## Evaluations Show Drop in Pledge Grades

BY MEGAN MENDTE  
News Editor

Pledging is over, but the semester is not and many new sorority sisters are now struggling to bring up their grades.

In order to keep an eye on pledges grades during the month, long pledging activities, teachers were required to fill out an evaluation sheet on each pledge in their class. They gave the pledges a "2" if their grades improved during pledging, a "1" if they stayed the same, and a "0" if they went down. This year's pledge grades were consistently lower per sorority than last year's. Although this causes concern within the administration, it should have little impact on the regulations placed on next year's pledging activities.

"We also evaluate the pledges performance for the entire semester," said Dean Kane, "And although initial pledge month grades are down, grade point averages per sorority usually come close or equal to the semester before pledging. Therefore, the grades during pledging haven't been low enough to hurt the entire semester.

The pledges attribute this to the mandatory library hours they attend during pledging. "Three hours a night was plenty for me," said Lynn Cunnane, "I seemed to get more done during pledging than I usually did. It forced me to organize my time better than I would on my own."

Faculty evaluations will be taken again at the end of the semester to examine the overall grade point averages for the 1991 pledges as compared to their Spring semester grades.

## SAC Changes to AFAC

BY A. JUDD WOYTEK  
Associate Editor

The faculty voted in approval of the U.S.G.A.'s Activity Fee Allocation Committee (AFAC) proposal this last Wednesday. The proposal will bring an end to the current Student Activities Committee (SAC) which allocates the student activity fee to organizations on campus and also approved new group's constitutions.

The new committee will see membership change and a guideline change. Under AFAC, the student representation on the committee will be eight. The U.S.G.A. treasurer will

act as chair of the committee. Other members will include the U.S.G.A. President, one member from each class, a Campus Activities Board (CAB) representative, and an Organization of Commuting Students (OCS) representative. The student representatives from the four classes will be elected in U.S.G.A. run campus-wide elections in their freshman and junior years and will serve two year terms. For next year, all classes will have elections in the Spring of this year. The Dean of Student Life and three faculty/staff members

See AFAC on page 3

## Voters Choose Wofford

BY ERIKA COMPTON  
News Editor

On Tuesday, November 5, the people of Pennsylvania voted for their choices to fill the offices of United States Senate, Mayor of Philadelphia, and United States House of Representatives from the 2nd District.

Probably the most talked about race was the one for United States Senate. Due to the unfortunate death of John Heinz in April, democrat Harris Wofford was appointed to fill his vacancy. Last week, republican Dick Thornburgh ran against Wofford, with Wofford receiving 55% of the votes. He is Pennsylvania's first elected democratic senator in a generation.

Wofford centered his campaign in support of a national health care plan, sending a message to President Bush that he is "vulnerable on domestic matters." He also believed in the extension of unemployment benefits. Wofford received much support from suburban Philadelphia. He aimed sentiment against the rich, and changed the usual democratic message from one of compassion for the poor to one of meeting the needs of the burdened middle-class.

Many voters got the impression that Thornburgh was taking them for granted, and they didn't like the negative attacks and campaigning on Wofford. Voters liked Wofford's "common touch", and thought of him as "the kind of guy who would sit down beside them and talk...and listen."

In the race for Mayor of Philadelphia, democrat Ed Rendell won by a landslide over republican Joe Egan. Rendell received 68% of the votes, becoming Philadelphia's 127th mayor. His first and continuing challenge will be to bring the city out of debt. Since Rendell received such a large number of votes, it is imperative that he begin to turn the city around immediately. Rendell stated, "It was a long, long, long, long road to get here!" After Egan conceded the race, he said to his supporters, "I want to tell the people of Philadelphia that we have to get behind Ed Rendell."

Before the election, Rendell faced two serious problems. One,

Photo taken from The Philadelphia Inquirer

Harris Wofford speaks to the press after winning 55% of the vote to become Pennsylvania's first Democratic senator in a generation.

was that the black clergy saw his as untrustworthy. He was also a career politician with no election win in ten years. However, Rendell had incredible fund raisers. He raised \$4.5 million, with \$1.6 million being spent on fall television advertising.

Also in Philadelphia was the vote for who would join the United States House of Representatives from the second District. Democrat Lucien Blackwell defeated all his other opponents: N. Smith-Bulford(R), Chaka Fattah(O), and John White(O). Blackwell, a former city councilman, and 26th black House member, said the race was not based on issues. He depended on what is called The Big Lever. It is the endorsement by the Democratic City committee in which he gets one vote each time someone votes the straight Democratic ticket.

Although this was an important election, many people on the Ursinus campus failed to vote. I spoke to 45 people on campus, 12

whom voted. Eight people chose Thornburgh, while four voted for Wofford. Next time you start to complain about "the way things are," stop! If people would vote instead of being so apathetic, "things" could change.

### U.S. SENATE

(D) H. Wofford	55%
(R) D. Thornburgh	45%

### MAYOR

(D) Ed Rendell	68%
(R) Joe Egan	32%

### U.S. HOUSE - 2nd DISTRICT

(D) Lucien Blackwell	39%
(R) N. Smith-Bulford	5%
(O) Chaka Fattah	28%
(O) John White	27%

## Global Perspectives

BY DANA KUSHWARA

Asst. Arts and Entertainment Editor

### World

In Rome, Bush addressed a summit meeting of the North Atlantic Treaty Organization to make sure the United States keeps the confidence of the Western European countries it defends. Bush stated to the NATO members, "if you don't need us any longer, say so." The response was that the European countries still want NATO to exist and for the U.S. to lead it but not dominate it.

The Canadian House of Commons voted by 189-14 to ban the import of possession of military-style assault weapons, require a 28-day waiting period for purchase of guns, stiffer prison sentences for illegal possession of weapons, and restrict gun purchases to people at least 18 years old. Justice Minister Kim Campbell said this bill reflected Canada's "own firearms culture" and stated that it is less violent than the United States.

On Thursday November 7, thousands of people gathered in front of the Winter Palace in St. Petersburg, U.S.S.R. The main reason was to tell the world that Lenin's revolution is no longer worth celebrating. That day marked the 74th anniversary of the Bolshevik take over of the Winter Palace and the Russian Revolution.

### National

Congress sent legislation to President Bush that would lift a ban on abortion counseling at federally financed family planning clinics. Sources say a veto by Bush is threatened and most likely. The lifting of this ban is part of the \$205 billion budget increase in health, education and labor programs for the fiscal year. The ban originally started in 1988 during the Reagan administration and was retained by Bush.

The Center for Disease Control reported that the U.S. smoking rate had fallen a percentage point down to 28 percent. It was stated that smoking is significantly higher among people with bad marriages, the least educated smoke the most, and those who do smoke are starting at younger ages.

Senate Democrats proposed a third plan in the effort to help the jobless. This plan would extend payments to those whose benefits already expired. The plan would also give the President three options for financing the \$5.6 billion estimated to cover the costs. One option is to declare an emergency and borrow the funds. Another is to collect \$2.5 billion from delinquent student loans and slightly increase the federal unemployment tax. The last option would take \$3.6 billion from foreign aid spending.

Magic Johnson announced on Thursday November 7th that he has contracted the AIDS virus and has retired from the Los Angeles Lakers. In his speech he said "I'm going to miss playing. I will become a spokesman for the HIV virus because I want young people to realize they should practice safe sex. Sometimes we're a little naive about it. You think it could never happen to you."

### Community

The University of Pennsylvania Veterinary Hospital has started a new animal bloodmobile. The mobile is used to travel to various kennels in the area where they collect blood donations for their work in veterinary transfusion medicine. Around 600 dogs are used regularly to supply the blood needed for the three to five transfusions performed daily with donated blood.

A 30 year old Bensalem resident was killed on Thursday when a fire engulfed the engine of his car in the Fiesta Motor Lodge parking lot in Willow Grove.

