THE UNIVERSITY OF TENNESSEE UNDERGRADUATE COUNCIL

MINUTES OF MEETING January 17, 2002

Members present:

Mary Albrecht, Angela Batey, Richard Bayer, Chris Cox, Don Cox, David Dobbs, Tom George, Fred Gilliam, Eric Haley, Betsy Haughton, Heather Hirschfeld, Suzanne Kurth, Robert Leiter, Mark Moon, Johnie Mozingo, Mike Mullen, Fred Pierce, Paul Pinckney, Max Robinson, Harold Roth, Richard Saudargas, Charles Schreck, Carol Seavor, Euridice Silva, Jean Skinner, Delores Smith, Frank Spicuzza, Terry Stratta, and Linda Tober.

Members absent:

Elizabeth Clement, Katie Gregory, Andrew James, Faye Julian, Miriam Summers, and Michael Ware.

Proxv:

Rita Smith (Barbara Dewey).

Tober called the meeting to order at 1:30 p.m.

I. Curricular Changes

A. Albrecht distributed a revised agenda that reflects the College's withdrawal of a proposal to change a concentration to a major. Mullen presented the material.

The Departments of Agricultural and Biosystems Engineering, Ornamental Horticulture and Landscape Design, and Plant and Soil Sciences were reorganized into two departments: Biosystems Engineering and Environmental Science (BEES), and Plant Sciences and Landscape Systems (PSLS).

After some discussion of the lists of courses to be used to meet general education requirements, the College agreed to supply them so they can be published.

Saudargas requested that an upper division Psychology course be removed from the list and that affected colleges be consulted when such lists are constructed. With minor revisions, Council approved the material.

B. College Architecture and Design

Robinson presented the material. After some discussion of enforcement procedures for a proposed requirement of an off-campus academic program, Robinson agreed to return the proposal to the for college further clarification. Council approved the remaining items.

C. College of Arts and Sciences

Cox presented the material. A summary of the proposals appears on pp. 13340-13341. Council approved changes with minor revisions.

D. College of Business Administration

Changes were presented by Pierce. Changes include a name change of a major from General Business to Business Studies. Council approved.

Undergraduate Council Minutes for January 17, 2002

Page 13284

E. College of Communications

Haley and Taylor, head of the Department of Advertising, presented the changes in Advertising's progression requirements. Council approved.

F. College of Education

George presented the material which includes revision of the Exercise Science and Sport Management programs. Council approved.

G. College of Engineering

Gilliam presented the material. A summary of the revisions appears on pp. 13376-13377; and includes major changes in Electrical and Computer Engineering. Lists of approved electives for each major will be provided. Council approved.

H. College of Human Ecology

Skinner presented the material. After discussion of proposed revision to Early Childhood Administration, Early Childhood Development, Dual Licensure, and Early Childhood Education, Saudargas moved that the material be returned to the College for further consideration. Kurth seconded and Council concurred. The remaining proposals were approved.

I. College of Nursing

Mozingo presented revisions to two courses which Council approved.

J. Tober presented the list of courses to be dropped that have not been offered in four or more years. Council approved.

II. Academic Review

Tober presented the proposal that students dismissed for academic reasons be suspended one calendar year instead of two terms. Council approved.

There being no other business, the Council adjourned at 4:00 p.m.

Material for Faculty Senate approval appears on pp. 13283-13415.

Respectfully submitted,

Linda M. Tober Secretary to the Undergraduate Council

THE UNIVERSITY OF TENNESSEE COLLEGE OF AGRICULTURAL SCIENCES AND NATURAL RESOURCES

RE:

Proposed Changes to Undergraduate Courses and Curricula in the College of

Agricultural Sciences and Natural Resources

cc:

C.A. Speer

CASNR Undergraduate Council (via e-mail)

Department Heads (via e-mail)

Mary Lewnes Albrecht

Under cover of this letter are the proposed changes to undergraduate courses and curricula in the College of Agricultural Sciences and Natural Resources.

The bulk of the materials present extensive changes resulting from the reorganization of three departments into two departments. Effective July 1, 2001, the Departments of Agricultural and Biosystems Engineering, Ornamental Horticulture and Landscape Design, and Plant and Soil Sciences were reorganized into the Department of Biosystems Engineering and Environmental Science and the Department of Plant Sciences and Landscape Systems. This reorganization was approved by the UT Board of Trustees at their June, 2001 meeting.

Changes to the Biosystems Engineering major were planned prior to the reorganization of the departments and recognize changes in the discipline.

Other changes reflect revisions in courses and curricula to reduce the number of credit hours to earn a degree from 132 to 124. This resulted in course and curriculum changes in Agricultural Economics and Business and Animal Science; curriculum changes only for Food Science and Technology.

Also presented is the revised elective lists for the Forestry and the Wildlife and Fisheries Science majors.

Should you have any questions, please do not he sitate to contact me.

College of Agricultural Sciences and Natural Resources Course Changes

AGRICULTURAL ECONOMICS

ADD

310 The Agricultural Employment Process (1)

Career planning, job markets in the agricultural industry, and techniques to obtain employment including recruitment/placement services, résumé construction, personal interviewing, and job offer evaluation/analysis. F

356 <u>Marketing Team Participation</u> (1-2)

Participation in the development of a total marketing plan for a product sold to or by farmers. Includes product identification, market research, and development of an action plan including an extensive promotional plan, financial analysis, and evaluation. Requires preparation of final plan for presentation in written, oral and visual formats. Plan presented in national competition during the National AgriMarketing Conference. May be repeated up to a maximum of 6 hours. Prereq: Consent of instructor. F, Sp

REVISE COURSE DESCRIPTION

FROM:

410 <u>Seminar in Agricultural Economics and Business (1)</u>. Primarily for Agricultural Economics and Business majors in their senior year. Analysis of contemporary problems in the field. Discussion of career objectives, opportunities, and placement processes. Assignments for written and oral presentation.

TO:

410 <u>Seminar in Agricultural Economics and Business (1)</u>. Restricted to Agricultural Economics and Business majors in their senior year. Practice of critical thinking, ethical behavior, teamwork, and conflict resolution within the content of agribusiness decision making. Analysis of contemporary issues in the field of agricultural economics.

REVISE PREREQUISITE

320 <u>Agricultural Microeconomics</u> (3)

Prerequisites: Economics 201 and Agricultural Economics 212 (formerly Economics 201).

342 Farm Business Management I (3)

Prerequisites: Economics 201 and Agricultural Economics 212 (formerly Economics 201 and Junior standing).

350 <u>The Agricultural Marketing System</u> (3)

Prerequisites: Economics 201 and Agricultural Economics 212 (formerly Economics 201).

355 Agribusiness Marketing and Professional Selling (3)

Prerequisites: Economics 201 and Agricultural Economics 212 (formerly Economics 201).

412 <u>Agricultural Finance</u> (3)

Prerequisites: Economics 201 and Agricultural Economics 212 (formerly Economics 201).

EFFECTIVE DATE FOR ALL ADDITIONS AND REVISIONS: Fall 2002

AGRICULTURE AND NATURAL RESOURCES

ADD:

Orientation to Studies in Agriculture and Natural Resources (1) Orientation to academic advising and procedures in, and information about the College will be emphasized. Various invited guests will review University resources available to help students succeed at their studies. Student-to-student and advisor-to-student sessions are included to discuss the CASNR experience. Enrollment is restricted to freshmen and transfer sophomores. Grading is S/NC. F.

EFFECTIVE DATE: Fall, 2002

ANIMAL SCIENCE

ADD:

395 <u>Careers Seminar</u> (1)

Preparing students for career opportunities in animal agriculture including both industry and academic advancement. Topics will include resume preparation, interview skills, internship opportunities, and web-based employment search guides. Prereq: Junior standing. F, Sp.

DROP:

101 <u>Orientation to Animal Science</u> (1)

REVISE COURSE NAME, NUMBER AND DESCRIPTION:

FROM:

260 The Animal Industry and Market Evaluation (3)

Structure and production principles of food animal and horse industries. Criteria for food animal and horse evaluation. Market classes and grades of cattle, poultry and poultry products, lamb and wool, and swine. Subjective and objective techniques for evaluation of beef cattle, dairy cattle, poultry, sheep and swine. Introduction to and utilization of species specific performance programs. 3 labs. F, Sp.

TO:

160 <u>Introduction to Animal Science</u> (3)

Preparation of academic plans and career discussion. Introduction to structure and production principles of the food animal and horse industries. Overview of companion and alternative livestock. Market classes and grades of cattle, poultry and poultry products, lamb and wool, and swine. 3 labs. F, Sp

REVISE COURSE NAME:

FROM:

280 Farm Animal Management Practices (3)

Integration of herd/livestock management practices into cattle, horse, poultry, sheep, and swine enterprises. Application of animal behavior knowledge, handling of animals, including facilities and restraint. Includes age and sex determination, pre- and post-natal care, identification, dehorning, castrating, docking, implanting, dubbing, food care, fitting and grooming, record keeping, reproductive and milking management. 2 3-hr labs. F, Sp.

TO:

280 <u>Biotechnology and Management Practices in Animal Production</u> (3) Exposure to current animal agriculture management practices and biotechnology techniques as they affect beef, dairy, horse, poultry, sheep and swine industries. Includes animal behavior, restraint and welfare, computer applications, nutrients and nutrient utilization, waste management, food safety, animal reproduction, health and well being, and emerging technologies and opportunities in animal agriculture. 2 3-hour labs.

REVISE COURSE NAME, CREDIT HOURS, DESCRIPTION, AND PREREQUISITES:

FROM:

330 <u>Animal Nutrition, Feeds, and Ration Formulation</u> (4)

Properties, functions, utilization, and deficiency symptoms of essential nutrients; properties and functions of feedstuffs and principles of ration formulation. Prereq: Chemistry 110 or Chemistry 130 and Math 121. 2 hours and 2 labs. F.

TO:

330 Comparative Animal Nutrition (3)

Nomenclature, structures, functions, utilization, and deficiency symptoms of essential nutrients in carnivores, omnivores and herbivores. Prereq: Animal Science 220, Chemistry 110 or Chemistry 130.

REVISE COURSE NAME AND DESCRIPTION

FROM:

381 <u>Animal Production Systems</u> (3)

Fundamentals of production and management systems in beef, dairy, pork, and poultry programs. Application of principles of nutrition, breeding, physiology, and marketing into enterprise systems. Decision making management practices and information resources, enterprise evaluation, and comparison of production systems. 2 hours and 1 lab. No credit for majors. F.

TO:

381 <u>Animal Nutrition and Production Systems</u> (3)

Fundamentals of production and management systems with an emphasis on nutrition in beef, dairy, pork, and poultry programs. Application of principles of nutrition, breeding, physiology, and marketing into enterprise systems. Decision making management practices and information resources, enterprise evaluation, and comparison of production systems. 2 hours and 1 lab. No credit for majors. F.

REVISE COURSE CREDIT HOURS:

FROM:

430 Advanced Ration Formulation (2)

Advanced ration formulation for beef and dairy cattle, sheep, horses, swine poultry, laboratory, zoo and companion animals. Mathematical and computer solutions and applications to formulating complex rations with constraints. Prereq: Animal Science 330 and introductory computer course. 2 labs. Sp.

TO:

430 <u>Nutrient Evaluation and Ration Formulation</u> (3)

Ration nutrient analysis and formulation for beef and dairy cattle, sheep, horses, swine poultry, laboratory, zoo and companion animals. Mathematical and computer solutions and applications to formulating complex rations with constraints. Prereq: Animal Science 330 and introductory computer course. 2 hours and 1 lab. Sp.

REVISE NAME AND DESCRIPTION:

FROM:

495 <u>Seminar</u> (1)

Review of the literature and oral and written presentation on special topics an current research in Animal Science field. Prereq: Senior standing. One 2 hour lab. F, Sp.

TO:

495 Ethics in Animal Agriculture (1)

Discussion and presentations on issues related to ethics in animal research and industry. Prereq: Senior standing. F, Sp.

EFFECTIVE DATE for all animal science courses: FALL, 2002

BIOSYSTEMS ENGINEERING AND ENVIRONMENTAL SCIENCE

BIOSYSTEMS ENGINEERING

DROP:

103	Introductory Design and Fabrication (1)
243	Material and Energy Flows in Biological Systems (3)
303	Transport Processes in Biological Systems (3)
311	Processing Food and Biological Materials (3)
315	Soil and Water Conservation (3)
331	Power Units and Machinery (3)
403	Machine and Component Design (3)
423	Irrigation and Waste Management System Design (3)
430	Mobile Hydraulic Power System Design (3)
433	Bioprocess System Design and Analysis (3)

REVISE NUMBER, DESCRIPTION AND PREREQUISITE:

104 <u>Design Apprenticeship</u> (1) Exposure to design in biosystems engineering, through apprenticeship with senior design teams in Biosystems Engineering 402. Apprentices will maintain a journal describing their activities in assisting the senior design engineers, and will make an oral presentation summarizing the design project with which they assisted. Grading will be based on journal submissions, contributions to the design team, and the final presentation. Prereq: Engineering Fundamentals 101. 2 hour lab. Sp (Formerly: 103)

ADD:

- Mass and Energy in Biosystems (3) Introduction to thermodynamic concepts for biological systems (energy, mass and energy balances, processes and cycles); psychrometrics and psychrometric processes; biological systems and the biosphere (bioenergetics, hydrologic cycle, global energy cycle). Prereq: Chemistry 120, Engineering Fundamentals 102. 2 hours and 1 lab. F
- Biothermodynamics, Heat and Mass Transfer (3) Application of thermodynamics to biological systems; heat transfer, with emphasis upon conduction and convection applications; introduction to diffusion mass transfer. Coreq: Mathematics 241. Prereq: 221, Nuclear Engineering 203. 2 hours and 1 lab. Sp
- Mechanical Systems Engineering (3) Fundamentals of power delivery systems and simple mechanisms; selection and design of mechanical, hydraulic, and tractive power transmission systems. Emphasis on off-road vehicles and bioprocessing systems. Prereq. 431, Engineering Science 231, Engineering Science 321. 2 hours and 1 lab. Sp
- Natural Resource Engineering (3) Introduction to hydrologic cycle: movement of water and interaction with environment through such processes as erosion and contaminant transport. Impacts through estimation and measurement, and controlling impacts through engineering design. Specific designs: waterways, erosion and sediment control structures, waste management systems, irrigation systems, and hydrologic monitoring systems. Prereq: 321, Environmental and Soil Sciences 210, Civil Engineering 390 or Engineering Science 341. 2 hours and 1 lab. F

- Bioprocessing Engineering (3) Application of basic engineering principles to processing and handling of biological materials: physical, chemical, biological properties; materials handling; material conversion operations; drying; heat processing; and bioprocessing. Prereq: 321 or equivalent. 2 hours and 1 lab. F
- Life Systems Engineering (3) Design of controlled environments to optimize conditions for organism growth and development: growth equations and population dynamics; plant growth systems; microbial growth systems; animal growth systems; biotechnological applications. Prereq: 321, Mathematics 231. 2 hours and 1 lab. Sp
- Practicum (3) Applications of engineering theory and design in selecting, sizing, and fabricating engineering materials; and in developing processes and systems typically used in biosystems engineering. Must be taken in same semester as 401. 1 hour and 2 labs. F

BIOSYSTEMS ENGINEERING TECHNOLOGY

ADD:

- GIS/GPS Applications in Agriculture and Environmental Science (3) Introduction to the application of Geographic Information Systems (GIS) and Global Positioning Systems (GPS) in agriculture and in environmental science. Topics covered will include GIS software and concepts, GPS receivers, data acquisition, and spatial analysis of data to solve problems. Case studies in agricultural demographics, precision agriculture, pasture management, water quality, watershed management, and waste pollution will be used to provide hands-on experience with these emerging technologies. Prereq. Agriculture and Natural Resources 290 or equivalent. S
- 414 <u>CAD Applications to Biosystems Engineering Technology</u> (3) Computer Aided Drafting (CAD) applications in agriculture and environmental science. Essentials of CAD software to create drawings of components, systems, flow charts, and process diagrams. Applications in mechanical, structural, and biosystems. 2D applications with limited exposure to 3D applications. Computer intensive course. Hands-on experience. Prereq. Computer proficiency and admission to graduate program. (Students cannot receive credit for both 414 and 514.) Two 2-hour labs. F
- Environmental Instrumentation and Monitoring (3) Equipment and techniques commonly used to measure all aspects of hydrologic cycle: precipitation, runoff, streamflow, subsurface water movement. Sampling of all flows for contaminants. Design of monitoring systems. Analysis of data. Prereq: Environmental and Soil Sciences 324, Statistics 201, Math 152, or consent of instructor. (Students cannot receive credit for both 474 and 574.) 2 hours and 1 lab. Sp.

ENVIRONMENTAL AND SOIL SCIENCES (ESS)

ADD NEW COURSE PREFIX:

ESS: ENVIRONMENTAL AND SOIL SCIENCES

NOTE: Course proposals for the new Environmental and Soil Sciences course panel are the soil and climate courses from the old Plant and Soil Sciences (792) panel. This request is made due to departmental reorganization (see more information below under Curricula Changes)

REVISE CREDIT HOURS AND CREDIT HOURS DISTRIBUTION:

FROM: <u>Plant and Soil Sciences</u> 210 Introduction to Soil Science (3). 2 hours lecture and one 2-hour lab

TO: <u>Environmental and Soil Sciences</u> 210 Introduction to Soil Science (4). 3 hours lecture and one 2-hour lab

REVISE COURSE NUMBER:

FROM: Plant and Soil Sciences 292 Soil Morphology

TO: <u>Environmental and Soil Sciences</u> **242** Soil Morphology

FROM: Plant and Soil Sciences 311 Soil Nutrient Management and Fertilizers

TO: Environmental and Soil Sciences 334 Soil Nutrient Management and Fertilizers

REVISE COURSE NUMBER AND DESCRIPTION:

FROM: <u>Plant and Soil Sciences</u> **315** Soil and Water Conservation (3) Hydrologic, agronomic, and engineering principles applied to resource management problems including flood and erosion control, drainage, and water quality. Prereq: 210. 2 hours lecture and one 2-hour lab. Sp.

