> Lerd Roberts Columns Steadily Contracting.

London, June 27, 3.20 a. m .- The Box commandoes in the eastern part of the Orange river colony appear to have been broken up by their leaders for the time, into small parties that harrass large columns of the British, incessantly cut-ting off scouts, sniping pickets, making a show of force here and there, and bewildering the slow moving bodies. Commandant De Wet, General Steyn's principal commander is the genius of those guerilla operations. He is the hero on the Boer side in these last days of hostilities. Lord Roberts' columns are steadily

contracting the circle of their advance. Transvaal officials who were interviewed yesterday at Machadodorp by a correspondent of the Daily Express, as-serted an intention to hold out to the last. ## NOTE ABOUT BIFOCALS.

There are three kinds of bifocals, "double" lanses. The split bifocals is the old style, split straight across the center. The objection is the dividing line which is always visible to the eye. The "perfection" bifocal is made of two pieces the lower part is the shape of a crescent and inserted into the upper part. The objection to these is the difference in thickness of the two parts which makes the change from one to the other too abrupt and therefore confusing. The cement bifocal overcomes these difficulties. The lower part is extremely thin, and is cemented upon the distance glass. There is no strain, no confusion. The dividing line is scarcely perceptible. They are always in place and they feel natural and

CUTTING ICE.

Before They Are Delivered.

The cutting of the ice on a pond is an interesting process, and the equipment is peculiar and varied. All the fall and winter, until the harvest is closed, men and horses after every snowstorm scrape the ice to the glare with snow scrapers. When the cutting begins, a horse draws

quick, well directed blows from an ice chisel in the hands of a skilled cutter, and a large "float" containing 100 or more of the ordinary 24 by 86 cakes is broken from the field. Ready men with pikes on the end of long poles push it through the open water to the vicinity of the elevator. The "canal" of course is longer the farther away from the elevator the men are cutting. The course must be kept open, and should it freeze during the night the new ice must be broken.

kept open, and should it freeze during the night the new ice must be broken.

The first men who receive the float at the elevator break it with their chisels lengthwise, and the smaller piece is sent under the plank bridge, where the cross sections are broken off. Each cake is then at hand ready for its upward journey. The "feeder" drives it with his pike to the proper position, when it is caught by a section of the endless chain, and up, up, up, it glides. The feeder must be careful and quick of eye to see that every piece of the 40 each minute that passes careful and quick of eye to see that every piece of the 40 each minute that passes through his hands is whole, of the right size and gets its correct position upon the chain. A cake askew might wreck the whole elevator.

As an additional precaution way up at As an additional precaution way up at

the top of the tower is stationed the "clutch," who watches the cakes not only before they arrive at the planer, but after they have started down the galleries, to see that no obstruction is encountered. Should a hitch occur electric bells with buttons at convenient distances give him and the other men the alarm. Of all he is the one to stop the danger. In his place of duty there is a clutch with which he can throw off the belt, and without stopping the engine the motion of the chain stops at once.

But the cake has almost completed its

journey up the elevator. Before being stored away the thin snow on its surface which has escaped the planer when in the lake must be got rid of. The First Patent on Matches. Before 1833, when wooden matches with phosphorus were made in Vienna, people were dependent upon flint and steel to secure a light. The first patent for a phosphorus match in the United States was taken out in 1836 by A. D Philipps of Springfield, Mass. For many years people refused to use them, but by 1845 the ill smelling and clumsy old tinder boxes were generally discarded and are preserved, like saudboxes, as curios tties.-Chicago Chronicle.

It is a pleasant duty to preside over a convention of the Republicans of this district, and I thank you for the honor.

We are now entering upon a campaign in which national issues are to be discussed and the character of the alministration of the country's affairs for the next four years determined. The Republican party has selected its candidate, and in terms clear, positive and distinct has defined its policy. The past is filled with examples of the evil effects of clipping the coin and tampering with the standard of value. A great part of the troubles in our colonial history arose from a changing and disordered turner. MR. ALLEN'S SPEECH.

Gentlemen of the Convention—I thank you with all my heart for the great honor you give me by this renomination for Representative in Congress from the 1st District of Maine, and I pledge you that if your action today is ratified by the people, I will give as faithful service as I am capable.

