This Event is brought to you for free and open access by Trace: Tennessee Research and Creative Exchange. It has been accepted for inclusion in Veterinary Partners Appreciation Conference (V-PAC) by an authorized administrator of Trace: Tennessee Research and Creative Exchange. For more information, please contact trace@utk.edu.

The Importance of Dental Radiography

Dentistry is a growing field in Veterinary Medicine, which allows us to help more patients as well as increase practice profits. Dental radiography is an important tool to help achieve this. 60% of the tooth is below the gumline and we need to be able to evaluate the entire tooth for pathology or abnormalities.

This session will talk about indications for dental radiographs, different types of systems and units, and close with a few cases.

Tiffany Hunt, B.S., LVMT