TO: <u>Environmental and Soil Sciences</u> **324** Soil and Water Conservation (3) Investigation of hydrologic principles regarding soil and water conservation. Topics include: hydrologic cycle, water quality, soil properties, erosion prediction and control, and techniques to protect natural resources. Prereg: 210. 2 hours lecture and one 2-hour lab. Sp.

REVISE COURSE NUMBER AND PREREQUISITES:

FROM: Plant and Soil Sciences 412 Soil Genesis and Classification. Prereq: PSS 310

TO: Environmental and Soil Sciences 442 Soil Genesis and Classification. Prereq: ESS 210

FROM: Plant and Soil Sciences 413 Environmental Soil Chemistry. Prereq: 310 and Chemistry 110 or 350

TO: <u>Environmental and Soil Sciences</u> **434** Environmental Soil Chemistry. Prereq: **ESS 210 and** Chemistry 350

REVISE COURSE NUMBER, TITLE, DESCRIPTION, PREREQUISITES:

FROM: Plant and Soil Sciences 414 Soil, Land Use and the Environment (3). Prereq: 310

TO: Environmental and Soil Sciences 481 Capstone in Environmental and Soil Sciences (3).

Integrative course in which students work individually and collaboratively to develop solutions for soil and water related environmental problems. Writing and oral communication emphasis course. Prereq: 434 and senior standing

FROM: Plant and Soil Sciences 415 Soil Hydrology. (3) Prereq: 310

TO: <u>Environmental and Soil Sciences</u> **444 Environmental Soil Physics.** (3) Basic understanding of soil physical properties and processes; practical experience in measurement and analysis of soil physical properties; methods of analysis related to agricultural, environmental, and engineering issues. Prereq: 210 and Physics 221 or equivalent.

FROM: Plant and Soil Sciences 432 Bioclimatology (3)

TO: <u>Environmental Climatology (3)</u>. Study of atmosphere as environment. Physical, chemical and biological factors affecting climates of various earth environments; meteorological process affecting biosystems. Climatic change and the human impact on the atmosphere, consequences of climatic change and mitigation policies, microclimates and urban climates, atmospheric pollution, extreme events and ozone depletion. Design and operation of weather information systems; automated weather stations. Prereq: Agriculture and Natural Resources 290 or equivalent.

ADD:

Environmental and Soil Sciences 110 Introduction to Environmental and Soil Sciences (1). Invited speakers on current topics; career opportunities in the environmental sciences; field trip with departmental faculty. S/NC grading. F.

Environmental and Soil Sciences 301 Professional Development (1). Techniques of effective professional communications; professional ethics; interviewing and the job search. Prereq: Junior standing. Sp.

Environmental and Soil Sciences 355 Environmental Soil Biology (3). Biology and biochemistry of the soil environment as it applies to environmental and agricultural processes. Topics to include microbial ecology, biogeochemical cycling of soil elements, soil quality and bioremediation. Prereq: 210 and Microbiology 210. Sp.

Environmental and Soil Sciences 492 Internship (1-6). Supervised experience with a departmentally-approved employer. Student is responsible for making arrangements. Requirements include maintaining a daily log, supervisor evaluations, and a final report. May be repeated with a maximum of 6 hours credit. Prereg: Junior standing. S/NC. E

Environmental and Soil Sciences 493 Problems in Environmental and Soil Sciences (1-3). Special research problems in environmental sciences. May be repeated. Maximum 6 hours. Prereq: Approval of Department and Junior Standing. E.

EFFECTIVE DATE: Fall 2002 for all Biosystems Engineering, Biosystems Engineering Technology, and Environmental and Soil Sciences course changes

ENTOMOLOGY AND PLANT PATHOLOGY

ADD:

201 Impact of Insects and Plant Diseases on Human Societies (3) Insects and plant diseases have had a significant influence on human history, culture, and lifestyles. The science of entomology and plant pathology help humankind understand the impact of insects and plant pathogens on these dimensions of human existence. The development of strategies to capitalize on the beneficial aspects of these organisms will also be explored. 3 hours. Sp, A-O

EFFECTIVE DATE: Spring Semester, 2002

FOOD SCIENCE AND TECHNOLOGY

ADD:

301 <u>Professional Development</u> (1) Professional development requirements, resources and opportunities. Individual written and oral report and group discussion on careers and food companies. Prerequisite: Junior standing or consent of instructor.

Application of Food Chemistry and Processing Principles (4) Interactions and functions of dairy, egg, cereal and other plant based ingredients during the production and storage of processed food products. Prerequisite: FST 340 and 410 or consent of instructor. 3 hours lecture and 1 lab.

EFFECTIVE DATE: Fall 2002

DROP:

EFFECTIVE DATE: Fall 2002

PLANT SCIENCES AND LANDSCAPE SYSTEMS

Ornamental Horticulture and Landscape Design ADD:

- Management and Administration of Public Horticulture Institutions (3) Management of resources in non-profit institutions, support organizations and communities. Theoretical framework and institutional mission; strategic planning and programming; financial accounting and budgeting; development and fund raising; personnel policies; volunteer development; marketing and publicity; legal issues; relationships between staff and governing boards; the use of information technology in management and governance systems; and conservation/preservation roles in community development. Prereq: 326. F
- Public Garden Operations and Management (3) An analysis of year-round operations and management of public gardens. Case studies involving time and labor management, budget development and management, implementation of volunteer programs, information dissemination methods for public outreach, management of grounds and facilities using the University of Tennessee Institute of Agriculture Gardens as a model. Prereq: 326. Sp
- 436 <u>Plant and Garden Photography</u> (2) Principles and techniques of photography as they relate to plants and gardens. Study of equipment options and field shooting under various weather conditions and in different seasons. Prereq: 326 or consent of the instructor. Sp, A-O

Undergraduate Council Minutes for January 17, 2002

Page 13294

Horticulture Therapy (3) Application of horticulture as therapy for treatment, rehabilitation and/or training of individuals with disabilities. Prereq: 326, senior standing, or consent of the instructor. F, A-E

EFFECTIVE DATE: Spring, 2002

DROP:

431 Greenhouse Floral Crop Production Laboratory (1)

EFFECTIVE DATE: Spring, 2002

REVISE COURSE NUMBER, CREDIT, AND PREREQUISITES:

FROM:

426 <u>Public Horticulture</u> (2) In-depth study of the public horticulture industry. Attention given to the diversity of public horticulture institutions, career opportunities, and research. Discussion of current topics and issues. Prereq: Must have senior standing in OHLD or consent of the instructor. Sp

COLLEGE REQUIREMENTS:

FROM: (see page 38 of the 2001-2002 Undergraduate Catalog)

Minimum Requirements for Baccalaureate Degree Programs

All B.S. degree programs offered in the College have the following minimum requirements:

Perspectives in Agriculture and Associated Natural Resources (3) (counts towards the University's general education requirement for 6 hours of integrative studies)

Biological Sciences (College of Agricultural Sciences and Natural Resources courses included1) (8)

Computer Science (3) (Or equivalent experience. See specific departmental requirements.)

English and Communications to include English Composition (6), Speech (3), and an additional communications elective (3) for a total of 12 (the communications elective may overlay to fulfill one course for the University's humanities electives)

Mathematics (6)

Physical Sciences (Chemistry, Physics, Geology) (8)

Social Sciences and Humanities to include Economics (4) and other electives (8) for a total of 12 (Economics (4) may overlay to fulfill one course for the University's social science electives)

²Directed Electives (6)

Major Courses (24)

³College of Agricultural Sciences and Natural Resources courses (outside of the major department) designated by the department and/or electives (12)

Other courses designated by the department and/or electives (38)

For a total of 132 hours.

TO:

Minimum Requirements for Baccalaureate Degree Programs

All B.S. degree programs offered in the College have the following minimum requirements:

Communicating through Writing (3 courses that include two English Composition courses and one course designated as "writing intensive" (W) in the undergraduate catalog.)

Communication (1 course from specified list)

Quantitative Reasoning (2 courses, 6 hours minimum, from two math or statistics courses from approved list)

Arts and Humanities (2 courses, 6 hours minimum, from approved list)

Social Sciences (2 courses, 6 hours minimum, from approved list)

History (2 courses, 6 hours minimum, from approved list)

Biological Sciences (2 courses, 6 hours minimum, College of Agricultural Sciences and Natural Resources courses included)

Physical Sciences (2 courses, 6 hours minimum from Chemistry, Physics or Geology)

Computer Applications (ANR 290 or equivalent)

Major Courses (24) (These courses are specified within each major)

For a total of 124 hours minimum.

¹ Bachelor of Science in Biosystems Engineering

² Must be courses in English and communications, biological sciences, physical sciences, or social sciences and humanities, historical studies, integrative studies or combinations of these subject matter areas in order for degree programs to meet the University's general education requirements.

³ Bachelor of Science in Biosystems Engineering and Bachelor of Science in Forestry program excepted.

Agricultural Economics and Business: Minor

On page 39 of the 2001-2002 Undergraduate Catalog, change requirements From:

Minor consists of 16 credit hours including Economics 201, Agricultural Economics 342, 350, 412 and a 3-hour elective in Agricultural Economics.

To:

Minor consists of 19 credit hours including Economics 201, Agricultural Economics 212, 342, 350, 412 and a 3-hour elective in Agricultural Economics.

Effective date: Fall 2002

ANIMAL SCIENCE

REVISE DEGREE NAME:

From:

Bachelor of Science in Agriculture

To:

Bachelor of Science in Animal Science

Summary of changes in the curriculum's concentrations:

- 1. Change concentration name from "Animal Science: Production and Management" to "Animal Science: Production and Business". Require a minor in Business or Agricultural Economics and Business for the Production and Business concentration.
- 2. Drop AS 101: Orientation to Animal Science (1 hr).
- 3. Change AS 260: Animal Industry and Market Evaluation (3 hr) to AS 160: Introduction to Animal Science (3 hr).
- 4. Require AS 160 for all Animal Science concentrations.
- 5. Change AS 280: Farm Animal Management Practices (3 hr) to AS 280: Biotechnology and Management Practices in Animal Agriculture (3 hr).
- 6. Require AS 280 for all Animal Science concentrations.
- 7. Drop AS 48X requirement for Pre-vet 3 + 1 students (replaced by AS 280).
- 8. Change AS 330: Animal Nutrition, Feeds and Ration Formulation (4 hr) to AS 330: Comparative Animal Nutrition (3 hr).
- 9. Require AS 330 for all Animal Science concentrations.
- 10. Change AS 430: Advanced Ration Formulation (2 hr) to AS 430: Advanced Ration Formulation (3 hr).
- 11. Change AS 495: Seminar (1 hr) to AS 395: Careers Seminar (1 hr).
- 12. Require AS 395 for all Animal Science concentrations.
- 13. Revise AS 495 Seminar to a seminar course that focuses on "Ethics in Animal Agriculture "(1 hr).
- 14. Change hours required for graduation with a BS in Animal Science from 132 to 124 for Production and Business, Science and Technology, Science and Technology/ Pre-vet concentrations.
- 15. Change hours required for Pre-vet 3 + 1 from 99-100 to 96.

¹ May select either English 101 and 102 or English 118 and 102 (Students who obtain a grade of A or B in 118 may complete their freshman requirement with 102, 355, or with a 200 level course in the English department. The 200 level course may, if so listed, also be used toward the Humanities requirement.)

² Math placement depends on high school courses and grades and ACT scores. Math 119 or higher is required and Math 125 or 141 or 151.

³ May be chosen from Biology or Botany course.

⁴ May be chosen from a Physics course.

⁵ Lists of appropriate courses are available and should be selected in conference with academic advisor.

⁶ One course other than English requirements must be designated as "writing intensive" (W) in the undergraduate catalog.

⁷ May be chosen from Speech 210, 220 or 240

REVISE Food Science and Technology Pre-Professional Concentration curriculum from that on pages 43-44 of the 2001-2002 Undergraduate Catalog, TO:

FOOD SCIENCE AND TECHNOLOGY PREPROFESSIONAL CONCENTRATION

These programs in Pre-Dental, Pre-Medicine, Pre-Pharmacy and Pre-Veterinary Medicine allow students to be awarded a B.S. degree in Agriculture with a major in Food Science and Technology, after three years and the successful completion of the first year (two semesters) in UT-Memphis dental, medical or pharmacy programs or UT College of Veterinary Medicine, Knoxville. The last 30 hours of the three-year curriculum must have been taken at UT Knoxville. A total of 124 hours must be completed by the end of the first year in professional school. No later than December 31 of the student's first year in professional school (s)he should contact the Department Food Science and Technology in order to check on graduation procedures for this program.

Although a B.S. degree is not required for admission to the Colleges of Dentistry or Medicine, most of the students accepted into these programs have the baccalaureate degree before admission. Therefore students are encouraged to plan to complete all requirements for B.S. degree before enrolling in either of these colleges. A B.S. degree can be obtained before enrolling in the Doctor of Pharmacy (Pharm. D.) program.

REVISE ELECTIVES LISTS

FROM:

APPROVED ELECTIVES

For both Forest Resource Management and Wildland Recreation Concentrations

The two concentrations in the Bachelor of Science in require courses in a number of general education. Below are specific courses that meet the requirements in each of the areas. Courses listed for social science, humanities, and history are from a University-wide list, while those for communications have been developed within the Department of Forestry, Wildlife and Fisheries. Other courses may satisfy the requirements. If you are interested in an unlisted course, see the description of each area under general education requirements (page 46 in the 1997-98 UT Undergraduate Catalog) and then discuss it with your advisor.

SOCIAL SCIENCES

Afro-American Studies 201, 202, 314, 315, 343, 373, 379, 442, 452, 473, 480, 483

American Studies 310.410

Anthropology 110, 120, 130, 302, 306, 310-320, 360, 361, 373, 410, 412, 413, 462-463, 495

Reorganization of Departments and Curricula: Department of Agricultural and Biosystems Engineering Department of Ornamental Horticulture and Landscape Design Department of Plant and Soil Sciences

The College of Agricultural Sciences and Natural Resources, the Tennessee Agricultural Experiment Station, and UT Agricultural Extension Service have undergone reorganization of units over the years.

- In 1964, the Experiment Station Departments of Entomology and Plant Pathology were combined and named the Department of Agricultural Biology. In 1980 it was renamed the Department of Entomology and Plant Pathology.
- Also in 1964, the Department of Forestry was formed out of the Department of Horticulture. Later, it was renamed the Department of Forestry, Wildlife & Fisheries.
- In 1972, the Institute of Agriculture reorganized eliminating the Departments of Animal Husbandry, Dairying, Poultry, Horticulture, and Agronomy and creating the Department of Animal Science, Ornamental Horticulture and Landscape Design, and Plant and Soil Sciences. The food processing activities of four departments Animal Husbandry, Dairying, Poultry, and Food Technology were combined to form the new Department of Food Science and Technology.
- In 1986, the agricultural education program was transferred from the College of Education to the College of Agriculture and combined with the Department of Agricultural Extension to become the Department of Agricultural and Extension Education.
- Effective July 1, 2001, the Departments of Agricultural and Biosystems Engineering, Ornamental Horticulture and Landscape Design, and Plant and Soil Sciences were reorganized into two departments: Biosystems Engineering and Environmental Science (BEES), and Plant Sciences and Landscape Systems (PSLS). This reorganization was approved at the June, 2000 UT Board of Trustees meeting.

As with each of the previous changes, changes in academic programs resulted.

Recent departmental restructuring was the first step in laying the groundwork to develop new research emphases as well as updated degree programs and strategies for increasing enrollment and retention of undergraduate and graduate students. The departmental restructuring was necessitated by evolution and changing directions of the different disciplines involved. With the reorganization of the three departments into two, the management of concentrations has changed. The proposal that follows stems from the departmental reorganizations that necessitates the reorganization and renaming of academic programs.

The Ornamental Horticulture and Landscape Design major and associated concentrations (see pages 33 and 46 to 48 in the current Undergraduate Catalog) and the Plant and Soil Sciences major and two of its concentrations – Science/Technology and Management/Consulting – (see pages 33 and 48 to 49 in the current Undergraduate Catalog) are maintained by the new Department of Plant Sciences and Landscape Systems.

The Plant and Soil Sciences – Environmental Science and Natural Resources concentration (see pages 33 and 48 to 49 in the current Undergraduate Catalog) was moved to the new Department of Biosystems Engineering and Environmental Science. This concentration was originally developed by the Soils Faculty in the former Department of Plant and Soil Sciences. These faculty are now housed in BEES. The faculty propose to rename this degree Environmental and Soil Sciences with a concentration in Soil Environmental Science. They are also proposing two concentrations: Environmental Science and Agricultural Systems Management (ASM). The new ASM concentration will be more interdisciplinary in nature and will allow the department to attract students with an interest in precision crop agriculture. This concentration crosses the disciplines of agricultural technology, soils, and crops. Because it is more diverse than the other concentrations, the ASM concentration is not yet completed and will be submitted later.