We are Republicans. You and I believe that the success of the Republican party and of its principles and policy, will result in the highest good and for the best interests of the people and of the country. The people and the country, in very recent years have tried the administration of public affairs and the political policy of each of the great parties. If experience be a teacher and guide, there ought to be no doubt of the result in the coming campaign—the triumphant election of Mckinley and Roosevelt.

In 1896, after the experience of a Democratic a iministration, with its divided councils on the money question, and its ruinous tariff policy of free trade under the Gorman-Wilson revenue law, the two great parties joined issue before the people on two leading questions—the currency and the tariff. Our party in its platform at St. Louis espoused the well known policy we had advocated and carried out since 1861, of a tariff for the protection of American industries and American labor, and also declared for a money policy the maintenance of the gold standard for all our currency.

The Democratic party in its platform at Chicago declared that the money question was paramount to all others; denounced gold monometalism as a British policy and un-American, and demanded the free and unlimited coinage of both gold and silver., at the ratio of 16 to 1, without-waiting for the aid or consent of any other nation. It denounced the Republican policy as a prolific breeder of trusts and monopolies and declared for a tariff for revenue only.

The result of that election was the triumphant endorsement of the Republican policy as a prolific breeder of trusts and monopolies and declared for a tariff for revenue only. The committee on resolution reported the following platform in their absence The Republicans of the First district of Maine, in convention assembled, heartily indorse the Republican platform adopted in the national convention at Philadelphia, and pledge their loyal and earnest support to their national candidates, McKinley and Roosevelt, believing that their election will give the country a continuation of the present unparalleled prosperity, with its good wages and constant employment of our workingmen.

We commend the splendid service of our representative in Congress, Hon. Amos L. Allen, who has given the most careful attention to the needs of the district; and we are proud to nominate and again present him to the voters of the district for their support, pledging him our earn est efforts for his re-election by an increased majority.

of any other nation. It denounced the Republican policy as a prolific breeder of trusts and monopolies and declared for a sariff for revenue only.

The result of that election was the triumphant endorsement of the Republican party and its proposed policy. That was in 1896. What has been the result? Has our party fulfilled its promises and kept its platform pledges?

President McKinley at once called Congress together in extra session and in July 1897, the Dingley tariff law was enacted, and the result has been revenue enough for the needs of the government in time of peace, protection for capital and labor resulting in prosperity to the people. The people experienced the results of the Morrill and McKinley laws from 1894 to 1897 and are now having good times under the Dingey law.

Daniel Webster said more than haif a century ago "That is the truest American policy which shall most usefully employ American capital and American labor, and best sustain the whole American population. Agriculture, commerce and manufactures will prosper together or languish together." By Webster's test, which is the "true American policy," protection or free trade? Under free trade agriculture, commerce and manufactures languished together as the Gorman-Wilsson law demonstrated. Under protection, they all flourished together, as the Morrill, McKinley and Dingley laws have shown.

Has our party kept and carried out its platform as to the ourrency ani maintained the gold standard? In the 55th Congress, the first Congress under McKinley, no attempt to legislate on the currency question was seriously made, because the Senate, as then constituted, was for free coinage; but early in 1899 a committee of Republican Senators and Representatives who were to be members of the 56th Congress. The bill was prepared, introduced and was bill No. 1 in the 56th Congress; it was passed by the House in December, and by the Senate last February, when it became a law.

This act provided that the gold dollar shall continue to be the standard. It to value,

of value, and that all forms of money coined or issued shall be maintained at a parity of value with the standard. It provided for the redemption of the outstanding 5, 4 and 3 per cent. bonds by the 2 per cent. gold bonds. It authorized a reserve fund in the treasury of \$150,000,000, and to be kept at that figure. It authorized national bank notes to the per value of the bonds securing them, and national banks at a capital of \$25,000 in places not exceeding 4,000 inhabitants. The act also contained other salutary provisions.

Thus our party carried out its platform pledges as to the currency, as well as the tariff; and the country has prospered,

is not so weak in a military sense as has been assumed. Clearly a good deal has been done since the war with Japan to rehabilitate the army and equip it with modern weapons. The despatches frequently refer to machine guns being used by the Chinese soldiers and also Mauser rifles. The Chinese soldiers in the forts at Taku seem to have made a pretty vigorous resistance and stood their ground with a good deal of courage. These are all disquieting facts. The population of in men are almost exhaustless. If she has trained soldiery for a nucleus and plenty of modern weapons she may be able to put an army in the field that will severely tax the powers to overthrow.

