Pew Roundtable Discusses Priorities at Ursinus

BY HOPE RINEHIMER
Co-News Editor

For many members of the Ursinus community, including faculty, staff, administrators, a board member, and a student, Friday night and Saturday were spent in Wismer Center at a Pew Higher Education Roundtable. The focuses of this Roundtable were to discuss the problems which are facing higher education institutions everywhere, including finances and enrollment, and in particular the dilemmas which Ursinus is facing concerning these topics. The meeting was facilitated by Dr. Mary Maples Dunn, President of Smith College. Her task was to keep the discussion flowing and to pattern the conversation. The dialogue at the meeting was recorded by a scribe, to give a "sense of meeting" report. This report will be forwarded to the Ursinus community and the Strategic Study Group in approximately six weeks. SSG can then use the ideas of the Roundtable, at their discretion, for creating budget solutions.

The Pew Roundtable was started in 1988 by two dozen higher education leaders. Their objective was to focus on the challenges and opportunities facing American colleges and universities by focusing on cost,

quality teaching and learning, and access. In 1993, 30 institutions began Roundtable discussions. Today, over 130 higher education institutions have scheduled or participated in Pew Roundtable discussions, sponsored by the Pew Charitable Trusts.

The meeting commenced at around 7:00 p.m. on Friday night with a brief introduction by the facilitator, Dr. Mary Maples Dunn. Dr. Dunn began by stating that the problems which are facing Ursinus College are not unlike those facing institutions across the country. In fact, Ursinus is ahead of the game in attempting to solve the problems. A brief dialogue then focused on the value placed on a post-secondary education, and what students and their parents are willing to do to achieve that education. Then the question "how do you see Ursinus in ten years time" was posed. The responses to this question ranged from a concern with the size of the student body, to the size of the faculty, to the style of teaching. The purpose of this question was to get at the heart of a deeper matter-- the priorities of Ursinus College.

By the conclusion of the exchange many ideas had been set forth. The

consensus seemed to render the top priorities as follows: keeping Ursinus a small, select, liberal arts school, maintaining a high quality student body, and maintaining a good, well-compensated faculty. In order to do these things, it will be necessary to have a smaller faculty and staff.

The other strengths which the Roundtable decided to focus on, while promoting the institution, included the capstone requirement or undergraduate research opportunities, the pre-professional programs, the athletics program, the museum, and the location. All of these factors add to the beauty of Ursinus.

The Roundtable did not make any specific decisions and discussion was kept at an institutional, rather than departmental level. A second meeting will be held on February 4th. Before that, representatives of different divisions of the college have been asked to meet with their constituents to briefly explain what occurred at the meeting and in turn get their feedback. Then, at a later date members of the Roundtable will meet with the Strategic Study Group to give further input. Eventually the process will conclude after the board has made a final decision concerning the new budget.

Clinton Wavers on School Prayer

BY JAYSON BLOCKSIDGE
Co-News Editor

The issue of school prayer made national attention last Tuesday when President Clinton said that he would consider backing a constitutional amendment on prayer that Republican leaders said they would pursue. Democrats complain that the president has once again displayed his erratic stance on policy matters.

Abner J. Mikva, the White House counsel, and other aides said that the president would prefer supporting a Federal law that granted a "moment of silence" in public schools. They, however, did not go so far as to say that he rejected the notion of constitutional amendment.

Many of Clinton's ardent supporters perceive his recent statements as being conciliatory to the new Republican leadership in Con-

gress, notably Representative Newt Gingrich of Georgia, the likely next Speaker of the House.

The Supreme Court first ruled in 1962 that organized prayer in the public schools violated the First Amendment's prohibition against the establishment of religion. In 1985, the Justices rejected an Alabama state law that established a "moment of silence" arguing that the history of the Alabama law made it clear that it intended to endorse religion, and encourage students to pray in school. Constitutional amendments to overturn the Court's school prayer rulings have been introduced in Congress since 1962 but have never succeeded. A constitutional amendment must be approved by two-thirds majorities in both houses of Congress and then by the legislatures of three quarters of the states.

Global Perspectives

International

- Israel and the Palestine Liberation Organization are struggling to keep their peace talks alive against a backdrop of growing mistrust and rancor. Charges from both sides declare that the other has violated "the declaration of principles" that they signed at the White House in September 1993.

Prime Minister Yitzhak Rabin said that he would not agree to Palestinian elections until the P.L.O. kept an unfulfilled promise to revoke parts of its charter calling for Israel's destruction. At a ceremony that was held for new Palestinian security agents last Tuesday in the West Bank town of Jericho, participants were shouting their claims to Israeli cities including Haifa and Ashdod. This demonstration was caught on video tape and denounced by Israeli officials as violating the 1993 declarations. The Palestinians claim that the participants used old slogans for want of new ones and the whole situation was blown out of proportion.

Despite the high expectations set by President Clinton and the White House 14 months ago, it is obvious that decades-old enmities on both sides are still flaring. It would appear that this bickering is going to stall efforts at peace for quite some time.