All of the proposed changes are a natural evolution of the disciplines involved in the departmental reorganization and capitalizes on the talents of current faculty, recently hired faculty and the strategic plans of the departments. The table below summarizes the proposed changes.

Current Majors and Concentrations	Degree Name	Proposed Changes in Majors & Concentrations	Degree Name
	Majors and Co	oncentrations Managed by PSLS	
Orn Hort & Land Des Business Hort Sci & Mgmt Landscape Design Public Horticulture	BS in OHLD	Plant Science & Land. Systems drop drop Landscape Design Public Horticulture	BS in PSLS
Plant and Soil Sciences Env Sci & Natl Res Mgmt/Consult Science & Tech	BS in PSS	moved to BEES Business Management Horticulture and Agronomy Agronomy Track Horticulture Track Turfgrass Management	
	Majors and Co	oncentrations Managed by BEES	
Plant and Soil Sciences Env Sci & Natl Res	BS in PSS	Environmental and Soil Sciences Soil Science Environmental Science Agricultural Systems Mgmt. (to be developed)	BS in ESS
Biosystems Engr. Agri. Engineering Biological Engineering Food Engineering	BS in BE	¹ Biosystems Engr. ¹ Food Engineering	BS in BsE

¹ Changes in the Biosystems Engineering degree program were planned before the departmental restructuring and are not associated with the restructuring.

BIOSYSTEMS ENGINEERING AND ENVIRONMENTAL SCIENCE

Revise catalog statement and curricula:

Because of massive faculty, catalog text, and curricula changes, the entire proposed content of the former Agricultural and Biosystems Engineering material should be replaced with the material on the following pages. Changes include:

- addition of the soils faculty from the former Plant and Soil Science Department
- changes in text to reflect movement of the PSS major and PSS-Environmental Sciences concentration to Biosystems Engineering and Environmental Science; renaming the degree program.
- revisions to the Biosystems Engineering concentration (the current concentration listings are shown following the catalog material).
- the transferred environmental sciences program (renamed Environmental and Soil Sciences) and concentrations within it.

On pages 40 to 41 of the 2000-2001 Undergraduate Catalog, <u>REVISE ENTIRE DEPARTMENTAL</u>

PROGRAMS AVAILABLE

The Department of Biosystems Engineering and Environmental Science offers two undergraduate degree programs: Bachelor of Science in Biosystems Engineering and Bachelor of Science in Environmental and Soil Sciences. The Biosystems Engineering program is a four- year, ABET- accredited engineering program emphasizing engineering applications to biological systems. The Environmental and Soil Sciences program is a strong science-based program for students interested in the environmental sciences. Minors in either Environmental and Soil Sciences or in Biosystems Engineering Technology are also available. More detailed descriptions of each program are included with the curriculum material that follows.

BIOSYSTEMS ENGINEERING

Advisors:

Professors Freeland, Hart, Pordesimo, Raman, Wilkerson, Womac, D. Yoder.

General:

The College of Agricultural Sciences and Natural Resources, in cooperation with the College of Engineering, offers a four-year curriculum leading to the degree of Bachelor of Science in Biosystems Engineering. The curriculum is accredited by the Engineering Commission of the Accreditation Board for Engineering and Technology (ABET). Overall goals of the program are emphasized in the Vision, Educational Objectives, and Program Outcomes statements listed below. Program details are given in the showcase curricula and the individual course descriptions provided.

Career opportunities for graduates include the design, the development, or the management of: practices that minimize soil erosion and conserve water resources; biological waste treatment systems; safer machinery systems with lower environmental impact; or improved food and bio-processing systems. Employment opportunities are available in a wide variety of industries, government agencies, research and testing organizations, and educational and non-profit institutions.

The math requirement for freshman admission to the Biosystems Engineering program is 3 1/2 units, including trigonometry and geometry. Otherwise, the general admission requirements of the University apply.

The curriculum provides instruction in the analytical and design skills needed to solve engineering problems related to biological and agricultural systems. Comprehensive design of systems and their components is emphasized in the senior year. In addition to the standard Biosystems Engineering curriculum, a concentration in Food Engineering is also available. The degree program has provisions for elective courses to be taken in specified subject areas. Students should outline a plan for all such electives not later than their second year of study. Proper scheduling of courses is very important, since prerequisite requirements must be met. Thus, students must consult with their advisors each semester to review their scheduling plan.

Students majoring in biosystems engineering are eligible to participate in the Engineering Cooperative Scholarship program and other student activities in the College of Engineering. Biosystems Engineering majors interested in the Cooperative Engineering Scholarship program should consult with their faculty advisor or the head of the Biosystems Engineering and Environmental Science Department (phone (865) 974-7266; e-mail: bees@utk.edu).

Vision:

The Biosystems Engineering Program at the University of Tennessee is committed to linking engineering sciences and mathematics to real-world problems involving natural and man-made biologically-based systems. We strive to educate students to become engineers with the ability to serve humanity by applying engineering knowledge to solve problems facing society. This education is accomplished by providing a strong grounding in engineering fundamentals and incorporating hands-on, real-world design scenarios throughout the curriculum.

Our graduates are technically competent in engineering design. They

- understand the steps in the engineering process;
- can define a problem;
- can gather the information required to solve a problem;
- can critically evaluate information from various sources;
- are creative and can synthesize solutions to a problem;
- can perform engineering analyses;
- can design components, machines, or systems to solve a problem;
- understand the importance of social, environmental, economic, and safety issues;
- appreciate the role of uncertainty and risk in engineering analyses.

Our graduates have the skills needed by professional engineers. Our program strives to instill

- an understanding of the engineering profession;
- the thrill of rewarding engineering accomplishments;
- a knowledge of the responsibilities of a practicing engineer;
- an ability to work effectively in teams of diverse makeup;
- an understanding of the importance of ethical conduct in a professional practice;
- effective oral, written, and graphical communications skills;
- the importance of taking initiative on projects;
- confidence in technical capabilities;
- strong personal time management skills;
- · strong project management skills.

Educational Objectives:

Specific educational objectives have been established for the Biosystems Engineering Program. Consistent with the vision outlined above, the program objectives are that graduates have a mastery of:

- the mathematical tools normally required of junior engineers;
- the basic sciences relevant to engineering applications to biological systems;
- the engineering sciences required by their chosen concentration, and application of engineering principles to biological systems;
- the design process, including collection and analysis of information, identification of problems, formula
 formulation and selection of a solution, application of the solution, and effective communication of
 the results;
- teamwork skills, communication skills, and an understanding of professional, social, environmental, safety, and ethical considerations;
- the reasons for and importance of lifelong learning and of developing an appreciation for cultural and social expression beyond the realm of engineering.

Program Outcomes:

To achieve the educational objectives listed above, a series of program outcomes have been adopted. These program outcomes provide specific measures to determine the degree of success in meeting each of the educational objectives. These outcomes are as follows:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data
- an ability to design a system, component, or process to meet desired needs
- an ability to function on multi-disciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global and societal context
- a recognition of the need for, and an ability to engage in, life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice
- an understanding of the complexity of biological systems, and the ability to apply engineering principles to those system

BIOSYSTEMS ENGINEERING: CONCENTRATION IN FOOD ENGINEERING

The concentration in Food Engineering emphasizes topics relevant to understanding and engineering food and bioprocessing operations. Students graduating with this emphasis are qualified for engineering positions in a variety of food and other biobased industries.

Sophomore Junior

¹ Or equivalent honors course.

² If mathematics placement test score is unsatisfactory, take Mathematics 130 prior to 141 (See advisor for alternated schedule). Mathematics 130 will not count as part of the required hours for graduation.

³ Select from the appropriate cluster in the College of Engineering listing of General Education Electives. In some instances a single course may meet requirements of more than one cluster. When this occurs, a course from another cluster may be used to meet the total hour requirement. These electives must be approved in advance by advisor to insure that they meet university and ABET criteria.

⁴ Select from CE 390 Hydraulics or ES 341 Fluid Mechanics.

⁵ Typically upper division courses in engineering or related areas. Must be approved in advance by advisor.

BIOSYSTEMS ENGINEERING TECHNOLOGY

Advisors:

Professors Freeland, Hart, Wilhelm, Wilkerson, Womac, D. Yoder.

No baccalaureate degree program is offered in biosystems engineering technology; however, seven undergraduate courses are offered to prepare students in other disciplines to apply elementary principles, techniques, and systems of engineering to the broad industry of agriculture.

A Minor in Biosystems Engineering Technology requires a minimum of 18 semester hours as follows: Biosystems Engineering Technology 202 or 212, 326, and 432, and three of the six courses 414, 422, 442, 452, 462 or 474.

A program leading to the Master of Science degree with a major in biosystems engineering technology is available (see the Graduate Catalog). The graduate program is open to qualifying BS graduates from other disciplines. Academic records of applicants will be reviewed by the departmental graduate committee to determine if prerequisite courses are required to meet program requirements.

ENVIRONMENTAL AND SOIL SCIENCES

Advisors: Essington, Lee, Logan, D. Yoder.

Many human activities adversely impact soil, water and environmental quality. The Bachelor of Science degree in Environmental and Soil Sciences provides students with a strong grounding in basic sciences and technology to prepare them for careers in environmental and natural resource management. Students in this program study basic natural sciences as well as applied areas such as ecology, soil sciences, and natural resource policy. Students also build expertise with modern technologies such as geographical information systems, global positioning systems, and computer applications in natural resource management. Graduates are prepared to work in a wide variety of interesting and challenging career paths and to work with a broad variety of other professionals to solve complex problems. Examples of potential careers include: soil and environmental special-

¹ Or equivalent honors course.

² If mathematics placement test does not indicated placement into Math 141, please discuss mathematics options with advisor.

⁴ Select from CE 390 Hydraulics or ES 341 Fluid Mechanics.

ists and scientists; state and federal regulatory agency work; private consulting in environmental and agricultural areas; and working with non-governmental organizations with interests in agriculture, environment and natural resources. Students receiving this BS degree are also very competitive for placement in graduate programs in environmental and agricultural sciences and technology, as well as law school.

The core program provides a strong grounding in the sciences and technology, while concentrations within the BS degree permit a focus on either science or technology. There are two concentrations in this degree program, Soil Environmental Science and Environmental Science. These concentrations are described below.

A minor in Environmental and Soil Sciences consists of 19 credit hours including ESS 210 and 324, BSET 326, and at least 9 elective hours in ESS and/or BSET courses at the 300 level or higher.

ENVIRONMENTAL AND SOIL SCIENCES: CONCENTRATION IN SOIL SCIENCE

This concentration is a rigorous, science-based program for students interested in the field of environmental sciences. The curriculum emphasizes soils and their long-term use and productivity, as well as surface and sub-surface water resources. Students will understand natural resource problems and their management, including soil and water conservation issues, land use problems, waste disposal, and reclamation of disturbed lands. Other areas of interest can be addressed through the appropriate selection of technical electives in the program. Students in this program will gain the practical knowledge necessary to compete for career opportunities in government, environmental consulting firms, public health services, environmental research laboratories, and agricultural production, while also gaining the theoretical training necessary for continuing on for advanced degrees in a number of environmentally related fields.

ENVIRONMENTAL AND SOIL SCIENCES: CONCENTRATION IN ENVIRONMENTAL SCIENCE

The Environmental Science concentration is a blended program of science and technology that provides a strong, broad background in the natural sciences. The plan of study emphasizes human impacts on the long-term use and productivity of land and water resources. Emphasis is also placed on the tools used in the management of these resources. The curriculum provides a good foundation in the collection and analysis of the information required to characterize resource conservation problems and to make good resource use decisions. Directed technical electives allow the students to concentrate in an area of interest. Students in this program will gain the practical knowledge necessary to compete for career opportunities in government, environmental consulting firms, public health services, environmental research laboratories, and agricultural production, while also gaining the theoretical training necessary for continuing on for advanced degrees in a variety of environmentally related fields.

EFFECTIVE DATE: Fall 2002 for all Department of Biosystems Engineering and Environmental Science changes

ADD this list of electives for the BS in ESS to the catalog following the showcases:

ELECTIVE LIST FOR ALL CONCENTRATIONS, BS DEGREE IN ENVIRONMENTAL AND SOIL SCIENCES

Arts and Humanities Electives:

Any course listed under the College of Arts and Sciences Humanities

requirements (Part A., section 3, Lists A, B, and C of Divisional Distribution

Requirements)

Art (all courses of instruction - art, ceramics, design/graphic, drawing, education, history, media arts, painting, printmaking, sculpture)

Asian Studies 101, 102

Classics (all courses)

Dance (all courses)

Music (all courses of instruction - education, ensemble, general, history, instrument, jazz, keyboard, performance, technology, theory)

Philosophy 120, 130, 135

Religious Studies (all courses)

Theatre (all courses)

Women's Studies 210, 215, 320, 330, 332, 382, 383, 422, 433, 483

Cultures and Civilizations Electives:

Any 2 sequence course in language at the intermediate level satisfies this requirement, e.g., Spanish 211-212, German 201-202, etc.

Anthropology 120, 130

History (all courses)

Any course listed under the College of Arts and Sciences Non-US History requirements (Part A., section 4 of Divisional Distribution Requirements) or any courses listed under the College of Arts and Sciences Upper Level Distribution Requirements – List A or List B.

Technical Electives:

Note that some electives have required electives. You must satisfy prerequisites prior to taking those classes. Those prerequisites are either required in the major or are listed below – see individual course descriptions in the catalog for specific prerequisite information.

Agriculture and Natural Resources 333

Animal Science 220, 260, 280, 320, 330, 380, 381

PLANT SCIENCES AND LANDSCAPE SYSTEMS

Because of massive faculty, catalog text, and curricula changes, the entire content of the former Department of Ornamental Horticulture and Landscape Design (pages 46 through 48) and the content of the former Department of Plant and Soil Sciences (pages 49 through 50) material should be replaced with the material for the new Department of Plant Sciences and Landscape Systems as presented on the following pages. Changes include:

- · combining the faculty lists for all plant science faculty form the two former departments
- changes in text to reflect movement of the PSS major and the PSS-Environmental Sciences concentration to Biosystems Engineering and Environmental Science
- combining the Ornamental Horticulture major and the Plant and Soil Sciences major (combining concentrations two PSS and OHLD concentrations, establish new concentration, retaining two concentrations) into new Plant Sciences and Landscape Systems major.

On the pages 46 through 50 of the 2001-2002 Undergraduate Catalog, REVISE as follows:

Plant Sciences and Landscape Systems

Professors:

G.N. Rhodes (Interim Head), Ph.D. North Carolina State; M.L. Albrecht (Assoc. Dean, College of Agricultural Sciences and Natural Resources), Ph.D. Ohio State; F.L. Allen, Ph.D. Minnesota; E.L. Ashburn, Ph.D. Tennessee (Emeritus); R.M. Augé, Ph.D. Washington State; B.V. Conger, Ph.D. Washington State; G.D. Crater (Emeritus) Ph.D. Ohio State; L.M. Callahan (Emeritus), Ph.D. Rutgers; D.L. Coffey, Ph.D. Purdue; D.E. Deyton, Ph.D. North Carolina State; W.T. Flinchum (Emeritus), Ph.D. North Carolina State; H.A. Fribourg (Emeritus), Ph.D. Iowa State; E.T. Graham (Emeritus), Ph.D. Pennsylvania State; C.R. Graves (Emeritus), M.S. Tennessee; R.M. Hayes, Ph.D. Illinois; D.W. Lockwood, Ph.D. Purdue; G.L. McDaniel, Ph.D. Iowa State; J.H. Reynolds (Emeritus), Ph.D. Wisconsin; A.D. Rutledge (Emeritus), Ph.D. Tennessee; T.J. Samples, Ph.D., Oklahoma State; C.E. Sams, Ph.D. Michigan State; D.W. Sams (Emeritus), Ph.D. Minnesota; P.P. Shelby (Emeritus), M.S. Tennessee; R.N. Trigiano, Ph.D. North Carolina State; D.R. West, Ph.D. Nebraska; D.B. Williams (Emeritus), Ph.D. Pennsylvania State.

Associate Professors:

G.E. Bates, Ph.D. Georgia; Z.-M. (Max) Cheng, Ph.D. Cornell; C.O. Gwathmay, Ph.D. U.C. Davis; W.A. Krueger (Emeritus), Ph.D. Illinois; S.L. Hamilton, Ed.D. Tennessee; G. L. Menendez, M.S. Tennessee; T.C. Mueller, Ph.D. Georgia; D.K. Robinson, Ph.D. North Carolina State; S.M. Rogers, M.L.A. Georgia; J.E. Wyatt, Ph.D. Florida.

Assistant Professors:

S. Garton, Ph.D. Minnesota; W. E. Klingeman, Ph.D. Georgia; G.D. Morgan, Ph.D. Wisconsin; V.R. Pantalone, Ph.D. North Carolina State; A.R. Straw, Ph.D. Tennessee.

Advisors: Coffey, Hamilton, McDaniel, Menendez, Rogers, and Sams.

The Department of Plant Sciences and Landscape Systems (PSLS) of the University of Tennessee provides quality academic instruction to undergraduate and graduate students. Experienced instructors who are committed to the success of their students staff the department. Advisors give students sound advice in the selection of career specialties, elective courses, and provide students the best education possible. Professors want their students to be successful and enjoy positive student-teacher relationships. They keep track of job openings and assist students during the job selection process. Since most PSLS teachers are also research scientists, undergraduate students interested in advanced studies are directed into appropriate courses necessary for admission to graduate school. Students are also encouraged to work with faculty researchers in a variety of laboratory, greenhouse, or field experiments.