Mr. Thomas may good reason point with pride to the wondefrul strides which have been made by the little colony that many years ago he planted in the midst of the Aroostook wilderness. It has now become one of the most thriving settle ments in Maine, not merely vicing with at American neighbors in energy and enterprise and thrift, but often setting them examples well worthy of imitation. Once was when the people of Maine looked askance at the settlement of Swedes that was planted at New Sweden That time has long gone by. Now every admits its success, and rejoices in it. No emigrants who have come among us have done more honor and credit to their adopted State than the Swedes of

It seems impossible that the Democratic National Convention can commit so egregious a blunder as would be the condemant of the government for sending troops and ships for China, and yet Mr. Bryan is said to have a resolution of that tener on his mind. The sending of troops to China has been simply for the purpose of protecting the lives of Americans who are there by right, and who have been set upon by the Boxers simply because they are foreigners. To condehan this act would be tantamount to a declaration that our government should shut its eyes to the fate of American should shut its eyes to the fate of American condend the pulmered or murdered with impunity. If the Democratic party wants to bury itself beyond hope of resur-wants t National Convention can commit so wants to bury itself beyond hope of resurrection it can do it very quickly by adopting a resolution condemning the sending of troops to China.

The Republican State convention which meets at Bangor today, will resem ble most of the other conventions which have been held this year, in that it will have little to do but to put in formal nomination for governor a gentleman who was agreed upon long ago. Such work as it has will be confined to the construction of a party platform. Of course it will ratify the national platform, but there is a good chance for expression of opinion upon several ques tions of state interest which we hope, it

That would have been impossible for any man. But it is the general testimony that Mr. Allen has looked carefully after theinterests of the special standard was maintained and became our financial policy. There was the usual crop of reports from Chinese sources It was said that the situation in Tien Tsin was frightful, and that a great many foreigners had been massacred. Rumors of disagreements between the allies, and a disposition on the part of Democratic war horses' 'that took part in the Russians to act independently were it. Mr. Bryan's election will mean the overturn of the protective system now happily established and the wonderful prosperity it has brought to all clusses of the people, a dishonest and fluctuating currency, great diminution of the value of all debts and savings, the overthrow of the authority of the Supperme Court, a dangerous attack on property, socialism, the complete success of the attempt now going on to disfranchise ten million American citizens at home, and render null and void the great constitutional amendments.

mit crimes on account or the gold standard.

Under our Republican financial policy gold coin as currency has wonderfully increased in the last few years. In 1873, we had in the United States \$135,000,000 in gold money of course not then in circulation, as we had not resumed special payments; but in 1800 we have more than \$1,040,000,000—seven times as much as 37 years ago. In 1873 only about 16 per cent. of all our government money was gold, but in 1800 more than 50 per cent. of the total amount is gold. In 1900 we have in circulation—shout \$2,075,000,000 of money, including gold, silver, government paper and national bank notes, and more than one-third of this amount is gold. On June 1, 1900, according to the circulation statement of the treasury department, the general stock of money in the United States was \$2,537,382,399, and of that amount \$1041,531,374 was gold (including the buillion in the treasury).

Thus, you see, gentlemen, the Republican financial policy has been wise, successful and beneficent; that our money is all as good as gold, and will remain so, and that the gold standard can and will be maintained.

As we join at issue with Bryan and his party in 1806, we challenge them to realirm the Chicago platform and declare again for the free and untimited coinage of silver at 16 to 1; silver at that ratio is worth 50 cents on a dollar in the markets of the world. We challenge them to declare against the gold standard, against our protective tariff law, and our national banking system. We will meet the issue and rejoice in the triumphant indorsement of our policy in November next.

But while the questions of tariff and Under our Republican financial policy

the issue and rejoice in the triumphant indorsement of our policy in November next.

But while the questions of tariff and currency were paramount in 1896, and will always be important when raised, because they affect capital and labor and general business prosperity, others have arisen and require solution. In 1898, we had a war with Spain for the liberty of Cuba from Spanish tyranny. Every American takes pride in the fact that in that war and its prosecution to victory we had a united people. The South as as patriotic as the North. Democrat and Republican, the fighting little "Joe" Wheeler and "Teddy" Roosevelt marched under the same starry banner. Party strife was hushed and all Americans were for the honor of the country and the flag.