National

-Japanese owned corporation, Sony, reported last week that they lost \$3.2 billion in their Columbia and Tristar pictures investment due to low box office returns, rising expenditures, and executive resignations. This report followed a loss of \$510 million due to lawsuit settlements, executive resignations, and cancellations of movies which had already been started. This loss was reported as one of the largest suffered by a Japanese corporation, but does not come close to the \$21 million debt of GM, or the \$8 million loss of IBM.

-Recent medical studies have found that replacing a blend of estrogen and progesterin hormones in women after menopause reduces the risk of both heart attacks and uterine cancer. The blend of these hormones is safer than the estrogen replacement therapy alone, which can cause uterine cancer. Studies, however, are still underway to evaluate other possible health risks, such as increased bone deterioration.

(Compiled by Hope Rinehimer and Jayson Blocksidge from the New York Times)

Man Arrested for Threatening Children

BY MICHAEL McCUEN
Of the Grizzly

Pottstown children are safer now. George Edward Hamilton, a 52 year old Malvern resident, was arrested for allegedly making death threats to children.

The crime occurred at Elizabeth B. Barth Elementary school on November 3 when Hamilton threatened two eleven year old girls from his car outside the Barth gymnasium. "Come out and I'll kill you. If you don't come out, I'll come in and kill you all" were the man's reported statements.

According to Pottstown detective Gregory Boyle, Hamilton attempted to justify his remarks by telling Boyle that the children were zapping him with electrical currents. Hamilton also told the children "that if they didn't change their ways, God would destroy them".

Hamilton is now behind bars in lieu of \$10,000 bail, much to the relief of local parents whose children attend Barth.

"I'm so glad they caught him, so glad," said Pottstown resident and Barth mother, Millie Ludy. Ludy had the tedious task of walking her children and her neighbors' children to and from school every day. For now, the worries are over, and Pottstown elementary students can go back to the peaceful life they knew.

Class of '98 Update

BY TARIK QASIM
Of the Grizzly

New ideas for the class of 1998 fundraiser were discussed at the freshman class officers' weekly meeting held last Wednesday in Wismer Lower Lounge. Two fundraising ideas are now being implemented.

The first idea is a support-your-school t-shirt sale to be advertised later this week. The t-shirts' design will be a bottle with the words "Absolut Ursinus - no proof required." Over 72 t-shirts and about 10 boxer shorts have been ordered.

Another idea to be implemented is a weekly 50/50 raffle. Tickets started selling Thursday of last week. Tickets were sold individually for fifty cents, three for a dollar,

or twenty for five dollars.

The freshman class officers are Chris Meyers, president; Dave Levine, vice president; John Paul Demarco, treasurer; Heather Clark, corresponding secretary; Bee Heeney, recording secretary; Christian Rice, student representative; Ryan Bilheimer, student representative; and Matt Onorato, who is head of the fund raising committee.

Future ideas include a Christmas Spirit Pizza party. Since there are three hundred students in the freshman class, officers are looking for a minimum of twenty five people to sign up beforehand. The party is planned tentatively for December 8th, the last day of classes before Reading Day. It is free for all students who are interested.

Iraq Recognizes Kuwait

BY PHIL CAIAZZO
Of the Grizzly

The United Nations Security Council welcomed Iraq's recognition of Kuwait after a debate that put the U.S. into isolation on the issue of lifting sanctions.

The debate reflected a deep division within the Security Council. The Clinton Administration has received little support for its insistence that all sanctions against Iraq should remain until it complies with other Security Council resolutions.

The predominant view is that if Iraq allows permanent monitoring for arms violations on its own soil, then the council should reward the leader of Iraq, Saddam Hussein, in approximately six months with a partial lifting of the ban on its sale of oil.

A key phrase during the Security Council's meeting was that it considered the Kuwait recognition by Iraq "a step in the direction toward implementation" of the resolutions.

CAMPUS MEMO

BY RICHARD P. RICHTER
President of the College

PROGNOSTICATION: When the world looks back on what the people of Ursinus undertook at the start of its second 125 years, what will it say they did? Speaking at the end of our 125th anniversary on Founders' Day on November 13, 1994, I took a stab at a prognostication. The world in the future, I suggested, will say that leading up to the year 2000 the people of Ursinus--

- understood that their historic mission was vital for the future because it was student-centered.
- went forward confidently into

the new reality of the late twentieth century because they found common ground, a vision all could believe in and work toward, while being able to value one another's differences at the margins.

--knew that the joy of learning was not a luxury but was central to their success.

--transformed the fear of change into the celebration of change and found a way to bring it about.

--entered the twenty-first century with hope and optimism.

--became a model for the nation of the new liberal arts college in the new millenium.

--understood that endings are beginnings.

RELIGIOUS CONNECTION:

When we mark Founders' Day each year, we revisit the fact that the College was founded with the intention of providing liberal education under "the benign influence of Christianity" by members of the old German Reformed Church. Not all students, I find, connect the present-day Ursinus with our religious origin; nor does everyone see the perpetuation of our religious heritage in the life of the College today.

