Wismer Hall to be Renovated By Next Fall

BY KATHLEEN BOWERS Sports Photography Editor

Plans for the Wismer student center are taking shape. Ursinus' architect has presented a definite plan for the renovation of the downstairs auditorium into a combination lounge and nightclub.

The upcoming changes are the first step in the long range goal of converting Wismer into an up-todate student center. The center will likely include the bookstore, a central mailroom, a variety of lounges, updated dining facilities, a gameroom, a snack shop, and student activities such as the campus radio station.

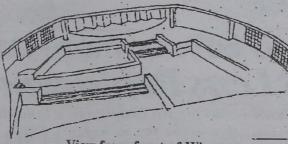

The current multi-purpose lounge plans are designed to eliminate the feeling that the room was an auditorium. Several lounge areas will be separated by short eighteen-inch walls and three different floor levels, dropped one foot each. Chairs and sofas will be grouped in these areas. Extra tables will be set up just inside the

room near Zack's for overflow seating.

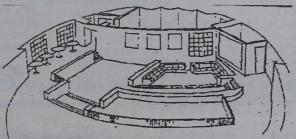

A new wall is tentatively planned to separate the current stage area from the rest of the room. The ceiling above the stage is much lower than the rest of the auditorium, and raising it would force expensive fire code updates. Though the wall would have large windows, it would reduce the total size of the room.

Many different areas of the new room will serve as a stage. The most obvious one for entertainment such as Reflections is the Zack's overflow area. Chairs can be set up all over the room in many directions to seat from 150 to 250 people.

A large square area of ceiling near the center of the room (denoted by the dotted line on the plans) will be recessed up to house electronic lighting and sound equipment and a video projector. A screen like the one in the Olin auditorium will sit to the right of the current stage. The main dance

View from front of Wismer

View from back of Wismer

floor will be directly under the lighting, though over 50% of the floors will be uncarpeted and available for dancing.

The new multi-purpose lounge will likely have entertainment such as a DJ or band at least once or twice a week. Sororities and fraternities could also sign the room out for fundraisers, shows or parties. The room will probably not have enough seating for Airband unless the wall around the stage is not put up. Airband could be held in the dining hall or in Ritter.

The original overall plans for Wismer allotted about \$100,000 for the auditorium. But the room the student planning committee would like would cost around \$450,000 including the sound and lighting equipment. The architect will visit Ursinus on Tuesday, December 11th at 4:00 p.m. to meet with those involved in planning. Other students are welcome to come and have a voice in the plans. Work should start in January and finish by next fall semester.

Quad Intruder Returns

BY SARA JACOBSON Assistant Arts and Entertainment Editor

After a quiet two weeks on campus, the quad shower peeper has returned. This week there were two incidents of girls being bothered while showering. The first incident was at a Reimert suite on Thursday, and the second occurred Saturday morning in Stauffer I in the quad.

A girl in Reimert was disturbed by a man standing on a toilet in the stall by the shower who was looking over the divider as she showered. This man was seen leaving the suite, but assumed to be a normal visitor by the girl who encountered him on his way out. The description of this peeper roughly fits the original description of the quad invader-5 foot 6 or 7 inches, brownish hair, but security is unsure as to whether or not it is really the same person. The man was also to have supposedly been wearing a red and black sweater.

Saturday morning the peeper hit again, but in a more serious fashion. At approximately 8:00 he entered the Stauffer I shower and peeped someone showering there by wrapping the shower curtain around his face and looking into the shower. He then put his arm in the shower and attempted to grab at the person. The girl then screamed and chased him out of the bathroom. Other hall mates were awakened by her screams but went out to help her too late to see the man running away. Unfortunately the victim did not get a good description of the peeper because she was without her glasses.

In response to this incident security pulled a fire alarm in the quad at approximately 9:30 later that morning. They hoped that the peeper was still in the quad as an unregistered guest. All the rooms were searched and all males found in the quad were written up and taken before the girl who had been peeped. As many as sixty males were found, but the shower peeper was not among them. Official Ursinus policy is that no males are allowed in the quad before noon or after midnight on the weeknights and two in the morning on the weekends.

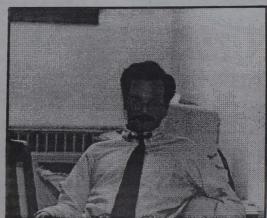

Security has provided rape whistles in each shower of the quad bathrooms and urged quad residents to continue to lock their dorm doors and not prop the doors to the quad open. The investigation is continuing with the help of the Collegeville police.

Politics Honors Projects

Grizzly News Services

The Politics Department has recently instituted a departmental honors program for senior Politics majors who qualify academically and wish to pursue in-depth study on a subject. Honors candidates will write a lengthy thesis over the course of the year, which will be presented in a seminar for the department at the end of April.

The process began last semester when qualified students received an invitation to submit a topic and potential thesis for study. Five students chose to participate in the program. Todd Keeler's thesis focuses on what role NATO will play in post-cold war Europe. Karen Lunova is working with the effects of political and cultural factors on the democratization of Poland. Lisa Shreiner is researching the history of the relationship between church and Mark Hallinger is researching the causes of political change in El Salvador in the 1984-1989 era. Kevin Murphy is looking at the break-up of the Soviet dynamics in other states.

students presented their expanded recognition of academic theses and early research findings achievement. He also sees the to the department on November thesis program as crucial for those

The Honors Program was graduate study. coordinated by Associate Professor program

students who will be pursuing

"It's an excellent opportunity for Paul Stern, who arrived at Ursinus students to get used to doing the Union by researching ethnic only last year. Stern hopes the kind of work they will do in will bring greater Graduate school", concludes Stern.

Happy Holidays!

URSINUS OFFERS ST. JOSEPH'S POST-MBA CERTIFICATES

From College Communications

Because many MBA graduates in the region need additional specialized education, Ursinus College will offer Post-MBA Certificates on the Collegeville campus through St. Joseph's University.

"Given changing technologies, globalization, recent developments in accounting and finance, and new management concepts such as intrapreneuring, (creativity or innovation within the confines of a corporation), it is understandable that business people, including MBA holders, are looking for ways to continue their formal education," said Adele C. Foley, director of MBA programs at St. Joseph's. "We think that the Post-MBA Certificate Program is an effective and convenient way to accommodate this need."

Individuals holding a Master of Business Administration degree may enroll in graduate courses in seven areas of specialization including accounting, finance, health administration, information systems, international business, management, or marketing. After completing four specialized courses (12 credits), the student will receive a Post-MBA Certificate in the chosen area.

St. Joseph's University has awarded the MBA degree since 1976 and began offering MBA classes at Ursinus in May 1985. More than 1.500 students. primarily working adults, now attend MBA classes on a part-time basis in the late afternoon or early evening at one of four locations: St. Joseph's main campus on City Line Avenue in Philadelphia; Ursinus College in Collegeville; Albright College in Reading; and the Business Development and Training Center at the Great Valley Corporate Center in Malvern, Pa.

Presently, there are 430 graduate business students at the Ursinus campus. Most students who attend Ursinus are able to complete the entire MBA program at the Collegeville location.

Current MBA students are impressed with the academic excellence of St. Joseph's MBA program, the highly qualified faculty, the variety of specializations, and the quality and professional diversity of their classmates.

IN-person registration at Ursinus is scheduled for Monday, Jan. 7, 1991, from 3:30 to 7:30 p.m. in Corson Hall. Spring semester MBA classes begin on Monday, Jan. 14, 1991. Classes are offered weekday evenings from 6:30 to 9:10 p.m.

MBA Information Sessions will be held at Ursinus College on Wednesday, Dec. 5, 1990, and Tuesday, Dec. 11, 1990, at 7 p.m. in Wismer Hall. Prospective students and their guests are invited to attend. Academic advising will be offered by appointment on Dec. 13, 1990, from 3:30 to 7:30 p.m. in Corson Hall. New applicants are encouraged to meet with an advisor to review their undergraduate transcripts and to determine their status.

For further information, contact Michelle Quinlan, MBA Coordinator at Ursinus College, at 489-4111 (daytime) or 489-4250 (evenings).

The Global Perspective

BY CASSANDRA YUTZY
Of The Grizzly

International

A runoff election will be held for the Polish Office of The Presidency between Lech Walesa and Stanislaw Tyminski on Dec.9, 1990. The Solidarity leader, Walesa, won the first round election with 40% of the vote. He is also expected to win on the 9th of December.

Last week, Nelson Mandella pleaded with all the black political factions to come together and form a united front against the white rule.

The five permanent members of the UN Security Council approved a Cambodian peace plan. This would end the 12 year civil war in Cambodia. It also calls for the United nation administrators to take control of the country during the transitional period leading to free elections.

The Prime Minister of Singapore resigned from office last week. He had served as the nation's Prime minister for 31 years. Bulgaria's Socialist Premier Lukanov resigned from his position in reaction to a general strike and growing economic problems. He said that political opponents and trade unions had made it impossible for him to implement his programs. No successor have been named.