The war accomplished more than expected, and perhaps too much for our political peace. Not only was Cuba made free to set up, in due time, a government of her own, but Porto Rico and the Philippine islands were ceded by treaty to the United States. In the last session of Congress Porto Rico was provided with a civil government, and will soon, we hope, be mataging its own affairs as an organized territory of the United States.

Our occupation of control and management of the Philippine islands, putting down a causeless insurrection there against ourl authority has caused opposition and severe criticism by our political opponents, and we are accused of imperialism and the subjugation of a people alleged to be entitled to self-government and independence.

Now what are the facts? We took those islands by treaty and cossion in pay.

began an insurrection. The President, using his power, undertook, as was his duty to suppress the insurrection and he has done it. Is that imperalism? Then we are imperalists, whenever we undertake to put down armed resistance against the authority of the United States.

against the authority of the United States.

Does this language of the President, in his message to Congress last December, sound like imperialism?

"Until Congress shall have made known the formal expression of its will I shall use the authority vested in me by the constitution and the statutes to uphold the sovereignty of the United States in those distant islands, as in all other places where our flag rightfully floats.

"No effort will be spared to build up the waste places desolated by war and by long years of misgovernment. We shall not wait for the end of the strife to begin the beneficent work.

"We shall continue, as we have begun, to open the schools and the churches, to set the courts in operation, to foster industry and trade and agriculture, and in every way in our power to make these

I will quote Mr. Bryan's own words in a speech at Minneapolis:

"The gold standard means dearer money; dearer money is more people out of work; more people out of work; more people out of work; more people destitute; more people destitute means more people destitute means more people destitute; and the giving it the vitality of law, with a sound currency and enough of it, American capital and American labor are "most usefully employed," and agriculture, commerce and manufactures flourish together, and the whole American population is sustained. Instead of the resitty of Bryan's doleful prophecy, momey has been more plenty and cheaper, property has increased in value, times have been better, more people have been destitute, and none of the people have been destitute, and none of the people have had occasion to be desperate or commit crimes on account of the gold standard.

"For over two years my daughter had been declining from a strong, healthy, rosy-cheeked girl to a pale, weak and helpless invalid. She was afflicted with terrible headaches, and gradually grew weaker and more languid, apparently without cause. I tried several doctors, but all without avail. Finally, to please a friend, I bought a box of

## BY STRONG FORCE

U. S. Will Be Well Represented in China.

to Command.

Significant Wording Orders.

Directed to Proceed to Pekin.

Casualty List at Tien Tsin Auxiously Awaited.

Washington, June 26.-The purpose of the government to place an adequate military force in China was made perfectly clear today when orders were issued to Brigadier General Adna R Chaffee to assignment itself was the wording of the formal orders to General Chaffee issued late in the day by acting Secretary of War Melkeljohn, directing him "to take command of the troops ordered to China" and to proceed to Pekin by way of San Francisco and Taku, accompanied by his aides. It had been expected that the military forces would be concentrated at Che Foo or some other convenient military base but the direction to proceed to Pekin, the capital of the Chinese empire, indicated a firm determination on the part of the government authorities to have a strong military force at the seat of the Chinese government. This announcement of General Chaffee's assignment and the orders to proceed to Pekin, came after the state department had declined to accede to a second proposition from six great viceroys of China that foreign troops be kept out of China until Li Hung Chang reaches Pekin. In more formal manner, with the signatures of the six vizeroys representing the greater part of the empire, Minister Wu repeated today his plea of yesterday that the foreign troops be kept out of the country.

of the viceroys before the cabinet meeting but there was no disposition to vary from the President's determination, already made known by Secretary Hay to the Chinese minister, to send our forces to such points as were menaced and where our officials and citizens were in danger. While the viceroys spoke for their provinces they could not speak for Pekin and it is to Pekin that the officials most anxionsly look. Minister Conger is still silent and the latest advices have shown that little reliance can be placed on the despatches from Shanghai saying that the ministers and legations at Pekin were safe. For this reason, the orders to General Chaffee to proceed to Pekin took on

Secretary Hay laid the formal request

an added meaning.
General Chaffee was in conference with the war department authorities most of the day and in the afternoon spent nearly an hour with Secretary Hay going over those phases of the Chinese situation in which diplomacy will have to be mingled with military action.