The College of course is independent of control of the United Church of Christ (UCC), the successor denomination. However, as our catalog explains, "the Christian principles and traditions of the College continue to reinforce its educational mission." They are manifested in

our special concern for "high ethical standards, personal values, and an understanding of others." And they inform us as we strive for "an understanding of peace, justice, and the need for human cooperation." Our past animates our present.

SHREDDING A RUMOR: It is rumored among some students that the big sculpture on campus and the new skylight in Wismer were paid for from their tuition dollars, thus diverting them from expenditures more important to students. False. The sculpture temporarily on display as well as the permanent sculpture on campus are gifts from Philip and Muriel Berman. The skylight is an integral component of the completely new roof, desperately

needed, which was installed on Wismer this summer and fall. The capital funds for the roof-with-sky-light came from gifts of alumni and friends, not from student charges.

KUDOS: I congratulate Professor Tony Branker and the musicians under his baton who filled Bomberger on Saturday, November 19, with superb concert band music and jazz. There was a great audience turnout, but I regretted that the entire student body could not be present for such a performance. I wondered what kind of cultural cocktail we would have created if the whole show had picked up and gone to the Reimert quad. *President Richter's column appears weekly.*

Dear Editors...

Dear Editors:

I appreciated the student attendance at my faculty lecture and the additional attention your article (Grizzly, 11/15/94) drew to my topic of sex discrimination in the legal profession.

However, to prevent confusion and misunderstanding, I did not assert that sex discrimination in pay, promotion, and hourly wages are "bona fide occupation[al] qualification[s]". Rather, bona fide occupational qualifications for lawyers might include such resume items as whether they had law degrees, the quality of the law school they attended, and the number of years of experience they had as

lawyers. Any statistical analysis of sex discrimination must take account of how men and women differ along these dimensions as well as how their pay, promotions, and hourly wages differ.

Secondly, male attorneys who were not partners need only have reported that they observed sexual harassment of female attorneys in their employment. The data I used could not disclose whether they regarded this as a problem. In fact, my point in the lecture and forthcoming book is that these male lawyers found it to be to their advantage to have sexual harassment be permitted. This is why they were found to be willing to accept fifteen

percent less wages than comparable males who observed no such harassment of female attorneys.

Despite these difficulties with the article, I reiterate my pleasure with student interest in the topic of sex discrimination in the law. I also applaud the other articles in the November 15 issue reporting on faculty activities which sustain the intellectual life of the college beyond the classroom.

Yours truly,

Bernard F. Lentz
Professor of Economics
and Business Administration

Parent Shows Concern over Alcohol

To the editors of The Grizzly: Editors Note:

In light of the recent events at Ursinus concerning alcohol abuse, I thought it might be beneficial if you could do some research on this problem. I think you will find serious consequences are more rampant than we think. Too many very precious lives are lost because of this senseless behavior.

Thank you.

Signed,
A Concerned Parent

This letter was accompanied by two newspaper articles. The first was from the November 6 issue of *The Times Herald*. The article, entitled "Drinking lands Ursinus students in area hospitals," focussed on the recent event of alcohol overdose on campus.

The second article, "Coroner: Student drank 'lethal dose,'" from the April 19 issue of *Press-Enterprise*, was about a student, Terry Lee Linn, Jr., 21, who died of an alcohol overdose at a fraternity party at Bloomsburg University.

According to the article, the student had a blood-alcohol level of

.40, which is four times the legal limit. "That level of alcohol poisoning is sufficient to shut down a person's respiratory system," said Columbia County Coroner Dr. Ali Alley.

The letter from this concerned parent raises questions about alcohol use and alcoholism on this campus, as well as others. Do students consume too much alcohol? Is Ursinus too liberal in its drinking policies? We want to hear from you! Write a Letter to the Editors and send it via intercampus mail to *The Grizzly* or via e-mail at:

GRIZZLY@ACAD.URSINUS.EDU

Winter isn't all bad.

Let the winds blow!
While others are hibernating, you can earn Winter Session credits from Millersville University. More than 30 courses are available during January 3 - 21. Many Winter Session classes are introductory "core" courses that may be required for graduation and can be easily transferred for credit at Ursinus.

If you live in the Lancaster or York County area, Winter Session is a GREAT opportunity to jump ahead in 1995.

ROVING REPORTER

BY DAVID GAFT
Of The Grizzly

What are you thankful for?

Ryan Billheimer, freshman
I'm thankful for the great friends I've made here at Ursinus.

Denise Krch, sophomore
I'm thankful that I will be able to spend the holidays with my close family and friends.

Laura Owens, freshman
I am thankful that I am not a Biology major.

Sonny Pham, junior
I am thankful that I get to see my parents after twelve years.

Ron Floyd, sophomore
I am thankful that I have my health and I will be ready to play football next season.

Matt Zuckowski, freshman
I am thankful that I don't have to eat Wismer food for four days.

What's Up In Wellness?