The United Nations approved the resolution to authorize the use of military force after the deadline of Jan. 15th if Iraq does not withdraw from Kuwait. This measure is meant to give Iraq the final opportunity to comply with the previous resolutions. The "no" votes came from Cuba and Yemen. The one abstention came from China.

Former heavy weight boxing champion, Muhammad Ali, secured the release of 14 American hostages in Iraq.

Margaret Thatcher's hand-picked successor, John Major was elected by Britain's Conservative Party to be the new Prime Minister.

Foreign Policy and the Press

BY TONYA UGORETZ Of The Grizzly

"A lot of people think that the press sins by being a fourth estate of government...In foreign policy, the press is not...a fourth branch..or putty in the hands of government". This comment was made by Dr. Nicholas Berry on Monday, November 19, during an Ursinus Lecture Forum titled "Foreign Policy and the Press". Dr. Berry, chairperson of the Politics department at Ursinus, explained the various intricacies of the press' treatment of foreign policy and how it differs from the way domestic policy is handled.

Berry methodically identified the press as having three roles. The first being as a "agenda-setter". The press recognizes a problem, calls attention to it, and has it placed on the political agenda. The second is as a "game-caller". The press informs the public of what is happening and who is involved. The last role is as an "evaluator", explaining how the situation

came about. In foreign policy, the press is weak as an agenda-setter but strong as an evaluator.

Berry then went on to name five kinds of things that affect the press. "Getting the story" consists of the who, what, where, when, and why and is the "prime function" of the press. the press' "knowledge" or lack thereof controls the depth of the story. "Cultural and national biases"

determine the press' slant and often act as "filters". A desire to "please the editors" influences the quality of reporting. Finally, the need for "cultivating and protecting sources" is also a factor in the behavior of the press. These factors produce different levels of reporting, depending on whether it is domestic or foreign policy.

Berry asserted that in foreign policy, there is almost no agendasetting. Instead, the policy is evaluated with either high criticism or high praise. Using the recent Persian Gulf crisis as an example. Berry pointed out that when Saddam Hussein first seized Kuwait, the press' sole sources were Bush, Cheyney, and Baker. Due to a lack of knowledge, the press was forced to follow along with Bush's policy and not play agenda-setter or evaluator. Now, in the outcome stage, the press has become an evaluator. It has become highly critical because it knows what government's objectives are. The press has learned that "we are locked into war", and now that "interest groups are getting energized", it can really

In the outcome stage of foreign policy, reporting becomes a lot more skillful. The press has had time to increase its knowledge and be more "succinct". No longer a "national cheerleader", the press has learned the national and cultural biases and can examine the results confidently. Editors'

approval has been won and a large number of sources are available. In domestic policy, "someone's ox is always getting gored, while someone else's is always getting fed", but in foreign policy, it's always "us against them" so the press is either very critical or very approving in the outcome

At the onset, one can't expect a foreign policy debate. There is "consensus and conformity" and the press is fairly "flat and neutral". It is during this time that the reader must be very critical, to "forget red, white, and blue and be more aware of red and green—blood and money".

Berry closed his lecture by saying that there are positive trends occurring in the field of journalism. Journalists are getting a much better education and are taking more academic programs. Berry reassured, "You can have confidence in the press...In the end, they tend to get the story right".

Dr. Berry

National

Last week President Bush went to Mexico for a 2 day summit with M exican President Salinas.

The Supreme Court let stand a banning of begging and panhandling throughout New York City's subway system.

The Cable News Network won their fight to air taped conversations of deposed dictator, Manuel Noriega and his lawyer. A Miami federal judge lifted the ban last Wed. saying that airing the tapes would not endanger Noriega's right to a fair trial.

Dance Marathon Planned

Special to the Grizzly

Ursinus College needs to get ready for the largest event to hit the college in years. The first annual Dance Marathon for Leukemia is slated for March 22-3 1991. The theme of the marathon is Rockin' and Rollin' for Research. The Marathon will start at 10:00 P.M. on the 22nd and end at around midnight on the 23rd. Leading up to the dance marathon there will be many events to increase awareness on campus about leukemia. There will also be many fundraising events such as an auction and a raffle.

Throughout the marathon there will be games, food, and fun for all. Even if you do not plan on dancing, you can come out and support your friends, and also

support a great cause. This is a great opportunity for the students of Ursinus college to really contribute to the community. We plan on getting widespread newspaper, television and radio coverage for this event. We are hoping that this will be the start of a great tradition at Ursinus. If you are interested in helping out with the planning of the marathon, stop down to the Student Activities Office in Wismer. If you want to dance watch for sign-ups early next semester. Get excited Ursinus, this marathon is going to be a lot bigger than you can imagine!!

Crazy Toys

BY ELEANORE HAJIAN
Assitant Editor

It is the week after Thanksgiving and in the spirit of the season I decided it would be fun to interview Santa Claus. In some respects, my endeavors make me feel like a little kid again. I could just picture the ever-approachable Santa Claus laughing with a cluster of excited children all around him.

When I arrived at the mall I was pretty psyched to be doing this. I patiently stood in line with rambunctious one to five-year-old's waiting for my turn to see Santa. In front of me was a gazebo, and in the gazebo was a jolly Santa smiling and waving at everybody. I could not wait to talk to him. There was no way that this Santa was going to get bent out of shape by a few friendly questions.

All of a sudden I was approached by a "helper" who said "You look a little old to be waiting to see Santa."

"Oh, I'm just waiting to ask him a few questions," I replied.

"Questions?," echoed the helper.
"Yes...I'm interviewing Santa
Clauses for a Journalism article at
school," I explained.

"Well I think you need permission to do that," said the helper.

"Santa doesn't look like he would mind." I said.

"No, but the photographer will. You need permission. You will have to call the main office," insisted the helper.

"Oh," I said.

Nay next step was to call the main office. I was promptly told that Santa the Marketing Co. was "running a business" and could not let the photography sessions be interrupted by people who "just

wanted to talk." I thought about hiding in the trees until Santa got a break, but decided that he probably would not want to be accosted by a reporter during his few minutes of peace and quiet.

Heartbroken and angry at the parent who does not want his child fantasizing about hamburgers and french fries? The Teenage Mutant Ninja Turtles, of course. These are by far the most amusing toys on the market. Their action equipment includes the Sewer Dragster and the Psycho Cycle, with 2 land shark missiles, radicle Turtle rip cord, and Mutant buzzard.

There is also the Giant Mutant series of dolls. Needlenose—the bloodsucking, military mutant mosquito—and Killer Bee, the psychotic, stinging, pollinating punk (complete with deadly drone gun and chunky chain saw) are two of the more popular dolls in the series.

The action does not, however, stop with Giant Mutant dolls. Turtle paraphernalia also includes Flushomatic, the high tech Turtle torture trap with retromutagen ooze included and Leonardo's Sewer Force sword.

If these new inventions have scared you away from the toy "business," I began to wander about the mall. Suddenly, I came upon a huge toy store. It seemed like a cheery place to be, so I decided to start Christmas shopping for my younger cousins. As I browsed the aisles, I ran across some pretty outrageous stuff.

I found that the fast food industry has entered the toy market. Fisher Price and McDonalds have collaborated to produce the McDonalds' soda

fountain (with realistic pouring action), a full-fledged McDonalds' uniform with microphone attached to the hat, and a Happy Meal that comes with a hamburger (pickles attached), bun fries, soft drink, apple pie, the Happy Meal box and a real prize.

If all this is not enough to encourage a little tot to become a lifetime hamburger flipper, then try out the McDonalds' kitchen, complete with order panel and grill.

So, what is out there for the scene, never fear, Lightbrite, Spirograph, Mr. Potato Head and The Easy Bake Oven are still on the shelves along with multitudes of Barbie and Matchbox playthings. Barbie and Matchbox have, of course, become a bit more elaborate through the years.

Barbie now has a pool and patio set, a Ferrari, a scooter, a '57 Chevy, an ice cream shop, a home gym, a speed boat, and a giraffe. Oh, we can't forget Barbie's pet parrot, Tahiti, in his own cage, no less!

Matchbox has developed a full fledged Super Car wash (that really washes the cars), a new high-tech parking garage, and a car dealership.

By the time I got through the Matchboz aisle of the toy store, I had manged to forget that I wasn't allowed to see Santa. I was in a much better mood. Lightbrite and the Easy Bake Oven had brought back some great memories. I started on my way home with the conviction that Santa really would have talked to me if it had not been for that nosey helper.

This Week in U.C. History...

BY TERRI JOHNSON of The Grizzly

Twenty-seven years ago this week Ursinus students were coming to terms with their feelings of grief and disbelief about the assassination of President John F. Kennedy. When news of the assassination was broadcasted in the dining hall on November 22, 1963, there was a pronounced silence as shocked students listened to the events surrounding Kennedy's death.

After the announcement, a group of students put the flag at half mast, faculty meetings were canceled, the United Church of Christ opened for private worship that evening A memorial service was held in Bomberger Hall where students and faculty gathered to mourn and rededicate themselves to the principles that characterized

Kennedy

During the weeks following the initial shock of the Kennedy assassination, many students began to realize what the President meant to them. The Ursinus Weekly recorded many thoughts and reactions of students on campus.