The department offers a major leading to a Bachelor of Science degree in Plant Sciences and Landscape Systems five concentrations: Business Management, Horticulture and Agronomy, Landscape Design, Public Horticulture, and Turfgrass Management.

Each concentration offers a different approach to address the breadth of opportunities available to PSLS undergraduate students. A minimum of 124 credit hours including internship is required for each concentration. Full-time summer internships are available at selected local, regional, and national companies or institutions. Part-time summer or semester internships are available from PSLS, other university departments and laboratories and local commercial firms. For more information about undergraduate and other departmental programs, please contact our web site at: http://ohld.ag.utk.edu/psls/

CAREER SPECIALITIES

Students in the Landscape Design and the Public Horticulture concentrations have various career paths open to them. Opportunities exist within landscape construction and maintenance (installation and maintenance of residential and commercial landscapes), landscape design (creation of aesthetic concepts and practical plans for improved outdoor areas), and public horticulture (the promotion of horticulture to enhance people's education and enjoyment of plants). Students select courses to meet the challenges of the different areas of ornamental horticulture by working closely with their academic advisers. Internships at various horticultural enterprises provide students the opportunity to put theory into practice and screen possible job options.

Positions that graduates hold are numerous and include the following: owners, supervisors and employees of landscape construction; design and/or maintenance businesses for residential, recreational and commercial properties; owners, designers, salespersons or managers with interiorscape firms; directors, curators, public relations managers, education program director, high school or college teachers and employees of botanic gardens and arboreta; federal, state, county, city and municipal horticulturists; county extension workers in horticulture; estate manager; arborists and employees of tree care firms; and garden writers. A percentage of undergraduate students go on to graduate studies.

The Business Management and Turfgrass Management concentrations reflect the various other career paths open to graduates. Opportunities exist within floriculture (the field of growing and marketing flowers and plants), turfgrass management (growing and managing turfgrasses used for golf courses, parks, athletic fields, and residential and commercial lawns), wholesale nursery production (the production of trees, shrubs and other woody ornamental plants used by the landscape industry or sold through retail outlets), retail horticulture (the marketing; merchandising and sale of vegetables, fruit, or ornamental plants and gardening accessories directed to the consumer), and agronomic crops production and consulting.

Positions that graduates hold are numerous and include the following: owner, manager, salesperson or employee of garden centers, farm supply, or other retail outlets; golf course superintendents and assistant superintendents; sales positions with turfgrass equipment firms, supply firms, chemical companies and seed companies; owners, supervisors or growers of turfgrass sod, nursery or floral crop operations, and agronomic and field-produced horticultural crops.

The Horticulture and Agronomy concentration provides a solid background in science while preparing students to apply this knowledge. The graduate must have knowledge of the basic chemical, physical and biological sciences and be educated in communication and computer skills, The student may be broadly trained or may

Undergraduate Council Minutes for January 17, 2002

Page 13330

specialize in a specific phase of the subject. This concentration is especially designed to qualify students for professional certification and to prepare students for graduate study. Through the appropriate selection of major course and technical electives, students can qualify for certification as a crop scientist, agronomist, or horticulturist. Students can also prepare themselves for graduate study in crop ecology and physiology, crop breeding and genetics, and weed science. Careful selection of departmental courses and related courses as well as electives in consultation with the student's academic adviser will prepare graduates for a career of their choice in the Plant Science area, whether it be Agronomic or Horticultural in nature.

A **minor in Integrated Plant Systems** shall consist of 18 hours of courses in Plant Sciences and Landscape Systems including IPS 230, IPS 334, and a minimum of 12 credit hours at the upper division. Prerequisites, if any, to these courses will not be waived, but must be included in addition to the total of 18 hours. PSLS 471 will not be accepted as a course to meet minor requirements.

A **minor in Ornamental Horticulture and Landscape Design** shall consist of 18 hours of courses in Ornamental Horticulture and Landscape Design: OHLD 110, Introduction to Ornamental Horticulture and one additional lower division course, and a minimum of 12 credit hours at the upper division. Prerequisites, if any, to these courses will not be waived, but must be included in addition to the total of 18 hours.

ENROLLMENT MANAGEMENT PLAN

All majors in the Department of Plant Sciences and Landscape Systems must meet certain minimum requirements before registering for upper division PSLS, OHLD, or IPS classes. Admittance to each of the departmental concentrations will be determined by completion of core courses with a "C" or better for an individual concentration, completion of a minimum of 65 credit hours toward the degree, and a minimum cumulative grade point average (GPA) of 2.25.

To be considered for progression into the upper division of the program, majors must submit an application of intent for progression prior to class registration for the next semester. Their transcript will be reviewed by faculty members for completion of all core courses and meeting the minimum GPA. Students must have completed all but 3 core courses for their concentration by the end of the semester in which they apply for acceptance into upper division courses. They must complete all core courses before entering upper division courses. They will also need the prerequisites to these individual upper division courses.

Once admitted for progression to upper division programs, students must maintain a cumulative GPA of 2.25. Junior and senior majors in PSLS whose cumulative GPA falls below the minimum of 2.25 will not be allowed to register in departmental upper division classes until they again meet the required GPA for progression. This enrollment management plan becomes effective for all students enrolling in PSLS on or after Fall semester 2001

CORE COURSES

Majors must have completed the core courses for their respective PSLS concentration. Students must declare a concentration early in their undergraduate program and strictly follow the curriculum described for it. Students who transfer into PSLS from other colleges or programs must meet the same requirements as those entering the department as freshmen. The core courses for the PSLS concentrations are:

Business Management Concentration: two courses in English composition (English 101 and 102 or equivalent); college algebra and calculus (Math 119 and 125 or equivalent); general chemistry (Chemistry 100-110 or 120-130 or equivalent); general botany (Botany 110 and 120 or equivalent); general accounting (Accounting 201 and 202 or equivalent); soil science (ESS 210 or equivalent).

Horticulture and Agronomy Concentration: two courses in English composition (English 101 and 102 or equivalent); college algebra and either precalculus or calculus (Math 119 and 125 or 130) or completion of Math 151 and 152 or equivalent; general chemistry (Chemistry 100-110 or 120-130 or equivalent); general botany (Botany 110 and 120 or equivalent); soil science (ESS 210 or equivalent); crop science (IPS 230 or equivalent).

Landscape Design: two courses in English composition (English 101 and 102 or equivalent); college algebra and finite math or calculus (Math 119 and 123 or 125 or equivalent); general chemistry (Chemistry 100 or 120 or equivalent) and one natural science elective; general botany (Botany 110 and 120 or equivalent); soil science (ESS 210 or equivalent); basic landscape plants (OHLD 220 or equivalent); landscape design (OHLD 280 or equivalent).

Public Horticulture Concentration: two courses in English composition (English 101 and 102 or equivalent); college algebra and finite math or calculus (Math 119 and 123 or 125 or equivalent); general chemistry (Chemistry 100 or 120 or equivalent) and one natural science elective; general botany (Botany 110 and 120 or

equivalent); soil science (ESS 210 or equivalent); general ecology (Biology 250 or equivalent); basic landscape plants (OHLD 220 or equivalent).

Turfgrass Management Concentration: two courses in English composition (English 101 and 102 or equivalent); college algebra and finite math or calculus (Math 119 and 123 or 125 or equivalent); general chemistry (Chemistry 100-110 or 120-130 or equivalent); general botany (Botany 110 and 120 or equivalent); soil science (ESS 210 or equivalent); basic landscape plants (OHLD 220 or equivalent); microcomputer applications (ANR 290 or equivalent).

PLANT SCIENCES AND LANDSCAPE SYSTEMS

BUSINESS MANAGEMENT CONCENTRATION

The Business Management Concentration is fundamental to those interested in starting their own companies. Students receive a **minor in either Business Administration or Agricultural Economics and Business** allowing easier access to management positions as well as graduate programs such as the Masters of Business Administration (MBA) should they want to continue their education in the future.

Freshman	Hours Credit

HORTICULTURE AND AGRONOMY CONCENTRATION

The Horticulture and Agronomy Concentration is designed for the student desiring to pursue professions that include graduate studies, research and commercial production of agronomic and horticultural crops. Careful selection of departmental courses and other electives in consultation with your academic adviser will prepare graduates for the career of their choice. The concentration consists of two tracks of study: (1) Emphasis in agronomy and (2) Emphasis in horticulture.

Freshman	Hours Credit
Botany 110-120	8
Chemistry 100-110 or 120-130	8
English 101-102	
Math 119 and (125 or 130) or Math 151-152 for agronomy track or Math 119 and (123 or 125	5)

¹Lists of appropriate electives are available and should be selected in conference with academic advisor.

LANDSCAPE DESIGN CONCENTRATION

Landscape designers create aesthetic concepts and practical plans for improved outdoor living. OHLD Students study fundamental and advanced landscape design, landscape design graphics, computer aided landscape design, surveying, art, socio-economic impact of plants, field botany, professional practices, basic woody plant identification, landscape construction and maintenance methods. The development of comprehensive design projects helps students prepare for careers in landscape design or advanced studies in landscape architecture. Graduates in design have access to a large segment of the OHLD ornamental horticulture commodity areas of employment.

PUBLIC HORTICULTURE CONCENTRATION

The public horticulture concentration is intended for students interested in professional careers which promote horticulture and emphasize people and their education and enjoyment of plants. Such careers include director of a botanical garden or park; city or urban horticulturist; extension agent, teacher, educational director, or program coordinator; professional garden writer/editor or publication manager; horticulture therapist; public garden curator; and plant collections manager. Directed technical electives allow the student to concentrate in an area of their interest while encouraging the development of good people skills. Students are required internship training in the area of their interest.

MEMORANDUM December 17, 2001

To:

Undergraduate Council

From: Marleen Kay Davis, Dean

Subject: 2002-2003 Curriculum Changes for College of Architecture & Design

The following changes were approved by the faculty of College of Architecture and Design and are submitted for your consideration and approval.

Architecture

1. Revise the model curriculum shown in the catalog as follows: (changes indicated in boldface)

First Year	Hours Credit
Architecture 101, 102	5
Architecture 121, 122	
Architecture 171, 172	7
Architecture 211	
English 101, 102	6
Mathematics 125 or Elective	
Electives	6
Second Year	
Architecture 212, 213	
Architecture 231	
Architecture 232	3
Architecture 271, 272	
Physics 101, 135, 137, or 161	3
Electives	9
Third Year	
Architecture 312	3
Architecture 331, 332	8
Architecture 341, 342	8
Architecture 371, 372	12
Electives	3

The above revised sequence involves these changes:

Move one elective (3 hours credit) from the second semester of first year to the first semester of third year.

Move the architectural history sequence (ARCH 211, 212, and 213) back one semester to start in the second semester of first year and conclude in the second semester of second year.

2. Revise the course description for 180 Introduction to Architecture (2)

From: Introduction of the fundamentals of construction, materials and statics in a lecture/seminar format

To: Introduction to architecture as an intellectual discipline. Design as a creative endeavor central to the discipline and its profession.

3. Revise the course number and description:

From: 215 Architectural History/Theory I (3) Introduction to architectural form, ideas and traditions in a lecture/ discussion format. Prereq: M.Arch. Admission

To: 401 Architectural History/Theory I (3) Survey of architectural history and theory from earliest beginnings to about 1600 CE in Europe, Asia, and the Americas. Examination of theoretical ideas, building forms, and urban patterns in cultural and historical context. Prereq: M.Arch admission or consent of instructor. F

4. Revise course number and description:

From: 216 Architecture/History/Theory II (3) Exploration of the ideas and forms of architecture in a lecture/discussion format. Prereq: M.Arch Admission.

To: 402 Architectural History/Theory II (3) Survey of architectural history and theory from about 1600 CE through the present day. Examination of theoretical ideas, building forms, and urban patterns in cultural and historical context. Prereq: 401, and M.Arch admission or consent of instructor. Open undergraduates with consent of instructor. Sp

5. Revise course title and description:

From: 480 Comprehensive Design Project I (3) Project selection and preparation for Architecture 482. Formation and documentation of hypotheses. Preparation of background and program information. Goals and concepts set forth. To be taken semester immediately preceding 482. F

To: 480 Preparation and Programming for Projects. (3) Formation of project statement, documentation and analysis of project data. Preparation of background and program information. Goals and concepts set forth. To be taken the semester preceding 482.

6. Revise course title and description:

From: 482 Comprehensive Design Project II (6) Student selected project under faculty direction. Exploration of design hypothesis which informs the character of a substantial building design. (See Architecture 480.) Completed project will address all issues of environment, structure, enclosure, use, and ethical consideration of design appropriateness. Design is expected to stand up to rigorous scrutiny regarding strength of idea, economy of means, durability, validity for stipulated use, quality of cultural expression, and character of setting. Prereq: 480 and satisfactory completion of all design courses. Sp

- To: 482 Self-directed Design Project. (6) Student-selected project under faculty direction. Exploration of design hypothesis that informs the character of a substantial building design. Completed project will address issues of environment, structure, enclosure, use and ethical consideration of design appropriateness. Design is expected to stand up to rigorous scrutiny regarding strength of idea, economy of means, durability, validity for stipulated use, quality of cultural expression, and character of setting. Prereq: 480, satisfactory completion of a self-directed project proposal and program for that project, and satisfactory completion of all design courses.
- 7. Add to catalog copy in final paragraph under "Curriculum" the following sentences:

As part of the degree requirement, all architecture students are required to complete at least one term (6 credit hours) of an off-campus academic program. Students may avail themselves of the School of Architecture's numerous programs, or, in consultation with the student's advisor and approval of the Academic Standards Committee, a student may participate in a program offered by another institution of higher learning. Students are encouraged to participate in programs where courses will satisfy existing degree requirements. Students may petition the Academic Standards Committee to have this requirement waived.

Fax: (865) 974-4352

TO: Linda Tober, Undergraduate Council

FROM: Don Cox, Associate Dean for Academic Programs

DATE: December 12, 2001

The attached curricular proposals have been approved by the faculty of the College of Arts and Sciences and are submitted to the Undergraduate Council for consideration. The following is a summary of these proposals:

One course has been added to Divisional Distribution requirements, three have been dropped from Divisional Distribution requirements, one has been added to Upper Level Distribution requirements, and two have been dropped from Upper Level Distribution requirements.

The Pre-MBA Program is being dropped. The College of Business Administration has already eliminated the program.

- 1) **Audiology and Speech Pathology** Revise the description of the major, change title of two courses, revise title and description of one, revise title and prerequisite of one, revise prerequisites of three, and completely revise one course.
- 2) **Biochemistry and Cellular and Molecular Biology** Revise credit hours for one course.
- 3) **Botany** Add a cross listing.
- 4) **Chemistry** Revise the description of the major, revise footnote in the B.S. in Chemistry description, and add one course.
- 5) **Classics** Add and cross list one course and add one cross listing.
- 6) **Ecology and Evolutionary Biology** Revise prerequisites for four courses, and add and cross list one course.
- 7) **Geography** Revise the major, revise sequence statement of one course, revise prerequisites for five courses, and revise description and delete prerequisites for two courses.

- 8) **Geological Sciences** Add one course.
- 9) **History** Revise the history minor description, add four courses, revise title, description, and cross listing of 310-311, revise description of one course, drop two courses, and drop one course from the distribution list.
- 10) Interdisciplinary Programs –

American Studies: Add one cross listing.

Environmental Studies: Revise the program description.

Judaic Studies: Revise the major concentration description and add one cross listing.

Latin American Studies: Add one cross listing.

Legal Studies: Revise the concentration description, add one cross listing, and drop one cross listing.

- 11) **Mathematics** Revise the grading system for one course, revise the description of one, and add one course.
- 12) **Modern Foreign Languages and Literatures** Italian, add one course; Language and World Business, revise the description of the international business part of the Language and World Business Professional Emphasis, and revise credit hours for the 199 course in each language.
- 13) **School of Music** Revise the title of the Piano Pedagogy and Literature program, revise the BM in Sacred Music, revise the Bachelor in Music Education, drop one Music History course, revise the description of one Music Keyboard course, add a prerequisite for the Music Ensemble category, and revise the description of the ensemble requirement.
- 14) **Philosophy** Drop one course, add and cross list one course, and add one cross listing.
- 15) **Physics and Astronomy** Revise prerequisites for one Physics and one Astronomy course.
- 16) **Political Science** Add two courses.
- 17) **Psychology** Revise description of the major, add one course, and delete cross listing from one course.
- 18) **Sociology** Revise the major and minor descriptions, add one internship course and two honors courses, and revise prerequisites for two courses.
- 19) **Theatre** Revise the description of the major, drop four courses, revise the prerequisite for three courses, and revise the description of one course.