BY NICOLE D'ORSANEO
Of The Grizzly

Imagine going to the doctor for your annual checkup. You feel healthy and aren't worried, but the doctor finds a lump and suggests you get it checked out. The specialist who checks the lump is concerned about the size and advises having it removed and tested. After the operation, you must wait about a week to see if it is benign or malignant. That week seems so long. You begin to imagine living with cancer. Would you live life differently knowing your time might be limited? Would your complete outlook on life change? Are you really living life to its fullest? Are you happy with what you have accomplished with your life or are you filled with regret? Then the results come back, and you are fine. The lesson you learned was an important one: Carpe Diem-- seize the day.

Much of the meaning we assign to our lives flows from our relationships with family and friends, the jobs we choose and our religious beliefs. Finding meaning in our lives is one of the most difficult pursuits because it requires looking deep within ourselves.

There are some guidelines which may help in your search. First, you must look inside and trust what you find. Second, live in the present, not the past or future. Third, be yourself; honesty is key in establishing relationships.

Fully experiencing life means facing questions of purpose and meaning. Meanings in life come from the mind; everyone gives meaning to different aspects of their lives. For example, a particular date on the calendar can indicate the anniversary of a relationship. Another way to achieve meaning is through the setting of goals. Setting a goal is a way to reaffirm your life and energy. It helps give a feeling of worth and direction in life.

If you fear death because you fear the unknown, you probably approach life in the same manner--with fear, avoidance of change, minimal risks and the security of known routines. If you are one who denies death, then you may push everything to the limit without any thought of consequences.

Sgt. Grizz... "Nothing But The Bear Facts."

11/11/94 at 10:00 P.M. Security was informed that an individual formerly banned from campus was located in a residence hall in an intoxicated state. The Collegeville police were called and the person was cited for defiant trespass. SGT. GRIZZ COMMENDS THE ON-DUTY RESIDENT ASSISTANT FOR HIS FINE ASSISTANCE.

11/13/94 at 6:30 P.M. Security was advised that sometime during the night, unknown person(s) damaged walls and a room door in a residence hall. The matter is being investigated by RLO and Security.

11/14/94 at 12:45 A.M. Security observed a woman being carried into a residence hall and it was apparent that the individual had been drinking. An immediate follow-up by Security and an EMT determined that the person was over 21, a graduate and with friends.

11/16/94 at 11:10 A.M. Security is informed by a student that for a period of time, the student has been receiving annoying phone calls. The matter was referred to the Residence Life Office.

NOTICE NOTICE NOTICE
EFFECTIVE NOVEMBER 28, 1994, ALL EXTERIOR DOORS TO BRODBECK-WILKINSON-CURTIS WILL BE LOCKED DURING THE NIGHT. THE FOLLOWING ARE THE HOURS WHEN THE DOORS WILL BE LOCKED:
SUNDAY TO THURSDAY - 12 MIDNIGHT TO 7:00 A.M.
FRIDAY AND SATURDAY - 2:00 A.M. TO 7:00 A.M.

11/16/94 AT 3:15 P.M. A student reported that she left her camera in the Wismer Lower Lounge on 11/12/94. If you have found the item, please turn it in to Security and we will see that it is returned to the owner.

11/16/94 at 11:35 P.M. While on patrol, Security found a student's vehicle covered in debris, leaves, trash, etc. The owner was notified and Security continues its investigation of this incident. The student planned to check in the daylight to see if the paint was damaged or scratched.

11/17/94 at 11:20 A.M. Security received a report that the mail was either missing or taken from a student at his residence. The student is aware that the Postal Authorities can be contacted if the mail does not come through. SGT. GRIZZ REMINDS ALL THAT THE THEFT OR TAMPERING WITH U.S. MAIL IS A FEDERAL OFFENSE.

11/18/94 at 12:20 A.M. While on another call in a residence hall, Security detected the odor of marijuana. Two students were identified. The Collegeville Police were called and charges will be filed.

11/18/94 at 10:45 A.M. Security is informed by residents of a Reimert suite that at 2:00 A.M. they heard the common room window of the suite shatter. The incident is under investigation.

A & E Movie Mania

BY COLIN TUCKER
Arts and Entertainment Editor

Hi, I'm back! To those of you frantically paging through the paper last week, the editors-in-chief would like to apologize for not including "Movie Mania." Unfortunately, the paper needed to be cut to eight pages, and they had no choice, so I forgive them.

Star Trek: Generations- After months of waiting and anticipation, I finally saw it! Let me tell you, it was worth the wait. To the other Trekkers in the school (all five of you), you will not be disappointed!

The plot is about a "nexus" that lies inside an energy ribbon, where time stops, and everyone's wishes are fulfilled (Watch the movie and you'll see what I mean). Dr. Soran (Malcolm McDowell), a member of an alien race with an unusually long life expectancy, will do anything to return to the Nexus, including destroying entire star systems.

Captain Kirk (William Shatner), who is presumed dead because of damage done to the Enterprise NCC 1701-B on its maiden voyage, ends up in the nexus. Picard (Patrick Stewart), who is trying to stop Soran, also ends up in the nexus, thus allowing the two captains to meet. Picard and Kirk work well together; Soran wants to save the universe, and Kirk, as always, is the "cowboy" who wants to have a good time by risking his life and saving the universe for the umpteenth time. I won't give away anything else.

