforce the sanitary regulations. The Mexicans organized and armed themselves to resist. As soon as the troop arrived in the town Capt. Rogers, with one man, went to the street in which a smallpox patient was located. As he was walking up the street he was shot from cover by. a Mexican, who was promptly killed by the private who accompanied the captain. The sound of firing brought the remaining rangers to the scene, and they advanced up the street, firing as they went. Hundreds of armed Mexicans had gathered in the street to kill off the hated Americans, but the back-door exodus that accompanied Neuralgia may attack any part of the body the advance of the rangers would have

A FLORAL WONDER.

Originated by a Grower of California and Known as the "Shasta Daisy."

The newest floral wonder is the "Shasta daisy," originated by a flower grower of California. It measures a foot in circumference, and when one was exhibited recently in a florist's erally flocked to see it. says the Philaaelphia Saturday Evening Post.

It is really a new kind of flower, and has been produced by several years of crossing and selection, three different kinds of daisies being used -the common American species. the larger and coarser European sort and the Japanese daisy.

There are three rows of petals of the purest white, and each blossom is upheld by a single strong and wiry stem which is nearly two feet long. One advantage of the Shasta daisy is said to be that it is exceedingly hardy, enduring much cold, so that it can be grown out-of-doors. It 4s claimed that it prospers in almost any kind of soil, blooms all summer long (in California nearly all the year round) and may be rapidly multiplied by dividing the roots.

A peculiarity of this new and beautiful blossom is that it sometimes shows colors, indicating that daisies of various hues and of gigantic size may be placed on the market before long.

Window Panes That Diffuse Light. The increase in the number of tall buildings has resulted in a larger use of ribbed and prismatic glass for windows, as well as in the production of improved varieties of such glass. The illumination of dingy rooms, shut in by lofty walls, is increased by the reflection, from the many facets of the glass, of light which would otherwise pass the windows without penetrating the interior of the rooms. The employment of diffusing glass is regarded as introducing "a new era in interior lighting."

Up in the Air.

It is one of the peculiarities of travel by balloon, says the Idler, that you do mot feel anything; all is still with you, no matter how fast you may be going. You see, you are riding with the wind; you move as fast as it moves; you are part and parcel of it, whether you wish to be or not. It takes you in its embrace so firmly, yet so softly, you do know it; all is calm and placid with on every box.