Rising requests for financial aid are being reported by colleges across the region. At West Chester University the numbers rose by 1000 from 1990 to 1991 and at Drexel University thousands of students receive \$32 million in loans and grants. Laura Knapp, assistant director for policy analysis at the College board in Washington, stated the factor largely responsible for the surge requests is an economy that is about as soft as a Nerf ball.

## Tri-Lambda Meets

BY TOM WILUSZ  
Features Editor

On Wednesday, November 16, the Tri-Lambda Life-Long Learners met to hear Miss Donna Van Dusen speak on "Characterizing Verbal Aggression". Miss Van Dusen is a professor who has been studying the field of verbal aggression, her special interest being "Discourse Analysis", the study of the layered meanings involved in any dialogue.

Miss Van Dusen divided her discussion into three parts: a definition of verbal aggression, delineation of its effects, and methods for recognizing it. Verbal aggression is defined, she said, as "a message which attacks the self-concept of the receiver in order to deliver psychological pain," although she stressed that verbal aggression is often unintentional, and that there is a real difference between verbal aggression and friendly banter (although the one is often disguised as the other, making identification of such abuse even harder). Essentially, any statement that portrays the listener in a negative light is verbal aggression.

Van Dusen's study is important because of the serious negative results of verbal aggression. Aside from hurt feelings, even unintentional abuse of this sort is often a cause of broken marriages, claims of sexual harassment, and even physical violence. It is Van Dusen's hope that through study we can learn to recognize and refrain from verbal aggression, and identify what it is that makes certain people especially abusive.

The post-speech discussion centered upon the recent Clarence Thomas hearings, and the very abusive nature of them. Miss Van Dusen noted that the Senate committee was very aggressive, particularly towards Anita Hill and identified this as the reason so many of the discussion members had found Senators Specter and Helms (for example) so offensive. Thomas too, it was noted, had been very verbally aggressive, and had used that to put the Senators in uncomfortably defensive positions. Miss Van Dusen closed discussion by examining various personal examples of verbal aggression.

Tri-Lambda's next meeting will be on November 13, with a discussion on Reader Response.

Reminder: Grizzly meetings are on Monday nights at 8:30 p.m. in the Student Publications Room (3rd floor Bomberger Hall, Myrin Library side).

# Salk to Speak on Founders' Day

FROM COLLEGE COMMUNICATIONS  
Special to The Grizzly

Dr. Jonas Salk, developer of the world's first successful polio vaccine, and more recently leader of efforts to create an effective AIDS vaccine, will speak at the annual Ursinus College Founder's Day Convocation at 2:30 P.M., on Sunday, November 17, in the College's Bomberger Hall Auditorium.

Salk, who last June vowed that he would inject himself with his experimental AIDS vaccine before the end of this year, will talk about world health issues on a day when Ursinus plans to recognize the sciences in general. The public is invited to attend the ceremony, but is advised to arrive early because seating is limited. A closed-circuit television will be set up in a room adjacent to the auditorium so that any overflow crowd will be able to see and hear Salk speak.

During the convocation, which traditionally is also the College's mid-year commencement, Ursinus President P.P. Richter will confer honorary doctors of science degrees upon both Salk and Dr. Teru Hayashi, Ursinus 1938, a cell physiologist and specialist in muscle proteins. Richter also will formally install Ursinus Physics Department Chair Dr. Martha C. Takats in the Clamer Chair of Physics. Twenty-six students from the College's day and evening divisions will receive their associate's of bachelor's degrees on Founder's Day as well.

An hour before the convocation, there will be a ribbon-cutting ceremony at the Ursinus Life Science Building, which since last May has undergone a major complete renovation that includes a new addition and the upgrading of laboratories, classrooms and faculty offices. Then, during the convocation itself, the building will be rededicated and renamed Thomas Hall in honor of L. G. Lee Thomas, a life member of the

Ursinus Board of Directors, his wife, Florence S. Thomas, and his sister, Lucille V. Thomas, long-standing and faithful friends of Ursinus. The building houses the Ursinus biology and psychology departments.

This Founder's Day incidentally also marks the centennial of Bomberger Memorial Hall, site of the day's formalities. The hall was named for the College's founding president, John Henry Augustus Bomberger. J.H.A. Bomberger IV of Atlanta, Ga., a direct descendant of the founder, is expected to attend the commemoration.

Salk, 77, a native of New York City, holds his undergraduate degree from the City College of New York and his M.D. from the New York University College of Medicine. In the 1940s he helped develop a noninfectious "killed virus" vaccine against influenza at the University of Michigan. In 1947, he became director of the Virus Research Laboratory at the University of Pittsburgh, where he continued his research on influenza and began studies on poliomyelitis. It was this research that led to the development of another "killed virus" vaccine—the first effective vaccine against polio, a dreaded disease which was killing and crippling thousands of children a year prior to its development. This vaccine was licensed for public use in 1955.

After this, Salk's research turned to cancer and autoimmune diseases. In 1960 he founded The Salk Institute for Biological Studies. Today the institute is at the forefront of research in genetics, immunology and the study of the human brain. Dr. Salk, the institute's director until 1975, currently holds the title founding director.

From 1963 until 1984, he conducted research aimed at understanding and manipulating the immune system and its bearing on the control of autoimmune and neoplastic diseases, such as multiple sclerosis and cancer. He

continues to assist international health agencies in encouraging developing countries to establish immunization programs against polio and other infectious diseases. In 1986, Dr. Salk initiated work on a vaccine against the HIV virus and AIDS, work which continues today in collaboration with several research groups around the world.

Hayashi, who received his Ph.D. from the University of Missouri after graduating from Ursinus, taught zoology at Missouri and then at Columbia University, where he served as chairman of the zoology department from 1963 to 1967. Subsequently, he was chair of zoology at the Illinois Institute of Technology from 1967 to 1979 and a senior scientist at the Papanicolaou Cancer Research Institute from 1989 to 1985. He is the editor of two books on cell biology and the author of about 100 research papers in his field. A former Fulbright and Guggenheim fellow, Hayashi is currently an emeritus trustee of the Marine Biological Laboratory.

Professor Takats, a resident of Philadelphia, has been a member of the Ursinus faculty since 1969, and was named chair of the College's physics department following the retirement of Dr. Evan S. Snyder last summer. She will be the second member of the faculty to hold the Clamer Chair of Physics, following Snyder in that honor. In recent years her research has centered on the use of interactive computer software in the teaching of physics. A Phi Beta Kappa graduate of Wellesley College, she holds a master's degree from the University of Wisconsin and a Ph.D. from the University of Pennsylvania.

Ursinus has long held a reputation for excellence in the sciences. It is especially well-known for preparing students for medical school. Ninety percent of its graduates who apply to medical, dental and veterinary schools gain acceptance at those institutions.

# Haley Visits Nearby High School

BY CHARLES WASHINGTON  
Special to The Grizzly

On Friday, November 7, students from Ursinus College were invited to attend a speaking appearance by world-renowned author Alex Haley at North Penn High School. Haley, most notably remembered for his two books, The Autobiography of Malcolm X and Roots, began the evening by recognizing a nine year-old boy, with whom he had corresponded but had never met. The young man was brought on stage and introduced to the audience.

This led to the topic of Haley's speech, which was, interestingly, "The Importance of Interaction Between Children and Their Grandparents." He stated that such relationships reinforce the idea of oral history in America. He told the crowd how his relationship with his grandparents, especially his grandmother, influenced his life and helped him along the path of his successful career. He also gave a brief life history as well as a summarized version of the Roots story.

After the speech, Haley held a question-and-answer session. He said that the controversy surrounding the production of the movie, "The Autobiography of Malcolm X," his second book to have been made into a movie, is a "bunch of nonsense." He felt that the people who were disputing the movie's production have misdirected their energies. He also revealed that he has another book, entitled Henning, about life in the small town in which he grew up, coming out shortly.

The evening ended by Haley signing copies of his books (which were on sale for \$6). It was truly an interesting and exciting event to hear and see, arguably, one of the most eloquent and creative speakers of our time.

