# Digital Showcase in the Library

How Trace enhances UT's Virtual Library

# The Virtual Library – a few definitions

- A set of electronic resources for creating, searching, and using information constructed by and for a community of users (Borgman 2007, 17-18)
- An information network overlay that facilitates the creation of collaborative and contextual knowledge environments (Lagoze et al. 2005)

# The UT Virtual Library

- **Enhance the library's virtual presence** through efficient *searching* capabilities, *interactive* features, *archiving* services, tools for *discovery* and delivery of scholarly resources, and new technologies that advance and scale services.

(Virtual Library Steering Committee Charge, February 18, 2009)

- ...an evolving concept defined by and for UT's user communities: collaborative, discoverable, contextual, interactive

# Trace: UT's Digital Showcase Vision

“Trace acquires, organizes, preserves, and provides access to the intellectual capital that makes Tennessee a leader in research and teaching. These services highlight UT's prominence in advancing knowledge globally.” (“About Us” <http://trace.tennessee.edu/about.html>)

- Born-digital preservation and archiving tool
- Advance UT's institutional profile
- Increase exposure to and dissemination of faculty research