Although there were no groundbreaking computer effects, the special effects were excellent, with more than enough explosions to satisfy me. I also was impressed with the photography in the movie. Many of the close-up shots of the spaceships, and the gorgeous landscapes used in the movie, were simply breathtaking. The action scenes were very suspenseful, exciting, and well directed; they kept me on the edge of my seat. One scene was one of the most intense sequences I have ever

seen in any movie.

There was a good balance of action to drama and character development. All of the familiar characters were very good in the movie, but I do have a couple of complaints. Data (Brent Spiner), who now has the emotion chip, ends up being the comic relief in the movie. Although Brent Spiner was excellent, I think that giving Data emotions destroys seven years of character development. I would have also liked to have seen some development on the romantic relationship between Worf (Michael Dorn) and Troi (Marina Sirtis). There were also a couple of "flubs" (movie talk for a technical error or plot inconsistency). I don't want to give them away here, but if you have seen the movie, feel free to discuss them with me.

Although it took me a little while to get accustomed to the characters that I literally grew up watching on television for seven years appear on a movie screen, putting the same characters into a full length movie with a

story of more epic proportions worked very well. Trekkers will not be let down. I know I certainly wasn't! **Rating- 8 (Very Good)**

Jurassic Park- This will be playing in Wisner Lower Lounge on Saturday, December 3. I strongly suggest you go to see it (or see it again), because refreshments will be served, and free food is a great way to relieve the pressure of final exams.

For those of you that don't know the plot (You must live in a cave), John Hammond (Richard Attenborough) wants to open an amusement park with real dinosaurs, made thanks to DNA extracted from tree sap. All heck breaks loose, the dinosaurs get loose, people are eaten, etc.

Director Steven Spielberg does an excellent job. He uses his cinematic magic to create nailbiting suspense and action. I have seen this five times, and my heart still beats a mile a minute after watching it. The Academy Award-winning special effects are nothing short

of a breakthrough, using computer-generated images to create the unbelievably realistic dinosaurs we see on the screen.

Although the dinosaurs are the real stars of the movie, the acting is good. Jeff Goldblum stole the show as Dr. Ian Malcolm, a mathematician who specializes in chaos theory. The music by John Williams is also impressive. Take some of the heat off from finals and go check this out! **Rating- 9 (Excellent)**

Movie quote of the week- Last week's quote, "There is someone for everyone, even if you need a pickaxe, compass and night goggles to find them," was not guessed by anyone on campus. You said you wanted harder quotes, so I hope all of you are happy. Anyway, I had to go off campus to find someone to guess the quote. It was guessed by my old buddy from high school who now goes to Temple University, Jeff McCoach. This week's quote is "Are you saying that coconuts migrate?"

FRIENDS DON'T LET FRIENDS DRIVE DRUNK.

1 year old, 1991

2 years old, 1992

Stevie Ace Flores.

Killed by a drunk driver on March 23, 1993, on Pacific Coast Highway in Wilmington, Calif.

If you don't stop your friend from driving drunk, who will? Do whatever it takes.

Berman Features Watercolor Exhibit

BY AMY K. DAVENPORT
Compiled from a College Press Release

The Philadelphia Watercolor Club's 88th Annual International Exhibition is currently on view at the Berman Museum through January 8, 1995. Also, a portrait painting demonstration by Cliff Schule will be presented on December 11 from 2 to 4 p.m.

Two other programs were held in connection with the exhibit. They were: a guided tour of the show by regional painter Herb Appleson and Phil Zuckman, and a watercolor demonstration by Kass Freeman of the American Watercolor Association.

Artist Dominic Di Stefano won the Best in Show Award for "Early Morning." The Franklin Mint Foundation for the Arts Award was

given to Tomasina Fontanell for "Playing the Blues," and William Ziegler was recognized by the Philadelphia Watercolor Club for Achievement in the Arts. Twenty-three additional awards were given.

More than 450 works were submitted to the Philadelphia Watercolor Club, from which a panel of jurors selected 107 for the exhibit. The jurors were: Margot de Wit, artist-in-residence at Rowan College of New Jersey; Lee Everett, a representational watercolorist; and Robert Sakson, also a representational watercolorist, and member of the American Watercolor Society. Acting as the juror of awards was Rachel Wolf, acquisitions editor in the fine arts division of North Light Books, and project editor for the Splash Series of Contemporary Watercolors.

Holiday Helps:

The Alumni Office has baseball caps, tee shirts, and sweat shirts with 125th Anniversary prints on them. These items range in price from \$5.00 to \$8.00. Some tee shirts are in children's sizes and would be inexpensive gifts for younger members of the family. Purchases can be made daily, 8:30 a.m. - 4:30 p.m. Stop by the Alumni Office and start your holiday shopping early!

INSIDE THE NFL

BY GINO CERULLI
Of The Grizzly

Baseball and hockey are on strike. Boxing, with the emergence of George Foreman as heavyweight champ, has recently become the only sport in which the outcome is more pre-determined than professional wrestling. And basketball...well, let's just say that some people still have a difficult time overcoming the sport's prejudice towards those of us who are vertically challenged. Only one sport is maintaining interest...football.