# AFAC con'd. from p. 1

appointed by President Richter will finish out the group. There is a drop in the number of faculty representatives from six to four and an increase of one student. The new ratio of 2:1 in favor of the students will give the students more control of the committee and where funds are sent.

For the remainder of the 1991-1992 school year, the committee will examine the new procedures and set new guidelines for committee operation for next year. Proposed are stricter guidelines for allocation of funds and strict record keeping on the part of the organizations that receive funds. The possibility of relocating student organization accounts off campus is being looked at due to the complicated system which the College Business Office uses for accounts.

The new committee will not have the responsibility of reviewing constitutions for changes. The revision period will take place in the U.S.G.A. All new groups will submit their constitutions to U.S.G.A. and revisions will be made. The constitutions will then be sent to AFAC for final approval and to be sent to the faculty. The constitutions must still pass through AFAC because the faculty must receive constitutions through a campus committee, not from a student group.

All requests for block allocations (made for the entire school year) will always be considered in the Spring before school lets out. This will alleviate the rush of requests in the beginning of the fall semester. A notice will be sent to all organizations reminding them of the new procedure. Special allocation requests can be made at any time throughout the year. Request forms may be picked up in the Student Activities Office and must be returned the Friday before the request is to be considered. Student groups then come before the committee, which meets every week, to present their request. The committee discusses the request and votes on it. Student groups then receive a letter of approval or denial of funds.

The new committee should put students in greater control of the student activity fee fund and give the U.S.G.A. a more prominent position on campus. The AFAC goes into effect immediately with the first meeting of the new committee being this Wednesday at noon. Members currently on SAC will be retained for the remainder of the year as to avoid complications.

## Sgt. Grizz.... Nothing But the Bear Facts"

THE COLLEGEVILLE AREA DOES NOT HAVE 911 EMERGENCY SERVICE. IN THE EVENT OF AN EMERGENCY CALL THE URSINUS COLLEGE SECURITY DEPARTMENT AT 489-2737 AND/OR THE COLLEGEVILLE POLICE DEPARTMENT AT 489-9332. THESE NUMBERS COULD SAVE YOUR LIFE!! THE SECURITY DEPARTMENT HAS F-R-E-E STICKERS WITH THE EMERGENCY NUMBERS PRINTED ON THEM FOR YOUR PHONES, OUR OFFICE IS LOCATED AT REIMERT HALL, SUITE 97.

01 November 1991 at 1:30 P.M., Security responds to a house on Main Street after being advised of an incident that took place on the 21st of October 1991. According to the complaints, unknown person(s) forcibly entered into the room between 3:00 P.M. and 7:00 P.M. and removed items from the room. The incident is still under investigation.

IF A ROOM DETECTOR ALARM SOUNDS AND IT IS ABSOLUTELY CERTAIN THAT THERE IS NO FIRE, IMMEDIATELY CALL SECURITY TO HAVE THE ROOM CHECKED. WHEN A "GENERAL" ALARM IS SOUNDING, A TOTAL EVACUATION OF THE BUILDING IS REQUIRED AS WELL AS NOTIFICATION TO SECURITY. ANYONE FOUND NOT ADHERING TO THIS POLICY WILL BE REPORTED TO THE OFFICE OF RESIDENCE LIFE FOR DISCIPLINARY ACTION!!!!

03 November 1991 at 11:27 P.M., Security responds to Reimert after being advised of four unregistered guests at this location causing a problem. The subjects were taken to the Security Office for questioning and then escorted off campus by Security.

04 November 1991 at 9:10, A.M., Security responds to Myrin Library and learns that two posters had been taken over the weekend. The posters were removed from the framing and can be easily identified. If anyone has seen the unusual posters titled "Where the Wild Things Are," call Brain Mc Cullough at ext. 2482. All information will be kept confidential.

URSINUS COLLEGE SECURITY DEPARTMENT PROVIDES ESCORTS TO STUDENTS, STAFF, AND FACULTY WHOSE CIRCUMSTANCES REQUIRES THEM TO TRAVEL ALONE ON CAMPUS, IN ISOLATED AREAS, AFTER DARK, DURING TIMES OF LOW ACTIVITY ON CAMPUS OR WHENEVER THERE IS CONCERN FOR ONE'S PERSONAL SAFETY. BECAUSE OF THE VARIOUS PATROL FUNCTIONS, IT MAY RESULT IN A WAITING PERIOD FOR ESCORT SERVICE. PLEASE CALL AHEAD SO THERE IS NO INCONVENIENCE TO YOU. THE DEPARTMENT ENCOURAGES EVERYONE TO USE THIS SERVICE. CALL 489-2737 FOR AN ESCORT, WE ARE ONLY A PHONE CALL AWAY!!!!

## This Week in U.C. History

BY KRISTIN WHITE  
Of The Grizzly

As the fall sports season draws to a close, you may wish to look back at the team records for the year. Why not take it a step further and look at the fall sports for, say, this century?

Approximately two decades ago, in 1972 this week, the men's cross-country team placed third at the MAC meet, finishing the season at 11 wins and 3 losses.

The field hockey team had a great week in 1962 when they swept the honors at the Swathmore All-College Classics game. Ursinus had four first all-college players chosen for that game. Also in 1962 this week, the soccer team finished with a record of 4-5-1 and the football team with a record of 2-5.

This week in 1952, both the football and soccer teams won their games. The football team crushed F&M with a 68-19 victory while the soccer team won 2-0 against LaSalle. The field hockey team lost 2-5 to Temple bringing their record to 2-1-1.

In 1942 this week, the football team lost the Homecoming game to Gettysburg 0-12; however, both soccer and field hockey won with scores of 3-1 over Lafayette and Temple.

This week in 1932, the Ursinus men's cross-country team lost the Eastern Pennsylvania Championships to F&M by only two points, with a final score of: F&M-33 Ursinus-35 and Dickinson-52. Both the football and soccer teams beat Swathmore.

And during the early half of the century in 1902 this week, the Ursinus football team beat F&M with a 16-0 victory. After the game, a Collegeville fan, Mr. Frank Gristock, sponsored a banquet for the players and coaches.

## Environmental Corner

BY KRISTIN WHITE  
Of The Grizzly

It seems that everything we do anymore has a detrimental effect on our environment. While people constantly push to save our earth, save our oceans, and save the wildlife (not that this is bad), more emphasis goes into saving things with no emphasis on why. Do you ever wonder how environmental problems begin in the first place and why they are so crucial? Perhaps I can simplify and explain one major concern: the greenhouse effect.

Basically, the greenhouse effect serves to keep our planet warm and regulates our climate. The natural gasses in our atmosphere form a protective blanket around the earth which allows sunlight to reach the earth's surface and prevents the heat from escaping.

Lately, however, human beings have been altering the earth's atmosphere, thus changing our global climate. The earth's temperature grows warmer as we continue to emit more and more of the greenhouse gasses into the atmosphere. If we continue at our present rate, our pleasant, comfortable climate will become a thing of the past.

To change this problem, we need to reduce the emission of further greenhouse gasses (carbon dioxide, chlorofluorocarbons, methane, nitrous oxide, and ozone) into the atmosphere. Carbon dioxide (CO<sub>2</sub>) accounts for approximately 50% of the greenhouse effect. Every year, six billion tons of CO<sub>2</sub> are added to our atmosphere (1.5 billion from the U.S. alone), and in the past two centuries we have increased

the amount of CO<sub>2</sub> in our atmosphere by 25%. CO<sub>2</sub> emission occurs when fossil fuels such as coal, oil, and natural gasses are burned or during the destruction of forests, which release CO<sub>2</sub> when burned or cut down.

We also regularly emit chlorofluorocarbons (CFCs) into our atmosphere. Responsible for between fifteen and twenty percent of global warming, CFCs also break down our delicate protective ozone layer.

Methane contributes up to 18% of the greenhouse effect and is emitted from cattle, rice paddies and landfills. Nitrous Oxide, which comes from breaking down chemical fertilizers and burning wood and fossil fuels, contributes up to 10% of the greenhouse effect.

