November 20, 1985

Dear City Official:

In an effort to provide comparative utility rate information to Tennessee city officials, MTAS has initiated a data collection program which will hopefully result in a comprehensive utility rate survey document. This issue of Municipal Utility Rates in Tennessee is the result of input from some 130 cities/utilities. When the next issue of "MURTS" is prepared in calendar year 1987, we hope to have an even broader survey base from which to provide you utility rate information.

We will be the first to caution you that comparison of utility rates from city to city is many times a meaningless exercise. Each city must set its rates based on operating and maintenance costs, system indebtedness, depreciation commitments, and other factors. Practically speaking, however, comparison of rates can give municipal officials a sense of perspective as they attempt to set rates that are reasonable and politically acceptable.

As you use this document, please note any changes, deletions, or additions that you think need to be made, and advise us accordingly. We are open to any and all suggestions.

Ken Joines was assisted by Pam Jones, Vickie Cunningham and Tracey Baker in the design and creation of this database. Tracey additionally was responsible for data entry.

If additional information is required on any aspect of utility rates, please contact any MTAS consultant. Thank you for your continuing support and advice.

Sincerely,

C. L. Overman  
Executive Director

CLO:aal

**TABLE OF CONTENTS**

INTRODUCTION . . . . .	4
MUNICIPAL WATER SYSTEMS . . . . .	W-1
MUNICIPAL SEWER SYSTEMS . . . . .	S-1
MUNICIPAL NATURAL GAS SYSTEMS . . . . .	NG-1
GARBAGE COLLECTION AND DISPOSAL DATA . . . . .	G-1
ELECTRIC RATE DATA FROM TVA . . . . .	E-1

## INTRODUCTION

This publication is primarily the compiled results of surveys sent to the cities in Tennessee. Electric rate information was supplied by the Tennessee Valley Authority and population figures were taken from the 1985 Certified Population of Tennessee Incorporated Municipalities.

Approximately, one-hundred and thirty cities responded in part or whole to the survey. If data from a city appears in one section but not another it indicates the city either does not provide that service or information was not included in the survey response for some other reason.

The data is divided into five major utility areas: **Water; Sewer; Natural Gas; Garbage Collection and Disposal;** and **Electricity.** The data on the first four utilities is divided into four population groups in alphabetical order. The population groups are:

OVER 20,000  
5,000 - 20,000  
2,000 - 5,000  
UNDER 2,000

The data on electricity is confined to rates and includes rate information for all power distributors in the TVA region.

Some individual points that might help in interpreting the data that follows include:

**"NOT PROVIDED"** - indicates that data was not supplied by respondent or the question was interpreted differently by that particular city than others causing an inconsistent response.

In column four of both Water Systems and Sewer Systems (multiple dwelling and commercial rates), **"NO"** indicates the utility does not have a special rate schedule for commercial users or multiple users on a single meter. The rates are the same as those listed in column five. In column six of the same utility areas, pipe size breakdowns were not extended if prices were the same for larger size connections.

Under Garbage Collection and Disposal, line two, column two, **"PRIVATE CONTRACT BY CITY"** indicates the city contracts with a private company or individual to provide residential service. In line two, column three of the same utility area, **"YES-NOT PROVIDED"** indicates the responding city reported they do have containerized equipment, but did not indicate what type.

## ABBREVIATIONS

/C	=	PER 100 CUBIC FOOT
CU	=	CUBIC
/M	=	PER 1000
/MCF	=	PER 1000 CUBIC FEET
MGD	=	MILLION GALLONS PER DAY
MTH	=	MONTH OR MONTHLY
PU	=	PICKUP
WK	=	WEEK OR WEEKLY
YD	=	YARD

For abbreviations of treatment types for Water and Sewer Systems, see the bottom of each page in these sections.

If you need additional information on this publication and the data it includes contact Ken Joines or another MTAS Consultant. Several cities included detailed rate information on water and sewer multiple dwelling rates, commercial rates and commercial garbage collection fees. If you need information of this type on a few specific cities, please contact Ken Joines or Carol Hewlett (615-974-5301) and we will provide copies of this data.

FOR CUSTOMERS SERVED UNDER TVA WHOLESALE RATE SCHEDULES

WHOLESALE POWER RATE - WP

Delivery Point Charge	\$1,500.00 per delivery point per month
Demand Charge	\$ 7.89 per kW of demand per month
Energy Charge	2.568¢ per kWh per month

TIME-OF-DAY WHOLESALE POWER RATE - WP

Delivery Point Charge	\$1,500.00 per delivery point per month
Demand Charges:	
All onpeak kW	\$ 7.89 per kW of demand per month
Excess offpeak kW	\$ 4.16 per kW of demand per month
Energy Charges:	
All onpeak kWh	2.785¢ per kWh per month
All offpeak kWh	2.441¢ per kWh per month

ADJUSTMENTS FOR PASSING THROUGH HYDROPOWER BENEFITS  
TO RESIDENTIAL CONSUMERS

Credit: 0.656¢ per kWh per month of residential sales within the first 2,000 kWh block.

Credit: \$4.00 per customer per month for each residential customer served by distributor during June.

Debit: 0.517¢ per kWh per month for general power sales (excluding sales to customers with greater than 5,000 kW demand) and Outdoor Lighting sales.

Debit: 0.131¢ per kWh per month for general power sales to customers with demand greater than 5,000 kW.

Adjustment factors are recalculated annually to reflect changing sales statistics and changing costs. Energy adjustment factors are based on applicable sales data from distributors' fiscal years, July through June,

---

a. Reflects base rates effective July 2, 1983 and Adjustment Addendum effective October 2, 1985. These net amounts will remain applicable until rates and charges have been adjusted or changed.

preceding the beginning of each TVA fiscal year, October through September. Residential customer adjustment is defined as \$48.00 multiplied by the total number of residential customers served by Distributor during June preceding the beginning of each TVA fiscal year (October 1 - September 30) of application.

- a. Reflects base rates effective July 2, 1983 and Adjustment Addendum effective October 2, 1985. These net amounts will remain applicable until rates and charges have been adjusted or changed.
- b. Onpeak--During months of October through April beginning 6 a.m. and ending 12 noon, and beginning 4 p.m. and ending 10 p.m. excluding Saturdays and Sundays.  
During months of May through September beginning 10 a.m. and ending 10 p.m., excluding Saturdays and Sundays.  
Offpeak--All hours not included above including all hours on Saturdays, Sundays, New Year's Day, Memorial Day, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day shall be offpeak.
- c. Rates used to determine customer's monthly power bills before the hydro energy adjustment. Monthly bill is decreased by the application of the residential hydro energy adjustment factor of 0.656 cents/kwh on total energy consumed up to 2,000 kwh per month.
- d. Customer charge includes \$4.65 to cover the additional cost of the time-of-day meter.
- e. Excess offpeak kW demand is the difference between onpeak and offpeak demands when offpeak is greater than onpeak.