This is convenient, considering it is the best sport ever to have been invented. While other professional sports try desperately to destroy themselves, football, with rule variations and the introduction of the salary cap, has increased the excitement and competition of play. The two-point conversion has added excitement to many otherwise dull games and has allowed superstars, such as Tom Tupa to emerge. The change of the spot of the ball after a field goal attempt has prevented some of last seasons' brutally dull 9-6 games (Of course, this rule does not apply when the Jets plays the Colts). The salary cap has helped to increase competition in the league. Fourteen teams are .500 or better and have a legitimate shot at the playoffs. However, this has created mediocrity in the NFL. Teams can no longer afford to pay solid backups, leaving them help-

less against injuries.

Now to the heart of the matter, the strive for the playoffs. There is no better place to start than the NFC east. Considering this division has been, and remains the toughest in football, it is no wonder that the previous four Super Bowl winners call it their home. Shall we start at the top? The Dallas Cowboys, despite their recent loss to the 49ers are the best team in football. In fact, their recent loss to the 49ers has only solidified for them their third trip to the Super Bowl. I will now guarantee a victory for the 'Boys over the 'Niners in the NFC championship game, should the 'Niners make it. I don't care if they play in Steve Young's backyard. It is difficult to beat a great team once in a season; it is next to impossible to beat a great team twice in a season. Aikman, Smith, Irvin, Harper, Novacek, Haley, and Bates...with guys like that on a team how can you help but win. The Eagles? Where did they come from? I can't answer that, but I can tell you where they are going...NOWHERE! Betting on the Eagles to overachieve in the regular season is a sure, just as betting on them to underachieve in the playoffs. Bye, bye Randall. The Phoenix...sorry Arizona...sorry Buddy Ryan Cardinals were picked by many to win the NFC east. Hey Buddy, I have a secret for you, "Offense is half of the game, you should think about getting one." The Giants and the Redskins...well

at least you have pretty good coaches.

Our next logical stop is the NFC central. The Minnesota Vikings seem out to prove something. Warren Moon has added a spark that has ignited Cris Carter, putting him on pace to break records. With a tough defense and running threat from Terry Allen, they have a solid team. While I admire their efforts, I have bad news for the Vikings. You are going to have to go through either the Niners or the Cowboys on the road to the Super Bowl. Good luck. The Chicago Bears continue to surprise, led by Steve Walsh, who is undefeated as a starter. They're a good team and they could make the playoffs as a wildcard. However, that will be the extent of their season. The Barry Sanders, I mean the Detroit Lions, will travel only as far as Barry's legs will carry them, which may include the playoffs but little more. I mean Sanders is only human...isn't he? Tampa Bay...I will not waste my ink.

The NFC west is only worth mentioning because of the 49ers. Anybody else in the division is kidding themselves, including Atlanta. If it were not for the Cowboys, the Niners would be pursuing their fifth Super Bowl title. With a solidified and explosive defense, they clearly are, along with the Cowboys, in a league of their own. Hopefully, for Steve, free agency will weaken the Cowboys and maybe next year you can finally shake off Montana's

shadow.

What can I say about the AFC? I think the results of the recent Super Bowls say enough. In the AFC it is simply a battle to see which team will get the opportunity to lose the next Super Bowl. The AFC east is led by the Miami Dolphins. Yes, Marino is good, and yes, he is fully healed, but is there enough magic in his arm left to fulfill his final dream? I do not think so. Miami is a good team, but they are a good AFC team; that will not cut it. Sorry Buffalo, you were a great team with a lot of heart and I respect that. Unfortunately, Kelly's arm is not what it used to be. Still, I won't count you out until the last second of your final game this season...will anybody? The Jets are a team with a lot of decent players and no superstars. They will go nowhere. The Colts have a great rookie running back in Marshall Faulk, but they are still the Colts. New England's offense should combine with the Cardinal's defense.

The AFC central contains the two biggest pretenders in football, the Browns and Steelers. Close your eyes and try to imagine either Neil O'Donnell or Vinny Testaverde leading their respective teams to a Super Bowl or even an AFC championship game. Enough said. Cincinnati has found a rising star in Jeff Blake. If they're lucky he will lead them to 4, maybe 5 victories. Houston, why did you trade Warren Moon?

The San Diego Chargers, leaders of the AFC west, are being described as an NFC type team with the power running of Natrone Means and a punishing defense. Granted, they are good, but I can not remember the last time that the Cowboys or the Niners had to rely solely on their field goal kicker's points to win a game. If the Chargers do make the Super Bowl, John Carney will be the team MVP. Montana still has magic in his arm. But, unlike the old days, he no longer can control when it is on and off. If the Raiders can decide who is calling the plays, they can be a tough team. A tough enough team to make the playoffs? No way. The Denver Broncos are my sleeper pick. After a miserable start they are playing with a "we have nothing to lose attitude." Don't be surprised if they make the playoffs, and while there make a little noise. Wasn't Seattle a good team earlier this year? They certainly are not now.