Ozone, which provides protection

in our atmosphere, can be deadly when formed at ground level. Released from motor vehicles, power plants, and oil refineries, ozone contributes to much of our ground-based pollution.

And, to leave you with a couple of facts:

- \* "If every commuter car carried just one more passenger, we'd save 600,000 gallons of gasoline and keep 12 million pounds of "greenhouse gasses" out of the atmosphere every day."
- \* "If every American family planted just one tree, over a billion pounds of "greenhouse gasses" would be removed from the atmosphere every year."

# "Crucible" Captivates

BY ERIC FOELLMER  
Editor In Chief

This semester's pro-Theatre production, Arthur Miller's classic tale of the 17th-century witch trials, "The Crucible," was a great success. Students, faculty, and members of the community enjoyed a marvelous adaptation of the tragic play.

Students were also treated to watching several of their professors tackle some of the major roles in the play. Director Dr. Joyce Henry, who was very convincing as the role of Rebecca Nurse, cast five other Ursinus faculty members in the production. Keith Strunk, who played principal character John Proctor, was, as always, marvelous. His wife, Elizabeth, was played brilliantly by English professor Dr. Schroeder, who successfully avoided being upstaged by Strunk, an Ursinus theatre veteran. Dr. DeCatur provided the few moments of comic relief with his daffy portrayal of Giles Corey, and Psychology professor Dr. Fago played the stern and hot-tempered

Judge Hathorne. The most powerful faculty performance was turned in by Dr. Apple of the English Department, who was tremendous as Deputy Governor Danforth.

There were plenty of familiar student faces on stage, as well as some newcomers who contributed fine performances. Both Rev. Parris (Bob Lane) and Rev. Hale (Alan McCabe) were terrific, providing the play with a great deal of dramatic tension. Senior Kristen Schwarz brought marvelous intensity to the role of Abigail Williams, the wicked young tramp responsible for a great deal of the controversy. Freshman Alicia Lehr was excellent as Mary Warren, and has established herself as perhaps the brightest new star of the Ursinus theatre.

Everyone who attended the shows, which ran from Thursday to Saturday nights, seemed to enjoy the adaptation tremendously.

Senior Steven Grubb stated, "I've read the book five times, but watching it performed on stage gave me a whole new perspective."

# WVOU at Music Marathon

BY JULIO OMANA  
and DAVE VAN  
Special to The Grizzly

Mr. Bungle, Murphy's Law, Soul Asylum, Meat Puppets, Scatterbrain and The Mighty, Mighty Bosstones. What do these bands have in common with Ice-T, Chuck D and They Might Be Giants? They all were involved with the 1991 College Music Journal (CMJ) Music Marathon in New York City. Now, here's a toughie, what do they have to do with Ursinus College? WVOU am 530, "The Beast of the AM Dial."

From October 30th until November 2nd, we, WVOU staffers, bagged school and invented creative ways to spend Ursinus' money while learning and benefitting the station at the same time. Beside seeing seventeen or so bands in concert at places like the Ritz and CBGB's, we also attended lectures and seminars by artists and music business insiders.

On Wednesday night we went to see Joan Jett, but scamboogered her and left after waiting an hour for her to start the show. Oh well, it was free. Halloween Night at NYU in Greenwich Village featured five thrash bands and five

cardrum-busting hours of slam dancing. Speaking of scamboogery, Scatterbrain stole the show (that's the name of their new album).

Friday night we went back to CBGB's to catch the Poster Children, a Pixies-like band from Illinois. Later we saw the Mighty, Mighty Bosstones, a "plaid to the bone" ska (reggae/punk) Boston-based band. There was a riot outside the Beastie Boys venue (yes, they're still around), so we walked on home.

The conference ended with a subdued bang at the 1991 CMJ New Music Awards where Michelle Shocked, Julian Cope and Soul Asylum among others performed, and Ice-T, Mike Mills, half of the Marley Clan and They Might Be Giants presented. Some of the winners were: Jane's Addiction for Best Live Band and Best Album of the Year (from when they existed). Neil Young won the Lifetime Achievement Award, and REM won just about everything else including, Best Video and Best Song of the Year for "Losing My Religion" ...ZZZZZZ... (we are allowed to be subjective, yes?).

On the more serious side of the conference were the seminars and

keynote speeches. Julian Cope gave a great talk that ended with a swan dive and our nominee for Best Quote of the Year, "If you free your mind, your ass will follow." Think about it. Ice-T, Chuck D. and Anthrax drummer Charlie Benante answered questions about Lollapalooza, Ice-T's new band Body Count and the Public Enemy/Anthrax collaborative "Bring Tha Noise" video/song/tour. Queen Latifah spoke as well but we were too busy recovering from Halloween night to attend.

The seminars were very informative. We learned a lot about the politics that go on in the business side of the music world. Specifically, we learned about independent record labels, the effect MTV has had on the industry over the past ten years, and the evolution of music criticism since the sixties.

So, what did we learn? We learned that Follow for Now, Chemistry Set, and the Poster Children will be bands to watch for in the future, that glasses and moshing don't mix, and that Chuck D. is nobody when he's in the same room with Ice-T.

## CAB's Open Forum

On Thursday, November 14, the Campus Activities Board will be holding a forum to answer any student questions about how CAB works and where the money they receive is going. The forum will consist of CAB officers speaking for about 15 minutes and then the floor will be opened up for questions. The forum will be held in the Parents' Lounge at 7:00 p.m. All are invited to attend, here is your chance to speak out!!!!

# Movie Review -- Fantasia

BY GAR DONECKER and ERIK MOORE  
*Of The Grizzly*

On a platform in front of the Philadelphia Orchestra, the director (Leopold Stokowski) introduces the "Dance of the

Hours" by Amilcare Ponchielli. The picture fades. Two minutes later, animated ostriches in toe-shoes rehearse ballet steps. The "Dance" climaxes as tutued hippopotami gracefully dance with their caped alligator partners. This is "Fantasia," a movie

completely different from Disney's usual children's features, such as "The Little Mermaid."

Be prepared. "Fantasia" has no conventional plot or characters. The subject of the movie is visual interpretation of classical music. Although this may sound complicated, or worse, boring, all it means is that the Disney animators made short cartoons to go along with some famous music.

The cartoons, which have hippos, demons, cherubs, centaurs, dinosaurs, and even Mickey Mouse, show the range of Disney creativity. In "The Sorcerer's Apprentice," for example, Mickey plays the young apprentice who borrows his master's magic hat. His misadventures with an army of animated brooms has become one of the most famous cartoons ever.

These unusual images are brought to life with exceptionally good animation. What is impressive is that "Fantasia" was completed in 1940 without the aid of modern computers. Twenty-four frames are required for one second of animation ("Fantasia" is two hours long). Each frame was hand-inked and hand-painted as were the many backgrounds.

Even working by hand within such a tedious medium, Disney animators manage to create animation which surpasses that of many modern cartoons. "Fantasia" is filled with scenes containing over a dozen characters moving at a time. Modern television animation rarely has more than three images moving at a time.

One minor disappointment with the film is the soundtrack. Last year Disney released an all new digital recording of the Fantasia score. The video release of "Fantasia," though, uses only an enhanced version of the 1940 recording. The music is still impressive, but the sound quality could be better.

"Fantasia" is a classic masterpiece of animation, but it does start out slow and has some other boring parts. See it but bring some foods and friends to talk with during the lulls.

# Killer CAB Comedy

BY MELISSA MILLER  
*Of The Grizzly*

On Thursday November 7th, comedian Dan Wilson performed at "Giggles" comedy club in Wismer Lower Lounge before Red and Gold students as well as Ursinus students. Dan Wilson is widely known in New York and has opened for well-known comedians such as Dana Carvey and Richard Lewis. Some of the highlights of his show included midget wrestling, people and their strange relationships with cows, and how beepers make men feel powerful. His quote about beepers that vibrate that stuck with everyone was, "A hum in your pants, and a song in your heart." Dan commented on his performance saying, "I had a wonderful time here at Ursinus. The audience was receptive, and I

hope I can come back to Ursinus soon."