ARTS AND SCIENCES CURRICULAR PROPOSALS UNDERGRADUATE COUNCIL JANUARY 17, 2002

Add to Divisional Distribution Requirements, Natural Science, List B:

Geology 204 Geology Beyond the Earth

Drop from Divisional Distribution Requirements, Humanities, List B: Philosophical and Religious Thought:

Philosophy 349 War and Morality

Drop from Divisional Distribution Requirements, Humanities, List C: Study or Practice of the Arts:

Theatre 245 <u>Basic Stage Costume</u>
Theatre 250 <u>Introduction to Scenery Technology</u>
Theatre 260 <u>Fundamentals of Lighting and Sound Production</u>

Add to Upper Level Distribution Requirements, Foreign Studies, Critical Issues in Foreign Studies:

History 484 Studies in Jewish History (Same as Judaic Studies 484)

Drop from Upper Level Distribution Requirements, U. S. Studies

History 346 <u>The Environment in U.S. History</u> History 359 <u>History of the U.S. Economy</u>

COLLEGE OF ARTS AND SCIENCES

In the 2001-2002 Undergraduate Catalog, page 61, 2nd column, Drop the PRE-MBA PROGRAM (delete entire section–program no longer exists).

AUDIOLOGY AND SPEECH PATHOLOGY

On page 68 of the 2001-2002 *Undergraduate Catalog*, 1st column, 2nd and 3rd text paragraphs, Revise From:

The **B.A. Major in Speech Pathology** consists of Audiology and Speech Pathology 300, 302, 303, 305, 306, 320, 331, 433, 461, 473, and 494; and one course from the following courses: Linguistics 200, 371, 372, 411, 471, or 472.

The **B.A. Major in Audiology** consists of Audiology and Speech Pathology 300, 302, 303, 305, 306, 320, 331, 433, 461, 473, and 494.

To:

The **B.A. Major in Speech Pathology** consists of Audiology and Speech Pathology 300, 302, 303, 305, 306, 320, 433, 435, 461, 473, and 494; and one course from the following courses: Linguistics 200, 371, 372, 411, 471, or 472.

The **B.A. Major in Audiology** consists of Audiology and Speech Pathology 300, 302, 303, 305, 306, 320, 433, 435, 461, 473, and 494.

Revise Title:

303 Introduction to Hearing Science (3)

(Formerly: Audiology I)

Revise Title and Description From:

305 Speech Science I: Phonetics and Acoustics of Speech (3) Basic phonetics including recognition and production of spoken English sounds with analysis of their formation; acoustics characteristics of speech and speech perception.

To:

305 Phonetics (3) Basic phonetics including recognition and production of spoken English sounds with analysis of their formation; phonetic transcription of speech; phonetic aspects of dialect variation.

Revise Title:

306 Anatomy and Physiology of Speech (3)

(Formerly: Speech Science II: Anatomy and Physiology)

Revise Prerequisite:

431 Stuttering (3)

Prereq: 300 or consent of instructor. (Formerly: 304 or consent of instructor)

Revise Prerequisite:

433 Observation of Clinical Practice (1)

Prereg: 320, or consent of instructor.

(Formerly: 320, 331, or consent of instructor).

Revise Number, Title, Description, and Prerequisite From:

331 Articulation Disorders (3) Etiology, diagnosis, and treatment of articulatory defects. Prereq: 304, 305 or consent of instructor.

To:

435 Introduction to Speech Sound Disorders (3) Etiology, diagnosis, and treatment of articulatory and phonological disorders. Prereq: 300, 305 or consent of instructor.

Revise Prerequisite:

440 Voice Disorders (3)

Prereq: 300, 306 or consent of instructor. (Formerly: 304, 306, or consent of instructor)

Revise Title and Prerequisite:

473 Introduction to Audiologic Assessment (3)

Prereq: 303

(Formerly: Audiology II, Prereq: 371)

BIOCHEMISTRY AND CELLULAR AND MOLECULAR BIOLOGY

Revise Credit Hours:

403 Advanced Genetics Laboratory (3)

(Formerly: 2)

BOTANY

Add cross listing:

419 Science as Method (3) (same as Ecology and Evolutionary Biology 419 and Philosophy 419) Primary department is Ecology and Evolutionary Biology.

CHEMISTRY

On page 70 of the 2001-2002 Undergraduate Catalog, 2nd column, immediately above B.S. Degree and Chemistry Major, Revise footnote 4 From:

⁴To be chosen from Chemistry 400, 401, 408, 450, and 490.

To:

⁴To be chosen from Chemistry 400, 401, 408, 420, 450, and 490.

On page 70 of the 2001-2002 Undergraduate Catalog, 2nd column, 4th paragraph under B.S. Degree and Chemistry Major, Revise From:

The major consists of Chemistry 240, 310, 319, 350-360, 369, 471-481 or 473-83, 479 and 10 hours of additional work in chemistry that includes at least one laboratory course or lecture/laboratory course; up to 6 hours of Biochemistry and Cellular and Molecular Biology 410-420 or 401-402 or Geology 460 may be applied to the 10-hour requirement.

To:

The major consists of Chemistry 240, 310, 319, 350-360, 369, 471-481 or 473-483, 479 and 10 hours of additional work in chemistry at the 200-level or above that includes at least one laboratory course or lecture/laboratory course; up to 6 hours of Biochemistry and Cellular and Molecular Biology 410-420 or 401-402 or Geology 460 may be applied to the 10-hour requirement.

Add:

Chemistry 420 Selected Topics in Chemistry (1-3) Topics of current significance in Chemistry. May be repeated. Maximum 6 hrs. Only three credits may be applied to a major or minor in Chemistry. Prereg: consent of instructor.

CLASSICS

Add and Cross List:

Classics 310 The Ancient World: Greece (3) Development of Athenian democracy: its successes and failures; polis crisis of the fourth century B.C.; emergence of hellenistic civilization. (Same as History 310)

Primary department is Classics.

Add Cross listing:

Classics 311 The Ancient World: Rome (3) (Same as History 311) Primary department is History.

ECOLOGY AND EVOLUTIONARY BIOLOGY

Revise Prerequisite:

202-203 Ecology and Evolutionary Biology Colloquium (1,1) Prereq: Biology 101-102 or equivalent. (Formerly: Biology 110-120 or equivalent.)

402 Practicum in Ecology and Evolutionary Biology (2)

Prereq: Biology 140, 240, 250 and prior consent of instructor. (Formerly: Biology 210, 220, 230 and prior consent of instructor)

470 Aquatic Ecology (3)

Prereq: Chemistry 120-130 and Biology 250. (Formerly: Chemistry 120-130 and Biology 230)

484 Conservation Biology (3)

Prereq: Biology 240, 250. (Formerly: Biology 220, 230)

Add and Cross List:

419 Science as Method (3) The dynamic process of scientific discovery, as opposed to a static body of knowledge. Topics included will be comparisons of science, nonscience, and pseudoscience, successful and unsuccessful science, the ethics of scientific research, and the philosophical aspects of the scientific enterprise. Implications for teaching and writing about science will be covered. Prereq: an introductory science or philosophy course, or consent of instructor. (Same as Botany 419 and Philosophy 419)
Primary department is Ecology and Evolutionary Biology.

GEOGRAPHY

On page 73 of the 2001-2002 Undergraduate Catalog, 1st column, 1st paragraph below faculty listing, revise B.A. Major From:

B.A. Major Geography 131 and 132 are prerequisite to a major in Geography, which consists of Geography 310, 320, 340, 411 or 415, 499, and 12 additional credits selected from Geography courses at the 300 and 400 levels. At least one course must be chosen from among Geography 361, 363, 365, 371, 372, 373, 375, and 379 and at least 9 hours must be at the 400 level. No more than 3 hours of Geography 490 may be counted toward the major.

To:

B.A. Major Geography 131 and 132 are prerequisite to a major in Geography, which consists of Geography 310 and 499; either 320, 421, or 423; either 340 or 351; one course from among 410, 411 412, 413 or 415; one course from among 361, 363, 365, 371, 372, 373, 375, or 379; and 9 additional credits, at least 6 of which must be taken at the 400 level. No more than 3 hours of Geography 490 may be counted toward the major.

Revise Description From:

101-102 World Geography (3,3) Selected topics and world regions, especially those with problems or situations of contemporary interest, to illustrate geographical points of view, concepts, and techniques. Must be taken in sequence.

To:

101-102 World Geography (3,3) Selected topics and world regions, especially those with problems or situations of contemporary interest, to illustrate geographical points of view, concepts, and techniques. May be taken in either order.

Revise Prerequisite:

411 Computer Mapping and Geographic Information Systems (3)

Prereq: 310 or consent of instructor.

(Formerly: 310 and knowledge of a computer language or consent of instructor.)

415 Quantitative Methods in Geography (3)

Prereq: Mathematics 115 or Statistics 201 or consent of instructor. (Formerly: Mathematics 115 or two semesters of Calculus or consent of instructor.)

421 Geography of Folk Societies (3)

Delete Prereg.

423 Geography of American Popular Culture (3)

Delete Prereq.

449 Geography of Transportation (3)

Delete Prereg.

Revise Description and Delete Prerequisite From:

441 Urban Geography of the United States (3) Concepts and theories concerning development and significance of systems of cities and internal morphology of cities in the United States. Prereq: 101-102 or 340 or consent of instructor. (Same as Urban Studies 441.) Writing intensive.

To:

441 Urban Geography of the United States (3) Concepts and theories concerning development and significance of systems of cities and internal morphology of cities in the United States. Writing emphasis course. (Same as Urban Studies 441.)

Revise Description and Delete Prerequisite From:

443 Rural Geography of the United States (3) Geographical appraisal of rural areas of the United States, including small towns and urban fringes. Problems and potentials of rural America. Prereq: 101-102 or 340 or consent of instructor. Writing intensive.

To:

443 Rural Geography of the United States (3) Geographical appraisal of rural areas of the United States, including small towns and urban fringes. Problems and potentials of rural America. Writing emphasis course.

GEOLOGICAL SCIENCES

Add:

204 Geology Beyond the Earth (3) The geologic evolution of other bodies in the solar system, including Mercury, Mars, Venus, meteorites, and large moons of Earth and Jupiter. The focus is on geologic and possibly biological processes that can be identified and understood from space-craft missions, remote sensing, and laboratory study of extraterrestrial samples. No prerequisites. May not be applied toward the Geology major.

Add to Divisional Distribution Requirements, Natural Science, List B.

HISTORY

In the 2001-2002 Undergraduate Catalog, page 74, 1st column, 2nd paragraph, description of the History minor, Revise From:

Minor History 241-242 (or honors equivalents) are prerequisites to a minor which consists of 15 hours of courses numbered 200 or above, including at least: (1) 6 hours in United States history; and (2) 9 upper-division hours.

To:

Minor History 241-242 or 261-262 (or honors equivalents) are prerequisites to a minor which consists of 15 hours of courses numbered 200 or above, including at least: (1) 6 hours in United States history; and (2) 9 upper-division hours.

Revise Description From:

221-222 History of the United States (3,3) 221 - Settlement to 1877. 222 - 1877 to present.

To:

221-222 History of the United States (3,3) 221 – Settlement to 1877. 222 – 1877 to present. Writing emphasis course.

Revise Title, Description and Cross Listing From:

310-311 The Ancient World (3,3) 310 – Development of Athenian democracy: its successes and failures; polis crisis of the fourth century B.C.; emergence of hellenistic civilization. 311 – Origins of Roman imperialism and its consequences: militarism, empire, socioeconomic changes, constitutional crises, emergence of military and political autocracy.

To:

310 The Ancient World: Greece (3) (Same as Classics 310) Primary department is Classics.

311 The Ancient World: Rome (3) Origins of Roman imperialism and its consequences: militarism, empire, socioeconomic changes, constitutional crises, emergence of military and political autocracy. Writing emphasis course. (Same as Classics 311) Primary department is History.

Add:

342 History of Nazi Germany (3) The coming to power of the Nazi party in Germany, origins of ideology, rise and fall of the "Third Reich." Topics include foreign policy, social policy, World War II, Hitler's brutal rule and racial programs, culminating in mass murder and genocide against the Jews of Europe. Writing emphasis course.

Add:

356 The 1960s in America (3) The politics, social movements, and cultural rebellions of the 1960s. Topics include race riots, antiwar protests, new art forms, Great Society legislation, the rise of neoconservatism, empowerment movements by people of color, Cold War brinksmanship in Cuba, and the escalation of ground and air wars in Vietnam. Writing emphasis course. (Same as American Studies 356). Primary department is History.

Drop:

359 History of the US Economy (3)

Drop from Upper Level Distribution Requirements, U.S. Studies.

Drop:

415 Western Economic Thought Since the 18th Century (3)

Add and Cross List:

484 Studies in Jewish History (3) Variable content. Significant topics in the study of Jewish civilization and culture, including the development of the synagogue, Judaism and ethnicity, and the history of Jerusalem. May be repeated. Maximum 9 hrs. Writing emphasis course. (Same as Judaic Studies 484)

Primary department is History.

Add to Upper Level Distribution Requirements, Foreign Studies, Critical Issues.

Add:

486 Studies in the Ancient Near East (3) Variable content. History and archaeology of Egypt, Anatolia (Turkey), Cyprus, and Persia (Iran), the rise of social complexity, and social boundaries in antiquity. May be repeated. Maximum 9 hrs. Writing emphasis course.

INTERDISCIPLINARY PROGRAMS

AMERICAN STUDIES

Add and Crosslist:

356 The 1960s in America (3) (Same as History 356) Primary department is History.

ENVIRONMENTAL STUDIES

On page 75 of the 2001-2002 Undergraduate Catalog, 1st column, under Environmental Studies, 2nd paragraph and the first two sentences of 3rd paragraph, Revise From:

Prerequisites to a B.A. Major in Environmental Studies are: Biology 130-140 or Botany 110-120; Chemistry 120-130; Geology 101; Geography 131; Mathematics 123-125 or 141-142 or 151-152; and Economics 201.

The **Major Concentration** consists of a core and a specialty. The core includes: Biology 250; Sociology 360; Philosophy 346; Economics 462; Agriculture 333; History 373; Geography 436; or Plant and Soil Science 432.

To:

Prerequisites to a B.A. Major in Environmental Studies are: Biology 130-140 or Botany 110-120; Chemistry 120-130; Geology 101; Geography 131; Mathematics 123-125 or 141-142 or 151-152; Economics 201; and Biology 250.

The **Major Concentration** consists of a core and a specialty. The core includes Geology 202 plus: a) 12 hours from: History 346; Sociology 360; Philosophy 346; Economics 462; Agriculture and Natural Resources 333; Journalism 451; Geology 490; b) 3 hours from: Geology 455, Geography 433, Geography 436 or Ecology/Evolution 484; c) 3 hours from: Geography 334, Geography 434, or Environmental and Soil Sciences 462.

JUDAIC STUDIES

On page 75 of the 2001-2002 Undergraduate Catalog, under Judaic Studies, 2nd paragraph, Revise From:

A **Major Concentration** consists of at least 27 hours at the 300 level or above, distributed as follows: (a) Religious Studies 381, History 370, and 12 hours from Religious Studies 311, 312, 320, 385, 386, 405; (b) 9 hours selected from Art History 425, 431, 475; German 350; History 369, 395; Philosophy 322.

To:

A **Major Concentration** consists of at least 27 hours at the 300 level or above, distributed as follows: (a) Religious Studies 381, History 383, and 12 hours from Religious Studies 311, 312, 320, 385, 386, 405, History 370, 384; (b) 9 hours selected from Art History 425, 431, 475, German 350, History 369, 395, 484, Philosophy 322.

Add:

484 Studies in Jewish History (3) (Same as History 484) Primary department is History.

LATIN AMERICAN STUDIES

Add Cross Listing:

334 Survey of Hispanic Literatures: Beginnings-1700 (3) (Same as Spanish 334) Primary department is Modern Foreign Languages and Literatures.

LEGAL STUDIES

On page 75 of the 2001-2002 Undergraduate Catalog, $3^{\rm rd}$ column, next to last paragraph under Legal Studies, Revise From:

The concentration consists of 27 hours, including Sociology 455 Society and Law and 24 hours of upper division courses distributed among five categories: (1) analysis - 3 hours from Communications 300, English 496, Psychology 395, Sociology 331; (2) processes - Sociology 451, and 3 hours from Political Science 331, 430, 442; (3) perspectives - 3 hours from English 490, Political Science 330, Psychology 424; (4) historical and global dynamics - 3 hours from Classics 462, Political Science 470; (5) issues - 6 hours from Communications 400, Philosophy 344, Political Science 431, Speech Communication 469, Women's Studies 340. The remaining three hours are to be chosen from one of the five categories or an approved elective.

To:

The concentration consists of 27 hours, including Sociology 455 Society and Law and 24 hours of upper division courses distributed among five categories: (1) analysis - 3 hours from Communications 300, English 496, Sociology 331; (2) processes - Sociology 451, and 3 hours from Political Science 430, 442; (3) perspectives - 3 hours from English 490, Political Science 330, Philosophy 392; (4) historical and global dynamics - 3 hours from Classics 362, Political Science 470; (5) issues - 6 hours from Communications 400, Philosophy 344, Political Science 431, Speech Communication 469, Women's Studies 340. The remaining three hours are to be chosen from one of the five categories or an approved elective.

Add Cross Listing:

392 Philosophy of Law (3) (Same as Philosophy 392) Primary department is Philosophy.

Drop:

424 Psychology and Law (3) (Same as Psychology 424)

MATHEMATICS

Revise Description From:

151-152 Mathematics for the Life Sciences I, II (3,3) For students majoring in the Life Sciences. Does not serve as a prerequisite for 231 or 241. Topics include: descriptive statistics, linear regression, discrete probability, matrix algebra, difference equations, calculus, and differential equations. Emphasis on applications in the life sciences. Includes computer projects. Prereq: Two years of algebra, a year of geometry, and half a year of trigonometry in high school, plus satisfactory placement test scores, or 130. Credit will not be given for 141 and 152.