Judy Noyes, a sophomore, described her feelings as "utter disbelief in the realization that one man, an assassin could cause utter chaos and mourning for the country." When asked how she would describe the president, Noyes answered, "John F. Kennedy was not only a mortal, vital contributor to humanity, but also a strong symbol of all that we stand

Richard Sanders, a senior history major, described his feelings in the following manner, "the image of youth dominated us almost every moment; you just really can't believe the president is dead." Another senior, Otto Renner described Kennedy as "the embodiment of what a President should be."

President Helferrich reacted to the tragedy by commenting that the country had lost a great friend of the youth, and a strong proponent of education. Helferrich described what Kennedy had started as "a picture of firm lines, strong colors, and a clear subject." He also felt that the students and people of the country had a responsibility to complete the programs that were in Kennedy's picture.

The state of the s

SGT. GRIZZ... "THE BEAR FACTS"

11-18-90 at 1:12 A.M., Officers respond to a suite in Reimert after receiving a report of wood breaking in a suite. Upon arrival to this location officers found pieces of a broken chair piled up in one of the suites as well as screws and splintered wood in the common area of the suite. Officers questioned the students at this location and the subjects denied any knowledge of what transpired.

11-18-90 at 2:38 A.M., A smoke detector was activated in one of the Reimert suites. Upon arrival, officers found that the common area of the suite smelled like smoke and ashes were on the floor. The students were questioned about the incident and one subject advised the officers that she had set paper on fire then extinguished it. The Collegeville P.D. as well as the Collegeville Fire Department responded to this location.

THE REIMERT FIRE SYSTEM IS NOW CONNECTED TO THE FIRE COMPANY!!!AS WITH ALL HOUSES AND DORMS WHEN THE COMMON ALARM IS ACTIVATED YOU WILL EVACUATE THE BUILDING. IN THE EVENT A SMOKE DETECTOR IS ACTIVATED IN YOUR ROOM, YOU ARE TO NOTIFY SECURITY...DO NOT ATTEMPT TO SILENCE THE DETECTOR. ANYONE FOUND TAMPERING WITH THE FIRE SYSTEMS WILL BE REFERRED TO THE "J-BOARD".

11-28-90 at 1:10 A.M., A student reports to security that while walking from the 7-11 Store back to a Main Street house someone threw a glass bottle at the subject from a passing vehicle. The incident was reported to the Collegeville Police Department along with the description of the vehicle, after Security searched the Ursinus College parking lots with negative results.

11-28-90 at 12:30 A.M. and 1:18 A.M., It is reported to security that two obscene phone calls were received on a pay phone located at the Quad. The subject calling is believed to be the same one that has been involved in other obscene calls to this location.

IN THIS AREA WE HAVE A SERVICE KNOWN AS "CALL TRACE" WHICH LETS YOU TRACE THE NUMBER OF THE LAST CALL YOU RECEIVE. THE NUMBER IS AUTOMATICALLY REPORTED TO THE BELL OF PENNSYLVANIA'S ANNOYANCE CALL CENTER. TO USE THIS SERVICE FOLLOW THE PROCEDURE LISTED BELOW:

- AFTER RECEIVING A CALL YOU WANT TO TRACE, HANG UP.
- 2. BEFORE MAKING OR RECEIVING ANOTHER CALL, PICK UP THE RECEIVER, LISTEN FOR THE DIAL TONE AND DIAL THE TRACE CODE AS FOLLOWS:
- A) FROM BUTTON TOUCH-TONE PHONE WITH TOUCH TONE SERVICE *57
- B) FROM A ROTARY OR PULSE-DIALING PHONE 1157
 3. LISTEN FOR THE CONFIRMATION ANNOUNCEMENT
- 4. HANG UP AND THE TELEPHONE NUMBER OF THE CALLER WILL BE REPORTED TO BELL OF PENNSYLVANIA

PLEASE NOTE: YOU WILL NOT RECEIVE THE TELEPHONE NUMBER OF THE PARTY WHO CALLED. THE INFORMATION WILL BE HELD BY THE BELL OF PA FOR RELEASE TO APPROPRIATE LAW ENFORCEMENT PERSONNEL.

*IN THE EVENT YOU USE THIS SERVICE ON CAMPUS, PLEASE CONTACT SECURITY AT 489-2737 SO THAT THE INFORMATION CAN BE RELEASED TO THE COLLEGEVILLE POLICE DEPARTMENT AS WELL AS SECURITY.

11-29-90 at 5:14 A.M., Security Officer observes a male subject riding on a bike around dorm areas. The male subject was stopped by security and advised he was trespassing on private property and if he returned, charges would be filed.

11-29-90 at 7:40 A.M., Security responds to Reimert where it is reported that a male subject entered into a suite and went into the bathroom area where a female was taking a shower. Officers checked Reimert Complex and were unable to locate the subject. The Collegeville Police Department as well as Security are investigating the

11-29-90 at 12:25 P.M., It is reported to Security that other suites in Reimert had unknown subject(s) enter the suites at various times, however no one questioned those suspicious persons until hearing about the incident that was reported to Security earlier this date.

PLEASE NOTE: WITH THE SUSPICIOUS INCIDENTS...ALL SUITE DOORS WERE NOT SECURE INTO THE COMMON AREAS. THE LOCKS ON YOUR DOORS HAVE BEEN INSTALLED TO PROTECT YOU. PLEASE BE RESPONSIBLE

ENOUGH TO USE THEM. YOU MUST ALWAYS USE PREVENTIVE MEASURES TO PROTECT YOU AND YOUR **BELONGINGS**

11-30-90 at 7:20 A.M., Security locates a male subject in one of the bathrooms in the Quad. After questioning the subject it was found he was with a student who lives at this location. Subject advised of Quad rules and regulations and informed that when visiting never to use the bathroom facilities for the females.

REMINDER TO ALL RESIDENTS IN THE QUAD: THE SECURITY DEPARTMENT IS ENFORCING THE POLICY ON VISITATION!! VIOLATORS OF THE POLICY AS WELL AS ANY RESIDENTS WHO ASSISTS OR PERMITS A PERSON TO VIOLATE THE VISITATION HOURS WILL BE SANCTIONED BY THE OFFICE OF STUDENT LIFE.

REMINDER: ALL OUTSTANDING PARKING VIOLATIONS MUST BE PAID BY DECEMBER 11th OR THEY WILL BE BILLED TO THE TREASURER'S OFFICE. THERE WILL BE NO EXCEPTIONS AFTER THIS DATE.

Holiday Messages **Encouraged**

BY COLEEN CASCIANO Features Editor

As another fall semester draws to a close, we look forward to going home for the holidays. It's the time of year when our hearts long to be with the people we love most-our families and friends.

Imagine that instead of packing your crates and laundry bags into the family station wagon for the trip to Hometown, USA, you were loading up your backpack full of ammunition for a dangerous trek across the desert in Kuwait. The crisis in the Persian Gulf seems far removed from the life of a college student during finals. However, for the American servicemen in Kuwait, war is an imminent and daily threat.

Connecting the soldiers with life in America are the daily letters they receive from friends back home. The Star Ledger, a newspaper printed in Newark, NJ, is collecting mail for American servicemen stationed in the Persian Gulf. Instead of heading over to exam snacks for a study break, why not take a few minutes to compose a letter? To a soldier stuck in the burning desert on Christmas Day, a simple letter will be the best present of all.

Send your letters and Holiday

The Star Ledger-WCBS News 88 Mail Call Any US Service Member Operation Desert Shield P.O. Box 1990 Newark, NJ 170150-0001

The Grizzly would like to thank all of the people who have helped us throughout the semester. We could not have done it without you. Have a wonderful holiday.

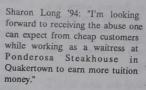

The Roving Reporter... "What are your plans for Winter Break?"

By Satsuki Scoville

Amparo M. Espadas: " I'm going back to Spain to see all my friends and family."

Dave Weiss '93: I'm going to Orlando, Florida, and spend the weekend with my aunt."

Tom "Kick" Blomstrom '91: "I was going to the Bahamas, but I ran out of cash, so I'm working at Macy's selling Carry-A-Tune, a wonderful Christmas product (\$99.95). I'll spend time with family and friends, go to bars and really enjoy the holiday spirit. I love Christmas!"

Todd Koser '91: "I'm going to Naples (Florida).

Sharon Festa '91: "I'm working at a popular culinary institute on the East Coast, and read every assigned text for the following semester."

Craig Tibaldi '94: "I'm going to go home to the family, see people, and be greedy for gifts. Have a superficial Christmas, but with good

Paul Coppola '94: "I'm going to work so I can afford to come back to Ursinus next semester.

Jerry Licata '94: "I'm going to go to court, drink lots of eggnog, sing Christmas songs, give presents to my family, get presents from my family, and enjoy not being at Ursinus, but miss the Betans."