I was considering making picks for all the division winners, wild cards, and playoff results but I decided it would not matter. Besides, after is all said and done, the only thing that matters is who wins the Super Bowl. So I have decided to only predict the Super Bowl participants. The representative from the NFC will be...(drum roll please)...The Dallas Cowboys...(surprised?)...and the representative from the AFC will be...(another drum roll)...the loser.

Lady Bears Preseason Outlook

BY DENISE SHORT
Special to The Grizzly

The Ursinus Women's Basketball team began its pre-season on Saturday when it hosted Elizabethtown College in a scrimmage. The team hopes to improve on last year's impressive season of 19 wins and six losses.

Headed by co-captains Ellen Cosgrove and Kristen Baldini and supported by seven returning players, the team is led by Coach Lisa Cornish in her seventh year of coaching at Ursinus. Coming off last year's big season, she and others predict the Bears will capture first place in the Division III Centennial Conference Eastern Division.

With the addition of one freshman starter, the team consists of several strong players who said they work well together. Erin Burke, a forward for the team, said the players have a "good chance of winning the Conference this year because we

only lost two starters from last year, and we've come together well as a team so far."

By heading the offense, senior Ellen Cosgrove is on her way to breaking the Ursinus all-time leading scorer record, which is currently set at 1,456. It is no surprise that Ellen is only 180 points away from breaking the record, considering that she has led the team in scoring and rebounding for the past three seasons.

The highlights of the season should be the Bahamas Tournament, which is set to take place in mid-December. The team is anxiously looking forward to participating in the tournament and encountering some tough challenges from their opponents.

The season officially starts Saturday, November 18th, at the Susquehanna Tip-Off Tournament. Bear team members said they are expecting to do well because of their impressive pre-season training.

A PHILLY FAN

BY JOEL SCHOFER
Assistant Sports Editor

28 points, 22 rebounds, and nine blocked shots. Sounds like a night that very few in the NBA are capable of producing. Shaquille O'Neal, Hakeem Olajuwon, Patrick Ewing, and some other centers and power forwards are surely capable of it, but if I told you that the player posting these dominating stats was on the Sixers, who would you think it was?

A week ago, some people would have answered Clarence Weatherspoon, although these stats are a bit out of reach for him. I can't see him blocking nine shots. Some others might have answered Sharone Wright. He certainly has the scoring, rebounding, and shot blocking potential to put up occasional nights like this.

If Shawn Bradley's name was suggested as the player with these stats, based on this season's performance before Friday night, people prob-

ably would have laughed. But he did it. 28 points, 22 rebounds, and 9 blocks from Shawn Bradley.

Before people go crazy and start to expect nights like this, you have to remember two things. First, Bradley was playing against Felton Spencer and the 0-8 Clippers. Second, it was just one night.

What does this stellar performance indicate, if anything at all? What it should tell you is that Bradley does have the potential to be an above average center. After a horrible start that resulted in his being removed from the starting lineup, he has improved his play and in the last game managed a career night. As I said in an earlier column, I think that 15-18 points and eight rebounds a night is a definite possibility.

As for other Sixers news, head coach John Lucas is encouraging Sixer great Maurice Cheeks to come back and play for the Sixers. Supposedly Cheek's playing will speed the development of rookie point guard B.J. Tyler, or at least that's

what Lucas thinks.

Has Lucas flipped his lid or what? How is taking 10 minutes of playing time from Tyler and giving it to Cheeks going to help Tyler develop? He needs all the playing time he can get! If Cheeks has some tricks of the trade to share with Tyler, let him do it in practice and not in the games. Isn't that what practice is for?

The Sixers also picked up two players, Willie Burton and Jaren Jackson, and cut Lloyd Daniels, who was slacking off after an outstanding preseason. Burton, a former lottery pick, has stepped in and provided the one thing he was signed for, scoring. He's even started games because of injuries to Wright and Scott Williams and played admirably. Jackson is just another NBA 12th man. In other words, he's got All-Star potential. In the CBA.

Last week the Eagles suffered what most consider to be a crushing blow, losing Byron Evans for

this season and possibly even next.

Contrary to popular belief, I don't think that the injury will have as much of an effect on the defense as everyone thinks it will. People forget just how good a player Britt Hager is. The man could be starting for most NFL teams!

Essentially, the Eagles lost an All-Pro middle linebacker and no team can go unaffected after a loss like that, but in this case the loss is going to be minimal and shouldn't have a drastic effect on the defense.

To help counter the loss of Evans, the Eagles signed former Saints Pro-Bowl inside linebacker Vaughan Johnson. The Saints decided not to resign him after he contracted a bacterial infection in his thigh during the off-season.

The Eagles plan on using Johnson in short yardage and goal line situations, but he'll most likely be deactivated until he returns to playing shape.

Will he make a meaningful contribution to the team? Who knows?

I don't know anything about his infection, what effect it had on him, or how long it'll take him to return to playing form.