Opening for Dan Wilson, was Barb Schloff an acoustic guitar player. Barb has performed around the world including a large folk festival in Rhode Island. She has also been on the college circuit for two years. Barb performed about twenty minutes worth of her own music about personal experiences and life. As junior Sherrod Jones commented, "I liked the comedian and the musician was there. I had a good time even though I had a headache." Another junior Heather Maillert remarked, "I think both performers were good, and I think having a musical opening was a nice idea before a comedian."

On Friday, November 15th musician Vince Rollins will be performing in the Wismer Lower Lounge. Vince is out of Reading and will be performing at 9:00 P.M.

WISMER LOWER LOUNGE

FRIDAY, 9:00  
NOVEMBER

15

The Fifth Annual Medieval Sports Festival for the Physically Challenged will take place at Ursinus College on April 6, 1992.

Events will commence at 9:00 A.M., with the arrival of participants and a grand parade through Helfferich Hall. Closing ceremonies will be at 1:30 P.M. The theme for this year's festival is "Adventures of Robin Hood." Co-sponsors of the event are the Ursinus College Department of Health and Physical Education, and the Montgomery County Intermediate Unit.

Ursinus student volunteers are crucial to the success of the Medieval Sports Festival. Last year approximately 150 Ursinus students volunteered to help. Each year the Sports Festival has grown larger, with more participants and more events. Therefore, pre-event preparations require more

volunteer workers than ever before! We need you! If you can donate time, as little as one hour, we have a task for you. Pre-event jobs include construction of props, decoration drawing and/or cutting and painting, costume making, and fund raising.

Applications are also underway for costumed characters for the Festival. This is your chance to be Robin Hood, a merry thief, Friar Tuck, a king, queen, knight, juggler, jester, fortune teller, etc.

COLLEGE ORGANIZATIONS, CLUBS, SORORITIES AND FRATERNITIES, ARE ENCOURAGED TO GET INVOLVED!

For more information, or to volunteer, contact Dr. Laura Borsdorf, Helfferich Hall #29, extension 2456.

# Bench Art

BY PEPE BYRMON  
*Of The Grizzly*

Two things for which Ursinus College is always noted are its progressive modern statues and its infinite construction. Outside of the newly-remodeled Life Science Building, the best of both worlds meet to form the impressive bench art.

Almost everyone has watched Dad take some household item apart and attempt to put it back together again. Somehow there always seem to be a few parts left over. What does one do with such pieces? The Ursinus gods might say--make it into a statue. Yes, just like Dad, the ever friendly construction workers found that when they tried to put the LSB back together they had a few extra scraps of metal, which were serving no apparent purpose. So, of course, it was made into art--exactly what this campus needs.

Not only does this statue make further use of the never-ending construction, but it serves another

purpose as well. It is a useful type of art because it doubles as a bench that the construction workers can eat their lunch on. This is the kind of art the campus needs. It makes use of existing materials while adding a purposeful presence to the LSB/Pfahler area. No doubt this expressive masterpiece will be a focal point for the upcoming founder's day festivities.

The obvious double purpose of this bench art leads one to wonder about the other benches that are popping out all over campus. Are they meant to be benches, or are they more art that just has everyone fooled into thinking that they are real benches? These are the complex questions that college students face every day.

One thing is known for sure. This functional art stands as a testament to the commitment this college has to the arts...and to continued construction. Granted, the excess aluminum could be recycled into a large government building, but it serves a better purpose here. Bench art?--only at Ursinus.

Functional art or vertical sliding board?

## Science News

## National Chemistry Week Unveils "The Alchemist"

BY ERIC BLEICKARDT  
Science Editor

"The ant has made himself illustrious/through constant industry industrious./So what?"

Would you be calm and placid/if you were full of formic acid?" Students, faculty and administration gathered in Pfahler Hall last Friday afternoon to witness the unveiling of the Wyeth

painting, "The Alchemist."

During the celebration, Dr. Hess, professor of Organic Chemistry, entertained an audience with poetry readings such as this one by Ogden Nash. The unveiling capped off National Chemistry Week, a week dedicated to awareness and education in the beauty and significance of the "Central Science," Chemistry.

Roger P. Staiger, Professor Emeritus, addressed the crowd with an insight into the imagery used in alchemy. Dr. Staiger outlined the three basic principles of Alchemical Philosophy.

1. Lead was considered to be sick Gold. For the transmutation of Lead into Gold, a healing elixir needed to be discovered.

2. The discovery of the healing elixir would involve finding the Philosopher's Stone and/or the

Universal Solvent.

3. With the discovery of the great Elixir, one would have the knowledge, the secret, and the remedy for correcting all maladies. This would include transforming sick gold into healthy, happy gold, as well as the maladies of old age into youth and healthiness. The Elixir of Life would be capable of transforming both animate and inanimate forms.

The alchemists believed in keeping their discoveries from "unworthy, ignorant or scornful people," which branded them as wizards or sorcerers. Today the philosophy of chemistry has changed completely to an expanded awareness. National Chemistry Week was testimony of this new philosophy.

Dr. Staiger's talk was followed

by President Richter's unveiling of the print of N. C. Wyeth's painting on the third floor of Pfahler. The original painting was commissioned by the Hercules Company for promotional purposes in the 1930's. After the painting was uncovered, and the hand-shaking and flashing camera bulbs had subsided, tea and cookies were served.

The celebration was well-attended by most of the chemistry and biology professors. Former professors such as Dr. Staiger and Mrs. Shaw attended. Several students as well as administration came out to the festivities. The college community supported and enjoyed this auspicious occasion, honoring both the predecessors of alchemy and the present practitioners of chemistry.

N.C. Wyeth's The Alchemist.

Dr. Staiger speaks on Alchemy.

## Changing Life's Blueprints

BY NAIMISH PANDYA  
Science Editor

A four year old girl slept quietly on her hospital bed as she received the serum through an IV tube. Although she did not realize it, history was being made as she lay motionless. This girl suffered from a severe ADA deficiency syndrome. In a healthy person, there is a protein called ADA which breaks down toxic compounds in the body. This little girl did not have adequate amounts of that protein and her immune system could not keep up with the toxic compound buildup. Doctors tried many modes of treatment, but all failed. Now she has just one last hope: Gene Therapy!

This remarkable technology is possibly the terminator to all deadly diseases. Gene therapy goes to the source of all illnesses, by alternating the genes, which are the blueprints of life and determine the characteristics of everything that exists, from microscopic viruses to human beings. Gene therapy appears simple superficially but involves many complex ideas. A portion of the body's cells are first removed. Then mutated genes are removed and replaced by healthy genes. After the cells grow with the new gene incorporated in them, they are placed back into the body, where hopefully they will operate normally and cure the patient.

This sounds astonishing. It can cure not only inherited diseases,

such as sickle-cell anemia and Tay Sach's diseases, but researchers believe that it could also stop cancer and AIDS. This technology could possibly wipe out all diseases. Also, currently there is a project running called the Human Genome Project in which scientists want to map all of the genes in the human body. With such knowledge, doctors will be able to identify the source of diseases and stop them before they even occur.

However, what are the consequences of this new-found technology? It raises many ethical questions that must be answered before we proceed practicing it on a usual basis. With the control of genes, parents will not only be able to produce healthy children, but they might also want to endow their children with many traits that

they don't possess. They can give their children height, intelligence, looks, etc. This can cause drastic social changes and produce a perfect race. How then can a "natural" human, born without human manipulations, compete with the genetically tampered product. This can wipeout the human race as we know it.

Although this seems very drastic, there are even immediate practical problems that this potent therapy will cause. For example, health insurance companies would discriminate against people who have a risk of developing a terminating disease. This discrimination, based on a person's gene, would be even more menacing than racial discrimination. Any one can be

segregated and treated morally wrong. Obtaining such knowledge, will give government and insurance companies too much power.