To:

151-152 Mathematics for the Life Sciences I, II (3,3) For students majoring in the Life Sciences. Does not serve as a prerequisite for 231 or 241. Topics include: descriptive statistics, linear regression, discrete probability, matrix algebra, difference equations, calculus, and differential equations. Emphasis on applications in the life sciences. Includes computer projects. Prereq: Two years of algebra, a year of geometry, and half a year of trigonometry in high school, plus satisfactory placement test scores, or 130. Students who receive a grade of C or better in Math 141 cannot subsequently receive credit for Math 152.

Revise Grading System:

171 Computer Literacy for Mathematics (3). Letter grade (Formerly: S/NC)

Add:

403 Mathematical Methods for Engineers and Scientists (3) Matrix computations, numerical methods, partial differential equations, Sturm-Liouville Theory and special functions as used in engineering and science. Does not satisfy major requirements for a B.S. or M.S. in mathematics. Prereq: 231, 241, and familiarity with an operating system and a programming language (e.g., 171 or Computer Science 102).

MODERN FOREIGN LANGUAGES AND LITERATURES

In the 2001-2002 Undergraduate Catalog, page 79, 1st column, under PROFESSIONAL EMPHASIS, Revise number 1 From:

1. International Business students will take 24 hours. The following are required: Accounting 201, 202, Marketing 301, Management 301, and Finance 301. Students then choose three courses from the following general business courses: Logistics and Transportation 301, 302, Business Law 301, Management 471, Marketing 440, Logistics and Transportation 441, Economics 321, or Business Administration 311.

To:

1. International Business students will take 24 hours beyond the prerequisite courses specified next under "C. PRACTICAL EXPERIENCE." The following are required: Accounting 201-202 (5 hours), Business Administration 201 (4 hours), Finance 301 (3 hours), Marketing 300 (3 hours), and Management 300 (3hours). Students then choose two from the following recommended list: Business Law 301, Management 471, Marketing 310, 440, Economics 321, Business Administration 371. Other business courses numbered 300 or higher may be used to fulfill this requirment with the consent of the student's faculty advisor.

In the 2001-2002 Undergraduate Catalog, page 187, 1st column, directly under the title Music Ensemble (708) Add:

Prerequisite: By audition or consent of instructor.

MUSIC HISTORY

Drop:

390 World Music (3)

MUSIC KEYBOARD

Revise description from:

490-491 Internship (2,2)

Opportunity for pedagogy students to gain experience in teaching pre-college students under the supervision of experienced instructors.

To:

490-491 Internship (2,2)

Opportunity for pedagogy students to gain experience in teaching beginning students under the supervision of experienced instructors. Includes weekly discussion seminars.

PHILOSOPHY

Drop:

349 War and Morality (3)

Drop from Divisional Distribution Requirements, Humanities, List B: Philosophical and Religious Thought.

Add and Cross List:

392 Philosophy of Law (3) A course in analytic and normative jurisprudence. Such topics as the nature of legal systems as normative social practices, the relationships between law and morality, theories of adjudication and legal reasoning, the justification of punishment, theories of legal responsibility, law and economics, and feminist and neo-Marxist critiques of law. Writing emphasis course. (Same as Legal Studies 392.)

Primary department is Philosophy.

Add Cross Listing:

419 Science as Method (3) (Same as Ecology and Evolutionary Biology 419 and Botany 419) Primary department is Ecology and Evolutionary Biology.

PHYSICS AND ASTRONOMY

PHYSICS

Revise Prerequisite:

231 Fundamentals of Physics: Electricity and Magnetism (3) Prereq: Engineering Fundamentals 102 (Formerly: Basic Engineering 121-131)

ASTRONOMY

Revise Prerequisite:

411 Astrophysics (3)
Prereq: Physics 136 or 138 or 222 or 232 and consent of instructor.
(Formerly: Physics 232 and consent of instructor)

POLITICAL SCIENCE

Add:

451 Ethnic Conflict in Foreign Countries (3) Examines political and violent conflict among ethnic and national groups and the challenges these conflicts pose for democratic and democratizing states.

PSYCHOLOGY

In the 2001-2002 Undergraduate Catalog, page 86, 1st paragraph, Revise Number 1 From:

(1) Either Psychology 385 or Statistics 201 and 21 additional hours in Psychology, or Math 115 and 24 additional hours in Psychology.

To:

(1) Either Psychology 295 or Psychology 395 (prerequisites to Psychology 395 are Psychology 385 or Statistics 201 or Math 115).

Undergraduate Council Minutes for January 17, 2002

Page 13358

Add:

295 Research Analysis in Psychology (3) An introduction to the research methods and data analyses used in psychological research. This course should be taken as soon as possible after declaring psychology a major. Prerequisite: Psychology 110.

Revise Description to Delete Cross Listing, From:

424 Psychology and the Law (3) Psychological aspects of legal systems. Prereq: 110 and Junior standing (60 semester hours) or consent of instructor or Graduate standing. (Same as Legal Studies 424)

To:

424 Psychology and the Law (3) Psychological aspects of legal systems. Prereq: 110 and Junior standing (60 semester hours) or consent of instructor or Graduate standing.

SOCIOLOGY

In the 2001-2002 Undergraduate Catalog, page 86, 2nd column, Revise the 1st sentence of the Major From:

Major Before applying to the Sociology Department for admission to the major a student must complete either Sociology 110 or 120 with a grade of C+ or above.

To:

Major Before applying to the Sociology Department for admission to the major a student must complete either Sociology 110 or 120 or their honors equivalent with a grade of C+ or above.

In the 2001-2002 Undergraduate Catalog, page 86, 2nd column, Revise the 2st sentence of the Minor From:

Prerequisite to the minor is three lower-division hours in Sociology (either 110 or 120).

To:

Prerequisite to the minor is three lower-division hours in Sociology (either 110 or 120 or their honors equivalent).

Add:

117 Honors: Social Problems and Social Change (3) Open to University Honors students and by departmental permission to first year students with 28 or higher ACT or 1200 SAT and other students with a minimum of a 3.0 average.

127 Honors: General Sociology (3) Open to University Honors students and by departmental permission to first year students with 28 or higher ACT or 1200 SAT and other students with a minimum of a 3.0 average.

399 Off-Campus Internship (1-6) Supervised experience at an approved site. Analysis of internship experiences with sociological tools provided through readings and class discussions. Oral and written reports required. Prerequisite: Departmental consent and senior standing in the

Administration

The faculty of the College of Business Administration wish to submit the attached curriculum changes to the Undergraduate Council for consideration for approval.

We appreciate your assistance in scheduling the attached changes at the January meeting.

Encl

College of Business Administration

CHANGE IN MAJOR TITLE

From:

General Business

To:

Business Studies

Rationale: To reflect contemporary terminology.

Effective Date: Fall 2002

REVISE curricula requirements

From:

Natural Science—Any two-course sequence from those listed below: NOTE: Certain restrictions may apply to receiving credit in some of these areas. See individual course descriptions or advisor for details. Astronomy 161-162, or 217-218; Biology 101-102; Botany 110-120; Chemistry 120-130, or 128-138; Geography 131-132; Geology 101-102; 101-103.

To:

Natural Science—Any two-course sequence from those listed below: NOTE: Certain restrictions may apply to receiving credit in some of these areas. See individual course descriptions or advisor for details. Astronomy 161-162, or 217-218; Biology 101-102; Botany 110-120; Chemistry 120-130, or 128-138; Geography 131-132; Geology 101-102; 101-103, or 107-108; Physics 135-136, or 137-138, or 221-222.

Rationale:

Add the honors sequence of Geology and Physics sequences.

From:

Humanities—Six hours from courses listed below with at least three from the literature list. Literature: Asian Languages 311, 312, 313, 314; Classics 253, 254; Comparative Literature 202, 203; English 201, 202, 221, 222, 231, 232, 233, 251, 252, 253, 281, 333, or 200-level Honors Literature Courses; Any foreign language courses whose content is literature including foreign literature in English translation; Medieval Studies 261, 262;

Music History 310; Religious Studies 312, 313; Women's Studies 210, 215; Other Humanities: Art 171; Classics 221, 222; Philosophy 110, 111, 120, 121, 130, 135, 290, 342, 360, 380, 382; Religious Studies 101, 102, 232, 235, 300; Women's Studies 382.

To:

Humanities—Three hours from courses listed below: Asian Languages 311, 312, 313, 314; Classics 253; Comparative Literature 202, 203; English 201, 202, 221, 222, 231, 232, 233, 251, 252, 253, 281, 333, or 200-level Honors Literature Courses; Any foreign language courses whose content is literature including foreign literature in English translation; Medieval Studies 261, 262; Religious Studies 312, 313; Women's Studies 210, 215.

Rationale:

To reflect the new curricular structure approved November 29, 2001.

Classics 254 is no longer offered.

Music History 310 course description contains no reference to literature.

From:

Social Science—Accounting majors must complete a course in Anthropology, Psychology, or Sociology and complete Political Science 101, 102 or 107. Public Administration majors must complete either Political Science 101 or 107; Anthropology 110, 120, 130, 320; Geography 101, 102, 320, 323; Political Science 101, 102, 107; Psychology 110, 220, 310, 320, 360, 395; Sociology 110, 120, 200, 310, 346, 370, 415, 459.

To:

Social Science—Public Administration majors must complete either Political Science 101 or 107; Anthropology 110,120, 130, 320; Geography 101, 102, 320, 323; Political Science 101, 102, 107; Psychology 110, **117**, 220, 310, 320, 360; Sociology 110, 117, 120, 127, 310, 370, 415, 459.

Rationale:

Accounting's accrediting body no longer requires Political Science and the new statement is inclusive of all majors.

Sociology 200 and 346 are no longer offered.

Psychology 117 reflects the addition of the honors version of 110, first offered Fall 2001.

From:

Written Communications—One course from English 263, 295, 355, 360, 455.

To:

Written Communications—One course from English 263, 295, 355, 360.

Rationale:

Courses approved in new progression standards November 29, 2001.

From:

Arts—One course from the courses listed below: Art 191; Art History 172, 173, 183; Classics 232, 233; **English 263;** Music History **100**, 110, 120; **Music General 130**; Speech 280, **380**; Theatre 100, 220, 221, 260; Women's Studies 330.

To:

Arts—One course from the courses listed below: Art 191; Art History 172, 173, 183; Classics 232, 233; Music History 110, 120, **330**; Speech 280, Theatre 100, 220, 221, 260; Women's Studies 330.

Rationale:

Remove English 263 because it is part of the approved progression requirements for Written Communications.

Music History 100, Music General 130, and Speech 380 are no longer offered.

Music History 330 is cross-listed with Women's Studies 330 (already on the list).

From:

International Business—The international course requirement may be satisfied by taking either Business Administration 311 or 491 or an international course in a concentration area such as Management 471, Logistics and Transportation 441, Economics 321, Economics 323, or Marketing 440.

To:

Business Administration 361

Rationale:

To reflect the curriculum approved November 29, 2001.

Effective Date: Fall 2002

STATISTICS

Add:

207 Honors Introduction to Statistics (3)

Intended as an alternative to 201 for higher GPA students. Involves both lecture and labs, prerequisite: MA 125, 141, or 147 Two 50 minute lecture classes, and one 110 minute lab per week.

Effective date: Fall 2002

December 12, 2001

To: Undergraduate Council Fr: College of Communications

Re: 2002-2003 Undergraduate Catalog Revisions

The College of Communications requests approval of the following course title and description revision for the 2002-2003 Undergraduate Catalog:

Course: BRD 470

Revise Title and Description:

The old catalog copy on page 157 (2001/2002 catalog) reads:

470 Cable Television and Emerging Technologies (3) History and structure of the cable television industry. Cable regulations and programming. Examination of the role of telephone companies in the distribution of video. Analysis of all relevant technologies including direct broadcasting satellite, fiber optics, cable, high definition television and others. Prereq: 275 or consent of instructor.

The new copy should read:

470 Cable, Broadband, and Interactive Digital Media (3) History and structure of cable television and other broadband delivery systems (DBS, Internet, etc.). Development of digital broadcasting, interactive television, and other broadband media systems and digital technologies. Regulatory, policy, programming, and management issues arising from new media and digital technologies. Prereq: 275 or consent of instructor.

Rationale for change: The Department of Broadcasting and the College of Communications feels these changes better reflect how the course is being taught in light of changes in modern communications technologies. The College of Communications requests approval of the following change in prerequisites:

Course: BRD 450

Revise Prereq:

The old catalog on page 157 (2001/2002 catalog) reads:

450 Radio, **Television and Society (3)** Effects of electronic media on society. Research and theory applied to current issues. Prereg: Communications 100 or Speech Communications 100.

The new catalog copy should read:

450 Radio, Television and Society (3) Effects of electronic media on society. Research and theory applied to current issues. Prereq: BRD 275.

Rationale: Students need a better basic understanding of broadcasting systems than the 100-level courses provide to deal with the issues presented in 450.

Associate Dean, Undergraduate Academic Affairs

Dwight L. Teeter, Jr.

FROM:

Professor and Dean

DATE: December 19, 2001

SUBJECT: Additions in Changes to College of Communications' Proposal on

Undergraduate Changes

Please add the attached proposal regarding a change in electives and a change in progression requirements for the Department of Advertising to the material previously submitted from the College of Communications.

Please add the attached proposal for the Undergraduate Council's consideration in January.

cc: Dr. Eric Haley Dr. Ron Taylor

Proposal from the Department of Advertising/College of Communications

1. Change in designation of electives

Rationale: A new standard by our accrediting agency requires that students in our major have a minimum of 65 hours in the ALiberal Arts@ and a total of 80 hours outside the College.

Under the current curriculum a student could have only 60 hours in the ALiberal Arts@ and 72 hours outside the College, depending on the choice of electives. By changing the mix, all students will meet the new standard of 65 hours in Liberal Arts and 80 hours outside the College. The changes also preserve a student=s ability to minor in Business, Foreign Language, or other areas without adding hours to the curriculum.

Current copy, middle column, p. 96, under AAdvertising@ curriculum, Junior Year and Senior Year

Junior Year	
Social Science Elective	3
General Elective	3
Senior Year	
General Electives	12

Change to:

Lunia # Vaa#

Arts & Sciences Electives	6
Senior Year Arts & Sciences Elective	3
Electives outside College of Communication	9

2. Change in Progression Requirements

Rationale is attached.

Current copy, p. 96, under Progression Requirements

Students may progress to a major in the Department of Advertising after they complete the course requirements listed for the freshmen year with a cumulative grade point average of 2.5.

Change to:

Students who have completed the course requirements for the freshman year with a minimum 2.75 cumulative average in those courses will be considered for progression into the Department of Advertising. Applicants must submit a completed department application, a statement of career goals, and an academic history.

Current copy, under Transfer Students, p. 96

Students pursuing a major in advertising must complete the freshman year course requirements with a 2.5 cumulative GPA.

Change to:

Students pursuing a major in advertising must complete the freshman year course requirements with a 2.75 cumulative GPA to be considered for admission.

Rationale for Change in Progression Requirements in the Department of Advertising

The Department of Advertising has been nationally ranked for its undergraduate and graduate programs for the past seven years. In 1998, it was designated a "program of excellence" on the University of Tennessee campus.

One of the things that allowed a program with very limited resources to rise to national prominence—a proper balance of undergraduate and graduate students, a balance of teaching, service and research, and reasonable class sizes—has slipped away and program quality is now threatened.

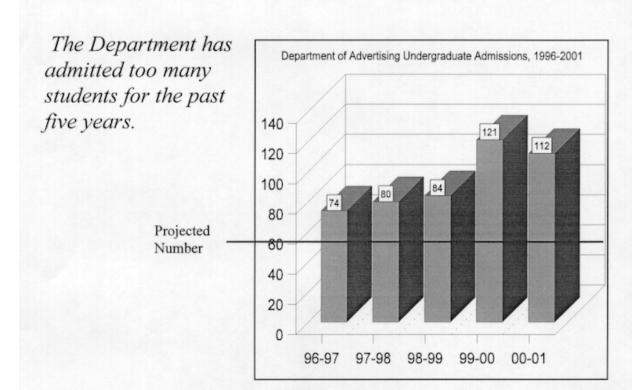

The number of eligible undergraduate students applying to the program jumped from 60 students in 1995 to more than 100 in each of the past three years. Approximately 50 percent of applicants in any given year have GPAs between 2.5 and 2.75.

The increasing waves of students each year has led to the following situation:

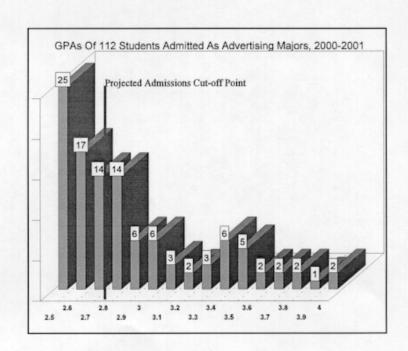

- a. The Department is stretched beyond its available resources.
- An increase in faculty research productivity is now decreasing due to much larger class sizes and a faculty to student advisee ratio of 1:45.
- c. Teaching evaluations, due to larger classes, have declined slightly.
- d. Although no student has been denied space in class needed to remain Aon track to graduation@ students and parents have become antagonistic regarding availability of classes
- e. Faculty morale has dropped and faculty feel frustrated with low pay, lowered teaching evaluations and reduced research productivity.

Data reflecting this situation are presented in the following graphs.

Effective Fall 2002

Fifty per cent of students admitted have GPAs below 2.75.