Heather Maillett '93: "More of the same, except in the Christmas

Gaela Latour '93: " Try and find shelter and presents."

Arts and Entertainment

Video Review

BY SARA JACOBSON Assistant Arts and Entertainment

What makes a chase scene in a movie original? Bird On A Wire starring Goldie Hawn and Mel Gibbson repeatedly finds the answer to this question. Be the chase scene over railroad tracks, in the air, or in an indoor zoo, the movie never becomes redundant. Bird On A Wire proves that there is still some originality left in Hollywood.

The story opens as Marianne (Hawn) runs into a familiar looking man pumping her gas at a remote gas station in an out of the way, small town. The man is actually Rick Jarmis(Gibbson) who used to be her closest friend before he mysteriously disappeared in South America. Marianne continues her travels, but Rick recognized Marianne and calls the federal witness relocation protection agency. For the past ten years Rick

Current Movie

BY DEBBIE MOORE Of The Grizzly

Dances With Wolves is a film directed by, produced by, and starring Kevin Costner. It is a "beautiful and moving movie about a man fighting for the North in the Civil War who comes into contact with Sioux Indians. This movie is excellent because it is the first movie of its kind to be sympathetic towards the Indians. The movie follows the northern lieutenant as he becomes integrated into life. This movie is beautiful and should definitely be seen on the big screen. Although the movie's length, 3 hours, may put some people off, don't let it put you off. This movie is a must-see and it won't even seem like 3 hours. By far Dances With Wolves is the best movie of 1990.

had been moving form place to place under different identities for his protection from the South American drug kingpin he helped put away ten years ago.

Unfortunately, the drug lord has been released from prison and is seeking his revenge. He has corrupted the federal witness relocation protection agency and is coming after Rick. Marianne returns to the gas station to confirm her suspicions just as Rick has been found by the drug lord's hitmen. Rick climbs into Marianne's car to start off a hilarious set of chase scenes as the pair run from the drug lord, the federal witness relocation agency, the police, and Marianne's husband.

The movie is great. The chases are inspired and played wittily by Hawn and Gibbson. One of the funniest parts of the movie is when Rick reassumes one of his past identities as a gay hairstylist. It is a movie that ends with a climatic, exciting shootout. Bird On A Wire is a movie worth seeing.

Jane's Addiction Concert Review

Whining Slut or Musical Goddess?

BY MATT BECKER Of The Grizzly

Two weeks ago the most anticipated show of the year in Philadelphia was played at the Tower Theater. And what a disaster it turned out to be. The Buckpets opened up the show and played a short opening set which was liked by most. I missed them because I was busy pounding beers in the parking lot. Oh, well.

Then Jane's came out and proceeded to rip through 8 quick songs spanning a meager fifty minutes. Then they walked off the stage. No explanation. Then the house lights came on and the goons (security) surrounded the stage. So, realizing that they have just been screwed over royally, the crowd starts chanting obscenities and ripping up seat cushions. This spills out into the street where the crowd tries to roll the tour bus

Then the cops arrive and start beating the snot out of kids. So a chant of "f*!@ the pigs" arises and more cops arrive. The crowd eventually left after pigs in full riot gear arrived.

Perry Ferall, the lead singer of Jane's, offered this reason as to why they left the stage so early. "The crowd was lame. They needed an enema." Another band member said that the sound system sucked. Well, Perry, have you ever given any thought as to what would happen if people started enjoying themselves and losing their minds? The goons (security) would pounce on and pummel anyone who they thought was getting out of hand. I have been to well over 25 concerts and at over half of them the goons beat the tar out of someone. Perry, why don't you put your meager ass up against one of those meatheads? We'll see how crazy

and out of control you get! And another thing, even if the crowd is lame, it's your job as an entertainer to get them pumped up and give them a reason not to sit on their butts and yawn. If you can't do that you have failed to entertain

Perry, the crowd wasn't lame. I enjoyed what little of the concert there was and...Perry, you need a major attitude readjustment. You single handedly alienated over 3000 people. Good job, sissy!

P.S. I still like Jane's even though they pissed me off big time...concert goers will be able to get a \$5 refund from Electric Factory Concerts...Pete Smith does have something on me now. At least warrant would play a full set, even with a lame crowd. But Pete, they still suck. Ha!Ha!

Soap Box

BY ELLEN SCHATZ Of The Grizzly ALL MY CHILDREN

Derek seriously doubts Angie's prognosis for his complete recovery. Ceara pretends to be concerned for Skye and Jeremy (How Noble!), but Skye accused her of being hot for her future father-in-law (Good call, Skye!!). Dixie sets herself up to catch Billy Clyde. Bridget and Glinda confirm Erica's suspicions that Trevor and Barbara spent a few hours together at a hotel. (At least it wasn't a sleazy motel!) Erica heads straight to Jackson and tells him she loves him (oh no, not the "L" word!!)

ANOTHER WORLD

John had dinner with Taylor, but wished he was with Sharlene. Taylor is excited when John says he's going to the snowflake Ball (What a name!!), and shows him her invitation. Vicki dumps Ryan, but when she sees him with Paulina, she warns her about him. (A little jealous, Vicki?) Paulina is more concerned when she overhears that Ryan has found the surveillance that Jake made of her. Cass tried to get Marley to tell the truth, and she finally admitted she's hiding something.

DAYS OF OUR LIVES

Roman, our hero, rescues everyone from the rubble of the Alamain villa. Leopold dies and Lawrence is devastated, but Carli kindly tells him it's all his fault. Roman escorts Frankie to the Brady's, who gladly accept him when he reveals his true identity. Frankie decides to live with his sister, Carli, instead of the Brady's. Hearing of Roman's return. Dr. Baker heads straight for him to tell him of her findings on Nick's murder. Too bad for her, Roman doesn't care. Roman overhears Julie and Johnny accusing each other of Nick's murder. Roman tells Julie that he wants to see her gun, and her assistant later tells her the gun is missing. Julie says not to worry or mention it. (Pretty suspicious if you ask me!!) Isabella moves in with a paralyzed Victor to protect him from Johnny. Jennifer is terrified about sleeping with Jack again, vividly recalling Lawrence raping her, and asks him to just hold her. Melissa rejects Emilio's marriage proposal realizing he's using her.(Good choice, Melissa!!)

GENERAL HOSPITAL

Rita conveniently forgot to tell Bobbi that Tony was sleeping at the hospital, by Tony and Bobbi came to an understanding, kissed, and made up. After Robert refused to marry her, Kate left Port Charles for good. Scott tries to talk Edge into taking the diamonds, but Edge fears losing Anna's friendship. (Yeah, right!) Robert tells Lucy she'll have to wait until 5p.m. for her diamonds. Anna confronts Edge about his identity, and he admits he's Evan Jerome

SANTA BARBARA

Eden is Keith's top suspect in Quinn's murder. He tries to plea bargain with Flame. Keith tells Cruz that Eden is his top suspect just to get a rise out of him. Kelly called Eden to apologize to her. Cruz buried the gun to protect Eden, and Keith arrived just as they finished (and the plot thickens...) Robert tells Kelly how he feels and that she can take all the time she needs. He's shocked to find her walking when he returns (what a faker!!).

Mixed Up

BY SARA JACOBSON Arts and Entertainment Editor

The Cure has been a popular band on the new wave arena for years. With their latest release, "Mixed Up" they transform some of their older songs into a different sound.

The Cure, who has not released a new tape since their last hit "Disintegration" has come up with an album of remixes. "Mixed Up" contains no new material, only previously unreleased extended mixes. There are some classics Cure favorites, like "In Between Days", "Hot! Hot!", and "Caterpillar Girl" which have been mixed into a danceable form. Some hard core Cure fans will complain that the tape is too commercial and that the Cure was never meant to be a dance group. However, some of the new mixes are definite improvements and good versions of the old songs.

Whether or not you like the old songs the way they were or prefer these slightly changed versions, "Mixed Up" should be given a chance. The new sound may just hold the fans over until the Cure's next release.

Arts and Entertainment

European Old Master Prints

FROM COLLEGE COMMUNICATIONS

From Mantegna to Goya: Selections from the Muriel and Philip Berman Gift of European Old Master Prints at the Philadelphia Museum of Art is the title of an exhibition of 112 prints to be displayed at the Philip and Muriel Berman Museum of Art at Ursinus College from Dec. 4,1990 to Feb. 3,1991. The prints were selected from thousands given to the Philadelphia Museum of Art by the Bermans in 1985.

The exhibition highlights the history of European print making form the 15th through the 19th centuries. First shown at the Philadelphia Museum of Art in 1986 and curated be Ellen Jacobowitz, former acting curator of prints at the museum, the show highlights works by the most important inventors of and experimenters in the various print making techniques of the times. A full range of subject matter is represented in the exhibition.

Among the artists whose works will appear in the exhibition are Andrea Mategna, Pieter Brueghel, Hendrik Goltzius, Rembrandt van Rijn, Giovanni Comenico Tiepolo, William Hogarth, Giovanni Battista Piranesi, Albrecht Durer and Francesco Goya.