So as we head into the twenty-first century, we, the new generation, must make some serious decisions. Should we pursue gene therapy and the Human Genome Project, which could possibly be the only answer to deadly diseases such as cancer, AIDS, and inherited diseases? However, along with the benefits, there are significant problems that this technology offers, such as genetic discrimination and the possibility of the destruction of our human race and the development of a "perfect" race. The decision lies in the hands of the our generation.

## EDITORIAL

Earvin "Magic" Johnson's shocking revelation that he had tested HIV positive is truly a tragedy. For a man that positively affected billions with his athletic prowess and decent conduct on and off the court, his contraction of the fatal AIDS virus will affect people in an entirely different way. As should be expected from this class individual, he will use his unfortunate circumstance to help others. With the same vigor with which he dunked basketballs and assisted his teammates, he will put out the message that NONE of us are invincible. One regretful sexual or drug-related experience is all it takes.

Whether Magic was a homosexual, cheated on his wife or used an unclean needle does not matter now. What does matter is that we all realize, especially while we are young and vibrant, it only takes one slip-up and our lives can come to an abrupt end. Magic Johnson is only one of millions to contract the AIDS virus. But what sets him apart from the others is that as a heroic public figure, he shows us that EVERYONE is subject to this dreaded disease. If a vibrant personality with exceptional athletic talents can contract AIDS, so can the intelligent college student. Remember that!

## The Trouble With Wofford

BY STEVEN GRUBB  
Opinions Editor

For the first time in thirty years, Pennsylvanians chose a liberal democrat over a republican in a senatorial election. Shockingly, Harris Wofford trounced Dick Thornburgh by over ten percentage points in the final vote tally. While the message should be clear to George Bush that he has angered the middle class, Harris Wofford's re-election chances seem more in danger than the President's.

Mr. Wofford ran a campaign appealing primarily to middle-class Pennsylvanians. He set three lofty goals for his abbreviated senatorial term: national health care insurance, a middle-class tax break, and the defeat of the Mexican-American trade agreement. As Dick Thornburgh found out, these issues, if made knowledge to the public, will garner votes. But when Harris Wofford's term ends and he seeks re-election, what will he have to show his constituents?

It has been said if you have the right to an attorney in this country, you should have the right to a doctor. It is an admirable goal. The fact that millions of Americans cannot afford health care should be on the conscience of every lawmaker in Washington. And after Mr. Wofford's election, Congress began to closely consider taking care of the 30 to 40 million without health care.

The measures considered, however, seem to be half-answers

to the outrageous cost of health insurance and, as of now, no one has suggested how to pay the substantial price tag that would accompany a health care bill.

Partial health care programs have posed substantial problems in the past. If we look at Pennsylvania and New Jersey HMO's as examples we can see some of the problems with partial health care. Second-rate doctors, second-rate treatment, and long lines to wait in have been the charges leveled at some of these plans. With the problems partial health care has been having, it appears national health care is an all or nothing proposition. Lawmakers must either regulate the entire field of medicine, affecting health care costs, doctors' salaries, and pharmaceutical company's profits, or stick with the private health insurance policy currently in use. Couple this with a President who will probably veto any national health care proposal and Mr. Wofford will probably not have much to show his constituents in the next election.

The tax break for the middle-class also had wide appeal to voters. But with a deficit numbering in the hundreds of billions of dollars, the practicality of a tax-cut comes into question. A choice must be made. Is it better for the United States to cut taxes and incur an even larger deficit? Or is it better for the citizens to have more money in their pockets? At this time, the deficit would seem to be a much

larger problem. Again, what will Mr. Wofford show the middle-class at election time.

Finally, Mr. Wofford promises jobs for Pennsylvanians by not allowing the Mexican Trade Agreement to be passed by the Senate. Any student of international politics would tell you that in the coming age of economic competition, trading blocs will be essential. By negotiating the trading agreements with Canada and Mexico, the United States only strengthens its competitiveness with the emerging European bloc by becoming stronger as a coalition of North American economic partners. To say the Mexican free trade agreement will cost Pennsylvania jobs may play in Pittsburgh, but practically it is not good policy. Furthermore, the trade agreement will probably be approved.

If Mr. Wofford can be instrumental in carrying out his campaign promises, something all Pennsylvanians should hope he does, he will have earned the reputation of a successful senator and will have gained the admiration of millions. But practically speaking, Mr. Wofford has a difficult task in implementing his policy. The next election may be a tough road for Harris Wofford if he has nothing to show his constituents. The trouble with Mr. Wofford is that his ideas make for good campaign speeches but will they translate into productive policy?

## The Black Hole of Greek Life

BY A. JUDD WOYTEK  
Associate Editor

A few weeks ago, I was in one of my moods of playing devil's advocate with my friends. I do this every so often to evoke opinions and reactions from people (since most people on this campus can't seem to give opinions on their own). On this particular day, I was interested in one subject: greek life at Ursinus. This issue has been fueled even more by the recent Campus Life Committee meeting, which unfortunately I could not attend, but never fear, our astute Features editor has voiced his opinion on that meeting for you elsewhere in the Opinions section.

I began my quest for information into greek life by engaging in a half hour debate with a senior fraternity member (who I shall leave anonymous). We discussed the concepts of pledging as many of the sorority pledges walked in through the doors of Wismer in their final week of "bonding." This wise old friend of mine told me that pledging builds

the togetherness of the group and that most of the activities are actually fun to do. He looked back to his pledging days and realized that he would love to go through it again if he had the chance. He said that it may not have all been fun at the time, but overall it was a great experience.

We went on to discuss whether fraternities and sororities follow the guidelines set up by the school for pledging and how closely pledging activities adhere to the Pennsylvania Anti-Hazing laws. He told me that most greek organizations follow the rules while on the campus, but when they go off campus for pledging activities, the rules change. I asked him if he wasn't afraid that something could happen to one of the pledges during some of their pledging activities. He said that his fraternity is extremely "safety conscious" and would never make a pledge do anything that would endanger that person's life or cause them any serious harm.

I, of course, asked why the same

goal of "brotherhood" could not be accomplished through different means, such as a retreat or through a "trust" workshop run by a professional. He told me that he does believe these things could work, but that many of the fraternities and sororities have long traditions centering around pledging. He said that they follow the rule of, "I had to do it when I pledged, so now you have to do it." Being the anti-pledging voice that I am, I still argued that rolling in the mud, putting vaseline in my hair, and dousing myself with molasses would not make me feel any closer to anyone who was going through it with me. It would only make me realize that I am as stupid as they are.

We then moved to the subject of sleep deprivation. The Student Life Office keeps close tabs on pledges who fall asleep in class or miss classes due to the lack of sleep. My greek friend told me that the reasoning behind keeping

See Black Hole page 10

## Opinions/Letters

## Face Off: Pros and Cons of GALA

Dear Editor,

A group of anonymous homosexuals (GALA) recently circulated a letter soliciting faculty members to serve as contacts for students who wish to get in touch with the group. I would consider it extremely cruel to a student with homosexual inclinations to put him in contact with a group that is going to tell him or her: (1) that he or she was born that way and should accept it as their lot in life; (2) that the disgust and revulsion which normal, healthy people have for homosexual acts is a mental illness called "homophobia;" (3) that gay culture is wonderful and exciting (I wonder which part they mean - living with one disease after another and dying young? - having someone's fist up your rectum? - masturbation through a hole in the wall with thousands of anonymous partners? - urinating in your partner's mouth and then letting him take his turn? - exchanging feces to eat? All these are regular features of gay culture).

I have a counter-offer to students who may have homosexual leanings: I will be happy to put you in contact with a group (run by ex-homosexuals) that can help you avoid that short and miserable lifestyle. My offer, of course, is based on the conviction that homosexuality is an unhealthy perversion. If GALA and its promoters want to deny that there is such a thing as sexual perversion, then they should be sure to also open up their group to those who are interested in sex with children, sex with the dead, and sex with sheep and dogs.