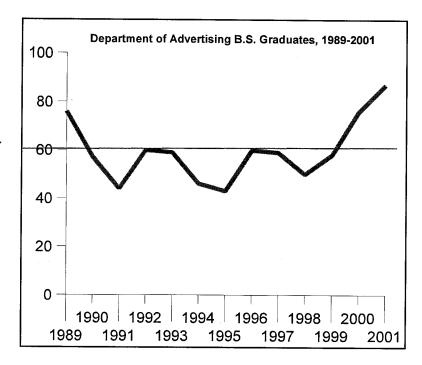

Undergraduate Council Minutes for January 17, 2002

Page 13370

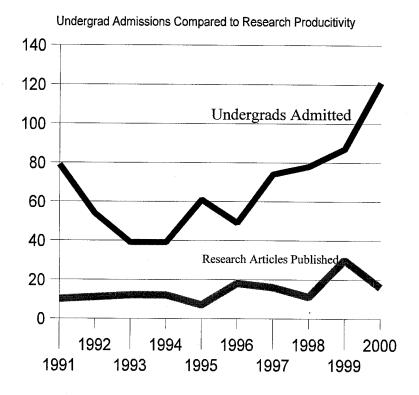

The number of advertising graduates has climbed rapidly.

Proposed number of graduates

Too many students reduces teaching evaluations and research productivity.

(Shown on one-year lag basis)

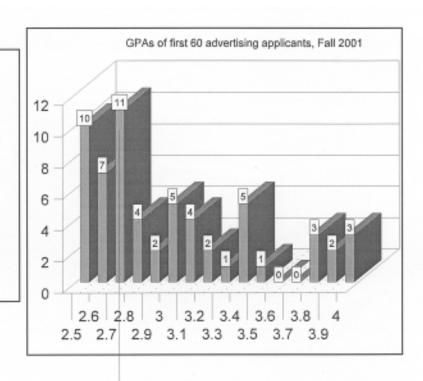

Current Admissions Requirements

 Complete these courses with a minimum 2.5 GPA:

English 101, 102 Communications 100 Foreign Language (6) Anthropology 130 Natural Science (8) Math 123, 125

- 2. Submit application and essay
- 3. Attend admissions meeting
- 4. Have between 30-80 hours

Projected cut-off point

RE:

ITEMS FOR NEXT UNDERGRADUATE COUNCIL

DATE: 12/18/2001

Enclosed please find items recently approved by the College of Education's Academic Affairs Committee. We would appreciate your placing these items on the agenda of the next Undergraduate Council meeting for further consideration.

Thank you.

EXERCISE SCIENCE & SPORT MANAGEMENT

Dance

Revise description (add repetition):

Dance 240 Tap I (2) Instruction and practice in elementary tap dance techniques. May be repeated. Maximum 4 hours.

Dance 340 Tap II (2) Instruction and practice in intermediate tap dance techniques. Prereq: 240 or consent of instructor. May be repeated. Maximum 12 hours.

Effective Fall 2002

Exercise Science

Revise program

On page 103 of the 2001-2002 Undergraduate Catalog, revise the Exercise Science requirements to reflect the following:

<u>Junior</u> <u>Hours Credit</u>
Cultural Studies in Education 291, 321, or 372 3 (was 6)
Statistics 201 or Math 115 3 (was 0)

Senior

Humanities Elective 0 (was 3) Professional Electives 15 (was 12)

Effective Fall 2002

Sport Management

Add:

Sport Management 330 Sport Communication (3) An introduction to the communications industry and its relationship with sport. Students will explore cultural issues, such as gender and ethnicity, and their relationship to sport and media. The course will also provide students opportunities to develop practical communication skills and learn how media and sport interact.

Effective Fall 2002

Revise Program:

On page 104 of the 2001-2002 Undergraduate Catalog, revise the Sport Management requirements to read as follows:

SPORT MANAGEMENT

The Sport Management major is designed for students interested in working in the sport industry. The program combines Sport Management and Sport Studies with a minor in Business Administration. The program includes a semester-long internship experience.

Hours Credit

412	Linear Control System Design (4)
	Effective date for dropping these 13 ECE courses is Fall, 200

Add:

- 206 Electrical Engineering Computations (4) Engineering problem solving and algorithm development by programming computers. Emphasis on software engineering, objectoriented design, building abstractions with procedures and data, and programming in a modern computer language. Includes Level 1 design projects which require laboratory work. Coreq: 255.
- 255 Introduction to Logic Design of Digital Systems (4) Standard codes, number systems, base conversions and computer arithmetic. Boolean algebra, minimization and synthesis techniques for combinational and sequential logic. Use of VHDL for logic synthesis. Implementation of circuits using SSI, MSI and LSI components. Includes Level 1 design projects which require laboratory work. Coreg: 206.
- 300 Circuits (5) Fundamental laws of circuit analysis. Ohm's Law, Kirchhoff's current and voltage laws, the law of conservation of energy, circuits containing independent and dependent voltage and current sources, resistance, conductance, capacitance and inductance analyzed using mesh and nodal analysis, superposition and source transformations, and Norton's and Thevenin's Theorems. Steady state analysis of DC and AC circuits. Complete solution for transient analysis for circuits with one and two storage elements. Complex frequency, sinusoidal forcing functions, and natural response. Resonance: general case, special cases in series and parallel circuits. Scaling: magnitude and

frequency. Admittance, impedance and hybrid parameters. Includes Level 1 design projects which require laboratory experiments. Prereq: All course work in the Freshman Engineering curriculum; grade of C or better in Mathematics 141, 142, 231 and Physics 231.

- 315 <u>Signals and Systems I</u> (3) Continuous- and discrete-time functions, function transformations, signal energy and power, solution of linear differential equations, system properties, convolution, continuous and discrete-time Fourier series, continuous and discrete-time Fourier transforms, Bode diagrams, correlation. Prereg: 300.
- 316 <u>Signals and Systems II</u> (3) Sampling theory, theory and application of Laplace transforms, feedback, root locus, gain and phase margin, theory and application of z Transforms, digital filters, discrete-time state variables. Prereq: 315.
- 325 <u>Electric Energy System Components</u> (4) Three phase systems, phasor analysis, ac power, ideal transformers, per unit notation. Magnetic circuits. Practical transformers: construction, equivalent circuits, single and three phase. DC machines: construction, connections, performance, control. Three phase induction motors: construction equivalent circuit, performance. Synchronous machines: construction, equivalent circuit, performance, parallel operation in power systems. Single-phase motors: construction, performance, starting methods. Includes Level 1 design projects which require laboratory work. Prereg: 300.
- Electronic Devices (4) Semiconductor physics, theory of p-n junctions; diodes, field-effect transistors, and bipolar transistors; modeling of diode and transistor devices; analysis and design of diode switching and rectifier circuits; basic transistor switching circuits and single stage amplifiers; electronic circuit simulation using SPICE. Includes 1 credit laboratory work involving Level 1 design projects. Prereq: 300, Coreq: 315.
- 336 <u>Electronic Circuits</u> (3) Multistage transistor amplifier biasing; gain stages, and output stages; frequency and transient response of open loop linear amplifiers; fundamentals of integrated circuits, operational amplifier applications in basic feedback configurations; basic transistor switching circuits. Includes laboratory experiments and design projects. Prereg: 335.
- 355 Computing System Fundamentals (3) Introduction to machine-level computer organization and programming. Basic microprocessor architectures; memory architectures; structured assembly language programming; intra- and inter-computer communication; I/O systems; device drivers; multi- and distributed processor systems; issues in computer security. Includes Level 1 design projects which require laboratory work. Prereq: 206, 255.
- 415 <u>Automatic Control Systems</u> (4) Automatic control systems for physical systems with linear models. The methods presented include steady-state error analysis, stability, root locus, Nyquist theory, and Bode plots. Prereq: 316.
- 416 Computer Control Systems (4) Computer controlled systems using state variables and z-transform model representations with sampling theory and its effect on digital control design. Design of digital controllers in both the state space and frequency domain. Includes Level 2 design projects. Prereq: 316.
- <u>Computer Network Design</u> (3) Principles of computer networking and software design of network protocol with an emphasis on the internet and TCP/IP protocol suite. Includes Level 1 design projects which require laboratory work. Prereq: 206.
 - Effective date for adding these 12 ECE courses is Fall, 2002.

Revise Course Title, Course Description and Prerequisites:

- <u>451</u> <u>Computer Systems Architecture</u> (3) Architecture and design of microcomputer systems with microprocessors or microcontrollers. Instruction set architectures, software interfaces, processor structures, memory hierarchy, interfacing. Includes Level 1 design projects which require laboratory work. Prereg: 355.
- 472 Introduction to Digital Image Processing (4) Mathematical foundations and practical techniques for digital manipulation of images, including image enhancement, restoration, compression, segmentation, and color image processing. Includes Level 2 design projects. Prereq: 316. Non majors require consent of instructor.

Revise Credit Hours, Course Description and Prerequisites:

Antennas and Propagation (3) Introduction to antenna theory including fundamental antenna concepts and parameters (directivity, gain, patterns, etc.) and signal propagation. Theory and design of linear and loop antennas, arrays, and other simple antennas. Includes Level 1 design projects. Prereq: 316, 341, 342.

Revise Course Title and Course Description:

<u>452</u> <u>Design of Digital Systems and Computers</u> (4) Considerations for design and application of digital systems and computers; includes embedded systems concepts and design, CPU issues, interrupt structures, and I/O channels. Includes Level 3 design projects which require laboratory work. Prereq: 451.

Revise Course Description and Prerequisites:

- Fields (3) Coulomb's law, Gauss' law, Ampere's law, Maxwell's equations for electrostatic and magnetostatic cases; Maxwell's equations for dynamic case, dynamic potentials, uniform plane wave propagation. Transmission lines. Prereq: 300, Math 241, and Physics 232.
- Analog Communication Amplitude and Frequency Modulation (3) Probability and random variables, signal-to-noise ratio, propagation models, link budget analysis, bandpass signals, amplitude modulation, frequency modulation, spread-spectrum. Includes Level 1 design projects which require laboratory experiments. Prereq: 315.
- <u>Digital Communications</u> (3) Quantization and pulse code modulation. Binary and M-ary signaling, spectra of line codes, link budget analysis, binary communication in the presence of noise, matched filtering and equalization, bandpass digital transmission, introduction to multiple access techniques. Includes Level I design projects.
- 471 <u>Introduction to Pattern Recognition</u> (3) Introduction to statistical decision theory, adaptive classifiers, and supervised and unsupervised learning. Students will explore the application of these techniques in areas of current interest such as face recognition, speech processing, remote sensing, data mining and bioinformatics. Includes Level 1 design projects. Prereq: 316. Non-majors require consent of instructor.
- 481 <u>Power Electronics</u> (3) Principles and characteristics of power semiconductor devices, single-phase and polyphase phase-controlled converters, converter control, ac voltage controller. Includes Level 1 design projects and laboratory work. Prereq: 316, 325, 332.

Revise Prerequisites:

- 395 <u>Junior Seminar</u> (1) Presentations and discussions related to professional development, including registration, ethics and current topics in electrical engineering. Prereq: 300. Satisfactory/No Credit.
- <u>Senior Design</u> (5) A major design project that focuses the student's attention on professional practice, accumulated background of curricular components, and recent developments in the field. This major design emphasis is directed to topics within the field of electrical engineering. Includes Level 3 design projects which require laboratory work. Prereg: 316, 325, 332, 342, 355.
- 421 <u>Electric Energy Systems</u> (3) Structure and operation of the electrical energy grid; load flow; economic loading; planning; control; reliability. Balanced and unbalanced faults; system protection; system stability. Includes Level 1 design projects. Prereg: 316, 325.
- 423 <u>Electric Machines</u> (3) Principles of electromechanical energy conversion. Design procedures for AC and DC machine windings; construction and performance constraints. Effects of machine parameters on steady state and dynamic performances; the d-q model; reference frames. Includes Level 1design projects. Prereq: 316, 325.
- Operational Amplifier Circuits (3) Linear and non-linear active circuits using commercial operational amplifiers. Includes operational, instrumentation, isolation, bridge, rms and logarithmic converters, multipliers and function generators, rectifiers, references, active filters, modulation and demodulation, sinusoidal generators. Noise fundamentals and calculations in op amp circuits. Design for specified pole-zero functions. Emphasis on applications including transducer interfacing. Includes Level 1 design projects which require laboratory work. Prereg: 316, 336, 342.
- Electromagnetic Compatibility (3) Principles and practices to avoid interference among and within electrical devices. Parameters and coupling for dipole, biconical, and log-periodic antennas. High frequency effects in circuit elements. Radiated and conducted emissions and susceptibility. Crosstalk, shielding, electrostatic discharge, and EMC regulations. Includes Level 1 design projects which require laboratory work. Prereq: 316, 341, 342.

Effective date for revisions to these 15 ECE courses is Fall, 2002.

Materials Science and Engineering

Drop:

475 Fracture-Safe Design (3)

Effective date: Fall 2002

Add:

Materials Processing (3) Application of fundamentals of mass and energy balances, mechanics, heat and mass transfer, chemical thermodynamics and kinetics to the processing of materials and manufacturing of products. A wide range of materials (metals, ceramics, polymers), geometries (bulk, fibers, films, coatings) and processes (casting, molding, extrusion, forging, powder processing, coating techniques, etc.) are studied as examples of processing technologies. Elementary ideas of process measurement and control. Prereq. 201, 320, ChE 200, and ChE 240, or equivalent. Sp

Effective date: Fall 2002

Revise Course Descriptions:

302 <u>Mechanical Behavior of Materials I</u> (3)

Tensile testing of metals, ceramics and polymers; deformation mechanisms in the various materials, incl. crystalline and non-crystalline forms; rubber elasticity, viscoelastic behavior, creep, time-temperature superposition in polymers; fatigue. Prereq: 201, 303, or consent of instructor. Sp

429 <u>Introduction to Ceramic Matrix Composites</u> (3)

Characteristics of composites, including ceramic matrix composites; macromechanics and materials design; overview of fabrication techniques; microstructural characterization; physical and mechanical property evaluation; current and potential applications. Prereq: 201 and ES 321, or equivalent.

472 Fundamental Principles of Composite Materials (3)

Physical principles basic to the design, manufacture and application of fiber reinforced polymers, metals and ceramics. Prereq: 302 or equivalent. F

Effective date for revisions to these 3 MSE courses is Fall, 2002

Engineering Science

Drop:

- 322 <u>Mechanics of Materials II</u> (3)
- 323 Mechanical Behavior of Materials (3)
- 423 Fracture-Safe Design (3)
- 426 Fundamental Principles of Composite Materials (3)
- 429 Introduction to Ceramic Matrix Composites (3)
- 442 Fluid Mechanics II (3)
- 453 Projects in Design (3)
- 454 <u>Computational Mechanics In Design</u> (3)
- 465 <u>Dynamic Data Acquisition</u> (3)

Effective date for dropping these 9 Engineering Science courses is Fall 2002.

Revise Course Prefix, Title, and Prerequisites

321 Mechanics of Materials (3) to ME 321 Mechanics of Materials (3)
Concepts of stress and strain; stress-strain relations; applications including axially loaded members, torsion of circular shafts, bending of beams and column stability. Prereq: Engineering Fundamentals 102. Coreg: Mathematics 241. F, Sp, Su.

Revise Course Prefix, Course Description, and Prerequisites:

Design of Artificial Internal Organs (3) to BME 475 Design of Artificial Internal Organs (3) Design, development and evaluation of artificial internal organs; analysis of transport processes in therapeutic devices for design optimization; current research and development needs. Ethical considerations. Prereq: AE 341, Math 231.

Revise Course Prefix and Title:

494- Special Project in Biomedical Engineering (1-3, 1-3) to BME 494-495 Special Project in

495 Biomedical Engineering (1-3, 1-3)

Problems related to recent developments and practice. May be repeated once for credit. Prereq: junior or senior standing, consent of instructor.

Revise Course Prefix and Prerequisites:

<u>Dynamics</u> (3) to ME 231 <u>Dynamics</u> (3)
 Kinematics of rigid bodies; center of mass, kinetics of systems of particles; mass moments of inertia; kinetics of rigid bodies; Newton's laws, work-energy, impulse-momentum.
 Prereg: Engineering Fundamentals 102, Mathematics 142. F, Sp, Su.

- Fluid Mechanics I (3) to AE 341 Fluid Mechanics I (3)
 Introduction to fluid flow concepts; hydrostatics; development of mass, momentum, and energy conservation laws in integral and differential form; dimensional analysis and similitude; viscous laminar and turbulent flows in pipes; introduction to boundary layers. Prereg: ME 231, Mathematics 241. F, Sp, Su
- <u>452</u> Computational Mechanics (3) to ME 452 Computational Mechanics (3) Integration of fundamental physical laws, mathematical methods and computational techniques necessary to develop engineering analysis and design capabilities. Finite element method. Prereq: 321, AE 341. F.

Effective date for revisions to these 7 Engineering Science courses is Fall 2002.

Aerospace Engineering

Add:

494- <u>Selected Topics in Aerospace Engineering</u> (1-4, 1-4) Problems and topics related to
 495 developments and practice in aerospace engineering. Prereq: Consent of instructor. F,
 Sp, Su

Effective date: Fall 2002

Revise Course Description:

Aerospace System Design (4) Synthesis and design of a complete aerospace system. Participation in team design effort including formal presentations and design report. Prereg: 422, 425, 426. Sp.