Print making came into its own in 15th century Europe with the widespread availability of paper, the rise of a prosperous urban middle class and improved trade routes. The first masterpiece of engraving, Battle of the Nudes, created by the Italian sculptor and painter Antonio Pollaiuolo in the 1470's, appears in the exhibition. Pollaiuolo was a contemporary of Mantegna's, whose Risen Christ between Saints Andrew and Longinus, c. 1472, is also included. Only seven prints firmly attributed to Mantegna exist in the world

Early etchings, including Albrecht Durer's The Desperate Man, c.1515, and Adam by littleknown German artist Daniel Hopfer (1470-1536), the first to develop the etching technique, are included in the exhibit. Prints by Dutch engravers, French mannerists, and Venetian etchers will appear in the show. Of special interest is the rare first edition series of dream Prisons by Venetian theatrical designer Giovanni Piranesi. Goya's early 19th century works draw on pure fantasy, which probe the deepest human fears and hopes. Goya was one of the most powerful innovators in the graphic arts.

In July of 1985, the Philadelphia

Museum of Art and the Pennsylvania Academy of the Fine Arts announced a joint agreement by which 43,000 European prints, then owned by the academy, would be acquired by the Philadelphia Museum in exchange for six important works of American art and funds contributed by the Bermans for this purpose. Philip Berman was then a trustee of the museum, and is now president of its board.

This collaboration between two of the city's most respected institutions allowed a significant body of work to remain in Philadelphia. The American works given to the Academy reinforced its mission as a museum of American art. the transfer of the old master European prints tot he Philadelphia Museum of Art, through the Bermans' generosity, allowed that collection to benefit from the attention of the Museum's Department of Prints, Drawings and Photographs in terms of scholarship, exhibition and preservation.

The Berman Museum is open to the public from 10 a.m. to 4 p.m. Tuesday, Wednesday, and Friday; from 10 a.m. to 8 p.m. Thursday; and noon to 4:30 p.m. Saturday and Sunday. Admission is free and open to the public.

At the Playhouse

BY JENNIFER STRAWBRIDGE Arts And Entertainment Editor

Big River drew quite a crowd last Friday night at the Walnut Street Theatre. This musical adaption of Mark Twain's Huckleberry Finn follows Huck and Jim down the Mississippi River where they have a number of adventures.

Big River follows the story-line closely, however the first act is rather choppy. The only thing moving the play along is a string of songs. I would have been clueless as to what was going on had I not had Huckleberry him crammed down my throat in the classroom

Act II picks up the pace and pulls the play together. The singing is admirable and the scenery is

colorful and effective. Jim and Huck spend a good deal of time on an authentic looking raft that travels back and forth across the stage.

Although I have been exposed to Huck Finn a number of times, this musical version was a new experience.

Big River, directed by Chuck Abbott, is a seven-time Tony award winner. If you haven't beaten Huck Finn to death in the classroom, Big River still provides an enjoyable night out.

The Walnut Street Theatre offers a special student subscription. Full-time students may subscribe for \$1 when a second student subscription is purchased for \$43. Other student discounts are available. For more ticket information call (215)925-6885

Attention Skiers

BY MICHELLE ROBERTSON
Of The Grizzly

The Ursinus Ski Club is planning a trip to Sugarbush, Vermont on January 6th to the 11th for Sugarbush's annual College Week. This trip which costs only \$315 for five days' lodging, five and a half days lift tickets, and transportation, is shaping up to be the best trip the club has offered yet. Sugarbush resort, consisting of two mountains, South Basin, and Mt. Ellen, has the highest peak in the Green Mountain National Forest. Its mountains contain downhill skiing for skiers of all abilities, as well as snowboarding, cross country skiing, and ice skating. When the sun goes down, the club will still have plenty to do. "Fun Shuttles", starting at 5:30 p.m. take college week guests to all the local bars and restaurants, all of which have food and drink specials especially for college week. The Ski Club will be staying at the South Basin, which has its own shuttle bus to the ski slopes. The condos themselves have a T.V., phone, fireplace (with firewood), full sized kitchen. Throughout the resort area located many amenities, such as an indoor pool, tennis, saunas, squash, game room and an eight person outdoor hot tub. The trip promises to be the highlight of the ski season. This trip also STILL HAS ROOM AVAILABLE!! All student, faculty members, and friends from other colleges are welcome. However, this is a popular trip and the condos are filling up fast, so act now. If you think you may be interested, or you would like some more details feel free to call either Ryan Jacoby at 454-0226, or Michelle Robertson at 454-0407.

Edie Brickell Reviewed

BY MATT BECKER
Of The Grizzly

Edie Brickell has, by leaps and bounds, the most annoying singing voice ever created by our wonderful God. You ask, "why He would torture us with such a straining "erethal" whine? Who knows? Why did He torture Job? Who knows? I do have one hypothesis, though, and that is to test us. To test our ears and see how much awful sound they can take at any one time. And that is about, oh, the length of any song that is sung by Ms. Brickell.

It's not that I hate her, but I can

It's not that I hate her, but I can only stand one Edie Brickell song in any given 2 hour time slot. It's sort of like sex more than once a day, it gets distracting...hold the press...scratch that...bad example. I would gladly have sex at least once a day with a heinous troll if it meant Ms. Brickell would never utter or moan another singing syllable the rest of her life. But that will probably never happen. I have standards and some people like this "pseudo-hippie wanna-be,

give peace a chance, I'm Ms. Social Conscious" loser. So I'll let her whine.

Enough of that and now on to her new album Ghost of a Dog. Well folks, it sucks. Period. That's all. Freddy lent me this C.D. and he said that it was recorded in a drug-induced hypnosis. Doesn't surprise me. This album would be terrible if she recorded it sober. Now here is an individual critique of each song.

- 1. Mama Help Me-Junk
- 2. Black and Blue-Junk
 3. Carmelito-*See Below*

- 4. He Said-Confusing Junk
- 5. Times Like This-Dumb
- 6. 10,000 Angels-Dumb Junk7. Ghost of a Dog-Total Crap
- 8. Strings of Love-Sappy Crap
- 9. Woyaho-Silly Crap
- 10. Oak Cliff Bra-Dumb Crap
- 11. Stwisted-See #8
- 12. This Eye-Stupid
- 13. Forgiven-Really Stupid
- 14. Me By The Sea-Really Sappy Junk

*Now, I must confess. I like Carmelito. It has a hip Spanish beat and even better lyrics. Such as, "my friend I must confess, I pulled off her dress and had the time of my life with your wife." One flash of brilliance out of 14. Poor ratio, Edie, very poor. I'll finish off this piece of literature with a little advice. The very talented New Bohemains (Edie's back up band) should really consider getting a lead singer with a little talent and/or singing voice, otherwise they wallow in mediocrity forever.

In the Spotlight

Spotlight: Amy Laskin/Tropical Paradise, an exhibition of paintings and other works by King of Prussia artist Amy Laskin, will be on view in the upper gallery of the Philip and Muriel Berman of Art at Ursinus College from Dec. 7, 1990 through Jan. 20, 1991.

The exhibit will be the first in a new "Spotlight Series", which will feature the works of contemporary

The artist, primarily a painter, draws her subject matter from the lush landscape of Jamaica, which

allows her to interpret her environment in a spiritual manner.

An opening reception for the two shows beginning next week at the Berman Museum of Art at Ursinus College (From Mantegna to Goya: Prints at the Philadelphia Museum of Art, and Spotlight: Amy Laskin/Tropical Paradise) will be held on Friday, Dec. 7, from 6:00 to 8:00 p.m. at the Museum. The general public is invited to attend.

desired some to a good finish.

Swimmers Host Double-Header Weekend

BY JUDD WOYTEK Sports Editor

The women's swim team went into Saturday's meet against Swarthmore undefeated in the MAC. Nothing changed this weekend! The women who had just soundly beaten Bryn Mawr last Wednesday found it surprisingly easy to wipe out the Swarthmore team 122-78.

The Lady Bears began the meet with a win in the 400 yd. medley relay with a team of Jen Derstine, Mary Garrett, Lisa Wessner and Senta Bamberger. The relay set a new team record cf 4:17.25!! Garrett then helped the women to an even greater lead by placing first in the 1000 yd. freestyle, with a 4th and 5th from Kelly Crowers and Brenda Dreyling respectively. Wessner then took first in the 200 yd. freestyle while Rachel Sargent and Jen Dorr came in 5th and 6th respectively.

Bamberger picked up her second win in the 50 yd. freestyle with Denise Miller taking a third place in the event. Derstine and Terri Johnson captured first and fourth in the 200 yd. individual medley and Wessner and Crowers took first and third respectively in the 200 yd. butterfly. Bamberger, Abby Rosenbaum and Dorr went 1-2-5 in the 100 free and Derstine, Johnson and Deb Butzbach placed 1-3-5 in the 200 yd. backstroke.

Garrett captured another win in the 500 vd. freestyle with Dreyling and Sargent taking 4th and 5th in the event. Miller, Dorr and Butzbach placed 3-5-6 in the 200 yd. breaststroke and the 400 yd. freestyle relay of Crowers, Miller, Johnson and Rosenbaum finished off the meet with a win.