Sincerely,  
John Ronning  
Physics Dept.

Friends:

There seem to be a number of misconceptions abroad on campus about the newly formed Gay and Lesbian Alliance, and your October 22 article did little to correct them.

I'm proud to be the faculty advisor to this group. Those who know me know my interest in cultural diversity, in celebrating rather than merely tolerating the differences among us, and in trying to create a society in which each individual can freely seek to achieve her or his own individual potential. Society as a whole has come a long way toward reaching a state in which gender, racial and ethnic discrimination are unacceptable. Prejudice and discrimination on the basis of sexual preference, however, are still largely tolerated. Though perfect statistics are unavailable, the best available ones indicate that as many as one in 10-15 individuals is gay. In previous generations, most of these people found it necessary to conceal their sexual preferences; many still do.

Some of my personal interest in this issue began because of my uncle, who was gay. In his generation, outside of "Bohemian" circles, there was no question of tolerance for this preference. He found it hard to accept his own sexuality as normal, and was in constant inner conflict. He neither married nor had a long-term gay relationship; he was a very lonely man. The existence of a support structure of the kind GALA proposes to provide could have made all the difference in my uncle's life. I intend to do anything I can to change the social climate so that others can lead happier

lives, relatively free from social stigma.

The Oct. 22 *Grizzly* article raises the issue of whether there is a "need for GALA on this campus." The other group having its constitution reviewed at the Oct. 16th SAC meeting was the Skydiving Club. Is there a need on campus for a Skydiving Club? I'd venture to guess that there are more gay people on campus than potential skydivers. A member of the Ursinus Hillel pointed out to me that the same question could be raised about the Hillel, which serves a very small portion of the community. However, in each of these organizations, the group of people directly involved certainly sees the "need" for them, and it seems to me that whether they serve directly the needs of other students is entirely beside the point.

The other issue that seems to cause some people concern is confidentiality. The article reports that "GALA members want to be anonymous." This is not exactly the case. After all, the members of the executive committee who attended the SAC meeting were making no attempt to maintain anonymity. What is true is that GALA has established a mechanism whereby gay students who prefer to remain "in the closet" can become involved with the organization. For GALA to accomplish its objectives, this is absolutely necessary. People who need peer counseling about their sexuality must be able to contact a supportive peer group without being required to make their identities known to everyone. At present, the organization officers are all out and perfectly willing to

reveal who they are. All the anonymity they want is not to have their phone numbers published to all and sundry. It's difficult for me to see how anyone can deny that in the case of this particular organization there is a unique potential for harassment. Much intolerance is demonstrated even in quotes in the article: "I am against homosexuality"; "It offends me...I do not approve of the public organization such as GALA."

The author of your article finds problematic "how the club was going to be an active part of the Ursinus community, but remain anonymous." Part of the answer is that no-one is talking about complete anonymity for all members. The club will be an active part of the community by sponsoring speakers, workshops and other awareness events. They also plan to make trips to off-campus events, on which other students will be welcome to come along.

SAC, it is reported, is "debating as to whether the campus will benefit from the organization." (Does every organization have to argue that it will provide benefits to the entire campus?) I would make the assumption that gay students represent a portion of the community at least as substantial as other special interests represented in other student organizations. These students will benefit directly. Beyond this, I believe that all students will benefit from any organization that make efforts toward increasing appreciation of diversity.

Sincerely,  
Gina Oboler

## Adopt a Flower Bed

To The Grizzly:

With all of the plantings that have been done over the past several months, the campus is undoubtedly more beautiful today than ever before. Unfortunately, when flowers, shrubs, and trees are planted, weeds always follow closely. Recently one staff member, while admiring the flower beds between Olin and Bomberger, was inspired to suggest an idea whose time, in my opinion, has come.

Why doesn't Ursinus follow the lead of the Pennsylvania Department of Transportation and implement an "adopt a flower bed" program modeled after the "adopt a highway" program that has become increasingly popular in this state? Individuals, departments, clubs, societies, classes, Greek organizations, etc. could be invited to participate in such a program. Small signs identifying the name(s) of the individual(s) or organization responsible for a given area could be posted in a tasteful fashion.

Certainly the Maintenance Department for reasons of person-power cannot afford to assign such work to its staff. Furthermore, keeping the campus clean and attractive is the responsibility of the entire college community. If you want to be a part of this most worthwhile effort to keep our campus lovely, please stop by my office (Pfahler 307) at your earliest convenience.

I hope you will give this proposal serious consideration. It will work!

Ronald Hess  
Professor of Chemistry

## ATTENTION!

Six Ursinus students are currently studying at Tohoku Gakuin University in Sendai, Japan. They have notified the school that they miss Ursinus, and would greatly appreciate hearing from some of their friends from home. If you know any of these students, please take the time to drop them a line. Letters should be addressed as follows:

Student Name  
Room # (see below) Izumi House  
25-16 Eiwa-Dai, Izumi-Ku  
Sendai 981-31  
Japan

	Room #
Shannon Cleary	203
Patricia Gilbert	202
Nikki Plante	205
Michele Winter	201
Richard Tarr	102
Michael Vanim	101

## Campus Memo

BY RICHARD P. RICHTER  
President of the College

**PERSONAL INTEGRITY:** Last week the fine and performing arts on campus afforded us two memorable insights into the meaning of personal integrity.

The Berman Museum of Art opened *Keepers of the Flame*. And proTheatre of Ursinus College, with a cast of students and faculty, presented Arthur Miller's *The Crucible*.

Both in different ways and in different artistic forms celebrated the integrity of the individual in the face of official thought control.

*Keepers* presents 70 paintings by artists in Leningrad who kept their integrity as artists by painting underground during the repressive years of Soviet rule.

Mark Migdal, who emigrated

from Russia nineteen years ago, organized the exhibition. He spoke movingly at the opening reception on November 8 about his personal sense of obligation to the artist friends who remained behind the Iron Curtain after he came to the US. By organizing the show, he has allowed Americans to see the artistic results of personal integrity in the USSR before glasnost.

The paintings are full of color, variety, and energy. Walking around Berman from canvas to canvas, one cannot escape the sense of change sweeping the world. When the show was conceived, the authorities in the USSR still considered the artists outcasts. Since the fall of the Soviet system, they are free in their own country to express themselves as they wish.

I urge every last student on campus to take the time to see *Keepers of the Flame* and to read the exhibition catalog.

Salem, Massachusetts, in 1692 seems remote from our twentieth century notions about the "female" of personal integrity. But in *The Crucible*, it gave playwright Arthur Miller an appropriate setting in which to address the threat of official thought control in the US during the anti-communist hysteria of the 1950s.

Playgoers waiting in line for a ticket in the Ritter Center lobby got a first-hand reminder of the parallel between colonial and post-World War II America. We saw on a tv screen in black and white the "witch hunt" hearings conducted in Washington by Senator Joseph McCarthy.

Joyce Henry not only directed an intense performance but also rendered a memorable Rebecca Nurse onstage.

The audience saw students and faculty in a common artistic effort. We appreciated the reappearance of our colleagues, Dr. Schroeder, Dr. DeCatur, Dr. Fago, Mr. Strunk, Dr. Snyder, Dr. Apple, along with Dr. Henry. Joyce Henry's often-proven skill in casting veteran actors side by side with student actors again had its effect.

Personal integrity often seems like small flame in the face of large political forces. And yet it survives and prevails—as our two shows on campus have told us so well. They both lead us to believe that, in the end, personal integrity is political integrity.

## IFC and "The Illusion of Good Faith"

BY TOM WILUSZ  
Features Editor

On Tuesday the 5th, I joined my IFC representative, the treasurer, and the president of my fraternity and attended a special meeting of the Inter-Fraternity Council. The topic was pledging, 1992. We were there, according to Dean Kane, to discuss "the problem" of pledging and to offer solutions as to how to improve it. I will confess that I expected a one-sided debate, with administration holding all the cards. What I didn't expect was this mockery of a debate and blatant insult to all who attended.