Effective date: Fall 2002

Biomedical Engineering

Drop:

301 Biomedical Seminar I (1)

Effective date: Fall 2002

Add:

- 320 <u>FDA Regulation of Biomedical Devices</u> (1) Federal medical device law and regulation requirements; pre-market approval of new medical devices. Consent of instructor.
- 401 <u>Thesis</u> (3) Research and design problems in biomedical engineering with prior approval of a professor. May be repeated to a maximum of 6 hours. Prereq: senior standing or consent of instructor.
- Bioinstrumentation (3) Nature of biomedical signals, transducers, signal processing, noise, telemetry and display devices. Prereg: 300 and ECE 301.

Effective date for adding these 3 BME courses is Fall, 2002

Revise Course Description and Title:

431 <u>Biomedical Seminar</u> (1) Professionalism, teamwork, P.E. licensing, patents and intellectual property, product liability, ethics and other issues related to biomedical engineering. Formal written and oral reports. Prereq: Senior standing.

Revise Course Description and Prerequisite:

- Engineering Physiology (3) The study of human physiology, with an emphasis on making engineering decisions, and the development of analytical and computational models. Prereq: Consent of instructor.
- 310 <u>Biomechanics</u> (3) The application of statics, dynamics, the mechanics of materials and fluid mechanics to biomedical engineering problems. The special characteristics of living tissue and biological fluids and their incorporation into computational problems will be introduced. Prereq: ME 321, AE 341.
- Design of Experiments (3) Application of statistics to data analysis and problem solving in biomedical engineering. Analysis of experimental results, development of models, design of experiments, quality control in manufacturing, and application of standards. Prereq: 271, MSE 201. Coreq: Math 200, 241.
- 430 <u>Biomedical Engineering Laboratory</u> (3) This course provides experience with the unique problems associated with making measurements and interpreting data in living systems; experiments may include mechanical testing of biological materials, imaging and physiological measurements. (EKG, EMG, ECG, etc.) Prereq: 310 and 346 or consent of instructor.

Biomedical Engineering Design I (2) Design of biomedical systems. Economics, optimization, reliability, patents and product liability. Participation in team design efforts: requires oral and written design reports. Prereg: 310. Coreg: 430 and MSE 474.

Revise Course Description:

271 <u>Introduction to Biomedical Engineering</u> (3) Application of the skills developed in Engineering Fundamentals for biomedical engineers. The role of biomedical engineers in the design of artificial organs, orthopedics implants, medical imaging, and other biomedical applications with an emphasis on developing communication and teaming skills. Prereq: EF 102.

Revise Prerequisite:

- 408 <u>Cell and Tissue Engineering</u> (3) Culture of mammalian cells. Effects of mechanical forces on cells. Tissue engineering of cardiovascular and orthopedic tissues. Prereq: 310 and Biol 140.
- 469 <u>Biomedical Engineering Design II</u> (4) Design of complete biomedical device: documentation includes complete specification, design calculations, preparation of working drawings, and cost analysis. Written and oral reports. Prereq: 455.
- 473 <u>Applied Biomechanics</u> (3) Applications of biomechanics to the industrial and orthopedic areas. Design of orthopedic implant devices; biomechanics of injury and protection. Prereq: ME 321. Coreq: 310 and MSE 474.

Effective date for revisions to these 10 BME courses is Fall, 2002

On Page 277 of 2001-2002 Undergraduage Catalog, insert index listing for Biomedical Engineering.

Mechanical Engineering

Add:

401 <u>Thesis</u> (3) Research and design problems in mechanical engineering with prior approval of instructor. Prereq: senior standing or consent of instructor.

Effective date: Fall 2002

Revise Course Description and Prerequisites:

391 Engineering Analysis (3) Numerical and analytical techniques are developed for problems arising in mechanical and aerospace engineering. Numerical methods address root finding, direct and indirect techniques for linear and nonlinear systems, interpolation, curve fitting, quadratures, solutions to ordinary- and partial-differential equations. Analytic methods include Fourier series, solutions to linear systems of differential equations and separation of variables. Computer projects are assigned for reinforcing classroom developments. Prereq: Engineering Fundamentals 101, Mathematics 200 and 231, F, Sp, Su.

Effective date: Fall 2002

Revise Course Description:

Systems and Controls (3) Analytical models of physical systems; comprised of combinations of mechanical, fluid, electrical, and thermal systems. Analysis and design of feedback control systems using transient and frequency response techniques, stability analysis, sampled data systems. Prereq: 345, EE 301, F, Sp.

Effective date: Fall 2002

Nuclear Engineering

On page 117 of the 2001-of the 2001-02 *Undergraduate Catalog*, revise the showcase curriculum in Nuclear Engineering to:

Hours Credit
Sophomore
Mathematics 231, 241 7
Physics 231, 2327
Nuclear Engineering 200, 2034
Electrical Engineering 3013
Computer Science 102 4

Materials Science and Engineering 201 3
² Technical Electives6
¹ General Education Electives 3
Total: 131 hours

¹General Education Electives must include one course from the Communications Cluster and one course from the Professional and Ethical Responsibility Cluster.

²Technical electives are selected from upper division mathematics and engineering courses and must be pre-approved by the department.

On page 117 of the 2001-2002 Undergraduate Catalog, revise the Nuclear Engineering with a concentration in Radiological Engineering showcase curriculum to:

Nuclear Engineering Radiological Engineering Concentration

Hours Credit Sophomore Mathematics 231, 241 7 Nuclear Engineering 200, 203 4 Electrical Engineering 301 3 Computer Science 102 4 Junior Mathematics 403 3 Physics 341 3 Nuclear Engineering 301, 304, 342, 351, 431, 470 18 Biology 140 4 Senior Industrial Engineering 405 3 Mechanical Engineering 402 1 Nuclear Engineering 400, 403, 404, 406, Biochemistry and Cellular and Molecular Biology (BCMB) 230 5 Statistics 251, BCMB 310, or Chemistry 350 3 ²Technical Elective 3 Total: 134 hours

¹General Education Electives must include one course from the Communications Cluster and one course from the Professional and Ethical Responsibility Cluster.

² Technical electives are selected from upper division mathematics, chemistry, and engineering courses and must be pre-approved by the department. Pre-Med, pre-vet, and pre-dentistry students must take Chemistry 360 and also Chemistry 369.

THE UNIVERSITY OF TENNESSEE

College of Human Ecology
Office of the Dean
1215 West Cumberland Avenue, Room 110
Knoxville, TN 37996-1900

MEMORANDUM

TO:

Dr. Linda Tober and the Undergraduate Council

FROM:

Dr. Delores Smith

Assistant Dean

DATE:

December 7, 2001

RE:

Curricular Revisions for the College of Human Ecology

Attached are revisions to curricula and programs within the College of Human Ecology. These materials have been presented to the respective college committees and are now submitted to the Undergraduate Council. Following is a brief description of materials submitted:

- 1. In the Department of Child and Family Studies:
 - A. Revise the concentration name and showcase of Early Childhood Development.
 - B. Revise Name and Progression Requirements for Early Childhood Education for Teacher Licensure (Pre-K 4) and Dual Licensure concentrations.
 - C. Revise Foreign Language requirements to include two semesters of American Sign Language and a demonstrated proficiency in a foreign language at the introductory level.
 - E. Revise description of CFS 422.
 - F. Add one course, CFS 472 Advanced Practicum in Inclusive Early Childhood Programs.
 - G. Revise prerequisite and co-requisite for CFS 405.
 - H. Revise Family Studies Business Pod to reflect revisions to Business courses implemented by the College of Business Administration.
 - I. Revise program progression standards.
- 2. In the Department of Consumer and Industry Services Management:
 - A. Revise Recreation Tourism Management's Commercial Recreation and Tourism Management Concentration to Recreation Tourism Management: Service Management.
 - B. Revise Recreation Tourism Management's Therapeutic Recreation concentration showcase to equalize hours for the Service Management and Therapeutic Recreation Degrees.
 - C. Revise showcases of Retail and Consumer Sciences, Hotel Tourism Management and Restaurant and Foodservice Management to incorporate revisions to the business minor implemented by the College of Business.
- 3. In the Department of Human Resource Development:
 - A. Revise the Teacher Education concentration to include the revisions to the business minor implemented by the College of Business Administration.
 - B. Revise the Training and Development showcase.

DEPARTMENT OF CHILD AND FAMILY STUDIES

REVISE: Prereq/Coreq

From: CFS 405 Development and Teaching of Interpersonal Skills (3) Development of basic interpersonal skills needed to work with families and other professionals. Skills include active listening, self-disclosure, relationship-building, and negotiation. Process of teaching interpersonal skills and group facilitation in community setting. Prereg: Family Studies majors only.

TO: CFS 405 Development and Teaching of Interpersonal Skills (3) Development of basic interpersonal skills needed to work with families and other professionals. Skills include active listening, self-disclosure, relationship-building, and negotiation. Process of teaching interpersonal skills and group facilitation in community setting. Prereq: CFS 360.

REVISE Description

From: CFS 422 Early Childhood Teaching Methods (6) Fundamentals of teaching language arts, math, science and social studies through a holistic, integrative approach to early childhood education. Focus on grades K-3. Field experience included. Prereq: 351 and admission to the Early Childhood Education licensure program.

TO: CFS 422 Early Childhood Teaching Methods (6) Fundamentals of teaching language arts, math, science and social studies through a holistic, integrative approach to early childhood education. Focus on grades K-4. Field experience included. Prereq: 351 and admission to the Early Childhood Education licensure program.

REVISE: Family Studies Business Pod

- 1. Drop Marketing 301 and Management 301.
- 2. Add Marketing 300 and Management 300.
- 3. Drop Business Law 301 and Management 321
- 4. Add Business Administration 201

Family Studies Major

For progression into the Family Studies major, students must meet the following criteria:

- 1. Complete at least 15 semester hours at UT.
- 2. Complete CFS 205 with a satisfactory grade. Application for progression while enrolled in CFS 205 is PREMATURE.
- 3. Attain a minimum grade of C in all CFS and HE courses.
- 4. Attain and maintain a cumulative GPA of 2.5/4.0 (transfer hours not included).

For Progression into the Family Studies Internship, students must meet the following criteria:

- 1. Progress into the major.
- 2. Complete courses in Family Studies Core.
- 3. Complete at least 90 hours (senior standing).
- 4. Complete an application to intern (during CFS 345 or CFS 360).
- 5. Complete CFS 405, HS 380 and one additional 3 hour course in the Interactional and Conflict Resolutions Skills pod.
- 6. Attain a minimum of C in all CFS courses and HE courses.
- 7. Earn and maintain a GPA of 2.5/4.0.

.

DEPARTMENT OF CONSUMER AND INDUSTRY SERVICES MANAGEMENT

ADD and Cross-list:

RTM119 Introduction to the Service Industry (3) Organization and basic operating systems for the career paths available in the hospitality, retail and recreation and tourism industries. Managerial competencies necessary for success in these fields. (Same as HRA and RCS 119)

REVISE Description and Cross-listing:

From: HRA119 Introduction to the Service Industry (3) Organization and basic operating systems for the career paths available in the hospitality and retail industries. Managerial competencies necessary for success in these fields. (Same as RCS 119)

TO: HRA119 Introduction to the Service Industry (3) Organization and basic operating systems for the career paths available in the hospitality, retail and recreation and tourism industries. Managerial competencies necessary for success in these fields. (Same as RCS and RTM 119)

REVISE Crosslisting:

From: RCS119 Introduction to the Service Industry (3) Organization and basic operating systems for the career paths available in the hospitality and retail industries. Managerial competencies necessary for success in these fields. (Same as HRA 119)

TO: RCS119 Introduction to the Service Industry (3) Organization and basic operating systems for the career paths available in the hospitality, retail and recreation and tourism industries. Managerial competencies necessary for success in these fields. (Same as HRA and RTM 119)

REVISE Description, Pre/Co Reg. and Cross-listing:

From: HRA 311 Developing the Service Workforce (3) Personnel management procedures and policies to develop the service workforce. Topics include leading organizational change; labor cost; employee review process; retention issues. Prereq: HRA210/RCS210, or RCS211. (Same as RCS311).

TO: HRA 311 Developing the Service Workforce (3) Personnel management procedures and polices to develop the service workforce. Topics include leading organizational change; labor cost; employee review process retention issues. Same as RCS 311 and RTM 311. Prereq: HRA/RCS 210 or HRA 211 or RTM 310.

REVISE Crosslisting:

From: RCS 311 Developing the Service Workforce (3) (Same as HRA 311.)

TO: RCS 311 Developing the Service Workforce (3) (Same as RCS 311 and RTM 311.)

ADD and Cross-list:

RTM 311 Developing the Service Workforce (3) (Same as HRA 311 and RCS 311.)

REVISE Description, Pre/Coreq. and Cross-listing:

From: HRA 323 Diversity in the Service Marketplace (3) Survey of diversity in the service marketplace. Implications for the manager of a diverse workforce in the delivery of goods and services to a multiplicity of consumer groups. Prereq: RCS.HRA 311 (Same as RCS 323.)

TO: HRA 323 Diversity in the Service Marketplace (3) Survey of diversity in the service marketplace. Implications for the manager of a diverse workforce in the delivery of goods and services to a multiplicity of consumer groups. Prereq: RCS/HRA/RTM311 (Same as RCS and RTM323.)

REVISE Crosslisting:

From: RCS 323 Diversity in the Service Marketplace (3) (Same as HRA323

TO: RCS 323 Diversity in the Service Marketplace (3) Survey of diversity in the service marketplace. Implications for the manager of a diverse workforce in the delivery of goods and services to a multiplicity of consumer groups. Prereq: RCS/HRA/RTM311 (Same as HRA and RTM323.)

ADD and Cross-list:

RTM 323 Diversity in the Service Marketplace (3) Survey of diversity in the service marketplace. Implications for the manager of a diverse workforce in the delivery of goods and services to a multiplicity of consumer groups. Prereg: RCS/HRA/RTM311 (Same as HRA and RCS323.)

REVISE: Description, Pre/Coreq. and Cross-listing:

REVISE Prereq/Coreq

From: RTM 415 Development and Maintenance of Recreation, Tourism and Athletic Facilities (3) Principles of designing, planning, equipping, operating and maintaining various facilities. Elements of risk management and safety are incorporated into the design process. Prereq: RTM310, or consent of instructor. A-F, F.

TO: RTM 415 Development & Maintenance of Recreation, Tourism and Athletic Facilities (3) Principles of designing, planning, equipping, operating and maintaining various facilities. Elements of risk management and safety are incorporated into the design process. Prereq: RTM310, SM350 or consent of instructor.

REVISE Program Description for Recreation and Tourism Management

From: RECREATION AND TOURISM MANAGEMENT

The professional disciplines that comprise Recreation and Tourism Management (RTM) prepare students for management and leadership positions in many commercial recreation, sport and tourism enterprises. The RTM curriculum is one of only two programs in the state of Tennessee that is accredited in General Recreation and Par Association's Council on Accreditation.

The Commercial Recreation and Tourism Management concentration is designed to prepare students for employment in management and leadership positions in the recreation and tourism industry. Students will be competitive in securing employment in travel and tourism agencies, convention bureaus, resorts, corporate leisure services, sporting venues, city/county/state government and quasi public agencies, voluntary and religious organization. A business minor is built into the Commercial Recreation and tourism Management concentration.

The Therapeutic Recreation concentration prepares students for employment in management and leadership positions with agencies that deliver health care services. Students are successful in securing employment in psychiatric institutions, physical rehabilitation units, in drug and alcohol treatment centers, and in community based programs. In the Therapeutic Recreation concentration minors may be selected in Psychology and Child and Family Studies. Graduates fulfill the eligibility requirements for National Therapeutic Recreation Society certification.

A minimum of a 2.3 GPA is required for progression to and retention into the program.

TO: RECREATION AND TOURISM MANAGEMENT

The professional disciplines that comprise Recreation and Tourism Management (RTM) prepare students for management and leadership positions in Service Management (Commercial Recreation and Tourism enterprises), sport and tourism enterprises. The RTM curriculum is one of only two programs in the state of Tennessee that is accredited in General Recreation and the only program accredited in Therapeutic Recreation by the National Recreation & Park Association's Council on Accreditation.

The Service Management concentration is designed to assist students in gaining knowledge, responsibility and creativity to meet the changing environment of complex management in the recreation industry in the 21st century. A business minor is built into the degree requirements. Graduates are prepared for employment in travel and tourism agencies, convention bureaus, resorts, corporate sector, public/quasi public recreation agencies, voluntary and religious organizations.

The Therapeutic Recreation concentration prepares students for employment in management and leadership positions with agencies that deliver health care services. Graduates fulfill the eligibility requirements for National Therapeutic Recreation Society certification. Graduates are successful in securing employment in psychiatric institutions, physical rehabilitation units, drug and alcohol treatment centers, and community based programs.

A minimum of a 2.3 GPA is required for progression to and retention into the program.

ACADEMIC REVIEW REVISION

On page 31 of the **Undergraduate Catalog** revise the last sentence of the section "Academic Review" to read:

A student dismissed from the University may apply for readmission to the University after a minimum of **one calendar year** away from the University.

Formerly: ...after a minimum of **two semesters (with summer considered a semester)** away from the University.

Rationale: The period of one calendar year is a clear statement of how long a student should be dismissed from the university, is consistent with the policies of peer institutions (as well as with UT's policies), and provides better opportunity for reconsideration of academic goals, and academic and career planning. The revision of policy was passed without dissent by the Committee on Advising.

Effective: Fall 2002