The Aqualadies also had no problem handling Division II Kutztown at the special Sunday Matinee meet. The same relay team mentioned above took a first place to start another meet off with a bang. Garrett again won the 1000 yd. freestyle and she set a new team record of 11:20.97, breaking the old record by over

Dreyling took a 3rd and 4th in the event. Wessner again won the 200 yd. freestyle with Sargent and Dorr taking 5th and 6th respectively. Bamberger continued the winning streak with a first in the 50 yd. free followed by Rosenbaum and Miller taking third and fourth respectively.

Derstine and Johnson went 1-3 in the 200 yd. IM as did Wessner and Crowers in the 100 yd. butterfly. Derstine then picked up another win in the 100 vd. freestyle with Rosenbaum and Dorr taking third and fifth respectively. Bamberger, Johnson and Butzbach went 1-4-5 in the 100 yd. backstroke while Garrett picked up another win in the 500 yd. freestyle followed by Sargent and Dreyling taking 4th and 5th respectively. Miller placed second in the 100 yd. breaststroke with Dorr and Butzbach taking third and fifth respectively.

Mike Baganski executes his top placing bro

medley relay from the team of Judd Woytek, Mike Baganski, Matt Landis and Drew Seibel. Distance Warriors Steve Grubb and Jeff Andrews then went on to take first and second in the 1000

of Grubb, Andrews, Streck and Brown, Unfortunately, this was not enough, and the Bears lost the meet 90-115.

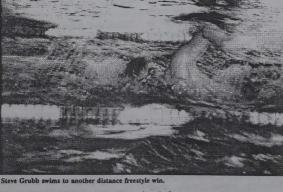

Sunday's meet against Kutztown was closer, but the Bears could just not pull out a win. The meet started off with the same medley relay team taking a second followed by a 1-3 finish in the 1000 yd. freestyle by Andrews and Seibel respectively. Grubb, Foust and Chrzanowski then placed 1-2-6 in the 200 vd. freestyle to help the Bears along. Baganski, Streck and McGeorge went 1-3-6 in the 50 yd. freestyle followed by a 3-5-6 finish in the 200 yd. IM from Brown, Camp and Simpson respectively.

Woytek, Landis and Camp took 3-4-5 in the 100 yd. butterfly while Brown, Streck and McGeorge went 2-3-6 in the 100 yd. freestyle. Foust, Woytek and Jeff Brown placed a disappointing 4-5-6 in the 100 yd. backstroke while Grubb, Andrews and Seibel uplifted the team with a 1-3-5 finish in the 500 vd. freestyle.

Baganski placed a sound first in the 100 yd. breaststroke with Chrzanowski and Camp taking 5th and 6th respectively. The 200 freestyle relay team of Grubb, Andrews, Streck and Fred Brown captured a close first to end the meet with a score of 97-105.

The Aquabears now take some time off until their trip to Florida to train for eight days at "Camp Zackey - Florida." The team returns to Ursinus on January 8,

1991 for "Camp Zackey" and the PAW meet. The Bears then resume their normal meet schedule on Saturday, January 12, 1991 against Gettysburg.

The women finished the meet with a win in the 200 yd. freestyle relay with a team of Dreyling, Sargent, Butzbach and Derstine. The final score was 110-77.

The men's team did not fare as well over the weekend. Both meets were very close, however, and coach Bill Zackey said that he was pleased with the swims. The men started off Saturday's meet against Swarthmore with a second in the

yd. freestyle, followed by a 4-5-6 finish in the 200 yd freestyle from Chris Foust, Seibel, and Frank Chrzanowski respectively. Baganski then took a first in the 50 yd. freestyle with Dean Streck and Brian McGeorge coming in 3rd and 5th.

Fred Brown, Landis, and Willie Simpson captured a 2-5-6 finish in the 200 yd. IM and Woytek and Josh Camp suffered a 4-5 finish in the 200 yd. butterfly. Fred Brown went on to place 2nd in the 100 yd. freestyle with Streck and McGeorge taking a 4th and 5th respectively in the event. Woytek redeemed himself in the 200 yd backstroke by capturing a first while Landis and Foust came in 3rd and 6th respectively. Grubb, Andrews, and Seibel placed 2-3-5 in the 500 yd. freestyle with an unexpected win from Swarthmore's Tim Childers.

Baganski captured another first in the 200 yd. breaststroke with Chrzanowski and Camp taking 4th and 6th respectively. The Bears ended the meet with a win in the 400 yd. freestyle relay from a team

Extra **Point**

BY STEVEN GRUBB Assistant Sports Editor

Pro football is enjoyed by millions of people all over the world, especially the young. At this time of year, open the Sears or JCPenneys Wish books and look at all the boys' merchandise with

football teams' logos or All-Pro players' numbers on them. Look in the sandlots full of young children pretending to be Joe Montana or Barry Sanders. These football players are heroes. Whether they like it or not, they are in the public eye.

Pro football commissioner Paul Tagliabue has forgotten his obligation to these youths and to the rest of the population by reinstating Dexter Manley after multiple violations of the NFL's drug policy. This country stresses drug abstinence, and while the war on drugs can not yet claim victory (cocaine prices are up, supply is down and purity is shrinking), drug abuse by minors has decreased by around 10%. Consider these positive signs in a difficult war;

and now this gaffe. Mr. Tagliabue now sends the message that, "convicted drug abusers have a place in the NFL if they have received treatment. We'll give you a second chance! Lifetime bans our strongest deterrent? Don't worry, everything can be repealed." And to think professional sports turned down a true legend's appeal of a lifetime ban when they left "Shoeless" Joe Jackson out of the Major Leagues and the Hall of Fame for a crime that was never proved he actually committed. The question we must ask

ourselves is do we want our youths or anybody in America to know that if they use drugs they'll be granted a second chance? Or do we want people to not use drugs at all, to have no second chance because the first mistake never existed? Give Mr. Manley credit for reportedly kicking his drug

habit. I think we all see the need for drug treatment programs. But don't glorify these men who have repeatedly abused drug policies that they were aware of.

I hope I never open my Sears Wish book and see Red Cardinals jersey with Dexter Manley's number on it. And in my backyard I hope I never hear a high-pitched voice celebrating a sack by his or her hero Dexter Manley. But we take that risk by allowing these repeat drug offenders re-admission into the NFL.

Lady Hoopsters Shoot for Title

RY JULIE HELM Of The Grizzly

With four seniors returning to this year's roster, the Ursinus Lady Bears have the right mix of talent and experience to challenge for the MAC championship.

Leading the squad are captains Deb Martin and Trina Derstine. Derstine, a Kodak All-American, was averaging approximately 22ppg before she was sidelined with an eye injury. In her absence Martin has carried the team offensively. pouring in 19ppg. Deb is currently only eight points away from reaching the 1000 point mark in her collegiate career.

include Additional seniors Donna Greybeck and Nicole Myers. Starting at center Donna scores 11ppg and is the team's leading rebounder. Myers, a two sport athlete, competes for time at the off guard spot. Nicole plays field hockey as well as basketball.

The junior class is also strong, featuring two members of last year's starting line-up. Megan Chmiel and Toni Wenger return, but ankle injuries have sidelined them for most of the early season. Proving she is recovered, however, Chmiel scored 15 points in Saturday's loss to Holy Family.

Wynique Reed and Dee Dee Prickett round out the junior class. Reed, an aggressive rebounder, sees time at power forward. Prickett, meanwhile, replaces Veronica Algeo, the only senior from last season, at point guard. A cool-headed ball handler, Prickett dishes out 6.8 assists per game.

The lone sophomore for the Lady Bears are Betsy Laskowski and Julie Helm. Betsy, a versatile

performer, sees action at the two, three, and four positions. Helm, a transfer student, has been starting in place of the injured Derstine. However, the return of Chmiel and Wenger, as well as the strong play of Reed and Laskowski, leaves the power forward position up for grabs.

Rounding out the roster are freshmen Heather Colvin, Amy Colistra, and Jeannine Fleming Colvin's aggressive play has earned her a starting position. Colistra backs up Prickett at the point and Fleming splits time between varsity and junior varsity.

The team is coached by Villanova graduate Lisa Ortlip-Cornish. In her fifth season, Ortlip-Cornish is expecting big things from the talented 1990-1991 squad. Assistant coach Sheila Pauley returns for her third season, while Leroy Johnson joins the Lady Bears this year. Johnson coaches the junior varsity team.

Ursinus opened on November 17th at the Susquehanna Tip-Off Tournament. After a tough loss to nationally ranked Keuka College, the Lady Bears rebounded to defeat arch-rival Muhlenberg the consolation game. Follow an easy victory at Swarthmore hoopsters again faced Muhler This time Ursinus came ur falling to Muhlenberg, 74

The Bears snatched an is. victory at Albright on the 29th, but in their home opener, fell to NAIA powerhouse Holy Family. In their next game they travel to Immaculata.