Secretary Long received nothing during the day beyond the early despatch from Admiral Kempff stating that the com bined forces had entered Tien Tsin and that the Seymour expedition was reported ten miles from Tien Tsin, surrounded. This cleared up one situation only to present another condition which may prove even more grave. The casualty list on the first engagement was awaited anxiously and arrangements were made by the officials to have relays through the aboard, will take 300 marines from Ma night in order that this list might be handled with the greatest dispatch and be given to the public at the first oppor-

The navy department today received a telegram from a number of the officers assigned to the Wisconsin, now under construction at San Francisco asking to be assigned to active service in Chinese waters. The officers signing the despatch were Captain Reiter, Lieut. Commanders Milton and Mayo, Lieutenants McElroy, Ackerman and Vogelgesang and Ensign

LARGELY SAILOR TALK. Not Much Stock Taken in Report of In ternational Discord,

June 26.-The officials here receive with great regret and con-ern the reports from Che Foo that discord existed between the Russians and the so-called Anglo-Americans. Com-ing from the officers of the Terribie it is considered as largely "salior talk." At the same time it has been recognized from the outset that such a heterogenous force gave opportunities for serious division, as it is well-known that the Gen. Adna R. Chaffee sailors and soldiers of certain countries do not like to serve under British commanders and that British sailors and soldiers have the same disinclination to take orders from a foreign superior. But it has been hoped that the peril of the moment would lead all differences to be sunk in order that a common purpose might be executed against a common ene my. One of the chief dangers apprehended has been that the foreigners would separate into factions upon the more serious possibility of an international breach between the forces of the foreign powers. Besides this it is felt here that the Russian authorities, always sensitive will quickly resent the imputation of

barbarism and crueity.

The officials here accept these charges with great allowance and they particular ly express their displeasure at having the Americans brought into an apparent disruption with the forces of another power oncurrently with all the powers with no one more than any other, and the authorities here will use every effort to prevent bickerings and back-bitings.

BIG ARMY NEEDED. (Copyrighted, 1990, the Associated Press) Chefoo, Tuesday, June 26.-The foreigners everywhere are urging the immediate concentration of an army of 100,000 men, nor at least 50,000 men, for an advance on Pekin. Many persons familiar with the Chinese character think the foreign ministers Seymour are held as hostages for good terms of settlement. They also believe the whole Chiness army is joining in to proceed at once to assume his new du-tles. More significant probably than the nominally degraded for the purpose of organizing an anti-foreign quietly. It is estimated that 60,600 well armed, but poorly discisoldiers. plined, are about Pekin and Tien Tsin.

The Chinese officers boast that they have 400,000 soldiers. Admiral Seymour force carried a week's rations and the men had an average of 150 pounds of ammunition. The Russian conduct at Taku, according to the other officers inflamed the natives. The Russians are re ported to have been shooting the Chinese indiscriminately and driving away the peaceful Chinese who would have pro cured transportation and p rovisions and

looted the fown.

A great naval demonstration at all the treaty ports is also said to be desirable in order to influence the wavering Chinese merchants who are friendly to foreigners

The masses are becoming excited at the reports of their countrymen's successes against the powers. Merchantmen arriving here report that the Boxers are drilling in the streets of New Chwang and that when the officials inspected the soldiers with the view of suppress ing the Boxers they found the soldiers had sold their rifles and equipments to the Boxers.

FRICTION EXISTS ALREADY. (Copyright, 1900, the Associated Press.)

Chefoo, June 26 .- The officers of the British first-class cruiser Terrible assert the concert and take possession of Pekin independently. They assert that Vice Admiral Sey

mour's command lacked unison, the for eigners sulking because they were under British leadership. They bitterly de nounce the Russian general's conduct a incivilized and barbarous and charge that the slaughter of peaceful Chinamer at Taku has aroused the otherwise pas sive natives against the foreigners.

GEN. CHAFFEE TO COMMAND.

Washington, June 26.-The Presiden has assigned Gen. Adpa R. Chaffee to the command of the military forces operating in China. Gen. Chaffee was at the war department today receiving instructions and will leave for San Franisco in time to sail on the first of July, with the Sixth cavalry.