The Eagles also signed Jeff Wilkins, who was released by the Cowboys at the end of their training camp, to serve as a long kicker. He is expected to be used only on kickoffs, with Eddie Murray continuing to kick all field goals and extra points. In my opinion, though, if the game comes down to a 52 yard field goal I'd rather have Wilkins kick it than Murray. I hope Rich Kotite realizes Murray's limited range and takes the necessary precautions by having Wilkins ready to step in if necessary.

Finally, I have to ask one thing. What has happened to Charlie Garner? Garner, now that you're healthy, get your butt in the game and make something happen! You're the Eagles' most dangerous runner and Lord knows they need a spark.

CHUCK'S WAGON

BY CHARLIE WEINGROFF
Sports Editor

Well, how far have we come in the hockey and baseball labor negotiations? Believe it or not, these things may actually be coming to an end. Stranger things have happened, like Shawn Bradley scoring 28 points in a game. Whatever the lunacy involved in the recent proposals, let's catch up on what has transpired. But before we do, just to report on South Jersey Group IV football action, Toms River North beat Overbrook 34-14.

In baseball, the owners have taken the salary cap demand off the table. And the removal of the salary cap should indeed mean the end is imminent. But, not when an innovative tax plan, as the owners term it, is a replacement. This "tax plan" calls for a tax on revenue tax and on the amount each team pays for players. These tax totals would be pooled and distributed to smaller market teams. Hopefully the union will say no dice to this cap in disguise. The whole injustice of a salary cap is that it limits how much a team can spend willingly. The

revenue tax is okay because it is charged to whoever makes money. However, the payroll tax is ludicrous because it also limits how much teams can spend. A contract that leads the payroll to exceed the "cap level" costs the team the price of that contract and the tax it creates. The tax may just be that much extra that the team can't spend. Just like a salary cap, this payroll tax will prevent certain teams from paying players their fair worth. Toms River North 34 Overbrook 14.

In hockey, some far more serious strides have been made. The union conceded to a rookie salary cap, which isn't all that bad. If this whole pro sport draft system has to be in place, then I can't disagree with a player, like Don Solomon, who has never played a game, not getting as much as a six year veteran. But, with Gary Bettman insulting the players' proposals, and the owners not budging on the 122% luxury tax, the players' current proposal may be tabled long enough to kill the entire season. Toms River North 34 Overbrook 14.

The torch of the NFL elite has

been officially passed in the form of the 49ers 21-14 win over the Cowboys. Mr. Merton Hanks was allegedly seen getting into his uniform in a Northern California Bell phone booth. Reason being that Mr. Hanks played like Superman against the Cowpokes. The only thing that Troy Aikman could have done to get a pass by Merton would have been to attach a piece of kryptonite to it. Hanks was nothing short of The Man last Sunday. I'm sure he used his giraffe-sized neck to peer into the Cowboys huddle, enabling the Niners to pick off Aikman 3 times. The Niners still aren't completely healthy, waiting on Ralph Tamm's leg injury and Pat Mulvihill's shoulder tendinitis, meaning the Niners are only going to get better. Toms River North 34 Overbrook 14.

The Cleveland Browns are for real. If they can manhandle the Feables in Philadelphia, then the Brownies are as good as their record. I just may have to say the same thing about the Chargers. They came back from down 13 against a team who was supposed to be one of the best, the Chiefs. The all

mighty #19 Joe Idaho just couldn't hold onto his lead against the Bolts. Say what you will about the AFC when the Chargers and the Browns get byes in the playoffs. Toms River North 34 Overbrook 14.

To Eagles defensive coordinator Bud Carson: Can you share all your wily secrets about how to stop Mark Rypien?

Chris Webber has elevated himself, based solely on this contract bologna, to SuperClown status. He's still one of the more devastating forces in the NBA. He gets all this and more: a big huge contract, a chance to play with UMich buddy Juwan Howard, who he will lead the team with, a total of 50 wins in 4 years, and a chance to play in front of 9000 fans in a game in Washington. Well, in Golden State he could play in front of a full house and with a bunch of guys that will win a championship. Think about it. Latrell Spreewell said "you da man" in the Nike commercial with Webber. Anyway, with Tom Gugliotta and the 3 picks back to replace the ones the Warriors gave up for Penny, the Warriors will certainly challenge the 8-0

Houston Spacely Sprockets and the Suns. Toms River North 34 Overbrook 14.

My how times have changed. Seattle: 3-4. Dallas: 4-2. Atlanta: 2-6. Detroit: 5-3. Toms River North 34 Overbrook 14.

To the Sixers Shawn Bradley: Who was that masked man that had 28 points, 22 rebounds, and 9 blocks last Friday night?

Last week's ultimate unanswerable trivia question was nothing more than a normal run of the mill effort on my part. The belt changes hands this week as Toms River East's, who got knocked out of South Jersey Group IV and lost to North in A South action, Steve Garbarini knew the Bushwackers were Butch Miller and Luke Williams. This week's World Wrestling Federation Trivia Question of the Week: Who were the only three wrestlers to ever legally use a foreign object in the ring? One still does. That's all for this week, the pleasure was all Toms River North's because they beat Overbrook 34-14.