The team is hoping to end on a win at Immaculata before winter recess begins. After a brief break for finals, both the women's and

men's basketball teams will travel to the Bahamas to participate in the Nassau Sunshine Shootout. Coach Ortlip-Cornish is hoping for an early Christmas present-a tournament victory.

The Lady Bear's next home game is on January 17th. For a final time, they will face Muhlenberg. This game will be crucial to the team's MAC success. Both Moravian and Muhlenberg are ranked ahead of Ursinus is the MAC Southeast Division.

Senior standout Trina Derstine is expected to resume playing following winter break, their depth, talent, and experience puts the MAC championship within

Harley's Haven

BY HARLEY DAVID RUBIN Of The Grizzly

Hey sports fans, I'm back! Where have I been? Well, my careers as neurosurgeon, astronaut, and sex therapist have kept me really busy-but not too busy to keep my watchful eye on the wild, wonderful world of Philadelphia

Starting out with football-how about those Eagles? After looking like real doggie-doo in the first six games, they've pulled off a string of wins that have put them back in the playoff picture. I think that it's due to the fact that the offense has shown that it is multi-faceted. The Eagles can beat you using Heath Sherman's rumbling runs up the middle, Fred Barnett or Calvin Williams catching a long pass and flying down the sidelines, the Keiths (Byars and Jackson) catching passes, or of course, the most dangerous weapon of them all, Randall Cunningham. He is on the verge of becoming a complete quarterback, showing he can pass or run with the best of them. If he doesn't get a Pro Bowl bid, it will be a disgrace. My prediction-the Eagles will finish the season at 10-6. I need to see at least two more games before making a prediction about post-season play.

The 76ers are still trucking along, although the absence of Johnny Dawkins is still felt. I don't think that no-names like Andre Turner and Jim Farmer are going to cut it as subs for Dawkins, so Rickey Green and Brian Oliver better continue to play the point as well as they have. Charles Barkley and Hersey Hawkins are picking up right where they left off last year, scoring big when they need to, and Manute Bol is picking up some quality time and making some big plays in the paint. Looking into my crystal ball, I don't see the 76ers winning the Atlantic Division with a big fightthe Celtics look strong early, but then again, they are getting old. If the 76ers can keep on getting by filling the point guard position and

receive continued superstar play from Barkley and Hawkins, I can see them going deep into the playoffs.

Hockey fans in Philly must be overioved to see how well their Flyers are doing. Pete Peeters has taken over the goaltending duties (temporarily) and is doing on hell of a job. Rick Tocchet and Murray Craven have been in the top 20 in the NHL in scoring and don't seem to be slowing up. This is a much improved team from last year, and if the rookies can add a little more scoring punch, I think the Flyers can go far this year. Finally, we turn to my phavorite-

-the Fightin' Phils. So far this winter, they haven't signed any free agents or made any deals. I don't know what will happen if they stay put, but I do know that the addition of Johnny Podres as pitching coach will help the staff a lot, and if the pitching comes around, and if Dykstra, Daulton, and Murphy keep their hitting going, and if Charlie Hayes and Mickey Morandini develop soon, who knows? With the loss of Darryl Strawberry by the Mets, the National League East title is wide open to all comers, and one of those comers could be our Phillies.

Well guys, I know you hate to see the end of my column, so let's end on a high note: Ursinus baseball is right around the corner, and we are "on the prowl", so

NordicPower Reduces Chance of Injury

NordicTrack News Release

Chaska, MN...Experts agree that when it comes to peak performance in sports, flexibility, strong muscles, tendons and ligaments, and a strong cardiovascular system are some of the most important components.

To help young athletes and people regularly involved in sports activities build all of the body's major muscle groups be more successful, Nordic Track has introduced the NordicPower. "With NordicPower, we've created a unique new muscle building machine designed to help people improve their power, speed and flexibility, so they can be their best in sports, whether it be running, golf, wrestling, football, tennis, softball, basketball or skiing," said Jim Bostic, president and CEO of NordicTrack.

According to Steven J. Fleck, Ph.D., sports physiologist with the United States Olympic Committee, 'The incidence of injuries caused by overuse, such as "tennis elbow" and "swimmers shoulder" is lower in athletes who strength train on a regular basis as compared to athletes who don't perform any type of strength training. In addition, the reoccurrence of these injuries is less frequent. This lowered incidence of injury is probably related to the increased strength and power of the muscles, tendons and ligaments which makes them more capable of tolerating stress," added Fleck in a recently-published book, The New Fitness Formula of the '90's.

"If you think of the body as a car, strong muscles are the shock absorbers," said Wayne Wescott, strength consultant for the National YMCA. Muscles that are strong enough to take the pounding of high-impact activities are especially helpful in preventing injuries among runners, dancers, and players in sports such as soccer, basketball and field hockey.

Editors Note:

We apologize to the men's basketball team and the wrestling team for not having articles published this week. No articles were submitted to us. The men's basketball team beat Phila. Pharmacy 57-54 this past week. If anyone is interested in writing for these sports teams next semester, please contact Judd Woytek (454-0153) or Steve Grubb (489-2080). Again, we apologize for not having articles on these teams.

Happy Holidays! - Judd & Steve

EDITORIAL

With the recent policy changes the US has effected in the gulf, one wonders just what the heck is going on. President Bush's gulf policy is a shambles. If he is going to lead the US into a war, he needs to better articulate his policy.

This is not to say that there are not valid reasons for going to war in the gulf, it is merely that Bush has completely muddled these reasons so that no one-the Congress, the American people, our allies-knows exactly what is going on. One week, we are there to defend oil supplies, the next to defend Saudi Arabia, the next to thwart Iraqi agression, the next to liberate Kuwait, and now, the latest reason, to destroy Iraq'a potential nuclear capability. All of these are potentially valid reasons for being there in real world politics, but Bush needs to develop a consistent valid policy enunciating all these reasons and defend this policy. Otherwise, his administration and his "policy" risks sliding down the slippery slope into complete ineffectiveness.

BY ANTONI CASTELLS-TALENS
Of The Grizzly

I took International Politics when I was a Freshman, in Spring 1987. I've forgotten a lot about it, but there are some things I still remember. I remember how when preparing for war, countries have a vital need for propaganda, for dehumanizing the enemy.

Saddam Hussein is working on it. The rhetoric on Arab brotherhood and on American-Israeli imperialism are part of this propagandistic move. Iraq says it doesn't want war, but I guess it's always useful to be prepared.

On the other hand, the United States is also preparing for war. I am not talking about the 230,000 Americans that are in the desert waiting for an order from Washington. I am talking about the brain-washing boom of propaganda that surrounds us.

I was amazed to see how popular the peace symbol (the circle one) was in 1987 in this country. Still now, buying "peace ear-rings" or "peace tie-die shirts" is common in the trendy Philadelphia stores. I am even more amazed now to see that this "peace-hippy-looking" fashion is yielding to a mood of war.

Don't you know what I am talking about? I am referring to the emphasis being put on how much of a Hitler is Saddam Hussein, to the Hussein voo-doo

dolls that you can buy in King of Prussia and that you can stab, hoping the real one will die. I am talking about the professional wrestler that we can see on TV, dressed as an Iraqi soldier, waving the Iraqi flag, and that gets his butt kicked in front of an enthusiastic crowd of children and teenagers that don't even know where the Persian Gulf is. I am talking about my friend Jeff, an Ursinus student, wearing a brand new T-Shirt that says "ATTACK IRAO."

The propaganda is everywhere, and as the American people are slowly getting introduced to a war mood, they seem to ignore the consequences of a war. A war is not a game nor a movie. In a war people get killed, and by people I mean the Arab families as well as the American soldiers.

Iraq is the size of California. It is smaller than the U.S., but larger than Vietnam. Unlike Vietnam it doesn't have a jungle, but like

Vietnam, it could be underestimated, because Saddam Hussein has chemical weapons while the Vietnamese had booby traps. A war in the Gulf cannot be won by either side, it can only bring death and destruction.

It is time that people start understanding that, no matter how many times we see or hear that Iraq is lead by a psychopath, a war would not solve the U.S., Iraq, or Kuwait's problems.

A year ago, the U.S. led a crusade in Panama to defeat another villain. The villain, Noriega, is not ruling Panama anymore, but I read in Columbia Journalism Review that Panama is not doing very well. Eighteen thousand people are homeless as a result of the American invasion, 30% of the people are unemployed, and the murder rate is six times greater than in 1989. After deciding that the Panama problem was solved, now we have this need to go and "free Kuwait." Oh, by the way, Kuwait never was a "free country," and it has been a great violator of Human Rights, but that's another story...

Merry Christmas!

Why Are We Really There?

As the situation in the Middle East worsens, many Americans are wondering just what our motivation for being there is. While it is true that Iraq had no right to usurp Kuwaiti lands, this is not Bush's true reason for sending troops

The White House would like us to think that our military is being used to defend our way of life and stop Saddam Hussein. In reality, we are fighting for our wasteful lifestyle that has driven us to this oil dependency. We are fighting for oil. The Reagan and Bush administrations have previously protected Hussein from legislators who were repulsed by his practices and wished to lower his trade status.