(To be fair, there were members of the Committee present who were there in good faith, and I'd hate to lump them in with the rest. In particular, Todd McKinney and Rob Kester stayed on the sidelines, carefully noting what was said on both sides; and Anjie Mason and Bonnie Gilmour maintained (appreciated) mediatorial roles. This letter, then, is about the rest.)

The Dean's "problem" with pledging was one of grades; namely, the documented dip in GPA experienced by pledges in their pledging semester. A wealth of data was supplied to us, and yes, it indicated a general drop in a pledge's grades. A dreadful drop. A marked drop. What sort of

academic nightmare could cause such debate, such fear in every faculty member on campus? A GPA drop of 1.0, a full letter grade? A half-letter grade? How about a sixth of a letter grade, a .167? NO. Dean Kane called the fraternity system "a threat to the academic mission of Ursinus" because in 1991 the average male freshman pledge's GPA (for one semester only, mind you, not overall) dropped .14. That is a drop, for example, from a C to a C+. More importantly, every single fraternity improved its academic record between 1989 and 1991; six out of the eight improved between 1990 and '91. The 1991 Fraternity Pledging Rules (paragraph 4) state that "The effects of pledging upon academic work during 1990 has been evaluated for each fraternity. Improvement is required during 1991." If every fraternity has improved, and GPA drops are so infinitesimal, why the renewed call to arms by Dean Kane and the CLC?

The answer they gave is that "It is expected that attendance, preparation, class participation, and grades will not suffer during pledging" (1991 F.P. Rules) Let us for the time being ignore the effects of other extracurricular activities on academics and concentrate on this statement. Are grades all that matter here? Is this a correspondence course or a

liberal arts institution? If the intangibles don't count for anything here, then why waste our time with an art museum, or Pro-Theatre, or the forums?

But I am not writing to defend pledging. Why defend pledging when it is so obvious that Dean Kane and the Committee have made up their minds on the topic? After the IFC spent a full ten minutes bringing to light statistical discrepancies in the Dean's argument (every one of which the Dean admitted to be completely valid), Dr. Lobue claimed that we had yet to "contest the numbers." When we pointed out that the Sig Rho pledges had in fact improved their GPA's, he replied, "No, they didn't. There were no improvements." If they weren't prepared to accept their own statistical evidence, what would they listen to? When it was pointed out that faculty evaluations of pledges had no correlation with their actual academic performance, and showed a definite anti-Greek bias on the part of Ursinus faculty, the Committee agreed—then went on to state that these same evaluations were an important part of the decisions-making process regardless.

But what infuriated me most about the meeting were the barefaced lies that we were told. When Hector Rodriguez came out

and challenged Dean Kane to come out and say what his plans really were for 1992 pledging—and I will confess that Hector was very cynical in this statement, but he was also eloquent and his cynicism proved well-founded—the Dean said point-blank that he had no plans yet for 1992, that the Committee had not even discussed the issue. He was fully supported by the Committee in this; Dr. Eaton went so far as to jestingly call Hector "paranoid" for thinking that plans were made behind our backs. Of course, we were assured, any decisions about '92 would be made with our knowledge; of course, our suggestions mattered; of course, the IFC meetings were conducted in good faith and not as "token" forums. Again, it was stressed that the Committee had not even discussed pledging.

Not sixty seconds later, Dr. Goetz turned to Dean Kane and said, "Have you mentioned your idea for moving pledging to start before winter break?"

And so the already tenuous illusion of a meaningful IFC, of discussion in "good faith," of an honest administration was shattered. Dean Kane flashed by Dr. Goetz a "Shhh" look, then reiterated his claim: the Committee had not even discussed the issue. Apparently, I suppose, Dr. Goetz must have received some telepathic message about

Dean Kane's plans—but even so, any plans made by the chair of the CLC and shared with even one member constitutes a discussion, a discussion that was hidden from us, even when we specifically asked about it. Did Dean Kane apologize for lying to his student body? Did the Committee members admit their error? I will admit that I am surprised and disappointed that they did not. The moral is simple—there is no debating with administration.

That Dean Kane could conduct a meeting in this manner should be an insult to every student on campus, but the problem he has created is purely Greek. The administration has made it quite clear that fraternities and sororities are the sole objects of their attentions. There had been no movement in administration to study the effects of other extracurricular activities on grades. And when this was brought up in meeting, the Dean sidestepped the issue by claiming that the faculty of this school don't care about those activities, only about pledging. Poor Dean Kane, slave to the whims of some impersonal and unblamable group known as "the faculty." It is unfortunate that his unwillingness to meet with us in good faith dooms any hopes of unity between Ursinus and its Greeks.

## Black Hole

Continued from p. 8

the pledges up late at night is to make them more subservient to the pledgemaster or pledgemistress. He said that pledges would not be as willing to do all the things they do if they were totally coherent and wide awake. I asked him what he thought about the harm that this does to the pledges physically and mentally in the classroom. He said he did not see any real harm being done.

I had exhausted my friend's opinions and I had to get to class, but I picked up the subject later that evening. I thought it quaint that Katie Jones listed the swim team along with the frats and sororities in her article titled "Dining Turf" in the October 22 issue. I took advantage of her comments and presented the idea to my fellow teammates that we should form a fraternity. Two of my associates were very enthusiastic about the idea. We had a hard time deciding whether to call ourselves Mu Epsilon Rho or Mu Epsilon Lambda (the second choice would look more like MER when turned to Greek letters).

We discussed the possible charter for our fraternity and

agreed to allow both sexes to pledge us. We also agreed that there would be no formal pledging, but only the requirement of having swam on the team for at least a year. We would do service projects in the community including the annual swimming Special Olympics which the team helped run last year. Dean Kane would love us!

As I was discussing this proposal with my teammates, one of my residents passed by my door and stopped when he heard what we were discussing. He tried not to be too obvious as he listened in, but I knew I had captured his interest. He, of course, is in a fraternity and probably thought we were crazy to be thinking of starting a new one. It would certainly offend all the frats that currently exist.

I thought back to the days of Alpha Chi Epsilon. They had a similar dream of a frat that admitted both males and females and did not have any formal pledging. Unfortunately, they have dwindled down to only a few members who are not concerned with keeping the fraternity on the top of the charts. I have talked with one of the remaining members and he has told me that AXE will be non-existent within a year or two.

But back to the matter at hand. I called up another fellow

swimmer to hear his wise opinions on the subject. He was vehemently opposed to the idea of forming a "swimmer frat" for a number of reasons. He told me that he chose not to pledge a frat because he felt that it wasn't for him. If he had wanted to pledge, he would have. He did not understand why we would have to form a frat of our own to fit in with the campus. "Why does everything have to center around frats?" he asked. He said that by forming a swimmer frat, we would be falling in with the rest of Ursinus students who think that the only way they can have a social life is through a frat.

I argued with him saying that if we were a frat, we could have dinner dances, dated parties, Reimert parties, and we could wear letters! He was appalled. He told me to think about why I didn't pledge. He gave me many good reasons which I said all played a part in my own decision. He also told me that we could do all of those things if we wanted to without Greek letters on our chest. Who could stop us from throwing a dinner dance? We hung up agreeing that forming a swimmer fraternity would be a stupid, useless idea.

So what is the point of this article? I am not really sure myself. I guess it is to bring up some topics for debate. We all know that we could use some

opinionated conversation here at Ursinus. So just think about what I have rambled on about in the preceding paragraphs. Why does everything revolve around the Greek system here? Have we let ourselves fall into a rut that we cannot escape from? Is it good or is it bad? There are many arguments on both sides of the issue. I'd like to hear your

opinions. I want to know what Ursinus students really think. Why did you pledge? What did you get out of it? Or, why didn't you pledge? Why not? We seriously need a change in the social atmosphere at Ursinus. How can we accomplish this?

Take the time to write a response. It won't kill you to voice your opinions.