TRAVELLING WILL BE BAD. New York, June 26 —Speaking of sending troops into North China at this season of the year, Henry Grant of the Presbyterian board who has been in China several times, said today:

"The Chinese have chosen the most favorable time for their outbreak. The foreign troops are likely to have a hard time of it, as this is about the opening of the rainy season. By the time our troops arrive at Taku, the rainy season w. tween Taku and Tien Tsin flooded so that the entire trip could be made by boat. Miles and miles of flat lands are submerged and traffic is sometimes delayed entirely. The season so far has been very dry so that the rains during the coming wet season are likely to be unusually

Boston, June 26.—The police today had another interview with Harold Poole, the Salem sallor-boy who was found half dead from a triple fracture of the skull Thus far, the United States has acted in the words of Brookline, three weeks ago last Saturday. After a prolonged period of unconsciousness, Poole was ab to talk a few days ago, and he gave the police a fragmentary story of the assault, describing as the one who did the deed, a man believed to be George Champio now in jail at Alfred, Me., charged with a four-fold murder at West Newfield, Me.

> Today's conversation did not weake the story told by Poole previously but, the police say rather strengthened it. He is unable to talk connectedly or remember all the incidents connected with his experience but he knows he was beaten and robbed by a man who promised to get him a job in Milton.

> It has developed that Poole probably never knew Champion's name. never been mentioned to him, neither will it be. Poole will be taken to the Alfred jail when he is fully recovered and there brought face to face with the man for the purpose of making an identifica-

South Berwick, June 26,-What was be lieved would prove the final ression of the coroner's jury in the Fanny Sprague nurder case was held here this afternoon, when County Attorney Matthews presented some new evidence. After going theroughly over the evidence in the case, the jurors took a vote to ascertain how they stood in the matter and the result showed two in favor of a verdict naming the man who, in their opinion committed the crime, and four for ren dering a verdict withholding the name of any person. At this point County Attorney Matthews was called into the jury room and his advice asked in the matter. He stated that he should accept nothing but a unanimous verdict and that he should not consent to the jury's New York, June 26 .- New York in discharge by the coroner until it had reached one. ## CAPECIAL TO THE PRESS.

Waterville, June 26.-The feature of today's commencement exercises at Col-by was the celebration of the 50th anniversary of the founding of the Chi chapter of the Leta Psi fraternity, the oldest but one of the Greek letter fraternities of the college.

The occasion served to call together surprisingly large gathering of the members of the society from every part of the Union, including many who perhaps

they graduated. The exercises occurred at the Baptist church in the evening the edifice being address to undergraduates, Leroy Gilbert packed to repletion. Hon. Hannibal Staples; poem, Mabel Emery May; ad-E. Hamlin of Elisworth presided. The history of the chapter was first given by Hon. Forrest Goodwin of the class of '87, Skowhegan, who told the story of the establishment of the society in the early days of the college, the late Hon. Nelson Dingley being one of the charter largest class ever graduated by a Maine

members. Hon. Harry Neil Haynes of Greely, Colo., delivered the oration, his subject "A Truer Aristocracy in This Republic." The poem was by William L. McElroy, LL. D, editor of the New York

## A Quaint Epitaph.

The epitaph by its assumption of accuracy is often delightfully humorous. I always enjoy, for instance, this one, which is to be found, I understand, at Williamsis to be found, I understand, at Williamsport, Lycoming county, Pa. At the top of the gravestone there is a rude carving—indeed, how could it be anything but rude?—of a boy, innocent of clothing, being kicked by a horse, arranged for the purpose. Then the epitaph follows:

"Sacred to the Memory of Henry Harris, Born June 27th, 1831, of Henry and Jane Harris his wife. Died on the 4th of May, 1837, by the Kick of a Colt in his howels peaceable and quiet a Friend to

New York Stock, Money and Grain Market Review

New York, June 26 .- The bull contingent in stocks failed to realize their exectations today though the changes at the close show not gains for the majority of stocks. Final prices, however, were onsiderably below the best. The opening rise was in sympathy with London ing rise was in sympathy with London and was attributed to the effect of the news from China of the relief of Tien Tsin. The New York market showed itself indifferent to the progress of events in China as it has consistently done throughout and the opening advance was largely lost. Crop news continued bad from the spring wheat region but the reacculates when here been buying wheat regions and coat in the spring wheat region but the reacculates when here buying wheat speculators who have been buying wheat are evidently impressed with the willingness of the farmers to take the price offered and the wheat market showed continuous realization today with a reverse sympathetic effect on grain carry-ing railroads. Time money continues to

harden but call loans are still very easy.

Some of the speculative bonds showed