Bush says we need cheap oil to fuel our cars and meet our high electricity demand. However, much of oil need could be curtailed by simple efficiency. For example, if we could use oil as well as Japan we could save seven million barrels of oil per day. Only 730,000 barrels of oil per day were imported from Iraq and Kuwait before the crisis. Peter Balse, president of the Audobon Society, states, "The Bryan bill would have required new cars to average about 40 mpg by the end of the decade...(This) would have saved four times more (oil, per day) than we imported daily from Iraq and Kuwait before the gulf crisis". The Bryan bill was defeated in the Senate by filibuster, but will be reintroduced.

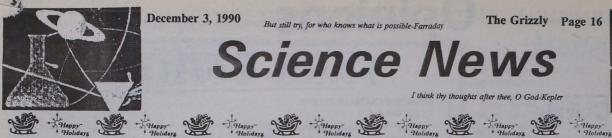

Bush's reasoning is flawed not only from an economical standpoint but also from an environmental one. When we burn oil carbon dioxide, the major greenhouse gas, is produced. Sensitive ecosystems, wilderness areas, and coastal zones are destroyed or altered when oil is

drilled. Instead of developing renewable energy sources, namely solar, the White House, under pressure form oil companies, wants to open up new areas for oil exploration. Two of these areas are the Arctic National Wildlife Refuge and Northwestern coastal zones. Oil generated from these areas would last about one year.

Fighting for cheap oil fails in its own logic. The current price of imported oil is 30-40 dollars per barrel. The weekly 600 million dollar price tag of maintaining our military in the Mid-East raises this to 200-500 dollars per barrel. Our wilderness, coastlines, and soldiers are not worth sacrificing for oil in order to continue our wasteful lifestyle. Put down the gun and harvest the sun.

I think thy thoughts after thee, O God-Kepler

BY BRIAN TOLENO AND JOE MULHOLLAND Of the Grizzly

Anybody who uses the computers in the Myrin Library has probably met the new director of Academic Computing, Steve Kneizys. Steve is a recent graduate of our academic archenemy Franklin & Marshall. Even though he graduated with a degree in chemistry (two thumbs up from these Chem majors!). Steve spent most of his time doing computer consultant work. He designed software for F & M's psychology, physics, and chemistry departments. One impressive

(watch out Saddam Hussein!). Steve is still active with chemistry as well. He is now doing

assignment that Steve completed

for the government was designing

missile guidance transponders

Steve Kneizys, Director of Academic Computing, computer lab at Myrin library

Brain in Brief

BY JUDY EVANS Of the Grizzly

At Ursinus, people spend a lot of time talking about brains- you hear everything from, "He's a brain" to "Is the sheep's brain on the test?" If you've ever had a class in which you had to learn about the nervous system, chances are you've passed hours trying to make sense of the axon-dendrite-forebrain-midbrainhindbrain jumble. Even if you haven't tried to study the brain and its systems, you've probably marveled now and then at how your brain manages your every function. Most of us take our nervous system for granted though, unless something goes

The science of neurology focusses on how and why brain dysfunction are revealed by alteration of function elsewhere in the body- in other words, its the science of nerves and the nervous system. Most of us are so intimidated by the intricate workings of the system and its breathtaking terminology that we dismiss the subject as impossible for the layman to understand. Not so- Toscanini's Fumble and other Tales of Clinical Neurology by Dr. Harold Klawans is a book about the brain written specifically for the curious but not necessarily well-versed. In it Dr. Klawans discusses some of the most interesting neurological case histories, and while he tells

patients' stories with humor and sensitivity, he also sneaks in some brain education for the average person.

The first case history deals with memory. A general surgeon, meticulous, and experienced removes a gall bladder and ten minutes later cannot remember doing so. As his startled and tactful nurse guides him through the suturing process, he asks repeatedly, "Did I remove that gall bladder?" When Dr. Klawans examines him hi is not able to store anything in his recent memory. He remembers names, faces and skills, as well as other things stored in remote memory, but he can remember nothing that happened to him in the last six months. After questioning the surgeon, Dr. Klawans gives his diagnosis: transient global amnesia, of TGA, a temporary condition in which the patient cannot remember anything he sees, feels, tastes, hears, reads, or smells. After the episode is over (usually a day or two), the patient has no memory of it or of anything that happened to him during it, but otherwise the patient is completely normal.

In another case history, a patient's inability to walk properly is traced back to his having been fed a diet composed of chickling peas during World War Two. Another patient has an exciting and creative sex life but experiences excruciating headaches after orgasm. A woman's marital infidelity comes to light only because her grandchild develops Huntington's Chorea, a disease that also sheds light on the New England witchcraft trials. The title of the book refers to an incident that occurred to the famous conductor Arturo Tascanini in 1954. He had been conducting vigorously as was his style when suddenly he stumbled, dropped his baton, then recovered. The diagnosis? Transient ischemic attack, or TIA, in which the blood supply to his brain was reduced momentarily by a series of pressure changes within the blood vessels of his arm. Other case histories are equally mysterious, their solutions equally satisfying.

It takes an expert and patient neurologist to explain the seemingly improbable connections between such bizarre events and their causes, but Dr. Klawans provides technical yet lucid information. The book is meant to be read "from front to back", but the author points out that each chapter can "stand alone" as

published by Bantam in 1988, offers anyone who is interested a fascinating way to appreciate the acrobatics of the nervous system.

research in calorimetry with a medical doctor (the heat of combustion for a medical doctor is approximately 1900 kJ/mole). Steve performs these experiments at home in his Grandpa Munsterstyle laboratory. The calorimeters he uses are made out of Pepsi cans; that's right Pepsi cans! More amazingly, his results from these calorimeters are published in respectable scientific journals. He attributes his "uncanny" ability to get these results published to good stirring: "the key to calorimetry".

Steve has numerous plans for Academic Computing. He has already installed a new Mirco-Vax mainframe doubling the speed of the academic computers and quadrupling the speed of the library MBS system. This Micro-Vax has also greatly increased memory capacities on both these

systems. In the future, his short range goal is to link the Macintoshes to the Novell system He also intends to link the Micro-Vax to the Bit-Net network which will enable Vax users to communicate with colleges and businesses worldwide. Steve hopes to accomplish both of these goals by the middle of the spring

With the work he has done and the projects he hopes to complete, Steve is a valuable addition to the Ursinus staff. Since Steve bought us fries at Zack's while we were conducting the interview, we already know he is a valuable asset to Ursinus

Science Editors' note: heat of combustion for average chem major is 700 J/mole

Bonnie and SAM

BY DONNA LORENZO Of the Grizzly

Bonnie Hutchinson, a senior Biology major working on research under Dr. Hughes, has received a grant from the Pennsylvania Academy of Sciences. The grant will be used to buy specific equipment, a nonradioactive photosensitive tag and a hybridi-slot system. This will allow Bonnie to take her research in the field of molecular biology in a slightly different direction than her previous

Bonnie's research for the past 3 years, has involved a certain gene in a virus coding for an enzyme called SAMase. SAMase is an enzyme found only in four known viruses, all four of which are viruses which infect only bacteria. Therefore, there is no danger of disease in humans or animals since animal cells differ so greatly from bacteria cells. The purpose of the SAMase enzyme is to break down the SAM (S-adenosylmethionine) of the bacteria cell. By doing this, it is preventing the normal immune response in the host cell.

SAM is a very small molecule in comparison to most biological molecules, but it is extremely important. Although Bonnie only studies its action in bacteria, the molecule exists also in animals, including humans. SAM effects such things as methylations (abnormal methylations have been associated with cancer), and production of methionine (one of the amino acids).

Bonnie's work has centered mainly on the topic of methionine production in bacteria. By using a clone of a SAMase gene, she is able to produce SAMase, cleave SAM, and prevent inhibition of methionine production.

This allows more methionine to be

(not Clyde) produced and allows the production to

be studied. Bonnie hopes to have the opportunity to present the methionine research results at a conference in Dallas this May.

At this point, Bonnie has decided to move on to something even more significant. She is now searching for a better SAMase gene which will aid her previous research. In order to do this, she will compare the SAMase genes of the four viruses which possess it by looking at the characteristics of the enzymes. This is the project for which Bonnie received a \$500 grant from the Pennsylvania Academy of Sciences to purchase the non-radioactive

photosensitive tag which would help her clone the other genes. This is money which probably would have been otherwise funded by Ursinus. Now this money will be available for some other worthy cause. The grant Bonnie was awarded is also significant because it proves that research at Ursinus is important to the scientific

Molecular biology is one of the most funded fields of biology today, but it is also a field with relatively few biologists involved. Its importance is obvious when one realizes that what happens at the molecular level is the basis of all life. It is also the approach taken to solving medical problems such as AIDS and cancer.

With Dr. Hughes' guidance and encouragement, Bonnie has chosen to work in this extremely important field. Her plans for the future are to eventually attend graduate school and to do research in molecular evolution.
